Index to the Export Administration Regulations

Legal Authority for the Export Administration Regulations

Part 730 General Information

- 730.1 What these regulations cover
- 730.2 Statutory authority
- 730.3 Dual use and other types of items subject to the EAR
- 730.4 Other control agencies and departments
- 730.5 Coverage of more than exports
- 730.6 Control purposes
- 730.7 License requirements and exceptions
- 730.8 How to proceed and where to get help
- 730.9 Organization of the Bureau of Industry and Security
- 730.10 Advisory information
- Supplement No. 1 to Part 730; Information Collection Requirements Under the Paperwork Reduction Act: OMB Control Numbers
- Supplement No. 2 to Part 730; Technical Advisory Committees
- Supplement No. 3 to Part 730; Other U.S. Government Departments and Agencies with Export Control Responsibilities

Part 732 Steps For Using the EAR

- 732.1 Steps overview
- 732.2 Steps regarding scope of the EAR
- 732.3 Steps regarding the ten general prohibitions
- 732.4 Steps regarding License Exceptions
- 732.5 Steps regarding Electronic Export information (EEI) requirements, Destination Control Statements, and Recordkeeping
- 732.6 Steps for other requirements
- Supplement No. 1 to Part 732; Decision Tree
- Supplement No. 2 to Part 732; Subject to the EAR?
- Supplement No. 3 to Part 732; BIS's "Know Your Customer" Guidance and Red Flags

Part 734 Scope of the Export Administration Regulations

- 734.1 Introduction
- 734.2 Subject to the EAR
- 734.3 Items subject to the EAR
- 734.4 *De minimis* U.S. content
- 734.5 Activities of U.S. and foreign persons subject to the EAR
- 734.6 Assistance available from BIS for determining licensing and other requirements
- 734.7 Published
- 734.8 "Technology" or "software" that arises during, or results from, fundamental research
- 734.9 Foreign-"direct product" rules
- 734.10 Patents
- 734.11 BIS activities conducted outside the United States
- 734.12 Effect on foreign laws and regulations
- 734.13 Export
- 734.14 Reexport
- 734.15 Release

734.16	Transfer (in-country)
734.17	Export of encryption source code and object code software
734.18	Activities that are not exports, reexports, or transfers
734.19	Transfer of access information
734.20	Activities that are not deemed reexports
	Supplement No. 1 to Part 734; Model Certification for purposes of Advanced computing FDP rule
	Supplement No. 2 to Part 734; Guidelines for <i>De Minimis</i> Rules

Part 736 General Prohibitions

736.1	Introduction
736.2	General prohibitions and determination of applicability
	Supplement No. 1 to Part 736; General Orders
	Supplement No. 2 to Part 736; Administrative Orders

Part 738 Commerce Control List Overview and the Country Chart

738.1	Introduction
738.2	Commerce Control List (CCL) structure
738.3	Commerce Country Chart structure
738.4	Determining whether a license is required
	Supplement No. 1 to Part 738; Commerce Country Chart

Part 740 License Exceptions

740.1	Introduction
740.2	Restrictions on all License Exceptions
740.3	Shipments of limited value (LVS)
740.4	Shipments to Country Group B countries (GBS)
740.5	[RESERVED]
740.6	Technology and software under restriction (TSR)
740.7	Computers (APP)
740.8	[RESERVED]
740.9	Temporary imports, exports, reexports, and transfers (in-country) (TMP)
740.10	Servicing and replacement of parts and equipment (RPL)
740.11	Governments, international organizations, international inspections under the Chemical Weapons Convention, and the international space station (GOV)
740.12	Gift parcels and humanitarian donations (GFT)
740.13	Technology and software - unrestricted (TSU)
740.14	Baggage (BAG)
740.15	Aircraft, vessels and spacecraft (AVS)
740.16	Additional permissive reexports (APR)
740.17	Encryption commodities, software, and technology (ENC)
740.18	Agricultural commodities (AGR)
740.19	Consumer Communications Devices (CCD)
740.20	License Exception Strategic Trade Authorization (STA)
740.21	Support for the Cuban People (SCP)
740.22	Authorized Cybersecurity Exports (ACE)
	Supplement No. 1 to Part 740; Country Groups
	Supplement No. 2 to Part 740; Items that may be Donated to Meet Basic Human Needs Under the Humanitarian License Exception
	Supplement No. 3 to Part 740; License Exception ENC Favorable Treatment Countries

Supplement No. 4 to Part 740; Annex A Firearm Models

Part 742	Control Policy – CCL Based Controls
742.1	Introduction
742.2	Proliferation of chemical and biological weapons
742.3	Nuclear nonproliferation
742.4	National security
742.5	Missile technology
742.6	Regional stability
742.7	Crime control and detection
742.8	Anti-Terrorism: Iran
742.9	Anti-Terrorism: Syria
742.10	Anti-Terrorism: Sudan
742.11	Specially designed implements of torture, thumbscrews, and thumbcuffs; and parts and accessories, n.e.s.
742.12	[RESERVED]
742.13	Communications intercepting devices; software and technology for communication interception devices
742.14	Significant items: Hot section technology for the development, production or overhaul of commercial aircraft engines, components, and systems
742.15	Encryption items
742.16	[RESERVED]
742.17	Exports of firearms to OAS member countries
742.18	Chemical Weapons Convention (CWC or Convention)
742.19	Anti-terrorism: North Korea
	Supplement No. 1 to Part 742; Nonproliferation of Chemical and Biological Weapons
	Supplement No. 2 to Part 742; Anti-terrorism Controls: North Korea, Syria and Sudan Contract Sanctity Dates and Related Policies
	Supplement No. 3 to Part 742; [RESERVED]
	Supplement No. 4 to Part 742; [RESERVED]
	Supplement No. 5 to Part 742; [RESERVED]
	Supplement No. 6 to Part 742; Technical Questionnaire for Encryption and Other “Information Security” Items
	Supplement No. 7 to Part 742; Description of Major Weapons Systems
	Supplement No. 8 to Part 742; Self-classification Report for Encryption Items
Part 743	Special Reporting and Notification
743.1	Wassenaar Arrangement
743.2	High performance computers: post shipment verification reporting
743.3	Thermal imaging camera reporting
743.4	Conventional arms reporting
743.5	Prior notifications to Congress of exports of “600 Series Major Defense Equipment”
743.6	Prior notifications to Congress of exports of certain semiautomatic firearms
	Supplement No. 1 to Part 743; Wassenaar Arrangement Participating States
Part 744	Control Policy: End-user and End-use Based
744.1	General provisions
744.2	Restrictions on certain nuclear end-uses
744.3	Restrictions on certain rocket systems (including ballistic missile systems and space launch vehicles and sounding rockets) and unmanned air vehicles (including cruise missile systems, target

	drones and reconnaissance drones) end-uses
744.4	Restrictions on certain chemical and biological weapons end-uses
744.5	Restrictions on certain maritime nuclear propulsion end-uses
744.6	Restrictions on certain activities of U.S. persons
744.7	Restrictions on certain exports to and for the use of certain foreign vessels or aircraft
744.8	Restrictions on exports and reexports to persons designated pursuant to Executive Order 13382 – Blocking Property of Weapons of Mass Destruction Proliferators and Their Supporters
744.9	Restrictions on certain exports and reexports of cameras controlled by ECCNs 6A003.b.3, 6A003.b.4.b, or 6A003.b.4.c
744.10	Restrictions on certain entities in Russia
744.11	License requirements that apply to entities acting contrary to national security or foreign policy interests of the United States
744.12	Restrictions on exports and reexports to persons designated in or pursuant to Executive Order 13224 (Specially Designated Global Terrorist) (SDGT)
744.13	Restrictions on exports and reexports to persons designated pursuant to Executive Order 12947 (Specially Designated Terrorists) (SDT)
744.14	Restrictions on exports and reexports to designated Foreign Terrorist Organizations (FTOs)
744.15	Restrictions on exports, reexports and transfers (in-country) to persons listed on the Unverified List
744.16	Entity List
744.17	Restrictions on certain exports, reexports and transfers (in-country) of microprocessors and associated “software” and “technology” for ‘military end uses’ and to ‘military end users’
744.18	Restrictions on exports, reexports, and transfers to persons designated in or pursuant to Executive Order 13315
744.19	Licensing policy regarding persons sanctioned pursuant to specified statutes
744.20	License requirements that apply to certain sanctioned entities
744.21	Restrictions on certain ‘military end use’ or ‘military end user’ in Burma, Cambodia, the People’s Republic of China, the Russian Federation, or Venezuela
744.22	Restrictions on exports, reexports and transfers to persons whose property and interests in property are blocked pursuant to Executive Orders 13310, 13448 or 13464
744.23	“Supercomputer” and semiconductor manufacturing end use
	Supplement No. 1 to Part 744; Military End-use Examples for §744.17
	Supplement No. 2 to Part 744; List of Items Subject to the Military End-use License Requirement of §744.21
	Supplement No. 3 to Part 744; Countries Not Subject to Certain Nuclear End-use Restrictions in §744.2(a)
	Supplement No. 4 to Part 744; Entity List
	Supplement No. 5 to Part 744; Procedures for End-User Review Committee Entity List and ‘Military End User’ (MEU) List Decisions
	Supplement No. 6 to Part 744; Unverified List
	Supplement No. 7 to Part 744; ‘Military End User’ (MEU) List

Part 745 Chemical Weapons Convention Requirements

745.1	Advance notification and annual report of all exports of Schedule 1 chemicals to other States Parties
745.2	End-Use Certificate reporting requirements under the Chemical Weapons Convention
	Supplement No. 1 to Part 745; Schedules of Chemicals
	Supplement No. 2 to Part 745; States Parties to the Convention on the Prohibition of the Development, Production, Stockpiling, and Use of Chemical Weapons and on Their Destruction
	Supplement No. 3 to Part 745; Foreign Authorized Agencies Responsible for Issuing End-Use Certificates

Pursuant to §745.2

Part 746 Embargoes and Other Special Controls

- 746.1 Introduction
- 746.2 Cuba
- 746.3 Iraq
- 746.4 North Korea
- 746.5 Russian industry sector sanctions
- 746.6 Crimea region of Ukraine and covered regions of Ukraine
- 746.7 Iran
- 746.8 Sanctions against Russia and Belarus
- 746.9 Syria
- 746.10 ‘Luxury goods’ sanctions against Russia and Belarus and Russian and Belarusian oligarchs and malign actors

Supplement No. 1 to Part 746; Examples of Luxury Goods

Supplement No. 2 to Part 746; Russian Industry Sector Sanction List

Supplement No. 3 to Part 746; Countries excluded from certain license requirements of § 746.8

Supplement No. 4 to Part 746; HTS codes and Schedule B numbers that require a license for export, reexport, and transfer (in-country) to or within Russia pursuant to § 746.5(a)(1)(ii)

Supplement No. 5 to Part 746; ‘Luxury goods’ that require a license for export, reexport, and transfer (in-country) to or within Russia or Belarus pursuant to § 746.10(a)(1) and (2)

Part 747 [RESERVED]**Part 748 Applications (Classification, Advisory, and License) and Documentation**

- 748.1 General provisions
- 748.2 Obtaining forms; mailing addresses
- 748.3 Classification Requests and Advisory Opinions
- 748.4 Basic guidance related to applying for a license
- 748.5 Parties to the transaction
- 748.6 General instructions for license applications
- 748.7 Registering for electronic submission of license applications and related documents
- 748.8 Unique license application and submission requirements
- 748.9 Support documents for evaluation of foreign parties in license applications and/or for promoting compliance with license requirements
- 748.10 People’s Republic of China (PRC) End User Statement
- 748.11 Statement by Ultimate Consignee and Purchaser
- 748.12 Firearms Convention (FC) Import Certificate
- 748.13 Hong Kong Import and Export Licenses
- 748.14 Granting of exceptions to the support document requirements
- 748.15 Authorization Validated End-user (VEU)

Supplement No. 1 to Part 748; BIS-748P; BIS-748P-A: Item Appendix, and BIS-748P-B: End-User Appendix; Multipurpose Application Instructions

Supplement No. 2 to Part 748; Unique Application and Submission Requirements

Supplement No. 3 to Part 748; Statement by Ultimate Consignee and Purchaser Content Requirements

Supplement No. 4 to Part 748; [RESERVED]

Supplement No. 5 to Part 748; U.S. Import Certificate and Delivery Verification Procedure

Supplement No. 6 to Part 748; Authorities issuing Import Certificates under the Firearms Convention [RESERVED]

Supplement No. 7 to Part 748; Authorization Validated End-user (VEU): List of Validated End-Users,

	Respective Eligible Items for export, reexport and transfer, and Eligible Destinations
	Supplement No. 8 to Part 748; Information Required in Requests for Validated End-User (VEU) Authorization
	Supplement No. 9 to Part 748; End-User Review Committee Procedures
Part 750	Application Processing, Issuance, and/or Denial
750.1	Scope
750.2	Processing of Classification Requests and Advisory Opinions
750.3	Review of license applications by BIS and other government agencies and departments
750.4	Procedures for processing license applications
750.5	[RESERVED]
750.6	Denial of license applications
750.7	Issuance of licenses
750.8	Revocation or suspension of licenses
750.9	Duplicate licenses
750.10	Transfer of licenses for exports
750.11	Shipping tolerances
Part 752	[RESERVED]
Part 754	Short Supply Controls
754.1	Introduction
754.2	Crude oil
754.3	Petroleum products not including crude oil
754.4	Unprocessed western red cedar
754.5	Horses for export by sea
754.6	Registration of U.S. agricultural commodities for exemption from short supply limitations on export
754.7	Petitions for the imposition of monitoring or controls on recyclable metallic materials; Public hearings
	Supplement No. 1 to Part 754; Crude Petroleum and Petroleum Products
	Supplement No. 2 to Part 754; Unprocessed Western Red Cedar
	Supplement No. 3 to Part 754; Statutory Provisions Dealing with Exports of Crude Oil
Part 756	Appeals and Judicial Review
756.1	Scope
756.2	Appeal from an administrative action
756.3	Judicial review of agency action
Part 758	Export Clearance Requirements and Authorities
758.1	The Electronic Export Information (EEI) filing to the Automated Export System (AES)
758.2	Automated Export System (AES)
758.3	Responsibilities of parties to the transaction
758.4	Use of export license
758.5	Conformity of documents and unloading of items
758.6	Destination control statement and other information furnished to consignees
758.7	Authorities of the Bureau of Industry and Security, Office of Export Enforcement (OEE)
758.8	Return or unloading of cargo
758.9	Other applicable laws and regulations
758.10	Entry Clearance Requirements for Temporary Imports
758.11	Export Clearance Requirements for Firearms and Related Items

Part 760	Restrictive Trade Practices or Boycotts
760.1	Definitions
760.2	Prohibitions
760.3	Exception to prohibitions
760.4	Evasion
760.5	Reporting requirements
Supplement Nos. 1-16; Interpretations	
Part 762	Recordkeeping
762.1	Scope
762.2	Records to be retained
762.3	Records exempt from recordkeeping requirements
762.4	Original records required
762.5	Reproduction of original records
762.6	Period of retention
762.7	Producing and inspecting records
Part 764	Enforcement and Protective Measures
764.1	Introduction
764.2	Violations
764.3	Sanctions
764.4	Reporting of violations
764.5	Voluntary self-disclosure
764.6	Protective administrative measures
764.7	Activities involving items that may have been illegally exported or reexported to Libya
764.8	Voluntary self-disclosures for boycott provisions
Supplement No. 1 to Part 764; Standard Terms of Orders Denying Export Privileges	
Part 766	Administrative Enforcement Proceedings
766.1	Scope
766.2	Definitions
766.3	Institution of administrative enforcement proceedings
766.4	Representation
766.5	Filing and service of papers other than charging letter
766.6	Answer and demand for hearing
766.7	Default
766.8	Summary decision
766.9	Discovery
766.10	Subpoenas
766.11	Matter protected against disclosure
766.12	Prehearing conference
766.13	Hearings
766.14	Interlocutory review of rulings
766.15	Proceeding without a hearing
766.16	Procedural stipulations; extension of time
766.17	Decision of the administrative law judge
766.18	Settlement
766.19	Reopening
766.20	Record for decision and availability of documents
766.21	Appeals

766.22	Review by Under Secretary
766.23	Related persons
766.24	Temporary denials
766.25	Administrative action denying export privileges

SUPPLEMENT NO. 2 TO PART 730 - TECHNICAL ADVISORY COMMITTEES 1

SUPPLEMENT NO. 3 TO PART 730 - OTHER U.S. GOVERNMENT DEPARTMENTS AND AGENCIES WITH EXPORT CONTROL RESPONSIBILITIES 1

§ 730.1 WHAT THESE REGULATIONS COVER

In this part, references to the Export Administration Regulations (EAR) are references to 15 CFR chapter VII, subchapter C. The EAR are issued by the United States Department of Commerce, Bureau of Industry and Security (BIS) under laws relating to the control of certain exports, reexports, and activities. In addition, the EAR implement antiboycott law provisions requiring regulations to prohibit specified conduct by United States persons that has the effect of furthering or supporting boycotts fostered or imposed by a country against a country friendly to United States. Supplement No. 1 to part 730 lists the control numbers assigned to information collection requirements under the EAR by the Office of Management and Budget pursuant to the Paperwork Reduction Act of 1995.

§ 730.2 STATUTORY AUTHORITY

The EAR have been designed primarily to implement the Export Administration Act of 1979, as amended, 50 U.S.C. app. 2401-2420 (EAA). There are numerous other legal authorities underlying the EAR. These are listed in the *Federal Register* documents promulgating the EAR and at the beginning of each part of the EAR in the Code of Federal Regulations (CFR). From time to time, the President has exercised authority under the International Emergency Economic Powers Act with respect to the EAR (50 U.S.C. 1701-1706 (IEEPA)). The EAA is not permanent legislation, and when it has lapsed, Presidential executive orders under IEEPA have directed and authorized the continuation in force of the EAR.

§ 730.3 “DUAL USE” AND OTHER TYPES OF ITEMS SUBJECT TO THE EAR

The term “dual use” is often used to describe the types of items subject to the EAR. A “dual-use” item is one that has civil applications as well as

terrorism and military or weapons of mass destruction (WMD)-related applications. The precise description of what is “subject to the EAR” is in § 734.3, which does not limit the EAR to controlling only dual-use items. In essence, the EAR control any item warranting control that is not exclusively controlled for export, reexport, or transfer (in-country) by another agency of the U.S. Government or otherwise excluded from being subject to the EAR pursuant to § 734.3(b) of the EAR. Thus, items subject to the EAR include purely civilian items, items with both civil and military, terrorism or potential WMD-related applications, and items that are exclusively used for military applications but that do not warrant control under the International Traffic in Arms Regulations (ITAR) (22 CFR parts 120 et seq.).

§ 730.4 OTHER CONTROL AGENCIES AND DEPARTMENTS

In addition to the departments and agencies mentioned in §730.3 of this part, other departments and agencies have jurisdiction over certain narrower classes of exports and reexports. These include the Department of Treasury's Office of Foreign Assets Control (OFAC), which administers controls against certain countries that are the object of sanctions affecting not only exports and reexports, but also imports and financial dealings. For your convenience, Supplement No. 3 to part 730 identifies other departments and agencies with regulatory jurisdiction over certain types of exports and reexports. This is not a comprehensive list, and the brief descriptions are only generally indicative of the types of controls administered and/or enforced by each agency.

§ 730.5 COVERAGE OF MORE THAN EXPORTS

The core of the export control provisions of the EAR concerns exports from the United States.

You will find, however, that some provisions give broad meaning to the term “export”, apply to transactions outside of the United States, or apply to activities other than exports.

(a) Reexports

Commodities, software, and technology that have been exported from the United States are generally subject to the EAR with respect to reexport. Many such reexports, however, may go to many destinations without a license or will qualify for an exception from licensing requirements.

(b) Foreign products

In some cases, exports from abroad, reexports or transfers (in-country) of items produced outside of the United States are subject to the EAR when they contain more than the *de minimis* amount of controlled U.S.-origin content as specified in § 734.4 of the EAR or when they are the direct product of specified “technology,” “software,” or a “plant or major component of a plant” as specified in § 736.2(b)(3) of the EAR.

(c) Scope of “exports”

Certain actions that you might not regard as an “export” in other contexts do constitute an export subject to the EAR. The release of technology to a foreign national in the United States through such means as demonstration or oral briefing is deemed an export. Other examples of exports under the EAR include the return of foreign equipment to its country of origin after repair in the United States, shipments from a U.S. foreign trade zone, and the electronic transmission of non-public data that will be received abroad.

(d) “U.S. person” activities

The EAR restrict specific activities of “U.S. persons,” wherever located, related to the proliferation of nuclear explosive devices, “missiles,” chemical or biological weapons,

whole plants for chemical weapons precursors, and certain military-intelligence end uses and end users, as described in § 744.6 of the EAR.

§ 730.6 CONTROL PURPOSES

The export control provisions of the EAR are intended to serve the national security, foreign policy, nonproliferation of weapons of mass destruction, and other interests of the United States, which in many cases are reflected in international obligations or arrangements. Some controls are designed to restrict access to items subject to the EAR by countries or persons that might apply such items to uses inimical to U.S. interests. These include controls designed to stem the proliferation of weapons of mass destruction and controls designed to limit the military and terrorism support capability of certain countries. The effectiveness of many of the controls under the EAR is enhanced by their being maintained as part of multilateral control arrangements. Multilateral export control cooperation is sought through arrangements such as the Nuclear Suppliers Group, the Australia Group, and the Missile Technology Control Regime. The EAR also include some export controls to protect the United States from the adverse impact of the unrestricted export of commodities in short supply.

§ 730.7 LICENSE REQUIREMENTS AND EXCEPTIONS

A relatively small percentage of exports and reexports subject to the EAR require an application to BIS for a license. Many items are not on the Commerce Control List (CCL) (Supplement No. 1 to §774.1 of the EAR), or, if on the CCL, require a license to only a limited number of countries. Other transactions may be covered by one or more of the License Exceptions in the EAR. In such cases no application need be made to BIS.

§ 730.8 HOW TO PROCEED AND WHERE TO GET HELP

(a) *How the EAR are organized*

The Export Administration Regulations (EAR) are structured in a logical manner. In dealing with the EAR you may find it helpful to be aware of the overall organization of these regulations. In order to determine what the rules are and what you need to do, review the titles and the introductory sections of the parts of the EAR.

(1) How do you go about determining your obligations under the EAR? Part 732 of the EAR provides steps you may follow to determine your obligations under the EAR. You will find guidance to enable you to tell whether or not your transaction is subject to the EAR and, if it is, whether it qualifies for a License Exception or must be authorized through issuance of a license.

(2) Are your items or activities subject to the EAR at all? Part 734 of the EAR defines the items and activities that are subject to the EAR. Note that the definition of “items subject to the EAR” includes, but is not limited to, items listed on the Commerce Control List in part 774 of the EAR.

(3) If subject to the EAR, what do the EAR require? Part 736 of the EAR lists all the prohibitions that are contained in the EAR. Note that certain prohibitions (General Prohibitions One through Three) apply to items as indicated on the CCL, and others (General Prohibitions Four through Ten) prohibit certain activities and apply to all items subject to the EAR unless otherwise indicated.

(4) Do you need a license for your item or activity? What policies will BIS apply if you do need to submit license application? The EAR have four principal ways of describing license requirements:

(i) The EAR may require a license to a country if your item is listed on the CCL and the Country Chart in part 738 of the EAR tells that a license is required to that country. Virtually all Export Control Classification Numbers (ECCN) on the CCL are covered by the Country Chart in part 738 of the EAR. That part identifies the limited number of entries that are not included on the Chart. These ECCNs will state the specific countries that require a license or refer you to a self-contained section, i.e., Short Supply in part 754 of the EAR, or Embargoes in part 746 of the EAR. If a license is required, you should consult part 740 of the EAR which describes the License Exception that may be available for items on the CCL. Part 742 of the EAR describes the licensing policies that BIS will apply in reviewing an application you file. Note that part 754 of the EAR on short supply controls and part 746 on embargoes are self-contained parts that include the available exceptions and licensing policy.

(ii) A license requirement may be based on the end-use or end-user in a transaction, primarily for proliferation reasons. Part 744 of the EAR describes such requirements and relevant licensing policies and includes both restrictions on items and restrictions on the activities of U.S. persons.

(iii) A license is required for virtually all exports to embargoed destinations, such as Cuba. Part 746 of the EAR describes all the licensing requirements, license review policies and License Exceptions that apply to such destinations. If your transaction involves one of these countries, you should first look at this part. This part also describes controls that may be maintained under the EAR to implement UN sanctions.

(iv) In addition, under §§736.2(b)(9) and (10) of the EAR, you may not engage in a transaction knowing a violation is about to occur or violate any orders, terms, and conditions under the EAR. Part 764 of the EAR describes prohibited transactions with a person denied export

privileges or activity that violates the terms or conditions of a denial order.

(5) How do you file a license application and what will happen to the application once you do file it? What if you need authorization for multiple transactions? Parts 748 and 750 of the EAR provide information on license submission and processing. If your application is denied, part 756 of the EAR provides rules for filing appeals.

(6) How do you clear shipments with the U.S. Customs Service? Part 758 of the EAR describes the requirements for clearance of exports.

(7) Where do you find the rules on restrictive trade practices and boycotts? Part 760 of the EAR deals with restrictive trade practices and boycotts.

(8) Where are the rules on recordkeeping and enforcement? Part 762 of the EAR sets out your recordkeeping requirements, and parts 764 and 766 of the EAR deal with violations and enforcement proceedings.

(9) What is the effect of foreign availability? Part 768 of the EAR provides rules for determining foreign availability of items subject to controls.

(10) Do the EAR provide definitions and interpretations? Part 770 of the EAR contains interpretations and part 772 of the EAR lists definitions used.

(b) Why the EAR are so detailed

Some people will find the great length of the EAR and their extensive use of technical terms intimidating. BIS believes, however, that such detail and precision can and does serve the interests of the public. The detailed listing of technical parameters in the CCL establishes precise, objective, criteria. This should, in most

cases, enable you to ascertain the appropriate control status. Broader, more subjective criteria would leave exporters and reexporters more dependent upon interpretations and rulings by BIS officials. Moreover, much of the detail in the CCL is derived from multilaterally adopted lists, and the specificity serves to enhance the uniformity and effectiveness of international control practices and to promote a “level playing field”. The detailed presentation of such elements as licensing and export clearance procedures enables you to find in one place what you need to know to comply with pertinent requirements. Of special importance is the detailed listing of License Exception criteria, as these will enable you to determine quickly, and with confidence, that you may proceed with a transaction without delay. Finally, some of the detail results from the need to draft the EAR with care in order to avoid loop-holes and to permit effective enforcement.

(c) Where to get help

Throughout the EAR you will find information on offices you can contact for various purposes and types of information. General information including assistance in understanding the EAR, information on how to obtain forms, electronic services, publications, and information on training programs offered by BIS, is available from the Office of Export Services at the following locations:

Outreach & Educational Services Division
U.S. Department of Commerce
14th and Pennsylvania Avenue, N.W.,
Room H1099D
Washington, DC 20230

**§ 730.9 ORGANIZATION OF THE
BUREAU OF INDUSTRY AND
SECURITY**

The head of the Bureau of Industry and Security is the Under Secretary for Industry and Security. The Under Secretary is assisted by a Deputy Under Secretary for Industry and Security, the Assistant Secretary for Export Administration, the Assistant Secretary for Export Enforcement, the Director of Administration, the Director of the Office of Congressional and Public Affairs, and the Chief Information Officer. The functions and authorities of the Under Secretary are described in the Department’s Organizational Order 10-16. The Department’s organizational and administrative orders are available via Office of Management and Organization’s Web page on the Department’s Web site at <http://www.osec.doc.gov/omo/DMPHome.htm>. The principal functions of the Bureau that directly affect the public are carried out by two units: Export Administration and Export Enforcement.

(a) Export Administration is headed by the Assistant Secretary for Export Administration, who is assisted by a Deputy Assistant Secretary. Its substantive work is carried out by six sub-

units: the Office of Nonproliferation and Treaty Compliance, the Office of National Security and Technology Transfer Controls, the Office of Exporter Services, the Operating Committee, the Office of Strategic Industries and Economic Security and the Office of Technology Evaluation. The functions of the Operating Committee are described in §750.4(f)(1) of the EAR. The roles of the other units are described on BIS's Web site at <http://www.bis.doc.gov/about/programoffices.htm>

(b) Export Enforcement is headed by the Assistant Secretary for Export Enforcement who is assisted by a Deputy Assistant Secretary. Its substantive work is carried out by three sub-units: the Office of Export Enforcement, the Office of Enforcement Analysis and the Office of Antiboycott Compliance. The roles of these units are described on BIS's Web site at <http://www.bis.doc.gov/about/programoffices.htm>

(c) BIS is also assisted in its work by six technical advisory committees. The procedures

and criteria for establishing and operating the technical advisory committees is at supplement No. 2 to this part. Information about the specific roles of each committee, meeting schedules, and membership selection is available on BIS's Web site at <http://tac.bis.doc.gov/>.

§ 730.10 ADVISORY INFORMATION

The general information in this part is just that—general. To achieve brevity, so as to give you a quick overview, the information in this part is selective, incomplete, and not expressed with regulatory precision. The controlling language is the language of succeeding parts of the EAR and of any other laws or regulations referred to or applicable. The content of this part is not to be construed as modifying or interpreting any other language, or as in any way limiting the authority of BIS, any of its components, or any other government department or agency. You should not take any action based solely on what you read in this part.

**SUPPLEMENT NO. 1 TO PART 730 - INFORMATION COLLECTION
REQUIREMENTS UNDER THE PAPERWORK REDUCTION ACT: OMB CONTROL
NUMBERS**

This Supplement lists the control numbers assigned to the information collection requirements for the Bureau of Industry and Security by the Office of Management and Budget (OMB), pursuant to the Paperwork Reduction Act of 1995. This Supplement complies with the requirements of section 3506(c)(1)(B)(i) of the Paperwork Reduction Act requiring agencies to display current control numbers assigned by the Director of OMB for each agency information collection requirement.

Collection number	Title	Reference in the EAR
0694-0004	Foreign Availability Procedures and Criteria	part 768
0694-0009	Approval of Triangular Transactions Involving Commodities Covered by a U.S. Import Certificate	§748.10(e)
0694-0012	Report of Requests for Restrictive Trade Practice or Boycott— Single or Multiple Transactions	part 760 and §762.2(b)
0694-0013	Computers and Related Equipment EAR Supplement 2 to Part 748	part 774
0694-0016	Delivery Verification Certificate	§§748.13 and 762.2(b)
0694-0017	International Import Certificate	§748.10
0694-0021	Statement by Ultimate Consignee and Purchaser	§§748.11 and 762.2(b)
0694-0026	Short Supply Regulations - Petroleum Products	§754.3
0694-0047	Technology Letter of Explanation	Supplement No. 2 to part 748, paragraph (o)(2)
0694-0058	Procedure for Voluntary Self-Disclosure of Violations	§§762.2(b) and 764.5
0694-0073	Export Controls of High Performance Computers	Supplement No. 2 to part 748, paragraph (c)(2), and §762.2(b)
0694-0088	Simplified Network Application Processing+ System (SNAP+) and the Multipurpose Export License Application	parts 746, 748, and §762.2(b)
0694-0093	Import Certificates And End-User Certificates	§§ 748.9, 748.10, 762.5(d), 762.6, 764.2(g)(2)
0694-0096	Five Year Records Retention Period	part 760, §762.6(a)
0694-0100	Requests for Appointment of Technical Advisory Committee	Supplement No. 1 to part 730
0694-0102	Registration of U.S. Agricultural Commodities For Exemption From Short Supply Limitations on Export, and Petitions For The Imposition of Monitoring Or Controls On Recyclable Metallic Materials; Public Hearings	§§754.6 and 754.7

0694-0134	Procedure for parties on the Entity List or the Unverified List to Request Removal or Modification of their Listing	§§ 744.15 and 744.16
0694-0137	License Exceptions and Exclusions	§734.4, Supplement No. 2 to part 734, §§ 740.3(d), 740.4(c), 740.9(a)(2)(viii)(B), 740.9(c), 740.12(b)(7), 740.17, 740.18, Supp. No. 2 to part 740, §§ 742.15, 743.1, 743.3, 754.4, 762.2(b) and Supplement No. 1 to part 774
0607-0152	Automated Export System (AES) Program	§§ 740.1(d), 740.3(a)(3), 754.4(c), 758.1, 758.2, and 758.3 of the EAR

SUPPLEMENT NO. 2 TO PART 730 - TECHNICAL ADVISORY COMMITTEES**(a) Purpose**

The purpose of this Supplement is to describe the procedures and criteria for the establishment and operation of Technical Advisory Committees.

(b) Technical advisory committees

Any producer of articles, materials, or supplies, including technology, software, and other information, that are subject to export controls, or are being considered for such controls because of their significance to the national security of the United States, may request the Secretary of Commerce to establish a technical advisory committee, under the provisions of section 5(h) of the Export Administration Act of 1979, as amended (EAA) to advise and assist the Department of Commerce and other appropriate U.S. Government agencies or officials with respect to questions involving technical matters; worldwide availability and actual utilization of production technology; licensing procedures that affect the level of export controls applicable to a clearly defined grouping of articles, materials, or supplies, including technology, software, or other information; and exports and reexports subject to all controls that the United States maintains including proposed revisions of any such controls. If producers of articles, materials, or supplies, including technology, software, and other information, that are subject to export controls because of their significance to the national security of the United States, wish a trade association or other representative to submit a written request on their behalf for the appointment to a TAC, such request shall be submitted in accordance with paragraph (b)(4) of this Supplement.

(1) Form and substance of requests. Each request for the appointment of a TAC shall be submitted in writing to:

Assistant Secretary for Export Administration

14th Street and Pennsylvania Ave., NW.
Room 2099B
Washington, DC 20230

The request shall include:

(i) A description of the articles, materials, or supplies including technology and software, in terms of a clear, cohesive grouping (citing the applicable Export Control Classification Numbers where practical);

(ii) A statement of the reasons for requesting the appointment of a TAC; and

(iii) Any information in support of any contention that may be made that the request meets the criteria described in paragraph (b)(2) of this Supplement.

(2) Consideration of request for establishment of a TAC. The Department of Commerce will review all requests for the establishment of a TAC to determine if the following criteria are met:

(i) That a substantial segment of the industry producing the specified articles, materials, or supplies including technology desires such a committee; and

(ii) That the evaluation of such articles, materials, or supplies including technology and software for export control purposes is difficult because of questions involving technical matters, worldwide availability and actual utilization of production and software technology, or licensing procedures.

(3) Requests by a substantial segment of an industry. In determining whether or not a substantial segment of any industry has requested the appointment of a TAC, the Department of Commerce will consider:

(i) The number of persons or firms requesting the establishment of a TAC for a particular grouping of commodities, software and technology in relation to the total number of U.S. producers of such items; and

(ii) The volume of annual production by such persons or firms of each item in the grouping in relation to the total U.S. production. Generally, a substantial segment of an industry (for purposes of this Supplement) shall consist of:

(A) Not less than 30 percent of the total number of U.S. producers of the items concerned; or

(B) Three or more U.S. producers who produce a combined total of not less than 30 percent of the total U.S. annual production, by dollar value of the items concerned; or

(C) Not less than 20 percent of the total number of U.S. producers of the items concerned, provided that the total of their annual production thereof is not less than 20 percent of the total U.S. annual production, by dollar value.

(iii) If it is determined that a substantial segment of the industry concerned has requested the establishment of a TAC concerning a specific grouping of items that the Department of Commerce determines difficult to evaluate for export control purposes, BIS will establish and use the TAC requested.

(4) Requests from trade associations or other representatives. Requests from trade associations or other representatives of U.S. producers for the establishment of a TAC must comply with the provisions of paragraphs (b)(1) through (3) of this Supplement. In addition, in order to assist BIS in determining whether the criteria described in paragraph (b)(3) of this Supplement have been met, a trade association or other representative submitting a request for the establishment of a TAC should include the following information:

(i) The total number of firms in the particular industry;

(ii) The total number of firms in the industry that have authorized the trade association or other representative to act in their behalf in this matter;

(iii) The approximate amount of total U.S. annual production by dollar value of the items concerned produced by those firms that have authorized the trade association or other representative to act in their behalf; and

(iv) A description of the method by which authorization to act on behalf of these producers was obtained.

(5) Nominations for membership on TACs. When the Department of Commerce determines that the establishment of a TAC is warranted, it will request nominations for membership on the committee among the producers of the items and from any other sources that may be able to suggest well-qualified nominees.

(6) Selection of industry members of committee. Industry members of a TAC will be selected by the Department of Commerce from a list of the nominees who have indicated their availability for service on the committee. To the extent feasible, the Department of Commerce will select a committee balanced to represent all significant facets of the industry involved, taking into consideration such factors as the size of the firms, their geographical distribution, and their product lines. No industry representative shall serve on a TAC for more than four consecutive years. The membership of a member who is absent from four consecutive meetings shall be terminated.

(7) Government members. Government members of a TAC will be selected by the Department of Commerce from the agencies having an interest in the subject matter concerned.

(8) Invitation to serve on committee. Invitations to serve on a TAC will be sent by letter to the selected nominees.

(9) Election of Chair. The Chair of each TAC shall be elected by a vote of the majority of the members of the committee present and voting.

(c) Charter

(1) No TAC established pursuant to this Supplement shall meet or take any action until an advisory committee charter has been filed with the Assistant Secretary for Export Administration of the Department of Commerce and with the standing committees of the Senate and of the House of Representatives having legislative jurisdiction over the Department. Such charter shall contain the following information:

- (i) The committee's official designation;
- (ii) The committee's objectives and the scope of its activities;
- (iii) The period of time necessary for the committee to carry out its purposes;
- (iv) The agency or official to whom the committee reports;
- (v) The agency responsible for providing the necessary support for the committee;
- (vi) A description of the duties for which the committee is responsible, and, if such duties are not solely advisory, a specification of the authority for such functions;
- (vii) The estimated annual operating costs in dollars and years for such committee;
- (viii) The estimated number and frequency of committee meetings;

(ix) The committee's termination date, if less than two years from the date of the committee's establishment; and

(x) The date the charter is filed.

(d) Meetings

(1) Each TAC established under the provisions of the EAA and paragraph (b) of this Supplement shall meet at least once every three months at the call of its Chair unless it is specifically determined by the Chair, in consultation with other members of the committee, that a particular meeting is not necessary.

(2) No TAC may meet except at the call of its Chair.

(3) Each meeting of a TAC shall be conducted in accordance with an agenda approved by a designated Federal government employee.

(4) No TAC shall conduct a meeting in the absence of a designated Federal government employee who shall be authorized to adjourn any advisory committee meeting, whenever the Federal government employee determines adjournment to be in the public interest.

(e) Public notice

Notice to the public of each meeting of a TAC will be issued at least 20 days in advance and will be published in the *Federal Register*. The notice will include the time and place of the meeting and the agenda.

(f) Public attendance and participation

(1) Any member of the public who wishes to do so may file a written statement with any TAC before or after any meeting of a committee.

(2) A request for an opportunity to deliver an oral statement relevant to matters on the agenda of a meeting of a TAC will be granted to the

extent that the time available for the meeting permits. A committee may establish procedures requiring such persons to obtain advance approval for such participation.

(3) Attendance at meetings of TACs will be open to the public unless it is determined pursuant to §10(d) of the Federal Advisory Committee Act to be necessary to close all, or some portion, of the meeting to the public. A determination that a meeting or portion thereof be closed to the public may be made if all or a specific portion of a meeting of a TAC is concerned with matters described in §552(b) of Title 5, U.S.C.

(4) Participation by members of the public in open TAC meetings or questioning of committee members or other participants shall not be permitted except in accordance with procedures established by the committee.

(5) Every effort will be made to accommodate all members of the public who wish to attend.

(g) Minutes

(1) Detailed minutes of each meeting of each TAC will be kept and will contain a record of the persons present, a complete and accurate description of the matters discussed and conclusions reached, and copies of all reports received, issued, or approved by the TAC.

(2) The accuracy of all the minutes will be certified to by the TAC Chair.

(h) Records

(1) Subject to §552 of Title 5, U.S.C. and Department of Commerce Administrative Order 205-12, “Public Information,” and “Public Information” regulations issued by the Department of Commerce that are contained in 15 CFR part 4, Subtitle A, the records, reports, transcripts, minutes, appendices, working papers, draft, studies, agenda, or other documents that were made available to or prepared for or by each

TAC will be available for public inspection and copying.

(2) Each TAC will prepare once each year a report describing its membership, functions, activities, and such related matters as would be informative to the public consistent with the policy of §552(b) of Title 5, U.S.C.

(3)(i) Requests for records should be addressed to:

Bureau of Industry and Security
Freedom of Information
Records Inspection Facility
U.S. Department of Commerce
Room 4513
Washington, DC 20230
Telephone (202) 482-2593

(ii) Rules concerning the use of the Records Inspection Facility are contained in 15 CFR part 4, Subtitle A, or may be obtained from this facility.

(i) Compensation

If the Department of Commerce deems it appropriate, a member of a TAC may be reimbursed for travel, subsistence, and other necessary expenses incurred in connection with the member's duties.

(j) Scope of advisory committee functions

All TACs are limited to the functions described in their charters.

(k) Duration of committees

Each TAC will terminate at the end of two years from the date the committee was established or two years from the effective date of its most recent extension, whichever is later. Committees may be continued only for successive two-year periods by appropriate action taken by the authorized officer of the

Department of Commerce prior to the date on which such advisory committee would otherwise terminate. TACs may be extended or terminated only after consultation with the committee.

(l) Miscellaneous

(1) TACs established in accordance with paragraph (b) of this supplement must conform to the provisions of the Federal Advisory Committee Act (Public Law 92-463), Office of Management and Budget Circular A-63 (Revision of March 1974), “Advisory Committee Management,” Department of Commerce Administrative Order 205-12, “Public Information,” the applicable provisions of the EAA, and any other applicable Department of Commerce regulations or procedures affecting the establishment or operation of advisory committees.

(2) Whenever the Department of Commerce desires the advice or assistance of a particular segment of an industry with respect to any export control problem for which the service of a TAC,

as described in paragraph (b) of this Supplement is either unavailable or impracticable, an advisory committee may be established pursuant to the provisions of section 9 of the Federal Advisory Committee Act. Such committees will be subject to the requirements of the Federal Advisory Committee Act, OMB Circular A-63 (Revision of March 1974), “Advisory Committee Management,” Department of Commerce Administrative Order 205-12, “Public Information,” and any other applicable Department of Commerce regulations or procedures affecting the establishment or operation of advisory committees.

(3) Nothing in the provisions of this Supplement shall be construed to restrict in any manner the right of any person or firm to discuss any export control matter with the Department of Commerce or to offer advice or information on export control matters. Similarly, nothing in these provisions shall be construed to restrict the Department of Commerce in consulting any person or firm relative to any export control matter.

**SUPPLEMENT NO. 3 TO PART 730 - OTHER U.S. GOVERNMENT DEPARTMENTS
AND AGENCIES WITH EXPORT CONTROL RESPONSIBILITIES**

Note: The departments and agencies identified with an asterisk control exports for foreign policy or national security reasons and, in certain cases, such controls may overlap with the controls described in the EAR (see part 734 of the EAR).

§ 732.1 STEPS OVERVIEW

(a)(1) Introduction

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. This part is intended to help you determine your obligations under the EAR by listing logical steps in §732.2 through §732.5 of this part that you can take in reviewing these regulations. A flow chart describing these steps is contained in Supplement No. 1 to part 732. By cross-references to the relevant provisions of the EAR, this part describes the suggested steps for you to determine applicability of the following:

(i) The scope of the EAR (part 734 of the EAR);

(ii) Each of the general prohibitions (part 736 of the EAR);

(iii) The License Exceptions (part 740 of the EAR); and

(iv) Other requirements such as clearing your export with the U.S. Customs Service, keeping records, and completing and documenting license applications.

(2) These steps describe the organization of the EAR, the relationship among the provisions of the EAR, and the appropriate order for you to consider the various provisions of the EAR.

(3) The general information in this part is intended to provide an overview of the steps to be taken for certain requirements in the EAR, though not all of them. Nothing in this part shall be construed as altering or affecting any other authority, regulation, investigation or other enforcement measure provided by or established under any other provision of federal law, including provisions of the EAR.

(b) Facts about your transaction

The following five types of facts determine your obligations under the EAR and will be of help to you in reviewing these steps:

(1) **What is it?** What an item is, for export control purposes, depends on its *classification*, which is its place on the Commerce Control List (see part 774 of the EAR).

(2) **Where is it going?** The *country of ultimate destination* for an export or reexport also determines licensing requirements (see parts 738 and 774 of the EAR concerning the Country Chart and the Commerce Control List).

(3) **Who will receive it?** The *ultimate end-user* of your item cannot be a bad end-user. See General Prohibition Four (Denial Orders) in §736.2(b)(4) and parts 744 and 764 of the EAR

for a reference to the list of persons you may not deal with.

(4) What will they do with it? The *ultimate end-use* of your item cannot be a bad end-use. See General Prohibition Five (End-Use End-User) in §736.2(b)(5) and part 744 of the EAR for general end-use and end-user restrictions.

(5) What else do they do? *Conduct* such as contracting, financing, and freight forwarding in support of a proliferation project (as described in §744.6 of the EAR) may prevent you from dealing with someone.

(c) *Are your items and activities subject to the EAR?*

You should first determine whether your commodity, software, or technology is subject to the EAR (see part 734 of the EAR concerning scope), and Steps 1 through 6 help you do that. For exports from the United States, only Steps 1 and 2 are relevant. If you already know that your item or activity is subject to the EAR, you should go on to consider the ten general prohibitions in part 736 of the EAR. If your item or activity is not subject to the EAR, you have no obligations under the EAR and may skip the remaining steps.

(d) *Does your item or activity require a license under one or more of the ten general prohibitions?*

(1) Brief summary of the ten general prohibitions. The general prohibitions are found in part 736 of the EAR and referred to in these steps. They consist, very briefly, of the following:

(i) General Prohibition One (Exports and Reexports): Export and reexport of controlled items to listed countries.

(ii) General Prohibition Two (Parts and Components Reexports): Reexport and export from abroad of foreign-made items incorporating

more than a de minimis amount of controlled U.S. content.

(iii) General Prohibition Three (Foreign-produced Direct Product Reexports): Reexport and export from abroad of the foreign-produced direct product of U.S. technology and software.

(iv) General Prohibition Four (Denial Orders): Engaging in actions prohibited by a denial order.

(v) General Prohibition Five (End-Uses End-Users): Export or reexport to prohibited end uses or end users.

(vi) General Prohibition Six (Embargo): Export or reexport to embargoed destinations.

(vii) General Prohibition Seven (U.S. Person Proliferation Activity): Support of proliferation activities.

(viii) General Prohibition Eight (In-Transit): In-transit shipments and items to be unladen from vessels and aircraft.

(ix) General Prohibition Nine (Orders, Terms and Conditions): Violation of any orders, terms, or conditions.

(x) General Prohibition Ten (Knowledge Violation to Occur): Proceeding with transactions with knowledge that a violation has occurred or is about to occur.

(2) *Controls on items on the Commerce Control List (CCL).* If your item or activity is subject to the EAR, you should determine whether any one or more of the ten general prohibitions require a license for your export, reexport, or activity. Steps 7 through 11 refer to classification of your item on the Commerce Control List (CCL) (part 774 of the EAR) and how to use the Country Chart (Supplement No. 1 to part 738 of the EAR) to determine whether a license is required based upon the classification of your item. These steps

refer to General Prohibitions One (Exports and Reexports), Two (Parts and Components Reexports), and Three (Foreign-Produced Direct Product Reexports) for all countries except: Cuba, Iran, North Korea, and Syria. For these countries, you may skip Steps 7 through 11 and go directly to Step 12.

(3) Controls on activities. Steps 12 through 18 refer to General Prohibitions Four through Ten. Those general prohibitions apply to all items subject to the EAR, not merely those items listed on the CCL in part 774 of the EAR. For example, they refer to the general prohibitions for persons denied export privileges, prohibited end-uses and end-users, countries subject to a comprehensive embargo (e.g., Cuba, Iran, North Korea and Syria), prohibited activities of U.S. persons in support of proliferation of weapons of mass destruction, prohibited unloading of shipments, compliance with orders, terms and conditions, and activities when a violation has occurred or is about to occur.

(4) General prohibitions. If none of the ten general prohibitions applies, you should skip the steps concerning License Exceptions and for exports from the United States, review Steps 27 through 29 concerning Shipper's Export Declarations to be filed with the U.S. Customs Service, Destination Control Statements for export control documents, and recordkeeping requirements.

(e) Is a License Exception available to overcome the license requirement?

If you decide by reviewing the CCL in combination with the Country Chart that a license is required for your destination, you should determine whether a License Exception will exempt you from that requirement. Steps 20 through 24 help you determine whether a License Exception is available. Note that generally License Exceptions are not available to overcome General Prohibitions Four through Ten. However, selected License Exceptions for

embargoed destinations are specified in part 746 of the EAR and License Exceptions for short supply controls are specified in part 754 of the EAR. If a License Exception is available and the export is from the United States, you should review Steps 26 through 28 concerning Shipper's Export Declarations to be filed with the U.S. Customs Service, Destination Control Statements for export control documents and recordkeeping requirements. If a License Exception is not available, go on to Steps 25 through 29.

(f) How do you apply for a license?

If you must file a license application, you should review the requirements of part 748 of the EAR as suggested by Step 26. Then you should review Steps 27 through 29 concerning Shipper's Export Declarations to be filed with the U.S. Customs Service, Destination Control Statements for export control documents, and record keeping requirements.

§ 732.2 STEPS REGARDING SCOPE OF THE EAR

Steps 1 through 6 are designed to aid you in determining the scope of the EAR. A flow chart describing these Steps is contained in Supplement No. 2 to part 732.

(a) Step 1: Items subject to the exclusive jurisdiction of another Federal agency

This step is relevant for both exports and reexports. Determine whether your item is subject to the exclusive jurisdiction of another Federal Agency as provided in §734.3 of the EAR.

(1) If your item is subject to the exclusive jurisdiction of another federal agency, comply with the regulations of that agency. You need not comply with the EAR and may skip the remaining steps.

(2) If your item is not subject to the exclusive jurisdiction of another federal agency, then proceed to Step 2 in paragraph (b) of this section.

(b) Step 2: Publicly available technology and software

This step is relevant for both exports and reexports. Determine if your technology or software is publicly available as defined and explained at part 734 of the EAR. Supplement No. 1 to part 734 of the EAR contains several practical examples describing publicly available technology and software that are outside the scope of the EAR. The examples are illustrative, not comprehensive. Note that encryption software classified under ECCN 5D002 on the Commerce Control List (refer to Supplement No.1 to Part 774 of the EAR) is subject to the EAR even if publicly available, except for publicly available encryption object code software classified under ECCN 5D002 when the corresponding source code meets the criteria specified in § 740.13(e) of the EAR. The following also remains subject to the EAR: “software” or “technology” for the production of a firearm, or firearm frame or receiver, controlled under ECCN 0A501, as referenced in § 734.7(c) of the EAR).

(1) If your technology or software is publicly available, and therefore outside the scope of the EAR, you may proceed with the export or reexport if you are not a U.S. person subject to General Prohibition Seven. If you are a U.S. person, go to Step 15 at §732.3(j) of this part. If you are a U.S. person and General Prohibition Seven concerning proliferation activity of U.S. persons does not apply, then you may proceed with the export or reexport of your publicly available technology or software. Note that all U.S. persons are subject to the provisions of General Prohibition Seven.

(2) If your technology or software is not publicly available and you are exporting from the

United States, skip to the Step 7 in §732.3(b) of this part concerning the general prohibitions.

(3) If you are exporting items from a foreign country, you should then proceed Step 3 in paragraph (c) of this section and the other steps concerning the scope of the EAR.

(c) Step 3: Reexport of U.S.-origin items

This step is appropriate only for reexporters. For an item in a foreign country, you should determine whether the item is of U.S.-origin. If it is of U.S.-origin, skip to Step 7 in §732.3(b) of this part. If it is not of U.S.-origin, then proceed to Step 4 in paragraph (d) of this section.

(d) Step 4: Foreign-made items incorporating controlled U.S.-origin items

This step is appropriate only for items that are made outside the United States and not currently located in the United States. Special requirements and restrictions apply to foreign-made items that incorporate U.S.-origin encryption items (see §734.4(a)(2), (b), and (g) of the EAR).

(1) Determining whether your foreign made item is subject to the EAR. Using the guidance provided in Supplement No. 2 to part 734 of the EAR, determine whether controlled U.S.-origin items are incorporated into the foreign-made item and are above the *de minimis* level set forth in §734.4 of the EAR

(2) If no U.S.-origin controlled items are incorporated or if the percentage of incorporated U.S.-origin controlled items are equal to or below the *de minimis* level described in § 734.4 of the EAR, then the foreign-made item is not subject to the EAR by reason of the *de minimis* rules, and you should go on to consider Step 6 regarding the foreign-produced direct product rule.

(3) If the foreign-made item incorporates more than the *de minimis* level of U.S.-origin items,

then that item is subject to the EAR and you should skip to Step 7 at § 732.3 of this part and consider the steps regarding all other general prohibitions, license exceptions, and other requirements to determine applicability of these provisions to the foreign-made item.

(e) [RESERVED]

(f) *Step 6: Direct product rule.*

Foreign items that are the direct product of U.S. technology, software, or plant or major component of a plant made from U.S. technology or software may be subject to the EAR if they meet the conditions of General Prohibition Three in § 736.2(b)(3) of the EAR. Direct products that are subject to the EAR may require a license to be exported from abroad or reexported to certain countries.

(1) Subject to the EAR. If your foreign item is captured by the direct product rule (General Prohibition Three), then the item is subject to the EAR and its export from abroad or reexport may require a license. You should next consider the steps regarding all other general prohibitions, license exceptions, and other requirements. If the item is not captured by General Prohibition Three, then you have completed the steps necessary to determine whether the item is subject to the EAR, and you may skip the remaining steps. As described in part 734 of the EAR, items outside the U.S. are subject to the EAR when they are:

(i) U.S.-origin commodities, software, or technology, unless controlled for export exclusively by another U.S. Federal agency or unless publicly available;

(ii) Foreign-origin commodities, software, or technology that are within the scope of General Prohibition Two (*De minimis* rules), or General Prohibition Three (Direct Product rule). However, such foreign-origin items are

also outside the scope of the EAR if they are controlled for export exclusively by another U.S. Federal Agency or, if technology or software, are publicly available as described in paragraph (b) of this section.

(2) [RESERVED]

§ 732.3 STEPS REGARDING THE TEN GENERAL PROHIBITIONS

(a) *Introduction*

If your item or activity is subject to the scope of the EAR, you should then consider each of the ten general prohibitions listed in part 736 of the EAR. General Prohibitions One (Exports and Reexports), Two (Parts and Components Reexports), and Three (Foreign-Produced Direct Product Reexports) (§736.2(b)(1), (2), and (3) of the EAR) are product controls that are shaped and limited by parameters specified on the CCL and Country Chart. General Prohibitions Four through Ten are prohibitions on certain activities that are not allowed without authorization from BIS, and these prohibitions apply to all items subject to the EAR unless otherwise specified (§736.2(b)(4) through (10) of the EAR).

(b) *Step 7: Classification*

(1) You should classify your items “subject to the EAR” in the relevant entry on the CCL, and you may do so on your own without BIS assistance. The CCL includes a Supplement No. 4 to part 774 – Commerce Control List Order of Review. This supplement establishes the steps (i.e., the order of review) that should be followed in classifying items that are “subject to the EAR.” The exporter, reexporter, or transferor is responsible for correctly classifying the items in a transaction, which may involve submitting a classification request to BIS. Failure to classify or have classified the item correctly does not relieve

the person of the obligation to obtain a license when one is required by the EAR.

(2) You have a right to request the applicable classification of your item from BIS, and BIS has a duty to provide that classification to you. For further information on how to obtain classification assistance from BIS, see part 748 of the EAR.

(3) For items subject to the EAR but not listed on the CCL, the proper classification is EAR99. This number is a “basket” for items not specified under any CCL entry and appears at the end of each Category on the CCL.

(4) Items subject to temporary CCL controls are classified under the ECCN 0Y521 series (i.e., 0A521, 0B521, 0C521, 0D521 and 0E521) pursuant to § 742.6(a)(8) of the EAR while a determination is being made as to whether classification under a revised or new ECCN or EAR99 designation is appropriate .

(c) Step 8: Country of ultimate destination

You should determine the country of ultimate destination. The country of destination determines the applicability of several general prohibitions, License Exceptions, and other requirements. Note that part 754 of the EAR concerning short supply controls is self-contained and is the only location in the EAR that contains both the prohibitions and exceptions applicable to short supply controls.

(d) Step 9: Reason for control and the Country Chart

(1) Reason for control and column identifier within the Export Control Classification Number (ECCN). Once you have determined that your item is controlled by a specific ECCN, you must use information contained in the “License Requirements” section of that ECCN in combination with the Country Chart to decide whether a license is required under General

Prohibitions One, Two, or Three to a particular destination. The CCL and the Country Chart are taken together to define these license requirements. The applicable ECCN will indicate the reason or reasons for control for items within that ECCN. For example, ECCN 6A007 is controlled for national security, missile technology, and anti-terrorism reasons.

(2) *Reason for control within the Country Chart.* With each of the applicable Country Chart column identifiers noted in the correct ECCN, turn to the Country Chart. Locate the correct Country Chart column identifier on the horizontal axis, and determine whether an “X” is marked in the cell next to the destination in question. Consult §738.4 of the EAR for comprehensive instructions on using the Country Chart and a detailed example.

(i) An “X” in the cell or cells for the relevant country and reason(s) for control column indicates that a license is required for General Prohibitions One (Exports and Reexports in the Form Received), Two (Parts and Components Reexports), and Three (Foreign-Produced Direct Product Reexports). (See §736.2(b)(1), (b)(2), and (b)(3) of the EAR).

(ii) If one or more cells have an “X” in the relevant column, a license is required unless you qualify for a License Exception described in part 740 of the EAR. If a cell does not contain an “X” for your destination in one or more relevant columns, a license is not required under the CCL and the Country Chart.

(iii) Additional controls may apply to your export. You must go on to steps 12 through 18 described in paragraphs (g) to (m) of this section to determine whether additional limits described in General Prohibition Two (Parts and Components Reexports) and General Prohibition Three (Foreign-Produced Direct Product Reexports) apply to your proposed transaction. If you are exporting an item from the United States, you should skip Step 10 and Step 11.

Proceed directly to Step 12 in paragraph (g) of this section.

(3) License requirements not on the Country Chart. There are two instances where the Country Chart cannot be used to determine if a license is required. Items controlled for short supply reasons are not governed by the Country Chart. Part 754 of the EAR contains license requirements and License Exceptions for items subject to short supply controls. A limited number of ECCNs contained on the CCL do not identify a Country Chart column identifier. In these instances, the ECCN states whether a license is required and for which destinations. See §738.3(a) of the EAR for a list of the ECCNs for which you do not need to consult the Country Chart to determine licensing requirements.

(4) Destinations subject to embargo and other special controls provisions. The Country Chart does not apply to Cuba, Iran, North Korea, and Syria. For those countries you should review the provisions at part 746 of the EAR and may skip this step concerning the Country Chart. For Iraq and Russia, the Country Chart provides for certain license requirements, and part 746 of the EAR provides additional requirements.

(5) Items subject to the EAR but not on the CCL. Items subject to the EAR that are not on the CCL are properly classified EAR99. For such items, you may skip this step and proceed directly with Step 12 in paragraph (g) of this section.

(e) Step 10: Foreign-made items incorporating U.S.-origin items and the de minimis rules

(1) De minimis rules. If your foreign-made item abroad is a foreign-made commodity that incorporates controlled U.S.-origin commodities, a foreign-made commodity that is ‘bundled’ with controlled U.S.-origin software, foreign-made software that is commingled with controlled U.S.-origin software, or foreign-made technology that is

commingled with controlled U.S.-origin technology, then it is subject to the EAR if the U.S.-origin controlled content exceeds the *de minimis* levels described in Sec. 734.4 of the EAR.

(2) Guidance for calculations. For guidance on how to calculate the U.S.-controlled content, refer to Supplement No. 2 to part 734 of the EAR. Note, U.S.-origin technology controlled by ECCN 9E003.a.1 through a.11, and .h, and related controls, and encryption software controlled for “EI” reasons under ECCN 5D002 (not eligible for *de minimis* treatment pursuant to § 734.4(b) of the EAR) or encryption technology controlled for “EI” reasons under ECCN 5E002 (not eligible for *de minimis* treatment pursuant to § 734.4(a)(2) of the EAR) do not lose their U.S.-origin when redrawn, used, consulted, or otherwise commingled abroad in any respect with other software or technology of any other origin. Therefore, any subsequent or similar software or technology prepared or engineered abroad for the design, construction, operation, or maintenance of any plant or equipment, or part thereof, which is based on or uses any such U.S.-origin software or technology is subject to the EAR.

(f) Step 11: Direct product rule - General Prohibition Three.

Foreign-produced items located outside the U.S. that are the direct product of “technology” or “software” subject to the EAR or produced by a plant or major component of a plant located outside the United States that is a direct product of U.S.-origin “technology” or “software” subject to the EAR, whether made in the U.S. or a foreign country, may be subject to the EAR if they meet the conditions of General Prohibition Three in §736.2(b)(3). Direct products that are subject to the EAR may require a license to be exported from abroad, transferred (in-country), or reexported to specified countries or end users. If your foreign item meets the conditions of the foreign-produced direct product rule (General Prohibition Three), then your export from abroad,

transfer (in-country), or reexport is subject to the EAR. You should next consider the steps regarding all other general prohibitions, license exceptions, and other requirements. If your item does not meet the conditions of General Prohibition Three, then your export from abroad, transfer (in-country), or reexport is not subject to the EAR. You have completed the steps necessary to determine whether your transaction is subject to the EAR, and you may skip the remaining steps.

(g) Step 12: Persons denied export privileges

(1) Determine whether your transferee, ultimate end-user, any intermediate consignee, or any other party to a transaction is a person denied export privileges. (See part 764 of the EAR). It is a violation of the EAR to engage in any activity that violates the terms or conditions of a denial order. General Prohibition Four (Denial Orders) applies to all items subject to the EAR, *i.e.* both items on the CCL and within EAR99.

(2) There are no License Exceptions to General Prohibition Four (Denial Orders). The prohibition concerning persons denied export privileges may be overcome only by a specific authorization from BIS, something that is rarely granted.

(h) Step 13: Prohibited end-uses and end-users

(1) Review the end-uses and end-users prohibited under General Prohibition Five (End-Use End-User) (§736.2(b)(5) of the EAR) described in part 744 of the EAR. Part 744 of the EAR contains all the end-use and end-user license requirements, and those are in addition to the license requirements under General Prohibitions One (Exports and Reexports), Two (Parts and Components Reexports), and Three (Foreign-produced Direct Product Reexports). Unless otherwise indicated, the license requirements of General Prohibition Five (End-Use End-User) described in part 744 of the EAR

apply to all items subject to the EAR, *i.e.* both items on the CCL and within EAR99. Moreover, the requirements of General Prohibition Five (End-Use and End-User) are in addition to various end-use and end-user limitations placed on certain License Exceptions.

(2) Under License Exception TSU (§740.13 of the EAR), operation technology and software, sales technology, and software updates overcome General Prohibition Five (End-Use and End-User) (§736.2(b)(5) of the EAR) if all terms and conditions of these provisions are met by the exporter or reexporter.

(i) Step 14: Embargoed countries and special destinations

If your destination for any item is Cuba, Iran, Iraq, North Korea, or Syria, you must consider the requirements of parts 742 and 746 of the EAR. Unless otherwise indicated, General Prohibition Six (Embargo) applies to all items subject to the EAR, *i.e.*, both items on the CCL and within EAR99. See § 746.1(b) for destinations subject to limited sanctions under United Nations Security Council arms embargoes. See §§ 746.5 for Russian and Belarusian industry sector sanctions, 746.6 for Crimea region of Ukraine and covered regions of Ukraine, 746.8 for Sanctions against Russia and Belarus, and 746.10 for ‘luxury goods’ sanctions against Russia and Belarus and Russian and Belarusian oligarchs and malign actors. You may not make an export, reexport, or transfer (in-country) contrary to the provisions of part 746 of the EAR without a license unless:

(1) You are exporting, reexporting, or transferring only published information or software as specified in § 734.7 or other items outside the scope of the EAR, or

(2) You qualify for a License Exception referenced in part 746 of the EAR concerning embargoed destinations. You may not use a license exception described in part 740 of the

EAR to overcome General Prohibition Six (Embargo) (§736.2(b)(6) of the EAR) unless it is specifically authorized in part 746 of the EAR. Note that part 754 of the EAR concerning short supply controls is self-contained and is the only location in the EAR for both the prohibitions and exceptions applicable to short supply controls.

(j) Step 15: Restrictions on specific activities of “U.S. persons”

(1) Review the scope of activity prohibited by General Prohibition Seven (“U.S. person” activities) (§ 736.2(b)(7) of the EAR) as that activity is described in § 744.6 of the EAR. Keep in mind that such activity is not limited to exports, reexports, or transfers (in-country). “U.S. person” activities extend to services and shipping or transmitting certain wholly foreign-origin items, or facilitating such shipments or transmissions, in ‘support’ of the specified weapons of mass destruction and military-intelligence-related end uses and end users and is not limited to items listed on the CCL or designated EAR99. See § 744.6(b)(6) of the EAR for the full definition of ‘support,’ which includes ordering, storing, using, selling, loaning, disposing, servicing, financing, transporting, freight forwarding, or conducting negotiations in furtherance of.

(2) Review the definition of “U.S. person” in § 772.1 of the EAR.

(k) Step 16: In-transit

Shippers and operators of vessels or aircraft should review General Prohibition Eight (In-Transit) to determine the countries in which you may not unload or ship certain items in-transit. General Prohibition Eight applies to all items subject to the EAR, i.e. both items on the CCL and within EAR99.

(l) Step 17: Review orders, terms, and conditions

Review the orders, terms, and conditions applicable to your transaction. General Prohibition Nine (Orders, Terms, and Conditions) prohibits the violation of any orders, terms, and conditions imposed under the EAR. Terms and conditions are frequently contained in licenses. In addition, the ten general prohibitions (part 736 of the EAR) and the License Exceptions (part 740 of the EAR) impose terms and conditions or limitations on your proposed transactions and use of License Exceptions. A given license or License Exception may not be used unless each relevant term or condition is met.

(m) Step 18: Review the “Know Your Customer” Guidance and General Prohibition Ten (Knowledge Violation to Occur)

License requirements under the EAR are determined solely by the classification, end-use, end-user, ultimate destination, and conduct of U.S. persons. Supplement No. 1 to part 732 of the EAR is intended to provide helpful guidance regarding the process for the evaluation of information about customers, end-uses, and end-users. General Prohibition Ten (Knowledge Violation to Occur) prohibits anyone from proceeding with a transaction with knowledge that a violation of the EAR has occurred or is about to occur. It also prohibits related shipping, financing, and other services. General Prohibition Ten applies to all items subject to the EAR, i.e. both items on the CCL and within EAR99.

(n) Step 19: Complete the review of the general prohibitions

After completion of Steps described in this section and review of all ten general prohibitions in part 736 of the EAR, including cross-referenced regulations in the EAR, you will know which, if any, of the ten general prohibitions of the EAR apply to you and your contemplated transaction or activity.

(1) If none of the ten general prohibitions is applicable to your export from the United States, no license from BIS is required, you do not need to qualify for a License Exception under part 740 of the EAR. You should skip the Steps in §732.4 of this part regarding License Exceptions and proceed directly to the Steps in §732.5 of this part regarding recordkeeping, clearing the Bureau of Customs and Border Protection with the appropriate Shipper's Export Declaration or Automated Export System Record, and using the required Destination Control Statement.

(2) If none of the ten general prohibitions is applicable to your reexport or export from abroad, no license is required and you should skip all remaining Steps.

(3) If one or more of the ten general prohibitions are applicable, continue with the remaining steps.

§ 732.4 STEPS REGARDING LICENSE EXCEPTIONS

(a) *Introduction to Steps for License Exceptions*

If your export or reexport is subject to the EAR and is subject to General Prohibitions One (Exports and Reexports), Two (Parts and Components Reexports), or Three (Foreign-Produced Direct Product Reexports), consider the steps listed in paragraph (b) of this section. If your export or reexport is subject to General Prohibitions Four (Denial Orders), Seven (U.S. Person Proliferation Activity), Eight (In-Transit), Nine (Orders, Terms, and Conditions), or Ten (Knowledge Violation to Occur), there are no License Exceptions available for your export or reexport. If your export is subject to General Prohibition Five (End-Use End-User), consult part 744 of the EAR. If your export or reexport is subject to General Prohibition Six (Embargo), consult part 746 of the EAR for applicable License Exceptions.

(b) *Steps for License Exceptions*

(1) **Step 20: Applicability of General Prohibitions.** Determine whether any one or more of the general prohibitions described in §736.2(b) of the EAR apply to your export or reexport. If no general prohibition applies to your export or reexport, then you may proceed with your export or reexport and need not review part 740 of the EAR regarding License Exceptions. You are reminded of your recordkeeping obligations related to the clearance of the U.S. Customs Service provided in parts 762 and 758 of the EAR.

(2) **Step 21: Applicability of restrictions on all License Exceptions.** Determine whether any one or more of the restrictions in §740.2 of the EAR applies to your export or reexport. If any one or more of these restrictions apply, there are no License Exceptions available to you, and you must either obtain a license or refrain from the export or reexport.

(3) **Step 22: Terms and conditions of the License Exceptions.**

(i) If none of the restrictions in §740.2 of the EAR applies, then review each of the License Exceptions to determine whether any one of them authorizes your export or reexport. Eligibility for License Exceptions is based on the item, the country of ultimate destination, the end-use, and the end-user, along with any special conditions imposed within a specific License Exception.

(ii) You may meet the conditions for more than one License Exception. Moreover, although you may not qualify for some License Exceptions you may qualify for others. Review the broadest License Exceptions first, and use any License Exception available to you. You are not required to use the most restrictive applicable License Exception. If you fail to qualify for the License Exception that you first consider, you may consider any other License Exception until

you have determined that no License Exception is available.

(iii) License Exceptions TMP, RPL, BAG, AVS, GOV, and TSU authorize exports notwithstanding the provisions of the CCL. List-based License Exceptions (LVS, GBS, CIV, TSR, and APP) are available only to the extent specified on the CCL. Some ECCNs contain License Exception STA exclusion paragraphs. Those paragraphs delineate items excluded from the License Exception STA provisions in § 740.20(c)(2) of the EAR. Part 740 of the EAR provides authorization for reexports only to the extent each License Exception expressly authorizes reexports. License Exception APR authorizes reexports only.

(iv) If you are exporting under License Exceptions GBS, CIV, LVS, STA, APP, TSR, or GOV, you should review §743.1 of the EAR to determine the applicability of certain reporting requirements. If you are exporting under License Exceptions LVS, TMP, RPL, STA, or GOV and your item is classified in the “600 series,” you should review § 743.4 of the EAR to determine the applicability of certain reporting requirements for conventional arms exports.

(4) Step 23: Scope of License Exceptions. Some License Exceptions are limited by country or by type of item.

(i) Countries are arranged in country groups for ease of reference. For a listing of country groups, please refer to Supplement No. 1 to part 740 of the EAR. Unless otherwise indicated in a License Exception, License Exceptions do not apply to any exports or reexports to embargoed destinations. If your export or reexport is subject to General Prohibition Six (Embargo) for embargoed destinations, License Exceptions are only available to the extent specifically provided in part 746 of the EAR concerning embargoed destinations.

(ii) Special commodity controls apply to short supply items. No License Exceptions described in part 740 of the EAR may be used for items listed on the CCL as controlled for Short Supply reasons. License Exceptions for short supply items are found in part 754 of the EAR.

(5) Step 24: Compliance with all terms and conditions. If a License Exception is available, you may proceed with your export or reexport. However, you must meet all the terms and conditions required by the License Exception that you determined authorized your export or reexport. You must also consult part 758 and 762 of the EAR to determine your recordkeeping and documentation requirements.

(6) Step 25: License requirements. If no License Exception is available, then you must either obtain a license before proceeding with your export or reexport or you must refrain from the proposed export or reexport.

(7) Step 26: License applications.

(i) If you are going to file a license application with BIS, you should first review the requirements in part 748 of the EAR. Exporters, reexporters, and transferors should review the instructions concerning applications and required support documents prior to submitting an application for a license.

(ii) If you are going to file a license application with BIS for the export, reexport, or in-country transfer for aircraft or military vessels controlled under ECCNs 0A606.a, 8A609.a, 8A620.a, 8A620.b, certain “spacecraft” controlled under ECCN subparagraphs 9A515.a.1, a.2, a.3, a.4 or 9A515.g, , ECCN 9A610.a, or technology under ECCNs 9E515.b, .d, .e, or .f, §740.20(g) permits you to request in the application that subsequent exports of the type of aircraft, spacecraft, military vessels, or technology at issue be eligible for export under License Exception STA. The types of “items” controlled under ECCNs 0A606.a, 8A609.a, 8A620.a, 8A620.b, certain spacecraft

controlled under ECCN subparagraphs 9A515.a.1, a.2, a.3, a.4 or 9A515.g, ECCN 9A610.a, and technology ECCNs 9E515.b, .d, .e, or .f, that have been determined to be eligible for License Exception STA pursuant to §740.20(g) are identified in the License Exceptions paragraphs of ECCNs 0A606, 8A609, 8A620, 9A610, 9A515, and 9E515. Supplement No. 2 to part 748, paragraph (w) (License Exception STA eligibility requests), contains the instructions for such applications.

Note 1 to paragraph (b)(7)(ii): If you intend to use License Exception STA, return to paragraphs (a) and then (b) of this section to review the Steps regarding the use of license exceptions.

§ 732.5 STEPS REGARDING ELECTRONIC EXPORT INFORMATION (EEI) REQUIREMENTS, DESTINATION CONTROL STATEMENTS, AND RECORDKEEPING.

(a) Step 27: Electronic Export Information (EEI) filing requirements

Exporters or agents authorized to file EEI to the Automated Export System (AES), should review § 758.1 of the EAR to determine when the EAR requires EEI to be filed and what EEI data elements the EAR requires to be included. More detailed information about EEI filing procedures and requirements may be found in the Bureau of Census Foreign Trade Regulations (FTR) at 15 CFR Part 30. Reexporters and firms exporting from abroad may skip Steps 27 through 29 and proceed directly to § 732.6 of the EAR.

(1) License code/license exception code (license code). You must report the correct license code that corresponds with your license authority (license or license exception) or designation (No License Required (NLR)) for your export on the

EEI filing, as appropriate. See § 758.1(g) of the EAR and 15 CFR 30.6(a)(23) and Part III of Appendix B to 15 CFR Part 30 of the FTR. Generally, conflicts of data elements with license exception criteria, e.g., ECCN or destination, will result in a fatal error in the AES system. By reporting a license code for a license exception on an EEI filing you are certifying that your transaction meets the criteria of that license exception. By reporting a license code of NLR you are certifying that no license is required for your export.

(2) License number. If you are exporting under the authority of a license, you must report the license number on the EEI filing. See 15 CFR 30.6(b)(5) of the FTR.

(3) Item description. You must report an item description identical to the item description on the license when a license is required, or report an item description sufficient in detail to permit review by the U.S. Government and verification of the Schedule B Number or the Harmonized Tariff Schedule of the United States (HTS) for license exception exports or exports for which No License is Required (NLR). See § 758.1(g) of the EAR; and 15 CFR 30.6(a)(13) of the FTR.

(4) Entering the ECCN. You must report the correct Export Control Classification Number (ECCN) or “EAR99” for items that are not classified under an ECCN on the EEI filing for all licensed and license exception exports, and “No License Required” (NLR) exports of items having a reason for control other than or in addition to anti-terrorism (AT). The only exception to this requirement would be the return of unwanted foreign origin items, meeting the provisions of License Exception TMP, under § 740.9(b)(3) of the EAR. See § 758.1(g) of the EAR and 15 CFR 30.6(b)(6) of the FTR.

(b) Step 28: Destination Control Statement

The Destination Control Statement (DCS) must be entered on the invoice and on the bill of lading,

air waybill, or other export control document that accompanies the shipment from its point of origin in the United States to the ultimate consignee or end-user abroad. The person responsible for preparation of those documents is responsible for entry of the DCS. The DCS is required for all exports from the United States of items on the Commerce Control List and is not required for items classified as EAR99, unless the export may be made under License Exception BAG or GFT (see part 740 of the EAR). DCS requirements do not apply to reexports. See § 758.6 of the EAR.

(c) Step 29: Recordkeeping

Records of transactions subject to the EAR must be maintained for five years in accordance with the recordkeeping provisions of part 762 of the EAR.

§ 732.6 STEPS FOR OTHER REQUIREMENTS

Sections 732.1 through 732.4 of this part are useful in determining the license requirements that apply to you. Other portions of the EAR impose other obligations and requirements. Some of them are:

(a) Requirements relating to the use of a license in §758.4 of the EAR.

(b) Obligations of carriers, forwarders, exporters and others to take specific steps and prepare and deliver certain documents to assure that items subject to the EAR are delivered to the destination to which they are licensed or authorized by a License Exception or some other provision of the regulations in §758.1 through §758.6 of the EAR.

(c) Duty of carriers to return or unload shipments at the direction of U.S. Government officials (see §758.8 of the EAR).

(d) [RESERVED]

(e) Recordkeeping requirements imposed in part 762 of the EAR.

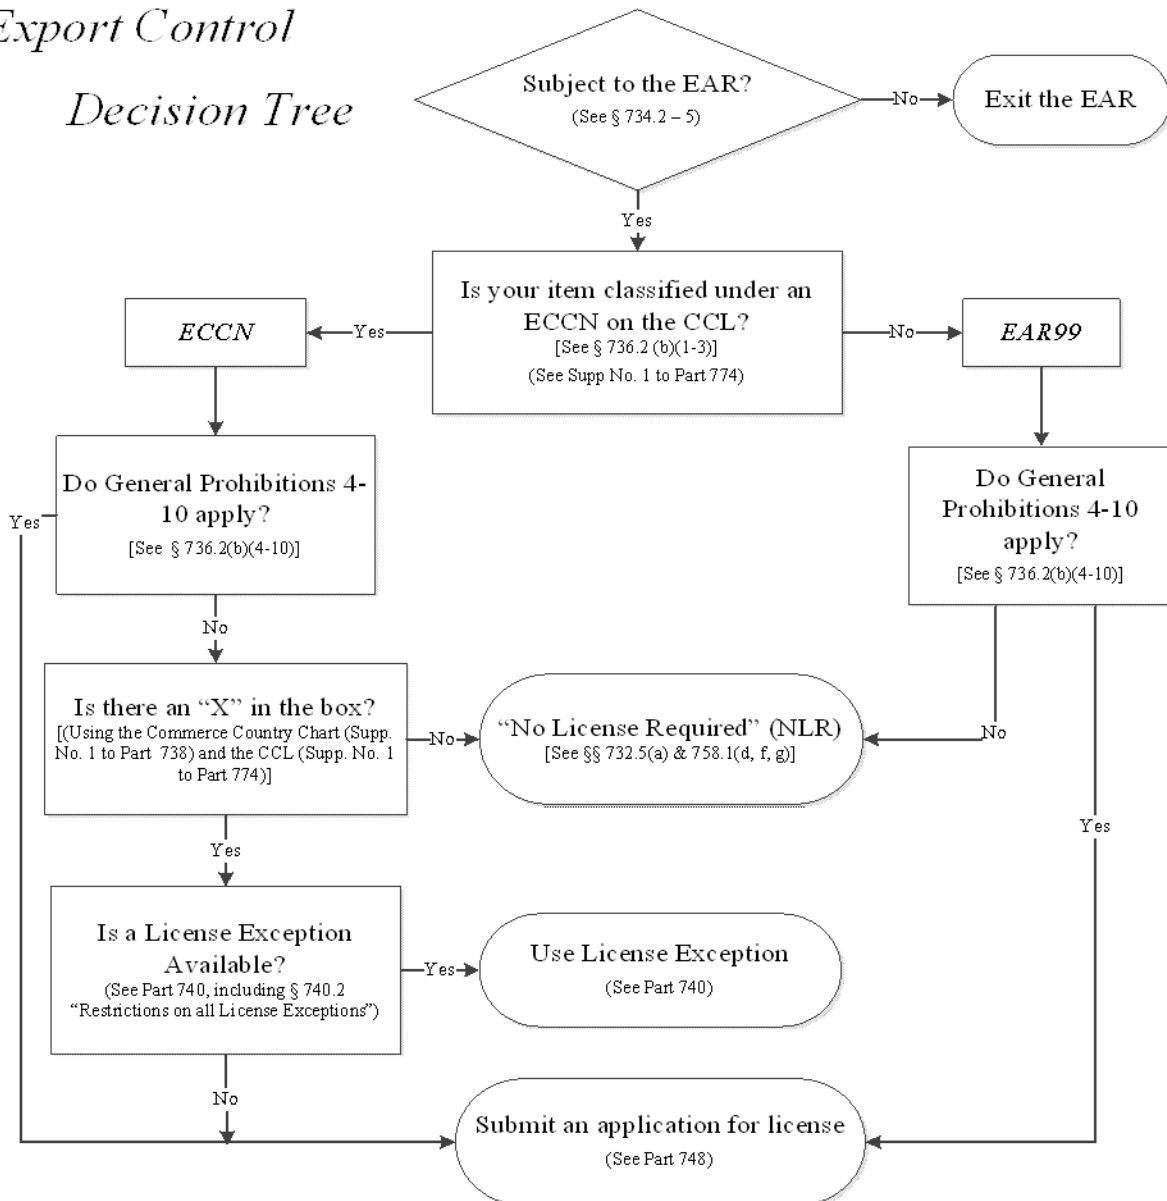

(f) Requirements of part 764 of the EAR to disclose facts that may come to your attention after you file a license application or make other statements to the government concerning a transaction or proposed transaction that is subject to the EAR.

(g) Certain obligations imposed by part 760 of the EAR on parties who receive requests to take actions related to foreign boycotts and prohibits certain actions relating to those boycotts.

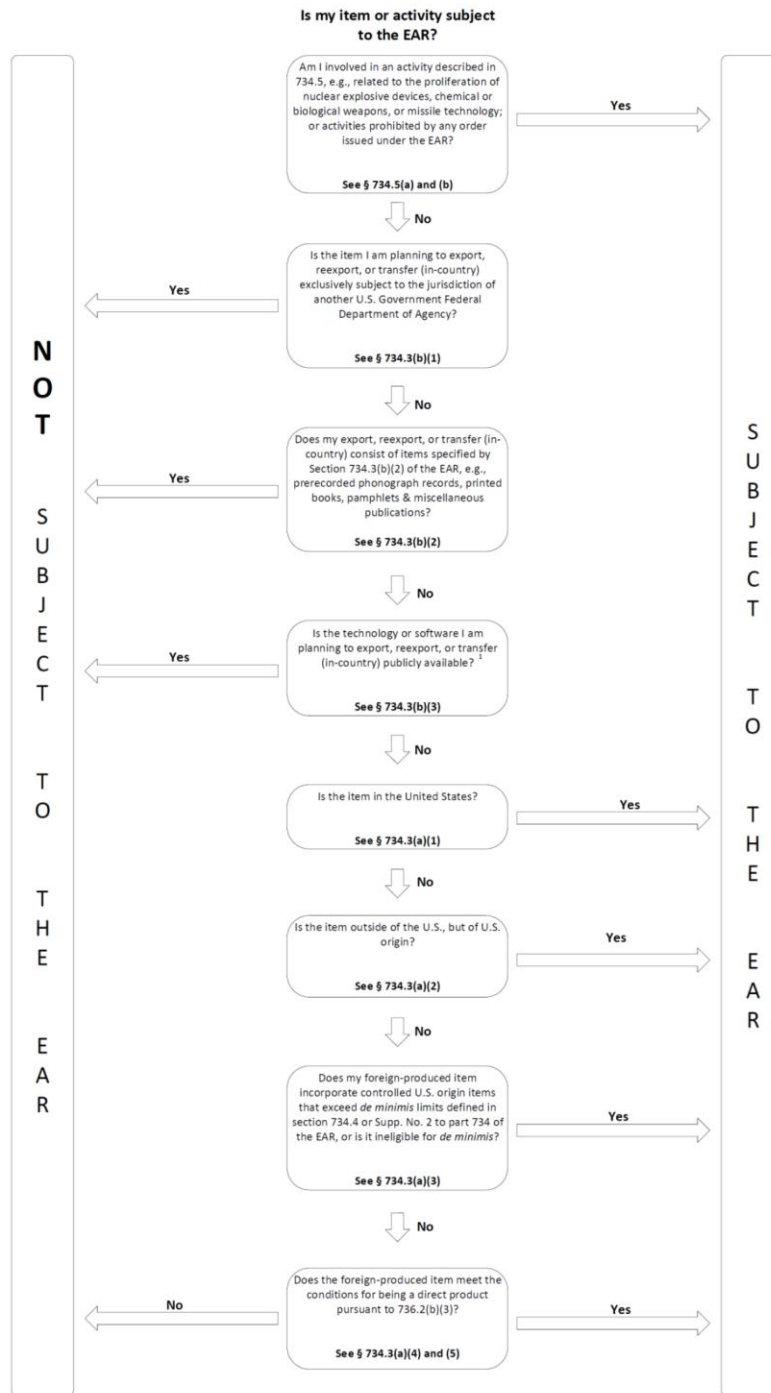

SUPPLEMENT NO. 1 TO PART 732 – EXPORT CONTROL DECISION TREE

SUPPLEMENT NO. 1 TO PART 732 – EXPORT CONTROL DECISION TREE

*Export Control
Decision Tree*

SUPPLEMENT NO. 2 TO PART 732 – SUBJECT TO THE EAR?

¹ Encryption source code in electronic form or media (e.g., computer diskette or CD ROM) remains subject to the EAR (see § 734.17). Publicly available encryption object code “software” classified under ECCN 5D002 is not subject to the EAR when the corresponding source code meets the criteria specified in § 742.15(b) of the EAR.

SUPPLEMENT NO. 3 TO PART 732 - BIS's "KNOW YOUR CUSTOMER" GUIDANCE AND RED FLAGS**"KNOW YOUR CUSTOMER" GUIDANCE**

Various requirements of the EAR are dependent upon a person's knowledge of the end-use, end-user, ultimate destination, or other facts relating to a transaction or activity. These provisions include the nonproliferation-related "catch-all" sections and the prohibition against proceeding with a transaction with knowledge that a violation of the EAR has occurred or is about to occur.

(a) BIS provides the following guidance on how individuals and firms should act under this knowledge standard. This guidance does not change or interpret the EAR.

(1) *Decide whether there are "red flags"*. Take into account any abnormal circumstances in a transaction that indicate that the export may be destined for an inappropriate end-use, end-user, or destination. Such circumstances are referred to as "red flags". Included among examples of red flags are orders for items that are inconsistent with the needs of the purchaser, a customer declining installation and testing when included in the sales price or when normally requested, or requests for equipment configurations that are incompatible with the stated destination (e.g., 120 volts in a country with 220 volts). Commerce has developed lists of such red flags that are not all-inclusive but are intended to illustrate the types of circumstances that should cause reasonable suspicion that a transaction will violate the EAR.

(2) *If there are "red flags", inquire*. If there are no "red flags" in the information that comes to your firm, you should be able to proceed with a transaction in reliance on information you have received. That is, absent "red flags" (or an express requirement in the EAR), there is no affirmative duty upon exporters to inquire, verify, or otherwise "go behind" the customer's

representations. However, when "red flags" are raised in information that comes to your firm, you have a duty to check out the suspicious circumstances and inquire about the end-use, end-user, or ultimate country of destination. The duty to check out "red flags" is not confined to the use of License Exceptions affected by the "know" or "reason to know" language in the EAR. Applicants for licenses are required by part 748 of the EAR to obtain documentary evidence concerning the transaction, and misrepresentation or concealment of material facts is prohibited, both in the licensing process and in all export control documents. You can rely upon representations from your customer and repeat them in the documents you file unless red flags oblige you to take verification steps.

(3) *Do not self-blind*. Do not cut off the flow of information that comes to your firm in the normal course of business. For example, do not instruct the sales force to tell potential customers to refrain from discussing the actual end-use, end-user, and ultimate country of destination for the product your firm is seeking to sell. Do not put on blinders that prevent the learning of relevant information. An affirmative policy of steps to avoid "bad" information would not insulate a company from liability, and it would usually be considered an aggravating factor in an enforcement proceeding.

(4) *Employees need to know how to handle "red flags"*. Knowledge possessed by an employee of a company can be imputed to a firm so as to make it liable for a violation. This makes it important for firms to establish clear policies and effective compliance procedures to ensure that such knowledge about transactions can be evaluated by responsible senior officials. Failure to do so could be regarded as a form of self-blinding.

(5) *Reevaluate all the information after the inquiry.* The purpose of this inquiry and reevaluation is to determine whether the "red flags" can be explained or justified. If they can, you may proceed with the transaction. If the "red flags" cannot be explained or justified and you proceed, you run the risk of having had "knowledge" that would make your action a violation of the EAR.

(6) *Refrain from the transaction or advise BIS and wait.* If you continue to have reasons for concern after your inquiry, then you should either refrain from the transaction or submit all the relevant information to BIS in the form of an application for a license or in such other form as BIS may specify.

(b) Industry has an important role to play in preventing exports and reexports contrary to the national security and foreign policy interests of the United States. BIS will continue to work in partnership with industry to make this front line of defense effective, while minimizing the regulatory burden on exporters. If you have any question about whether you have encountered a "red flag", you may contact: Office of Export Enforcement; (800) 424-2980 or Office of Exporter Services; (202) 482-4532.

RED FLAGS

Possible indicators that an unlawful diversion might be planned by your customer include the following:

1. The customer or purchasing agent is reluctant to offer information about the end-use of a product.
2. The product's capabilities do not fit the buyer's line of business; for example, a small bakery places an order for several sophisticated lasers.

3. The product ordered is incompatible with the technical level of the country to which the product is being shipped. For example, semiconductor manufacturing equipment would be of little use in a country without an electronics industry.
4. The customer has little or no business background.
5. The customer is willing to pay cash for a very expensive item when the terms of the sale call for financing.
6. The customer is unfamiliar with the product's performance characteristics but still wants the product.
7. Routine installation, training or maintenance services are declined by the customer.
8. Delivery dates are vague, or deliveries are planned for out-of-the-way destinations.
9. A freight forwarding firm is listed as the product's final destination.
10. The shipping route is abnormal for the product and destination.
11. Packaging is inconsistent with the stated method of shipment or destination.
12. When questioned, the buyer is evasive or unclear about whether the purchased product is for domestic use, export or reexport.
13. You receive an order for "parts" or "components" for an end item in 9x515 or the "600 series." The requested "parts" or "components" may be eligible for License Exception STA, another authorization, or may not require a destination-based license requirement for the country in question. However, the requested "parts" or "components" would be sufficient to service

one hundred of the 9x515 or “600 series” end items, but you “know” the country does not have those types of end items or only has two of those end items.

14. The customer indicates or the facts pertaining to the proposed export suggest that a 9x515 or “600 series” item may be reexported to a destination listed in Country Group D:5 (see Supplement No. 1 to part 740 of the EAR).

SUPPLEMENT NO. 2 TO PART 734 - GUIDELINES FOR *DE MINIMIS* RULES 1

§ 734.1 INTRODUCTION

(a) In this part, references to the Export Administration Regulations (EAR) are references to 15 CFR chapter VII, subchapter C. This part describes the scope of the Export Administration Regulations (EAR) and explains certain key terms and principles used in the EAR. This part provides the rules you need to use to determine whether items and activities are subject to the EAR. This part is the first step in determining your obligations under the EAR. If neither your item nor activity is subject to the EAR, then you do not have *any* obligations under the EAR and you do not need to review other parts of the EAR. If you already know that your item or activity is subject to the EAR, you do not need to review this part and you can go on to review other parts of the EAR to determine your obligations. This part also describes certain key terms and principles

used in the EAR. Specifically, it includes the following terms: “subject to the EAR”, “items subject to the EAR”, “export”, and “reexport”. These and other terms are also included in part 772 of the EAR, Definitions of Terms, and you should consult part 772 of the EAR for the meaning of terms used in the EAR. Finally, this part makes clear that compliance with the EAR does not relieve any obligations imposed under foreign laws.

(b) This part does not address any of the provisions set forth in part 760 of the EAR, Restrictive Trade Practices or Boycotts.

(c) This part does not define the scope of legal authority to regulate exports, including reexports, or activities found in the Export Administration Act and other statutes. What this part does do is set forth the extent to which such legal authority has been exercised through the EAR.

§ 734.2 SUBJECT TO THE EAR

(a) *Subject to the EAR - Definition*

(1) “*Subject to the EAR*” is a term used in the EAR to describe those items and activities over which BIS exercises regulatory jurisdiction under the EAR. Conversely, items and activities that are not subject to the EAR are outside the regulatory jurisdiction of the EAR and are not affected by these regulations. The items and activities subject to the EAR are described in §§ 734.2 through 734.5 and 734.9 of this part. You should review the Commerce Control List (CCL) and any applicable parts of the EAR to determine whether an item or activity is subject to the EAR. However, if you need help in determining whether an item or activity is subject to the EAR, see § 734.6 of this part. Publicly available technology and software not subject to the EAR are described in §§ 734.7, 734.8, 734.10, and supplement

no. 1 to this part.

(2) Items and activities subject to the EAR may also be controlled under export-related programs administered by other agencies. Items and activities subject to the EAR are not necessarily exempted from the control programs of other agencies. Although BIS and other agencies that maintain controls for national security and foreign policy reasons try to minimize overlapping jurisdiction, you should be aware that in some instances you may have to comply with more than one regulatory program.

(3) The term “subject to the EAR” should not be confused with licensing or other requirements imposed in other parts of the EAR. Just because an item or activity is subject to the EAR does not mean that a license or other requirement automatically applies. A license or other requirement applies only in those cases where other parts of the EAR impose a licensing or other requirement on such items or activities.

(b) *[Reserved]*

§ 734.3 ITEMS SUBJECT TO THE EAR

(a) Except for items excluded in paragraph (b) of this section, the following items are subject to the EAR:

(1) All items in the United States, including in a U.S. Foreign Trade Zone or moving intransit through the United States from one foreign country to another;

(2) All U.S. origin items wherever located;

(3) Foreign-made commodities that incorporate controlled U.S.-origin commodities, foreign-made commodities that are ‘bundled’ with controlled U.S.-origin software, foreign-made software that is commingled with controlled U.S.-origin software, and foreign-made

technology that is commingled with controlled U.S.-origin technology:

(i) In any quantity, as described in § 734.4(a) of this part; or

(ii) In quantities exceeding the *de minimis* levels, as described in §§ 734.4(c) or 734.4(d) of this part;

(4) Certain foreign-produced “direct products” of specified “technology” and “software,” as described in § 736.2(b)(3) of the EAR; and

NOTE to paragraph (a)(4): *Certain foreign-manufactured items developed or produced from U.S.-origin encryption items exported pursuant to License Exception ENC are subject to the EAR. See §740.17(a) of the EAR.*

(5) Certain foreign-produced “direct products” of a complete plant or any major component of a plant as described in § 736.2(b)(3) of the EAR.

(b) The following are not subject to the EAR:

(1) Items that are exclusively controlled for export or reexport by the following departments and agencies of the U.S. Government which regulate exports or reexports for national security or foreign policy purposes:

(i) *Department of State.* The International Traffic in Arms Regulations (22 CFR part 121) administered by the Directorate of Defense Trade Controls relate to defense articles and defense services on the U.S. Munitions List (22 CFR part 121). Section 38 of the Arms Export Control Act (22 U.S.C. 2778). (Also see paragraph (b)(1)(vi) of this section).

Note to paragraph (b)(1)(i): *If a defense article or service is controlled by the U.S. Munitions List set forth in the International Traffic in Arms Regulations, its export and temporary import is regulated by the Department of State. The*

President has delegated the authority to control defense articles and services for purposes of permanent import to the Attorney General. The defense articles and services controlled by the Secretary of State and the Attorney General collectively comprise the U.S. Munitions List under the Arms Export Control Act (AECA). As the Attorney General exercises independent delegated authority to designate defense articles and services for purposes of permanent import controls, the permanent import control list administered by the Department of Justice has been separately labeled the U.S. Munitions Import List (27 CFR Part 447) to distinguish it from the list set out in the International Traffic in Arms Regulations. In carrying out the functions delegated to the Attorney General pursuant to the AECA, the Attorney General shall be guided by the views of the Secretary of State on matters affecting world peace, and the external security and foreign policy of the United States.

(ii) *Treasury Department, Office of Foreign Assets Control (OFAC).* Regulations administered by OFAC implement broad controls and embargo transactions with certain foreign countries. These regulations include controls on exports and reexports to certain countries (31 CFR chapter V). Trading with the Enemy Act (50 U.S.C. app. section 1 *et seq.*), and International Emergency Economic Powers Act (50 U.S.C. 1701, *et seq.*)

(iii) *U.S. Nuclear Regulatory Commission (NRC).* Regulations administered by NRC control the export and reexport of commodities related to nuclear reactor vessels (10 CFR part 110). Atomic Energy Act of 1954, as amended (42 U.S.C. part 2011 *et seq.*).

(iv) *Department of Energy (DOE).* Regulations administered by DOE control the export and reexport of technology related to the production of special nuclear materials (10 CFR part 810). Atomic Energy Act of 1954, as amended (42 U.S.C. section 2011 *et seq.*).

(v) *Patent and Trademark Office (PTO).* Regulations administered by PTO provide for the export to a foreign country of unclassified

technology in the form of a patent application or an amendment, modification, or supplement thereto or division thereof (37 CFR part 5). BIS has delegated authority under the Export Administration Act to the PTO to approve exports and reexports of such technology which is subject to the EAR. Exports and reexports of such technology not approved under PTO regulations must comply with the EAR.

(vi) *Department of Defense (DoD) and Department of State Foreign Military Sales (FMS) Program.* Items that are subject to the EAR that are sold, leased or loaned by the Department of Defense to a foreign country or international organization under the FMS Program of the Arms Export Control Act pursuant to a Letter of Offer and Acceptance (LOA) authorizing such transfers are *not* “subject to the EAR,” but rather, are subject to the authority of the Arms Export Control Act.

(2) Pre-recorded phonograph records reproducing in whole or in part, the content of printed books, pamphlets, and miscellaneous publications, including newspapers and periodicals; printed books, pamphlets, and miscellaneous publications including bound newspapers and periodicals; children's picture and painting books; newspaper and periodicals, unbound, excluding waste; music books; sheet music; calendars and calendar blocks, paper; maps, hydrographical charts, atlases, gazetteers, globe covers, and globes (terrestrial and celestial); exposed and developed microfilm reproducing, in whole or in part, the content of any of the above; exposed and developed motion picture film and soundtrack; and advertising printed matter exclusively related thereto.

(3) Information and “software” that:

- (i) Are published, as described in § 734.7;
- (ii) Arise during, or result from, fundamental research, as described in § 734.8;
- (iii) Are released by instruction in a catalog course or associated teaching laboratory of an academic institution;

(iv) Appear in patents or open (published) patent applications available from or at any patent office, unless covered by an invention secrecy order, or are otherwise patent information as described in § 734.10;

(v) Are non-proprietary system descriptions; or

(vi) Are telemetry data as defined in Note 2 to Category 9, Product Group E (see Supplement No. 1 to part 774 of the EAR).

NOTE TO PARAGRAPHS (b)(2) AND (b)(3): *A printed book or other printed material setting forth encryption source code is not itself subject to the EAR (see § 734.3(b)(2)). However, notwithstanding § 734.3(b)(2), encryption source code in electronic form or media (e.g., computer diskette or CD ROM) remains subject to the EAR (see § 734.17)). Publicly available encryption object code “software” classified under ECCN 5D002 is not subject to the EAR when the corresponding source code meets the criteria specified in § 742.15(b) of the EAR.*

NOTE TO PARAGRAPH (b)(3): *Except as set forth in part 760 of this title, information that is not within the scope of the definition of “technology” (see § 772.1 of the EAR) is not subject to the EAR.*

(c) “Items subject to the EAR” consist of the items listed on the Commerce Control List (CCL) in part 774 of the EAR and all other items which meet the definition of that term. For ease of reference and classification purposes, items subject to the EAR which are not listed on the CCL are designated as “EAR99.” Items subject to temporary CCL controls are classified under the ECCN 0Y521 series (i.e., 0A521, 0B521, 0C521, 0D521, and 0E521) pursuant to § 742.6(a)(8) of the EAR, while a determination is made as to whether classification under a revised or new ECCN, or an EAR99 designation, is appropriate.

(d) Commodity classification determinations and advisory opinions issued by BIS are not, and may not be relied upon as, determinations that the items in question are “subject to the EAR,” as

described in §748.3 of the EAR.

(e) Items subject to the EAR may be exported, reexported, or transferred in country under licenses, agreements, or other approvals from the Department of State's Directorate of Defense Trade Controls pursuant to §§ 120.5(b) and 126.6(c) of the International Traffic in Arms Regulations (ITAR) (22 CFR 120.5(b) and 126.6(c)). Exports, reexports, or in-country transfers not in accordance with the terms and conditions of a license, agreement, or other approval under § 120.5(b) of the ITAR requires separate authorization from BIS. Exports, reexports, or in-country transfers of items subject to the EAR under a Foreign Military Sales case that exceed the scope of § 126.6(c) of the ITAR or the scope of actions made by the Department of State's Office of Regional Security and Arms Transfers require separate authorization from BIS.

§ 734.4 DE MINIMIS U.S. CONTENT

(a) *Items for which there is no de minimis level*

(1) There is no *de minimis* level for the export from a foreign country of a foreign-made computer with an Adjusted Peak Performance (APP) exceeding that listed in ECCN 4A003.b and containing U.S.-origin controlled semiconductors (other than memory circuits) classified under ECCN 3A001 to Computer Tier 3 destinations; or exceeding an APP listed in ECCN 4A994.b and containing U.S.-origin controlled semiconductors (other than memory circuits) classified under ECCN 3A001 or high speed interconnect devices (ECCN 4A994.j) to Cuba, Iran, North Korea, and Syria.

(2) Foreign produced encryption technology that incorporates U.S. origin encryption technology controlled by ECCN 5E002 is subject to the EAR regardless of the amount of U.S. origin content

(3) [RESERVED]

(4) There is no *de minimis* level for U.S.-origin technology controlled by ECCN 9E003.a.1

through a.8, h, .i, and .k, when redrawn, used, consulted, or otherwise commingled abroad.

(5) There is no *de minimis* level for foreign-made "military commodities" incorporating one or more of the commodities described in ECCN 0A919.a.1 when destined for a country listed in Country Group D:5 of Supplement No. 1 to part 740 of the EAR.

(6) 9x515 and "600 series"

(i) There is no *de minimis* level for foreign-made items that incorporate U.S.-origin 9x515 or "600 series" items enumerated or otherwise described in paragraphs .a through .x of a 9x515 or "600 series" ECCN when destined for a country listed in Country Group D:5 of Supplement No. 1 to part 740 of the EAR.

(ii) There is no *de minimis* level for foreign-made items that incorporate U.S.-origin 9x515 or "600 series" .y items when destined for a country listed in Country Group E:1 or E:2 of Supplement No. 1 to part 740 of the EAR or for the People's Republic of China (PRC).

(7) Under certain rules issued by the Office of Foreign Assets Control, certain exports from abroad by U.S.-owned or controlled entities may be prohibited notwithstanding the *de minimis* provisions of the EAR. In addition, the *de minimis* rules do not relieve U.S. persons of the obligation to refrain from supporting the proliferation of weapons of mass-destruction and missiles as provided in § 744.6 of the EAR.

(b) *Special requirements for certain Category 5, Part 2 items* Non-U.S.-made items that incorporate U.S.-origin items that are listed in this paragraph are subject to the EAR unless they meet the *de minimis* level and destination requirements of paragraph (c) or (d) of this section and the requirements of this paragraph.

(1) The U.S.-origin commodities or software, if controlled under ECCN 5A002, ECCN 5B002, equivalent or related software therefor classified under ECCN 5D002, and "cryptanalytic items" or digital forensics items (investigative tools)

classified under ECCN 5A004 or 5D002, must have been:

(i) Publicly available encryption source code classified under ECCN 5D002 that has met the criteria specified in § 742.15(b), see § 734.3(b)(3) of the EAR. Such source code does not have to be counted as controlled U.S.-origin content in a *de minimis* calculation;

(ii) Authorized for License Exception ENC by BIS after classification pursuant to § 740.17(b)(3) of the EAR;

(iii) Authorized for License Exception ENC by BIS after classification pursuant to § 740.17(b)(2) of the EAR, and the non-U.S.-made product will not be sent to any destination in Country Groups E:1 and E:2 in Supplement No. 1 to part 740 of the EAR; or

(iv) Authorized for License Exception ENC pursuant to § 740.17(b)(1) of the EAR.

(2) U.S.-origin encryption items classified under ECCNs 5A992.c, 5D992.c, or 5E992.b.

NOTE to paragraph (b): See Supplement No. 2 to this part for *de minimis* calculation procedures and reporting requirements.

(c) 10% De Minimis Rule

Except as provided in paragraphs (a) and (b)(1)(iii) of this section and subject to the provisions of paragraphs (b)(1)(i), (b)(1)(ii) and (b)(2) of this section, the following reexports are not subject to the EAR when made to any country in the world. See Supplement No. 2 of this part for guidance on calculating values.

(1) Reexports of a foreign-made commodity incorporating controlled U.S.-origin commodities or ‘bundled’ with U.S.-origin software valued at 10% or less of the total value of the foreign-made commodity;

NOTES to paragraph (c)(1):

(1) *U.S.-origin software is not eligible for the*

de minimis exclusion and is subject to the EAR when exported or reexported separately from (i.e., not bundled or incorporated with) the foreign-made item.

(2) For the purposes of this section, ‘bundled’ means software that is reexported together with the item and is configured for the item, but is not necessarily physically integrated into the item.

(3) The *de minimis* exclusion under paragraph (c)(1) only applies to software that is listed on the Commerce Control List (CCL) and has a reason for control of anti-terrorism (AT) only or software that is designated as EAR99 (subject to the EAR, but not listed on the CCL). For all other software, an independent assessment of whether the software by itself is subject to the EAR must be performed.

(2) Reexports of foreign-made software incorporating controlled U.S.-origin software valued at 10% or less of the total value of the foreign-made software; or

(3) Reexports of foreign technology commingled with or drawn from controlled U.S.-origin technology valued at 10% or less of the total value of the foreign technology. Before you may rely upon the *de minimis* exclusion for foreign-made technology commingled with controlled U.S.-origin technology, you must file a one-time report. See Supplement No. 2 to part 734 for submission requirements.

(d) 25% De Minimis Rule

Except as provided in paragraph (a) of this section and subject to the provisions of paragraph (b) of this section, the following reexports are not subject to the EAR when made to countries other than those listed in Country Group E:1 or E:2 of supplement no. 1 to part 740 of the EAR. See supplement no. 2 to this part for guidance on calculating values.

(1) Reexports of a foreign-made commodity incorporating controlled U.S.-origin commodities or ‘bundled’ with U.S.-origin software valued at 25% or less of the total value

of the foreign-made commodity;

NOTES to paragraph (d)(1):

(1) *U.S.-origin software is not eligible for the de minimis exclusion and is subject to the EAR when exported or reexported separately from (i.e., not bundled or incorporated with) the foreign-made item.*

(2) *For the purposes of this section, ‘bundled’ means software that is reexported together with the item and is configured for the item, but is not necessarily physically integrated into the item.*

(3) *The de minimis exclusion under paragraph (d)(1) only applies to software that is listed on the Commerce Control List (CCL) and has a reason for control of anti-terrorism (AT) only or software that is classified as EAR99 (subject to the EAR, but not listed on the CCL). For all other software, an independent assessment of whether the software by itself is subject to the EAR must be performed.*

(2) Reexports of foreign-made software incorporating controlled U.S.-origin software valued at 25% or less of the total value of the foreign-made software; or

(3) Reexports of foreign technology commingled with or drawn from controlled U.S.-origin technology valued at 25% or less of the total value of the foreign technology. Before you may rely upon the *de minimis* exclusion for foreign-made technology commingled with controlled U.S.-origin technology, you must file a one-time report. See Supplement No. 2 to part 734 for submission requirements.

(e) You are responsible for making the necessary calculations to determine whether the *de minimis* provisions apply to your situation. See Supplement No. 2 to part 734 for guidance regarding calculation of U.S. controlled content.

(f) See §770.3 of the EAR for principles that apply to commingled U.S.-origin technology and software.

(g) Recordkeeping requirement

The method by which you determined the percentage of U.S. content in foreign software or technology must be documented and retained in your records in accordance with the recordkeeping requirements in part 762 of the EAR. Your records should indicate whether the values you used in your calculations are actual arms-length market prices or prices derived from comparable transactions or costs of production, overhead, and profit.

§ 734.5 ACTIVITIES OF U.S. AND FOREIGN PERSONS SUBJECT TO THE EAR

The following kinds of activities are subject to the EAR:

(a) Specific activities of “U.S. persons,” wherever located, related to the proliferation of nuclear explosive devices, “missiles,” chemical or biological weapons, whole plants for chemical weapons precursors, and certain military-intelligence end uses and end users as described in § 744.6 of the EAR.

(b) Activities of U.S. or foreign persons prohibited by any order issued under the EAR, including a Denial Order issued pursuant to part 766 of the EAR.

§ 734.6 ASSISTANCE AVAILABLE FROM BIS FOR DETERMINING LICENSING AND OTHER REQUIREMENTS

(a) If you are not sure whether a commodity, software, technology, or activity “subject to the EAR” is subject to licensing or other requirements under the EAR, you may ask BIS for an advisory opinion or a commodity classification determination. In order to determine whether an item is “subject to the ITAR,” you should review the ITAR’s United States Munitions List (see 22 CFR §§ 120.3, 120.6 and 121.1). You may also submit a request

to the Department of State, Directorate of Defense Trade Controls, for a formal jurisdictional determination regarding the commodity, software, technology, or activity at issue; or in ITAR terms, the defense article, technical data or defense service at issue (see 22 CFR 120.4).

(b) As the agency responsible for administering the EAR, BIS is the only agency that has the responsibility for determining whether an item or activity is subject to the EAR and, if so, what licensing or other requirements apply under the EAR. Such a determination only affects EAR requirements, and does not affect the applicability of any other regulatory programs.

(c) If you need help in determining BIS licensing or other requirements, you may ask BIS for help by following the procedures described in §748.3 of the EAR.

§ 734.7 PUBLISHED

(a) Except as set forth in paragraphs (b) and (c) of this section, unclassified “technology” or “software” is “published,” and is thus not “technology” or “software” subject to the EAR, when it has been made available to the public without restrictions upon its further dissemination such as through any of the following:

- (1)** Subscriptions available without restriction to any individual who desires to obtain or purchase the published information;
- (2)** Libraries or other public collections that are open and available to the public, and from which the public can obtain tangible or intangible documents;
- (3)** Unlimited distribution at a conference, meeting, seminar, trade show, or exhibition, generally accessible to the interested public;
- (4)** Public dissemination (*i.e.*, unlimited distribution) in any form (e.g., not necessarily in published form), including posting on the Internet

on sites available to the public; or

(5) Submission of a written composition, manuscript, presentation, computer-readable dataset, formula, imagery, algorithms, or some other representation of knowledge with the intention that such information will be made publicly available if accepted for publication or presentation:

(i) To domestic or foreign co-authors, editors, or reviewers of journals, magazines, newspapers or trade publications;

(ii) To researchers conducting fundamental research; or

(iii) To organizers of open conferences or other open gatherings.

(b) Published encryption software classified under ECCN 5D002 remains subject to the EAR unless it is publicly available encryption object code software classified under ECCN 5D002 and the corresponding source code meets the criteria specified in § 742.15(b) of the EAR.

(c) The following remains subject to the EAR: “software” or “technology” for the production of a firearm, or firearm frame or receiver, controlled under ECCN 0A501, that is made available by posting on the internet in an electronic format, such as AMF or G-code, and is ready for insertion into a computer numerically controlled machine tool, additive manufacturing equipment, or any other equipment that makes use of the “software” or “technology” to produce the firearm frame or receiver or complete firearm.

§ 734.8 “TECHNOLOGY” OR “SOFTWARE” THAT ARISES DURING, OR RESULTS FROM, FUNDAMENTAL RESEARCH.

(a) Fundamental research

“Technology” or “software” that arises during, or results from, fundamental research and is intended to be published is not subject to the

EAR.

NOTE 1 TO PARAGRAPH (a): *This paragraph does not apply to “technology” or “software” subject to the EAR that is released to conduct fundamental research. (See § 734.7(a)(5)(ii) for information released to researchers that is “published.”)*

NOTE 2 TO PARAGRAPH (a): *There are instances in the conduct of research where a researcher, institution or company may decide to restrict or protect the release or publication of “technology” or “software” contained in research results. Once a decision is made to maintain such “technology” or “software” as restricted or proprietary, the “technology” or “software,” if within the scope of § 734.3(a), becomes subject to the EAR.*

(b) Prepublication review

“Technology” or “software” that arises during, or results, from fundamental research is intended to be published to the extent that the researchers are free to publish the “technology” or “software” contained in the research without restriction. “Technology” or “software” that arises during or results from fundamental research subject to prepublication review is still intended to be published when:

(1) Prepublication review is conducted solely to ensure that publication would not compromise patent rights, so long as the review causes no more than a temporary delay in publication of the research results;

(2) Prepublication review is conducted by a sponsor of research solely to insure that the publication would not inadvertently divulge proprietary information that the sponsor has furnished to the researchers; or

(3) With respect to research conducted by scientists or engineers working for a Federal agency or a Federally Funded Research and Development Center (FFRDC), the review is conducted within any appropriate system devised by the agency or the FFRDC to control the release

of information by such scientists and engineers.

NOTE 1 TO PARAGRAPH (b): *Although “technology” or “software” arising during or resulting from fundamental research is not considered intended to be published if researchers accept restrictions on its publication, such “technology” or “software” will nonetheless qualify as “technology” or “software” arising during or resulting from fundamental research once all such restrictions have expired or have been removed.*

NOTE 2 TO PARAGRAPH (b): *Research that is voluntarily subjected to U.S. government prepublication review is considered “intended to be published” when the research is released consistent with the prepublication review and any resulting controls.*

NOTE 3 TO PARAGRAPH (b): *“Technology” or “software” resulting from U.S. government funded research that is subject to government-imposed access and dissemination or other specific national security controls qualifies as “technology” or “software” resulting from fundamental research, provided that all government-imposed national security controls have been satisfied and the researchers are free to publish the “technology” or “software” contained in the research without restriction. Examples of specific national security controls include requirements for prepublication review by the Government, with right to withhold permission for publication; restrictions on prepublication dissemination of information to non-U.S. citizens or other categories of persons; or restrictions on participation of non-U.S. citizens or other categories of persons in the research. A general reference to one or more export control laws or regulations or a general reminder that the Government retains the right to classify is not a specific national security control.*

(c) Fundamental research definition

Fundamental research means research in science, engineering, or mathematics, the results of which ordinarily are published and shared broadly within the research community, and for which the

researchers have not accepted restrictions for proprietary or national security reasons.

§ 734.9 FOREIGN-DIRECT PRODUCT (FDP) RULES

Foreign-produced items located outside the United States are subject to the EAR when they are a “direct product” of specified “technology” or “software,” or are produced by a plant or ‘major component’ of a plant that itself is a “direct product” of specified “technology” or “software.” If a foreign-produced item is subject to the EAR, then you should separately determine the license requirements that apply to that foreign-produced item (e.g., by assessing the item classification, destination, end-use, and end-user in the relevant transaction). Not all transactions involving foreign-produced items that are subject to the EAR require a license. Those transactions that do require a license may be eligible for a license exception.

(a) Definitions

The terms defined in this paragraph are specific to § 734.9 of the EAR. These terms are indicated by single quotation marks. Terms that are in double quotation marks are defined in part 772 of the EAR.

Major Component: A major component of a plant located outside the United States means “equipment” that is essential to the “production” of an item, including testing “equipment.”

(b) National Security FDP rule

A foreign-produced item is subject to the EAR if it meets both the product scope in paragraph (b)(1) of this section and the country scope in paragraph (b)(2) of this section.

(1) Product scope of National Security FDP rule. The product scope applies if a foreign-produced item meets the conditions of either paragraph (b)(1)(i) or (ii) of this section.

(i) “Direct product” of “technology” or “software.” A foreign-produced item meets the

product scope of this paragraph if it meets both of the following conditions:

(A) The foreign-produced item is the “direct product” of U.S.-origin “technology” or “software” that requires a written assurance as a supporting document for a license, as defined in paragraph (o)(3)(i) of supplement no. 2 to part 748 of the EAR, or as a precondition for the use of License Exception TSR at §740.6 of the EAR; and

(B) The foreign-produced item is subject to national security controls as designated in the applicable ECCN of the Commerce Control List in part 774 of the EAR.

(ii) “Direct product” of a complete plant or ‘major component’ of a plant. A foreign-produced item meets the product scope of this paragraph if it meets both of the following conditions:

(A) The foreign-produced item is a “direct product” of a complete plant or ‘major component’ of a plant that itself is the “direct product” of U.S.-origin “technology” that requires a written assurance as a supporting document for a license or as a precondition for the use of License Exception TSR in §740.6 of the EAR; and

(B) The foreign-produced item is subject to national security controls as designated on the applicable ECCN of the Commerce Control List at part 774 of the EAR.

(2) Country scope of National Security FDP rule. A foreign-produced item meets the country scope of this paragraph if its destination is listed in Country Group D:1, E:1, or E:2 (See supplement no.1 to part 740 of the EAR).

(c) 9x515 FDP rule

A foreign-produced item is subject to the EAR if it meets both the product scope in paragraph (c)(1) of this section and the country scope in paragraph (c)(2) of this section.

(1) Product scope of 9x515 FDP rule. The product scope applies if a foreign-produced item

meets the conditions of either paragraph (c)(1)(i) or (ii) of this section.

(i) “Direct product” of “technology” or “software.” A foreign-produced item meets the product scope of this paragraph if it meets both of the following conditions:

(A) The foreign-produced item is the “direct product” of U.S.-origin “technology” or “software” that is specified in ECCN 9D515 or 9E515; *and*

(B) The foreign-produced item is specified in a 9x515 ECCN.

(ii) “Direct product” of a complete plant or ‘major component’ of a plant. A foreign-produced item meets the product scope of this paragraph if it meets both of the following conditions:

(A) The foreign-produced item is a “direct product” of a complete plant or any ‘major component’ of a plant that itself is the “direct product” of U.S.-origin “technology” specified in ECCN 9E515; *and*

(B) The foreign-produced item is specified in a 9x515 ECCN.

(2) Country scope of 9x515 FDP rule. A foreign produced item meets the country scope of this paragraph if its destination is listed in Country Group D:5, E:1, or E:2 (see supplement no.1 to part 740 of the EAR).

(d) “600 series” FDP rule

A foreign-produced item is subject to the EAR if it meets both the product scope in paragraph (d)(1) of this section and the country scope in paragraph (d)(2) of this section.

Note to introductory paragraph (d): *As described in the CCL, ECCN 0A919 is included in this paragraph because it includes the “direct product” of “600 series” “technology” or “software”.*

(1) Product scope of “600 series” FDP rule. The product scope applies if a foreign-produced

item meets the conditions of either paragraph (d)(1)(i) or (ii) of this section.

(i) “Direct product” of “technology” or “software.” A foreign-produced item meets the product scope of this paragraph if it meets both of the following conditions:

(A) The foreign-produced item is the “direct product” of U.S.-origin “technology” or “software” that is specified in a “600 series” ECCN; *and*

(B) The foreign-produced item is specified in a “600 series” ECCN or ECCN 0A919.

(ii) “Direct product” of a complete plant or ‘major component’ of a plant. Foreign-produced items meet the product scope of this paragraph if they meet both of the following conditions:

(A) The foreign-produced item is the “direct product” of a complete plant or ‘major component’ of a plant that itself is the “direct product” of U.S.-origin “technology” that is specified in a “600 series” ECCN; *and*

(B) The foreign produced item is specified in a “600 series” ECCN.

(2) Country scope of “600 series” FDP rule. A foreign-produced item meets the country scope of this paragraph if it is destined to a country listed in Country Group D:1, D:3, D:4, D:5, E:1, or E:2 (see supplement no.1 to part 740 of the EAR).

(e) Entity List FDP rule

A foreign-produced item is subject to the EAR if it meets the product scope and end-user scope in either Entity List FDP rule Footnote 1 provision in paragraph (e)(1) of this section or the Entity List FDP rule Footnote 4 provision in paragraph (e)(2) of this section.

(1) Entity List FDP rule: Footnote 1. A foreign-produced item is subject to the EAR if it meets both the product scope in paragraph (e)(1)(i) of this section and the end-user scope in paragraph (e)(1)(ii) of this section. See § 744.11(a)(2)(i) of the EAR for license requirements, license review policy, and license exceptions applicable to

foreign-produced items that are subject to the EAR pursuant to this paragraph (e)(1).

(i) Product Scope Entity List FDP rule: Footnote 1. The product scope applies if a foreign-produced item meets the conditions of either paragraph (e)(1)(i)(A) or (B) of this section.

(A) “Direct product” of “technology” or “software.” A foreign-produced item meets the product scope of this paragraph if the foreign-produced item is a “direct product” of “technology” or “software” subject to the EAR and specified in ECCN 3D001, 3D991, 3E001, 3E002, 3E003, 3E991, 4D001, 4D993, 4D994, 4E001, 4E992, 4E993, 5D001, 5D991, 5E001, or 5E991 of the Commerce Control List (CCL) in supplement no. 1 to part 774 of the EAR; or

(B) Product of a complete plant or ‘major component’ of a plant that is a “direct product.” A foreign-produced item meets the product scope of this paragraph if the foreign-produced item is produced by any plant or ‘major component’ of a plant that is located outside the United States, when the plant or ‘major component’ of a plant, whether made in the U.S. or a foreign country, itself is a “direct product” of U.S.-origin “technology” or “software” that is specified in ECCN 3D001, 3D991, 3E001, 3E002, 3E003, 3E991, 4D001, 4D993, 4D994, 4E001, 4E992, 4E993, 5D001, 5D991, 5E001, or 5E991 of the CCL.

Note 2 to paragraph (e)(1)(i): A foreign-produced item includes any foreign-produced wafer whether finished or unfinished.

(ii) End-user scope of the Entity List FDP rule: Footnote 1. A foreign-produced item meets the end-user scope of this paragraph if there is “knowledge” that:

(A) Activities involving Footnote 1 designated entities. The foreign-produced item will be incorporated into, or will be used in the “production” or “development” of any “part,” “component,” or “equipment” produced, purchased, or ordered by any entity with a footnote 1 designation in the license requirement

column of the Entity List in Supplement No. 4 to part 744 of the EAR; or

(B) Footnote 1 designated entities as transaction parties. Any entity with a footnote 1 designation in the license requirement column of the Entity List in Supplement No. 4 to part 744 of the EAR is a party to any transaction involving the foreign-produced item, e.g., as a “purchaser,” “intermediate consignee,” “ultimate consignee,” or “end-user.”

(2) Entity List FDP rule: Footnote 4. A foreign-produced item is subject to the EAR if it meets both the product scope in paragraph (e)(2)(i) of this section and the end-user scope in paragraph (e)(2)(ii) of this section. See § 744.11(a)(2)(ii) of the EAR for license requirements, license review policy, and license exceptions applicable to foreign-produced items that are subject to the EAR pursuant to this paragraph (e)(2).

(i) Product Scope Entity List FDP rule: Footnote 4. The product scope applies if a foreign-produced item meets the conditions of either paragraph (e)(2)(i)(A) or (B) of this section.

(A) “Direct product” of “technology” or “software.” The foreign-produced item is a “direct product” of “technology” or “software” subject to the EAR and specified in ECCN 3D001, 3D991, 3E001, 3E002, 3E003, 3E991, 4D001, 4D993, 4D994, 4E001, 4E992, 4E993, 5D001, 5D002, 5D991, 5E001, 5E002, or 5E991 of the CCL; or

(B) Product of plant or ‘major component’ that is a “direct product.” The foreign-produced item is produced by any plant or ‘major component’ of a plant when the plant or ‘major component’ of a plant, whether made in the U.S. or a foreign country, itself is a “direct product” of U.S.-origin “technology” or “software” that is specified in ECCN 3D001, 3D991, 3E001, 3E002, 3E003, 3E991, 4D001, 4D993, 4D994, 4E001, 4E992, 4E993, 5D001, 5D991, 5E001, 5E991, 5D002, or 5E002 of the CCL.

(ii) End user scope of the Entity List FDP rule: Footnote 4. A foreign-produced item meets

the end-user scope of this paragraph if there is “knowledge” that:

(A) *Activities involving Footnote 4 designated entities.* The foreign-produced item will be incorporated into, or will be used in the “production” or “development” of any “part,” “component,” or “equipment” produced, purchased, or ordered by any entity with a footnote 4 designation in the license requirement column of the Entity List in supplement no. 4 to part 744 of the EAR; *or*

(B) *Footnote 4 designated entities as transaction parties.* Any entity with a footnote 4 designation in the license requirement column of the Entity List in supplement no. 4 to part 744 of the EAR is a party to any transaction involving the foreign-produced item, *e.g.*, as a “purchaser,” “intermediate consignee,” “ultimate consignee,” or “end-user.”

(f) Russia/Belarus FDP rule

A foreign-produced item is subject to the EAR if it meets both the product scope in paragraph (f)(1) of this section and the destination scope in paragraph (f)(2) of this section. See § 746.8 of the EAR for license requirements, license review policy, and license exceptions applicable to foreign-produced items that are subject to the EAR pursuant to this paragraph (f).

(1) Product scope of Russia/Belarus FDP rule. The product scope applies if a foreign-produced item meets the conditions of either paragraph (f)(1)(i) or (ii) of this section.

(i) “Direct product” of “technology” or “software.” A foreign-produced item meets the product scope of this paragraph (f)(1)(i) if the foreign-produced item meets both of the following conditions:

(A) The foreign-produced item is the “direct product” of U.S.-origin “technology” or “software” subject to the EAR that is specified in any ECCN in product groups D or E of the CCL; and

(B) The foreign-produced item is specified in any ECCN on the CCL or in supplement no. 6 or 7 to part 746 of the EAR; or

(ii) “Direct product” of a complete plant or ‘major component’ of a plant. A foreign-produced item meets the product scope of this paragraph (f)(1)(ii) if it meets both of the following conditions:

(A) The foreign-produced item is produced by any plant or ‘major component’ of a plant that is located outside the United States, when the plant or ‘major component’ of a plant, whether made in the United States or a foreign country, itself is a “direct product” of U.S.-origin “technology” or “software” subject to the EAR that is specified in any ECCN in product groups D or E of the CCL; and

(B) The foreign-produced item is specified in any ECCN on the CCL or in supplement no. 6 or 7 to part 746 of the EAR.

(2) Destination scope of the Russia/Belarus FDP rule. A foreign-produced item meets the destination scope of this paragraph (f)(2) if there is “knowledge” that the foreign-produced item is destined to Russia or Belarus or will be incorporated into or used in the “production” or “development” of any “part,” “component,” or “equipment” specified in any ECCN on the CCL or in supplement no. 6 or 7 to part 746 of the EAR and produced in or destined to Russia or Belarus.

(g) Russia/Belarus-Military End User FDP rule

A foreign-produced item is subject to the EAR if it meets both the product scope in paragraph (g)(1) of this section and the end-user scope in paragraph (g)(2) of this section. See § 746.8 of the EAR for license requirements, license review policy, and license exceptions applicable to foreign-produced items that are subject to the EAR pursuant to this paragraph (g).

(1) Product Scope of Russia/Belarus-Military End User FDP rule. The product scope applies

if a foreign-produced item meets the conditions of either paragraph (g)(1)(i) or (ii) of this section.

(i) “Direct product” of “technology” or “software.” A foreign-produced item meets the product scope of this paragraph (g)(1)(i) if the foreign-produced item is a “direct product” of “technology” or “software” subject to the EAR and specified in any ECCN in product groups D or E in any categories of the CCL; or

(ii) “Direct product” of a complete plant or ‘major component’ of a plant. A foreign-produced item meets the product scope of this paragraph (g)(1)(ii) if the foreign-produced item is produced by any plant or ‘major component’ of a plant that is located outside the United States, when the plant or ‘major component’ of a plant, whether made in the United States or a foreign country, itself is a “direct product” of U.S.-origin “technology” or “software” subject to the EAR that is specified in any ECCN in product groups D or E in any categories of the CCL.

(2) End-user scope of the Russia/Belarus-‘Military End User’ FDP rule. A foreign-produced item meets the end-user scope of this paragraph (g)(2) if there is “knowledge” that:

(i) Activities involving footnote 3 designated entities. The foreign-produced item will be incorporated into, or used in the “production” or “development” of any “part,” “component,” or “equipment” produced, purchased, or ordered by any entity with a footnote 3 designation in the license requirement column of the Entity List in Supplement No. 4 to part 744 of the EAR; or

(ii) Footnote 3 designated entities as transaction parties. Any entity with a footnote 3 designation in the license requirement column of the Entity List in Supplement No. 4 to part 744 of the EAR is a party to any transaction involving the foreign-produced item, e.g., as a “purchaser,” “intermediate consignee,” “ultimate consignee,” or “end-user.”

Note 3 to paragraph (g). A ‘military end user’ for purposes of paragraph (g) is any entity listed on the Entity List in supplement no. 4 to part 744 of the EAR with a footnote 3 designation.

(h) Advanced computing FDP rule

A foreign-produced item is subject to the EAR if it meets both the product scope in paragraph (h)(1) of this section and the destination scope in paragraph (h)(2) of this section. See § 742.6(a)(6) of the EAR for license requirements and license exceptions and § 742.6(b)(10) for license review policy applicable to foreign-produced items that are subject to the EAR under this paragraph (h).

(1) Product scope of advanced computing FDP Rule. The product scope applies if a foreign-produced item meets the conditions of either paragraph (h)(1)(i) or (ii) of this section.

(i) “Direct product” of “technology” or “software.” A foreign-produced item meets the product scope of this paragraph if it meets both the following conditions:

(A) The foreign-produced item is the “direct product” of “technology” or “software” subject to the EAR and specified in 3D001, 3D991, 3E001, 3E002, 3E003, 3E991, 4D001, 4D090, 4D993, 4D994, 4E001, 4E992, 4E993, 5D001, 5D002, 5D991, 5E001, 5E991, or 5E002 of the CCL; and

(B) The foreign-produced item is:

(1) Specified in ECCN 3A090, 3E001 (for 3A090), 4A090, or 4E001 (for 4A090) of the CCL; or

(2) An integrated circuit, computer, “electronic assembly,” or “component” specified elsewhere on the CCL and meets the performance parameters of ECCN 3A090 or 4A090.

(ii) Product of a complete plant or ‘major component’ of a plant that is a “direct product.” A foreign-produced item meets the product scope of this paragraph if it meets both of the following conditions:

(A) The foreign-produced item is produced by any complete plant or ‘major component’ of a plant that is located outside the United States, when the plant or ‘major component’ of a plant, whether made in the United States or a foreign country, itself is a “direct product” of U.S.-origin

“technology” or “software” that is specified in ECCN 3D001, 3D991, 3E001, 3E002, 3E003, 3E991, 4D001, 4D090, 4D993, 4D994, 4E001, 4E992, 4E993, 5D001, 5D991, 5E001, 5E991, 5D002, or 5E002 of the CCL; and

(B) The foreign-produced item is:

(1) Specified in ECCN 3A090, 3E001 (for 3A090), 4A090, or 4E001 (for 4A090) of the CCL; or

(2) An integrated circuit, computer, “electronic assembly,” or “component” specified elsewhere on the CCL and meets the performance parameters of ECCN 3A090 or 4A090.

(2) Destination or end use scope of the advanced computing FDP rule. A foreign-produced item meets the destination scope of this paragraph (h)(2) if there is “knowledge” that the foreign-produced item is:

(i) Destined to the PRC or Macau or will be incorporated into any “part,” “component,” “computer,” or “equipment” not designated EAR99 that is destined to the PRC or Macau; or

(ii) Technology developed by an entity headquartered in the PRC or Macau for the “production” of a mask or an integrated circuit wafer or die.

(3) Certification. Exporters, reexporters, and transferors may obtain a written certification from a supplier that asserts an item being provided would be subject to the EAR if future transaction meet the destination scope in § 734.9(h)(2)(i) or (ii). The model certificate provided by BIS in supplement no. 1 to part 734 is not required under the EAR, but through its provision, the certificate may assist exporters, reexporters, and transferors with the process of resolving potential red flags regarding whether an item is subject to the EAR based on § 734.9(h). The model certificate provided by BIS contemplates signature by an official or designated employee of the certifying company and inclusion of all the information described in paragraph (b) of supplement no. 1 to part 734. If the exporter, reexporter or transferors has not obtained such a certification, due diligence needs

to be conducted to determine if the items meets the scope in this paragraph (h). While this certificate is expected to be useful for a company to understand the application of the EAR to an item, BIS does not view this as the only step to be completed during a company’s due diligence process. See supplement no. 1 to part 734 and supplement no. 3 to part 732 of the EAR.

(i) “Supercomputer” FDP rule

A foreign-produced item is subject to the EAR if it meets both the product scope in paragraph (i)(1) of this section and the country and end-use scope in paragraph (i)(2) of this section. See § 744.23 of the EAR for license requirement, license review policy, and license exceptions applicable to foreign-produced items that are subject to the EAR pursuant to this paragraph (i).

(1) Product scope. The product scope applies if a foreign-produced item meets the conditions of either paragraphs (i)(1)(i) or (ii) of this section.

(i) “Direct product” of “technology” or “software.” The foreign-produced item meets the product scope of this paragraph (i)(1)(i) if the foreign-produced item is a “direct product” of “technology” or “software” subject to the EAR and specified in ECCN 3D001, 3D991, 3E001, 3E002, 3E003, 3E991, 4D001, 4D993, 4D994, 4E001, 4E992, 4E993, 5D001, 5D991, 5E001, 5E991, 5D002, or 5E002 of the CCL; or

(ii) Product of a complete plant or ‘major component’ of a plant that is a “direct product.”

A foreign-produced item meets the product scope of this paragraph (i)(1)(ii) if the foreign-produced item is produced by any plant or ‘major component’ of a plant that is located outside the United States, when the plant or ‘major component’ of a plant, whether made in the United States or a foreign country, itself is a “direct product” of U.S.-origin “technology” or “software” that is specified in ECCN 3D001, 3D991, 3E001, 3E002, 3E003, 3E991, 4D001, 4D994, 4E001, 4E992, 4E993, 5D001, 5D991, 5E001, 5E991, 5D002, or 5E002 of the CCL.

(2) Country and end-use scope. A foreign-produced item meets the country and end-use scope of this paragraph (i)(2) if there is

“knowledge” that the foreign produced item will be:

(i) Used in the design, “development,” “production,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of, a “supercomputer” located in or destined to the PRC or Macau; or

(ii) Incorporated into, or used in the “development,” or “production,” of any “part,” “component,” or “equipment” that will be used in a “supercomputer” located in or destined to the PRC or Macau.

(j) Iran FDP rule

A foreign-produced item is subject to the EAR if it meets both the product scope in paragraph (j)(1) of this section and the destination scope in paragraph (j)(2) of this section. See § 746.7 of the EAR for license requirements, license review policy, and license exceptions applicable to foreign-produced items that are subject to the EAR pursuant to this paragraph (j).

(1) Product scope of Iran FDP rule. The product scope applies if a foreign-produced item meets the conditions of either paragraph (j)(1)(i) or (ii) of this section.

(i) **“Direct product” of “technology” or “software.”** A foreign-produced item meets the product scope of this paragraph (j)(1)(i) if the foreign-produced item meets both of the following conditions:

(A) The foreign-produced item is the “direct product” of U.S.-origin “technology” or “software” subject to the EAR that is specified in any ECCN in product groups D or E in Categories 3 through 5 or 7 of the CCL; and

(B) The foreign-produced item is identified in supplement no. 7 to part 746 of the EAR or is specified in any ECCN on the CCL in Categories 3 through 5 or 7 of the CCL; or

(ii) **Product of a complete plant or 'major component' of a plant that is a “direct product.”**

A foreign-produced item meets the product scope of this paragraph (j)(1)(ii) if it meets both of the following conditions:

(A) The foreign-produced item is produced by any plant or 'major component' of a plant that is located outside the United States, when the plant or 'major component' of a plant, whether made in the United States or a foreign country, itself is a “direct product” of U.S.-origin “technology” or “software” subject to the EAR that is specified in any ECCN in product groups D or E in Categories 3 through 5 or 7 of the CCL; and

(B) The foreign-produced item is identified in supplement no. 7 to part 746 of the EAR or is specified in any ECCN on the CCL in Categories 3 through 5 or 7 of the CCL.

(2) Destination scope of the Iran FDP rule. A foreign-produced item meets the destination scope of this paragraph (j)(2) if there is “knowledge” that the foreign-produced item is destined to Iran or will be incorporated into or used in the “production” or “development” of any “part,” “component,” or “equipment,” including any modified or designed “components,” “parts,” “accessories,” and “attachments” therefor, identified in supplement no. 7 to part 746 of the EAR or is specified in any ECCN on the CCL in Categories 3 through 5 or 7 of the CCL that is located in or destined to Iran.

§ 734.10 PATENTS

“Technology” is not subject to the EAR if it is contained in any of the following:

(a) A patent or an open (published) patent application available from or at any patent office;

(b) A published patent or patent application prepared wholly from foreign-origin “technology” where the application is being sent to the foreign inventor to be executed and returned to the United States for subsequent filing

in the U.S. Patent and Trademark Office;

(c) A patent application, or an amendment, modification, supplement or division of an application, and authorized for filing in a foreign country in accordance with the regulations of the Patent and Trademark Office, 37 CFR part 5; or

(d) A patent application when sent to a foreign country before or within six months after the filing of a United States patent application for the purpose of obtaining the signature of an inventor who was in the United States when the invention was made or who is a co-inventor with a person residing in the United States.

§ 734.11 BIS ACTIVITIES CONDUCTED OUTSIDE THE UNITED STATES

The Export Control Reform Act of 2018 (ECRA) (50 U.S.C. 4801-4852) authorizes the Secretary of Commerce, in carrying out its provisions, to undertake activities outside the United States, including, but not limited to, conducting investigations; requiring and obtaining information from persons; and conducting pre-license checks and post-shipment verifications. BIS officials will act with due care in the jurisdiction of a foreign nation and, to the extent possible, consistent with the applicable host nation government's laws. For any action taken outside the United States, BIS officials will consult and coordinate with the appropriate U.S. Government agencies and act in a manner consistent with the United States' international commitments and international agreements to which the United States is a party.

§ 734.12 EFFECT ON FOREIGN LAWS AND REGULATIONS

Any person who complies with any of the license or other requirements of the EAR is not relieved of the responsibility of complying with applicable foreign laws and regulations. Conversely, any person who complies with the license or other requirements of a foreign law or regulation is not

relieved of the responsibility of complying with U.S. laws and regulations, including the EAR.

§ 734.13 EXPORT

(a) Except as set forth in §§ 734.17 or 734.18, Export means:

(1) An actual shipment or transmission out of the United States, including the sending or taking of an item out of the United States, in any manner;

(2) Releasing or otherwise transferring "technology" or source code (but not object code) to a foreign person in the United States (a "deemed export");

(3) Transferring by a person in the United States of registration, control, or ownership of:

(i) A spacecraft subject to the EAR that is not eligible for export under License Exception STA (*i.e.*, spacecraft that provide space-based logistics, assembly or servicing of any spacecraft) to a person in or a national of any other country; or

(ii) Any other spacecraft subject to the EAR to a person in or a national of a Country Group D:5 country.

(b) Any release in the United States of "technology" or source code to a foreign person is a deemed export to the foreign person's most recent country of citizenship or permanent residency.

(c) The export of an item that will transit through a country or countries to a destination identified in the EAR is deemed to be an export to that destination.

§ 734.14 REEXPORT

(a) Except as set forth in §§ 734.18 and 734.20, Reexport means:

(1) An actual shipment or transmission of an item subject to the EAR from one foreign country to

another foreign country, including the sending or taking of an item to or from such countries in any manner;

(2) Releasing or otherwise transferring “technology” or source code subject to the EAR to a foreign person of a country other than the foreign country where the release or transfer takes place (a deemed reexport);

(3) Transferring by a person outside the United States of registration, control, or ownership of:

(i) A spacecraft subject to the EAR that is not eligible for reexport under License Exception STA (i.e., spacecraft that provide space-based logistics, assembly or servicing of any spacecraft) to a person in or a national of any other country; or

(ii) Any other spacecraft subject to the EAR to a person in or a national of a Country Group D:5 country.

(b) Any release outside of the United States of “technology” or source code subject to the EAR to a foreign person of another country is a deemed reexport to the foreign person's most recent country of citizenship or permanent residency, except as described in § 734.20.

(c) The reexport of an item subject to the EAR that will transit through a country or countries to a destination identified in the EAR is deemed to be a reexport to that destination.

§ 734.15 RELEASE

(a) Except as set forth in § 734.18, “technology” and “software” are “released” through:

(1) Visual or other inspection by a foreign person of items that reveals “technology” or source code subject to the EAR to a foreign person; or

(2) Oral or written exchanges with a foreign person of “technology” or source code in the United States or abroad.

(b) Any act causing the “release” of “technology” or “software,” through use of “access information” or otherwise, to yourself or another person requires an authorization to the same extent an authorization would be required to export or reexport such “technology” or “software” to that person.

§ 734.16 TRANSFER (IN-COUNTRY)

Except as set forth in § 734.18(a)(3), a Transfer (in-country) is a change in end use or end user of an item within the same foreign country. Transfer (in-country) is synonymous with In-country transfer.

§ 734.17 EXPORT OF ENCRYPTION SOURCE CODE AND OBJECT CODE SOFTWARE

(a) For purposes of the EAR, the Export of encryption source code and object code “software” means:

(1) An actual shipment, transfer, or transmission out of the United States (see also paragraph (b) of this section); or

(2) A transfer of such “software” in the United States to an embassy or affiliate of a foreign country.

(b) The export of encryption source code and object code “software” controlled for “EI” reasons under ECCN 5D002 on the Commerce Control List (see Supplement No. 1 to part 774 of the EAR) includes:

(1) Downloading, or causing the downloading of, such “software” to locations (including electronic bulletin boards, Internet file transfer protocol, and World Wide Web sites) outside the U.S., or

(2) Making such “software” available for transfer outside the United States, over wire, cable, radio, electromagnetic, photo optical, photoelectric or other comparable communications facilities accessible to persons outside the United States,

including transfers from electronic bulletin boards, Internet file transfer protocol and World Wide Web sites, unless the person making the “software” available takes precautions adequate to prevent unauthorized transfer of such code. See § 742.15(b) of the EAR for additional requirements pursuant to which exports or reexports of encryption source code “software” are considered to be publicly available consistent with the provisions of § 734.3(b)(3). Publicly available encryption source code “software” and corresponding object code are not subject to the EAR, when the encryption source code “software” meets the additional requirements in § 742.15(b) of the EAR.

(c) Subject to the General Prohibitions described in part 736 of the EAR, such precautions for Internet transfers of products eligible for export under § 740.17(b)(2) of the EAR (encryption “software” products, certain encryption source code and general purpose encryption toolkits) shall include such measures as:

(1) The access control system, either through automated means or human intervention, checks the address of every system outside of the U.S. or Canada requesting or receiving a transfer and verifies such systems do not have a domain name or Internet address of a foreign government end-user (e.g., “.gov,” “.gouv,” “.mil” or similar addresses);

(2) The access control system provides every requesting or receiving party with notice that the transfer includes or would include cryptographic “software” subject to export controls under the Export Administration Regulations, and anyone receiving such a transfer cannot export the “software” without a license or other authorization; and

(3) Every party requesting or receiving a transfer of such “software” must acknowledge affirmatively that the “software” is not intended for use by a government end user, as defined in part 772 of the EAR, and he or she understands the cryptographic “software” is subject to export controls under the Export Administration Regulations and anyone receiving the transfer cannot export the “software” without a license or

other authorization. BIS will consider acknowledgments in electronic form provided they are adequate to assure legal undertakings similar to written acknowledgments.

§ 734.18 ACTIVITIES THAT ARE NOT EXPORTS, REEXPORTS, OR TRANSFERS

(a) The following activities are not exports, reexports, or transfers:

(1) Launching a spacecraft, launch vehicle, payload, or other item into space.

(2) Transmitting or otherwise transferring “technology” or “software” to a person in the United States who is not a foreign person from another person in the United States.

(3) Transmitting or otherwise making a transfer (in-country) within the same foreign country of “technology” or “software” between or among only persons who are not “foreign persons,” so long as the transmission or transfer does not result in a release to a foreign person or to a person prohibited from receiving the “technology” or “software.”

(4) Shipping, moving, or transferring items between or among the United States, the District of Columbia, the Commonwealth of Puerto Rico, or the Commonwealth of the Northern Mariana Islands or any territory, dependency, or possession of the United States as listed in Schedule C, Classification Codes and Descriptions for U.S. Export Statistics, issued by the Bureau of the Census.

(5) Sending, taking, or storing “technology” or “software” that is:

(i) Unclassified;

(ii) Secured using 'end-to-end encryption;'

(iii) Secured using cryptographic modules (hardware or “software”) compliant with Federal

Information Processing Standards Publication 140-2 (FIPS 140-2) or its successors, supplemented by “software” implementation, cryptographic key management and other procedures and controls that are in accordance with guidance provided in current U.S. National Institute for Standards and Technology publications, or other equally or more effective cryptographic means; and

(iv) Not intentionally stored in a country listed in Country Group D:5 (see Supplement No. 1 to part 740 of the EAR) or in the Russian Federation.

Note 1 to paragraph (a)(5)(iv): Data in-transit via the Internet is not deemed to be stored.

(b) Definitions

For purposes of this section, **End-to-end encryption** means (i) the provision of cryptographic protection of data such that the data is not in unencrypted form between an originator (or the originator's in-country security boundary) and an intended recipient (or the recipient's in-country security boundary), and (ii) the means of decryption are not provided to any third party. The originator and the recipient may be the same person.

(c) The ability to access “technology” or “software” in encrypted form that satisfies the criteria set forth in paragraph (a)(5) of this section does not constitute the release or export of such “technology” or “software.”

§ 734.19 TRANSFER OF ACCESS INFORMATION

To the extent an authorization would be required to transfer “technology” or “software,” a comparable authorization is required to transfer access information if done with “knowledge” that such transfer would result in the release of such “technology” or “software” without a required authorization.

§ 734.20 ACTIVITIES THAT ARE NOT DEEMED REEXPORTS

The following activities are not deemed reexports (see “deemed reexport” definition in § 734.14(b)):

(a) Authorized Release of “technology” or source code

Release of “technology” or source code by an entity outside the United States to a foreign person of a country other than the foreign country where the release takes place if:

(1) The entity is authorized to receive the “technology” or source code at issue, whether by a license, license exception, or situation where no license is required under the EAR for such “technology” or source code; and

(2) The entity has “knowledge” that the foreign national's most recent country of citizenship or permanent residency is that of a country to which export from the United States of the “technology” or source code at issue would be authorized by the EAR either under a license exception or in situations where no license under the EAR would be required.

(b) Release to Country Group A:5 nationals

Without limiting the scope of paragraph (a), release of “technology” or source code by an entity outside the United States to a foreign person of a country other than the foreign country where the release takes place if:

(1) The entity is authorized to receive the “technology” or source code at issue, whether by a license, license exception, or through situations where no license is required under the EAR;

(2) The foreign person is a bona fide ‘permanent and regular employee’ of the entity and is not a proscribed person (see § 772.1 for definition of proscribed person);

(3) Such employee is a national exclusively of a

country in Country Group A:5; and

(4) The release of “technology” or source code takes place entirely within the physical territory of any such country, or within the United States.

(c) Release to other than Country Group A:5 nationals

Without limiting the scope of paragraph (a), release of “technology” or source code by an entity outside the United States to a foreign person of a country other than the foreign country where the release takes place if:

(1) The entity is authorized to receive the “technology” or source code at issue, whether by a license, license exception, or situations where no license is required under the EAR;

(2) The foreign person is a bona fide ‘permanent and regular employee’ of the entity and is not a proscribed person (see § 772.1 for definition of proscribed person);

(3) The release takes place entirely within the physical territory of the country where the entity is located, conducts official business, or operates, or within the United States;

(4) The entity has effective procedures to prevent diversion to destinations, entities, end users, and end uses contrary to the EAR; and

(5) Any one of the following six (i.e., paragraphs (c)(5)(i), (ii), (iii), (iv), (v), or (vi) of this section) situations is applicable:

(i) The foreign person has a security clearance approved by the host nation government of the entity outside the United States;

(ii) The entity outside the United States:

(A) Has in place a process to screen the foreign person employee and to have the employee execute a non-disclosure agreement that provides assurances that the employee will not disclose, transfer, or reexport controlled “technology” contrary to the EAR;

(B) Screens the employee for substantive contacts with countries listed in Country Group D:5 (see Supplement No. 1 to part 740 of the EAR). Although nationality does not, in and of itself, prohibit access to “technology” or source code subject to the EAR, an employee who has substantive contacts with foreign persons from countries listed in Country Group D:5 shall be presumed to raise a risk of diversion, unless BIS determines otherwise;

(C) Maintains a technology security or clearance plan that includes procedures for screening employees for such substantive contacts;

(D) Maintains records of such screenings for the longer of five years or the duration of the individual's employment with the entity; and

(E) Will make such plans and records available to BIS or its agents for civil and criminal law enforcement purposes upon request;

(iii) The entity is a U.K. entity implementing § 126.18 of the ITAR (22 CFR 126.18) pursuant to the U.S.-U.K. Exchange of Notes regarding §126.18 of the ITAR for which the U.K. has provided appropriate implementation guidance;

(iv) The entity is a Canadian entity implementing §126.18 of the ITAR pursuant to the U.S.-Canadian Exchange of Letters regarding § 126.18 of the ITAR for which Canada has provided appropriate implementation guidance;

(v) The entity is an Australian entity implementing the exemption at paragraph 3.7b of the ITAR Agreements Guidelines; or

(vi) The entity is a Dutch entity implementing the exemption at paragraph 3.7c of the ITAR Agreements Guidelines.

(d) Definitions

(1) **Substantive contacts** include regular travel to countries in Country Group D:5; recent or continuing contact with agents, brokers, and

nationals of such countries; continued demonstrated allegiance to such countries; maintenance of business relationships with persons from such countries; maintenance of a residence in such countries; receiving salary or other continuing monetary compensation from such countries; or acts otherwise indicating a risk of diversion.

(2) Permanent and regular employee is an individual who:

(i) Is permanently (i.e., for not less than a year) employed by an entity, or

(ii) Is a contract employee who:

(A) Is in a long-term contractual relationship with the company where the individual works at the entity's facilities or at locations assigned by the entity (such as a remote site or on travel);

(B) Works under the entity's direction and control such that the company must determine the individual's work schedule and duties;

(C) Works full time and exclusively for the entity; and

(D) Executes a nondisclosure certification for the company that he or she will not disclose confidential information received as part of his or her work for the entity.

NOTE TO PARAGRAPH (d)(2): *If the contract employee has been seconded to the entity by a staffing agency, then the staffing agency must not have any role in the work the individual performs other than to provide the individual for that work. The staffing agency also must not have access to any controlled "technology" or source code other than that authorized by the applicable regulations or a license.*

**SUPPLEMENT NO. 1 TO PART 734—MODEL CERTIFICATION FOR PURPOSES OF
ADVANCED COMPUTING FDP RULE**

a) General

This supplement is included in the EAR to assist exporters, reexporters, and transferors in determining whether the items being exported, reexported, or transferred (in-country) are subject to the EAR based on the advanced computing FDP rule under § 734.9(h). The model certificate provided by BIS in supplement no. 1 to this part is not required under the EAR, but through its provision, the certificate may assist exporters, reexporters, and transferors with the process of resolving potential red flags regarding whether an item is subject to the EAR based on § 734.9(h). The model certificate provided in this supplement by BIS contemplates signature by an official or designated employee of the certifying company and inclusion of all the information described in paragraph (b) of this supplement. Any certification relied on for this part must be retained pursuant to part 762.

Obtaining the certification set forth in this supplement no. 1 to part 734 does not relieve exporters, reexporters, and transferors of their obligation to exercise due diligence in determining whether items are subject to the EAR, including by following the “Know Your Customer” guidance in supplement no. 3 to part 732 of the EAR.

b) Model Criteria

A certification meets the criteria described in this supplement if it contains at least the following information:

- (1) The certification must be signed by an organization official specifically authorized to certify the document as being accurate and complete. The undersigned certifies that the information herein supplied in response to this paragraph is complete and correct to the best of his/her knowledge. By signing the certification below, I attest that:
- (2) My organization is aware that the items, [INSERT A DESCRIPTION OF THE ITEMS], provided to this exporter, reexporter, or transferor, [INSERT NAME OF EXPORTER, REEXPORTER, OR TRANSFEROR], could be subject to the U.S. Export Administration Regulations (EAR) (15 CFR 730-774) if future transactions are within the destination scope of § 734.9(h)(2)(i) or (ii) and exported or reexported to or transferred within the People’s Republic of China (China) or Macau;
- (3) My organization has reviewed the criteria for the advanced computing Foreign Direct Product (FDP) rule under § 734.9(h) and attests that from my organization’s “knowledge” of the item, it would be subject to the EAR if the destination criteria are met in § 734.9(h)(2)(i) or (ii); and
- (4) My organization affirms its commitment to apply with all applicable requirements under the EAR.

[INSERT NAME(S) OF CONSIGNEE(S)]

[INSERT DATE(S) SIGNED]

Note 1 to paragraph (b): When multiple consignees who form a network engaged in a production process (or other type of collaborative activity, such as joint development) will be receiving items under the EAR, a single model certification statement for multiple consignees may be used for any export, reexport, or transfer (in-country) under the EAR.

c) Additional Information

Because this is only a model certification, exporters, reexporters, or transferors may add additional elements to the certification and/or use it for multiple purposes as part of their compliance program. For example, if a company has ten affiliated companies in a multi-step supply chain, instead of obtaining a model certification for each export, reexport, or transfer (in-country), the initial exporter, reexporter, or transferor may get all ten parties to sign the certification, which may further reduce the burden on parties participating in the supply chain.

SUPPLEMENT NO. 2 TO PART 734 - GUIDELINES FOR *DE MINIMIS* RULES

(a) Calculation of the value of controlled U.S. origin content in foreign-made items is to be performed for the purposes of § 734.4 of this part, to determine whether the percentage of U.S. origin content is *de minimis*. (Note that you do not need to make these calculations if the foreign made item does not require a license to the destination in question.) Use the following guidelines to perform such calculations:

(1) U.S.-origin controlled content. To identify U.S.-origin controlled content for purposes of the *de minimis* rules, you must determine the Export Control Classification Number (ECCN) of each U.S.-origin item incorporated into a foreign-made product. Then, you must identify which, if any, of those U.S.-origin items would require a license from BIS if they were to be exported or reexported (in the form in which you received them) to the foreign-made product's country of destination. For purposes of identifying U.S.-origin controlled content, you should consult the Commerce Country Chart in supplement no. 1 to part 738 of the EAR and controls described in part 746 of the EAR (excluding U.S.-origin content that meets the criteria in §§ 746.7(a)(1)(v) and 746.8(a)(5)). Part 744 of the EAR should not be used to identify controlled U.S. content for purposes of determining the applicability of the *de minimis* rules. In identifying U.S.-origin controlled content, do not take account of commodities, software, or technology that could be exported or reexported to the country of destination without a license (designated as "NLR") or under License Exception GBS (see part 740 of the EAR). Commodities subject only to short supply controls are not included in calculating U.S. content.

Note to paragraph (a)(1): U.S.-origin controlled content is considered 'incorporated' for de minimis purposes if the U.S.-origin controlled item is: essential to the functioning of the foreign equipment; customarily included in sales of the foreign equipment; and reexported with the foreign produced item. U.S.-origin software may be 'bundled' with foreign produced commodities; see § 734.4 of this part. For purposes of determining de minimis levels, technology and source code used to

design or produce foreign-made commodities or software are not considered to be incorporated into such foreign-made commodities or software.

(2) Value of U.S.-origin controlled content. The value of the U.S.-origin controlled content shall reflect the fair market price of such content in the market where the foreign product is being produced. In most cases, this value will be the same as the actual cost to the foreign manufacturer of the U.S.-origin commodity, technology, or software. When the foreign manufacturer and the U.S. supplier are affiliated and have special arrangements that result in below-market pricing, the value of the U.S.-origin controlled content should reflect fair market prices that would normally be charged to unaffiliated customers in the same foreign market. If fair market value cannot be determined based upon actual arms-length transaction data for the U.S.-origin controlled content in question, then you must determine another reliable valuation method to calculate or derive the fair market value. Such methods may include the use of comparable market prices or costs of production and distribution. The EAR do not require calculations based upon any one accounting system or U.S. accounting standards. However, the method you use must be consistent with your business practice.

(3) Foreign-made product value.

(i) General. The value of the foreign-made product shall reflect the fair market price of such product in the market where the foreign product is sold. In most cases, this value will be the same as the actual cost to a buyer of the foreign-made product. When the foreign manufacturer and the buyer of their product are affiliated and have special arrangements that result in below-market pricing, the value of the foreign-made product should reflect fair market prices that would normally be charged to unaffiliated customers in the same foreign market. If fair market value cannot be determined based upon actual arms-length transaction data for the foreign-made product in question, then you must determine another reliable valuation method to calculate or

derive the fair market value. Such methods may include the use of comparable market prices or costs of production and distribution. The EAR do not require calculations based upon any one accounting system or U.S. accounting standards. However, the method you use must be consistent with your business practice.

(ii) Foreign-Made Software. In calculating the value of foreign-made software for purposes of the *de minimis* rules, you may make an estimate of future sales of that foreign software. The total value of foreign-made software will be the sum of: the value of actual sales of that software based on orders received at the time the foreign software incorporates U.S.-origin content and, if applicable; and an estimate of all future sales of that software.

Note to paragraph (a)(3): Regardless of the accounting systems, standard, or conventions you use in the operation of your business, you may not depreciate reported fair market values or otherwise reduce fair market values through related accounting conventions. Values may be historic or projected. However, you may rely on projected values only to the extent that they remain consistent with your documentation.

(4) Calculating percentage value of U.S.-origin items. To determine the percentage value of U.S.-origin controlled content incorporated in, commingled with, or ‘bundled’ with the foreign produced item, divide the total value of the U.S.-origin controlled content by the foreign-made item value, then multiply the resulting number times 100. If the percentage value of incorporated U.S.-origin items is equal to or less than the *de minimis* level described in § 734.4 of the EAR, then the foreign-made item is not subject to the EAR.

(b) One-time report

As stated in paragraphs (c) and (d) of § 734.4, a one-time report is required before reliance on the *de minimis* rules for technology. The purpose of the report is solely to permit the U.S. Government to evaluate whether U.S. content calculations were performed correctly.

(1) Contents of report. You must include in your

report a description of the scope and nature of the foreign technology that is the subject of the report and a description of its fair market value, along with the rationale and basis for the valuation of such foreign technology. Your report must indicate the country of destination for the foreign technology reexports when the U.S.-origin controlled content exceeds 10%, so that BIS can evaluate whether the U.S.-origin controlled content was correctly identified based on paragraph (a)(1) of this Supplement. The report does not require information regarding the end-use or end-users of the reexported foreign technology. You must include in your report the name, title, address, telephone number, E-mail address, and facsimile number of the person BIS may contact concerning your report.

(2) Submission of report. You must submit your report to BIS using one of the following Regulatory Policy Division, methods:

- (i) E-mail: rpd2@bis.doc.gov;
- (ii) Fax: (202) 482-3355; or
- (iii) Mail or Hand Delivery/Courier:

U.S. Department of Commerce,
Bureau of Industry and Security,
Regulatory Policy Division,
14th and Pennsylvania Avenue, N.W.,
Room 2099B,
Washington, D.C. 20230.

(3) Report and wait. If you have not been contacted by BIS concerning your report within thirty days after filing the report with BIS, you may rely upon the calculations described in the report unless and until BIS contacts you and instructs you otherwise. BIS may contact you with questions concerning your report or to indicate that BIS does not accept the assumptions or rationale for your calculations. If you receive such a contact or communication from BIS within thirty days after filing the report with BIS, you may not rely upon the calculations described in the report, and may not use the *de minimis* rules for technology that are described in § 734.4 of this part, until BIS has indicated that such calculations were performed correctly.

§ 736.1 INTRODUCTION 1

§ 736.2 GENERAL PROHIBITIONS AND DETERMINATION OF APPLICABILITY 1

SUPPLEMENT NO. 1 TO PART 736 - GENERAL ORDERS 1

SUPPLEMENT NO. 2 TO PART 736 - ADMINISTRATIVE ORDERS 1

§ 736.1 INTRODUCTION

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. A person may undertake transactions subject to the EAR without a license or other authorization, unless the regulations affirmatively state such a requirement. As such, if an export, reexport, or activity is subject to the EAR, the general prohibitions contained in this part and the License Exceptions specified in part 740 of the EAR must be reviewed to determine if a license is necessary. In the case of all exports from the United States, you must document your export as described in part 762 of the EAR regarding recordkeeping and clear your export through the U.S. Customs Service as described in part 758 of the EAR regarding export clearance requirements. Also note that for short supply controls all prohibitions and License Exceptions are in part 754 of the EAR.

(a) In this part we tell you:

(1) The facts that make your proposed export, reexport, or conduct subject to these general prohibitions, and

(2) The ten general prohibitions.

(b) Your obligations under the ten general prohibitions and under the EAR depend in large part upon the five types of information described in §736.2(a) of this part and upon the general prohibitions described in §736.2(b) of this part. The ten general prohibitions contain cross-

references to other parts of the EAR that further define the breadth of the general prohibitions. For that reason, this part is not freestanding. In part 732, we provide certain steps you may follow in proper order to help you understand the general prohibitions and their relationship to other parts of the EAR.

(c) If you violate any of these ten general prohibitions, or engage in other conduct contrary to the Export Administration Act, the EAR, or any order, license, License Exception, or authorization issued thereunder, as described in part 764 of the EAR regarding enforcement, you will be subject to the sanctions described in that part.

§ 736.2 GENERAL PROHIBITIONS AND DETERMINATION OF APPLICABILITY

(a) *Information or facts that determine the applicability of the general prohibitions.*

The following five types of facts determine your obligations under the ten general prohibitions and the EAR generally (also see other parts of the EAR where the license requirements and other EAR restrictions are specified in greater detail):

(1) **Classification of the item.** The classification of the item on the Commerce Control List (see part 774 of the EAR) or description of the item in supplements no. 2, 4, or 6 to part 746 of the EAR. For guidance on classifying items, see the Commerce Control List Order of Review in supplement no. 4 to part 774 and for determining licensing requirements using the Commerce Control List in supplement no. 1 to part 774 and the Commerce Country Chart in supplement no. 1 to part 738, see § 738.4;

Note 1 to paragraph (a)(1): The description of items in supplements no. 2, 4, or 6 of part 746 are used for determining license requirements for Russia and Belarus under §§ 746.5 and 746.10. Items described in supplements no. 2, 4, or 6 in most cases are designated as EAR99 (subject to

the EAR but not specifically listed on the Commerce Control List).

(2) Destination. The country of ultimate destination for an export, reexport, or transfer (in-country) (see parts 738 and 774 of the EAR concerning the Country Chart and the Commerce Control List for export and reexport license requirements and part 746 for additional license requirements based on embargoes and other special controls for exports, reexports, or certain transfers (in-country));

(3) End user or end use. The ultimate end user (see General Prohibition Four (paragraph (b)(4) of this section) and supplement no. 1 to part 764 of the EAR for references to persons with whom your transaction may not be permitted; see General Prohibition Five (Paragraph (b)(5) of this section) and part 744 for references to end users for whom you may need an export, reexport, or transfer (in-country) license). Certain EAR requirements (*e.g.*, §§ 734.9(e), 744.11(a)), and 744.15(b)) extend to all parties to the transaction as described in § 748.5(c) through (f). Many of the end-use controls in part 744 specify destinations or Country Groups as part of the criteria for defining the scope of the end use controls.

(4) End-use. The ultimate end-use (see General Prohibition Five (paragraph (b)(5) of this section) and part 744 of the EAR for general end-use restrictions); and

(5) Conduct. Conduct such as contracting, financing, and freight forwarding in support of a proliferation project or a ‘military-intelligence end use’ or a ‘military-intelligence end user,’ as described in part 744 of the EAR.

(b) General prohibitions

The following ten general prohibitions describe certain exports, reexports, transfers (in-country),

¹ See part 738 of the EAR for selected controls that

and other conduct, subject to the scope of the EAR, in which you may not engage unless you either have a license from the Bureau of Industry and Security (BIS) or qualify under part 740 of the EAR for a License Exception from each applicable general prohibition in this paragraph. The License Exceptions at part 740 of the EAR apply only to General Prohibitions One (Exports and Reexports in the Form Received), Two (Parts and Components Reexports), and Three (Foreign-Produced “Direct Product” Reexports); however, selected License Exceptions are specifically referenced and authorized in part 746 of the EAR concerning embargo destinations and in § 744.2(c) of the EAR regarding nuclear end-uses and in § 744.11 and in supplement no. 4 to part 744 – Entity List.

(1) General Prohibition One — Export and reexport of controlled items to listed countries (Exports and Reexports). You may not, without a license or License Exception, export any item subject to the EAR to another country or reexport any item of U.S.-origin if each of the following is true:

(i) The item is controlled for a reason indicated in the applicable Export Control Classification Number (ECCN), and

(ii) Export to the country of destination requires a license for the control reason as indicated on the Country Chart at part 738 of the EAR. (The scope of this prohibition is determined by the correct classification of your item and the ultimate destination as that combination is reflected on the Country Chart).¹ Note that each License Exception described at part 740 of the EAR supersedes General Prohibition One if all terms and conditions of a given License Exception are met by the exporter or reexporter.

(2) General Prohibition Two - Reexport and export from abroad of foreign-made items

are not specified on the Country Chart.

incorporating more than a *de minimis* amount of controlled U.S. content (U.S. Content Reexports).

(i) You may not, without a license or license exception, reexport or export from abroad foreign-made commodities that incorporate controlled U.S.-origin commodities, foreign-made commodities that are ‘bundled’ with controlled U.S.-origin software, foreign-made software that is commingled with controlled U.S.-origin software, or foreign-made technology that is commingled with controlled U.S.-origin technology if such items require a license according to any of the provisions in the EAR and incorporate or are commingled with more than a *de minimis* amount of controlled U.S. content, as defined in § 734.4 of the EAR concerning the scope of the EAR.

(A) It incorporates more than the *de minimis* amount of controlled U.S. content, as defined in §734.4 of the EAR concerning the scope of the EAR;

(B) It is controlled for a reason indicated in the applicable ECCN; and

(C) Its export to the country of destination requires a license for that control reason as indicated on the Country Chart. (The scope of this prohibition is determined by the correct classification of your foreign-made item and the ultimate destination, as that combination is reflected on the Country Chart.)

(ii) Each License Exception described in part 740 of the EAR supersedes General Prohibition Two if all terms and conditions of a given License Exception are met by the exporter or reexporter.

(3) General Prohibition Three - Foreign-direct product (FDP) rules.

(i) You may not, without a license or license exception, export from abroad, reexport, or transfer (in-country) foreign-“direct products” subject to the EAR pursuant to § 734.9 if such

items are subject to a license requirement in part 736, 742, 744, 746, or 764 of the EAR.

(ii) Each license exception described in part 740 of the EAR supersedes General Prohibition Three if all terms and conditions of a given license exception are met and none of the restrictions of §§ 740.2 or 744.11(a) apply.

(4) General Prohibition Four (Denial Orders) - Engaging in actions prohibited by a denial order.

(i) You may not take any action that is prohibited by a denial order issued under part 766 of the EAR, Administrative Enforcement Proceedings. These orders prohibit many actions in addition to direct exports by the person denied export privileges, including some transfers within a single country, either in the United States or abroad, by other persons. You are responsible for ensuring that any of your transactions in which a person who is denied export privileges is involved do not violate the terms of the order. Orders denying export privileges are published in the *Federal Register* when they are issued and are the legally controlling documents in accordance with their terms. BIS also maintains compilations of persons denied export privileges on its Web site at <http://www.bis.doc.gov>. BIS may, on an exceptional basis, authorize activity otherwise prohibited by a denial order. See Sec. 764.3(a)(2) of the EAR.

(ii) There are no License Exceptions described in part 740 of the EAR that authorize conduct prohibited by this General Prohibition Four.

(5) General Prohibition Five – Export, reexport, or transfer (in-country) to prohibited end-uses or end-users (End-Use End-User).

You may not, without a license, knowingly export, reexport, or transfer (in-country) any item subject to the EAR to an end user or end use that is prohibited by part 744 of the EAR. Each section in part 744 specifies whether the license requirements extend to exports, reexports, and transfers (in-country).

(6) General Prohibition Six – Export, reexport, and transfer (in-country) to embargoed destinations (Embargo).

(i) You may not, without a license or license exception or portion thereof that is specifically listed in the license exceptions paragraph pertaining to a particular sanctioned country or region in part 746 of the EAR, export, reexport, or transfer (in-country) any item subject to the EAR to a country or region (*e.g.*, the Crimea region of Ukraine and covered regions of Ukraine) that is embargoed by the United States or otherwise made subject to controls under part 734 as both are described at part 746 of the EAR. Each section in part 746 specifies whether the license requirements extend to exports, reexports, and transfers (in-country).

(ii) License exceptions to General Prohibition Six are described in part 746 of the EAR, on Embargoes and Other Special Controls. Unless a license exception or other authorization is authorized in part 746 of the EAR, the license exceptions described in part 740 of the EAR are not available to overcome this general prohibition.

(7) General Prohibition Seven – Support of proliferation activities and certain military-intelligence end uses and end users (“U.S. person” activities)-

(i) *Support of proliferation activities and certain military-intelligence end uses and end users (“U.S. person” activities).*

(A) If you are a “U.S. person,” as that term is defined in § 772.1 of the EAR, you may not engage in any activities prohibited by §§ 744.6(b) or (c) of the EAR, which prohibit, without a license from BIS, the shipment, transmission, or transfer (in-country) of items not subject to the EAR; facilitating such shipment, transmission, or transfer (in-country); or the performance of any contract, service, or employment (including, but not limited to: ordering, buying, removing,

concealing, storing, using, selling, loaning, disposing, servicing, financing, or transporting, freight forwarding, or conducting negotiations in furtherance of) that you know or are informed by BIS will support:

(1) The design, “development,” “production,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of nuclear explosive devices in or by any country not listed in supplement no. 3 to part 744 of the EAR;

(2) The design, “development,” “production,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of “missiles” in or by a country listed in Country Groups D:4 or E:2;

(3) The design, “development,” “production,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of chemical or biological weapons in or by any country or destination worldwide;

(4) The design, “development,” “production,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, refurbishing, shipment, or transfer (in-country) of a whole plant to make chemical weapons precursors identified in ECCN 1C350, in or by countries other than those listed in Country Group A:3 (Australia Group); or

(5) A ‘military-intelligence end use’ or a ‘military-intelligence end user,’ as defined in § 744.22(f) of the EAR, in Belarus, Burma, the People’s Republic of China, Russia, or Venezuela; or a country listed in Country Groups E:1 or E:2.

(B) If you are a “U.S. person” as that term is defined in § 772.1 of the EAR, you may not export a Schedule 1 chemical listed in Supplement No. 1 to part 745 without first complying with the provisions of §§ 742.18 and

745.1 of the EAR.

(C) If you are a “U.S. person” as that term is defined in § 772.1 of the EAR, you may not export a Schedule 3 chemical listed in Supplement No. 1 to part 745 to a destination *not* listed in Supplement No. 2 to part 745 without complying with the End-Use Certificate requirements in § 745.2 of the EAR that apply to Schedule 3 chemicals controlled for CW reasons in ECCN 1C350, ECCN 1C355, and ECCN 1C395.

(ii) [Reserved]

(8) General Prohibition Eight - In transit shipments and items to be unladen from vessels or aircraft (Intransit).

(i) *Unlading and shipping in transit.* You may not export or reexport an item through, or transit through a country listed in paragraph (b)(8)(ii) of this section, unless a license exception or license authorizes such an export or reexport directly to or transit through such a country of transit, or unless such an export or reexport is eligible to such a country of transit without a license.

(ii) *Country scope.* This General Prohibition Eight applies to Armenia, Azerbaijan, Belarus, Cambodia, Cuba, Georgia, Kazakhstan, Kyrgyzstan, Laos, Mongolia, North Korea, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan, Vietnam.

(9) General Prohibition Nine - Violation of any order, terms, and conditions (Orders, Terms, and Conditions). You may not violate terms or conditions of a license or of a License Exception issued under or made a part of the EAR, and you may not violate any order issued under or made a part of the EAR. There are no License Exceptions to this General Prohibition Nine in part 740 of the EAR. Supplements Nos. 1 and 2 to this part provide for certain General Orders and Administrative Orders.

(10) General Prohibition Ten - Proceeding with transactions with knowledge that a violation has occurred or is about to occur (Knowledge Violation to Occur). You may not sell, transfer, export, reexport, finance, order, buy, remove, conceal, store, use, loan, dispose of, transport, forward, or otherwise service, in whole or in part, any item subject to the EAR and exported, reexported, or transferred (in-country) or to be exported, reexported, or transferred (in-country) with knowledge that a violation of the Export Administration Regulations, the Export Control Reform Act of 2018, or any order, license, license exception, or other authorization issued thereunder has occurred, is about to occur, or is intended to occur in connection with the item. Nor may you rely upon any license or license exception after notice to you of the suspension or revocation of that license or exception. There are no license exceptions to this General Prohibition Ten in part 740 of the EAR.

SUPPLEMENT NO. 1 TO PART 736 - GENERAL ORDERS*(a) General Order No. 1*

General Order No. 1 of September 16, 1998; Establishing a 24-month validity period on reexport authorizations issued without a validity period and revoking those exceeding that period.

(1) Reexport authorizations issued within 24-months of the General Order. All reexport authorizations issued with no validity period within the 24-months preceding September 16, 1998 shall be deemed to have an expiration date which shall be the date 24-months from the date of issuance of the reexport authorization or November 16, 1998, whichever is longer.

(2) Reexport authorizations issued before the 24-month period preceding the General Order. For reexport authorizations issued with no validity period before the 24-month period preceding September 16, 1998:

(i) Effective September 16, 1998, all such outstanding reexport authorizations for terrorist-supporting countries (see parts 742 and 746 of the EAR) are revoked.

(ii) Effective November 16, 1998, all other such outstanding reexport authorizations are revoked.

(3) Extensions. If necessary, you may request extensions of such authorizations according to procedures set forth in §750.7(g) of the EAR.

(4) Specific Notice from BIS. If you have received, or should you receive, specific notice from BIS with regard to a reexport authorization covered by this General Order, informing you of a revocation, suspension, or revision (including validity period) of any such reexport authorization, then the terms of that specific notice will be controlling.

(5) Definition of “authorization.” The term “authorization” as used in this General Order encompasses the range of reexport authorizations granted by BIS, which includes licenses, individual letters, and other types of notifications.

(b) General Order No. 2

General Order No. 2; Section 5(b) of the Syria Accountability and Lebanese Sovereignty Restoration Act of 2003 (SAA) gives the President authority to waive the application of certain prohibitions set forth in the SAA if the President determines that it is in the national security interest of the United States to do so. The President made such a determination in Executive Order 13338, finding that it was “in the national security interest of the United States to waive application of subsection 5(a)(1) and 5(a)(2)(A) of the SAA so as to permit the exportation or reexportation of certain items as specified in the Department of Commerce’s General Order No. 2.”

The President’s reference to General Order No. 2 addresses applications to export and reexport the following items, which are considered on a case-by-case basis as opposed to the general policy of denial set forth in section 746.9 of the Regulations: items in support of activities, diplomatic or otherwise, of the United States Government (to the extent that regulation of such exportation or reexportation would not fall within the President's constitutional authority to conduct the nation's foreign affairs); medicine (on the CCL) and medical devices (both as defined in Part 772 of the EAR); parts and components intended to ensure the safety of civil aviation and the safe operation of commercial passenger aircraft; aircraft chartered by the Syrian Government for the transport of Syrian Government officials on official Syrian Government business; telecommunications equipment and associated computers, software and technology; items in support of United Nations operations in Syria; and

items necessary for the support of the Syrian people, including, but not limited to, items related to water supply and sanitation, agricultural production and food processing, power generation, oil and gas production, construction and engineering, transportation, and educational infrastructure. The total dollar value of each approved license for aircraft parts for flight safety normally will be limited to no more than \$2 million over the 24-month standard license term, except in the case of complete overhauls.

NOTE to GENERAL ORDER NO. 2. *The controls for exports and reexports to Syria are set forth in § 746.9 of the EAR.*

(c) General Order No. 3

General Order No. 3 of July 22, 2015. Certain licenses issued by BIS prior to July 22, 2015 contain conditions that restrict the export, reexport, or transfer (in-country) to or within Country Group E:1 as specified in Supplement No. 1 to part 740 of the EAR. At the time those licenses were issued, Cuba was in Country Group E:1. Many of those restrictions were intended to apply to Cuba, not only as a State Sponsor of Terrorism but also as a country subject to unilateral embargo. However, BIS did not always list both Country Groups E:1 and E:2 in license conditions because, at the time, doing so would have been redundant. However, with the rescission of Cuba's designation as a State Sponsor of Terrorism and resultant removal from Country Group E:1, continuing those conditions with respect to Cuba is consistent with the embargo. Accordingly, all conditions that apply to Country Group E:1 on licenses issued prior to July 22, 2015 that are in effect on that date, are revised to apply to Country Groups E:1 and E:2 as specified in Supplement No. 1 to part 740 of the EAR. Licensees who seek authorization for transactions that are affected by this General Order No. 3 may submit license applications that refer to General Order No. 3 and explain the reason for the request in Block 24 of the

application. All license applications involving Cuba are reviewed pursuant to the licensing policy in § 746.2(b) of the EAR. The request should provide any available information in support of the argument that the transaction would be consistent with the licensing policy in § 746.2(b) of the EAR.

(d) General Order No. 4

The purpose of this General Order is to avoid disruption of supply chains for items specified in paragraph (d)(1) that are ultimately destined to customers outside of People's Republic of China (China) or Macau.

(1) Temporary General License (TGL). BIS authorizes, from October 21, 2022 through April 7, 2023, exports, reexports, in-country transfers, and exports from abroad destined to or within China or Macau by companies not headquartered in Country Groups D:1 or D:5 or E (see supplement no. 1 to part 740 of the EAR) to continue or engage in integration, assembly (mounting), inspection, testing, quality assurance, and distribution of items covered by ECCN 3A090, 4A090, and associated software and technology in ECCN 3D001, 3E001, 4D090, or 4E001; or any item that is a computer, integrated circuit, "electronic assembly" or "component" and associated software and technology, specified elsewhere on Commerce Control List (supplement no. 1 to part 774), which meets or exceeds the performance parameters of ECCN 3A090 or 4A090. This does not authorize the export, reexport, in-country transfer, or export from abroad to "end-users" or "ultimate consignees" in China or Macau. This TGL does not overcome the license requirements of §§ 744.11 or 744.21 when an entity listed in supplements no. 4 or 7 to part 744 is a party to the transaction as described in § 748.5(c) through (f) of the EAR, or when there is knowledge of any other prohibited end use or end user. This TGL is only for companies that engage in the specific activities authorized under this TGL.

(2) Recordkeeping requirement. Prior to any export, reexport, or transfer (in-country) to China or Macau pursuant to this TGL, the exporter, reexporter, or transferor, must retain the name of the entity receiving the item and the complete physical address of where the item is destined in China or Macau and the location of that company's headquarters.

(e) General Order No. 5

General Order No. 5 of April 16, 2013; Authorization for Items the President Determines No Longer Warrant Control under the United States Munitions List (USML).

(1) Continued use of DDTC approvals from the Department of State's Directorate of Defense Trade Controls (DDTC) for items that become subject to the EAR. Items the President has determined no longer warrant control under the USML will become subject to the EAR as published final rules that transfer the items to the CCL become effective. DDTC licenses, agreements, or other approvals that contain items transitioning from the USML to the CCL and that are issued prior to the effective date of the final rule transferring such items to the CCL may continue to be used in accordance with the Department of State's final rule, *Amendments to the International Traffic in Arms Regulations: Initial Implementation of Export Control Reform*, published on April 16, 2013 in the Federal Register.

(2) BIS authorization.

(i) Where continued use of DDTC authorization is not or is no longer an available option, or a holder of an existing DDTC authorization returns or terminates that authorization, any required authorization to export, reexport, or transfer (in-country) a transitioned item on or after the effective date of the applicable final rule must be obtained under

the EAR. Following the publication date and prior to the effective date of a final rule moving an item from the USML to the CCL, applicants may submit license applications to BIS for authorization to export, reexport, or transfer (in-country) the transitioning item. BIS will process the license applications in accordance with § 750.4 of the EAR, hold the license application without action (HWA) if necessary, and issue a license, if approved, to the applicant no sooner than the effective date of the final rule transitioning the items to the CCL.

(ii) Following the effective date of a final rule moving items from the USML to the CCL, exporters, reexporters, and transferors of such items may return DDTC licenses in accordance with § 123.22 of the ITAR or terminate Technical Assistance Agreements, Manufacturing License Agreements, or Warehouse and Distribution Agreements in accordance with § 124.6 of the ITAR and thereafter export, reexport, or transfer (in-country) such items under applicable provisions of the EAR, including any applicable license requirements. No transfer (in-country) may be made of an item exported under a DDTC authorization containing provisos or other limitations without a license issued by BIS unless (i) the transfer (in-country) is authorized by an EAR license exception and the terms and conditions of the License Exception have been satisfied, or (ii) no license would otherwise be required under the EAR to export or reexport the item to the new end user.

(3) Prior commodity jurisdiction determinations. If the U.S. State Department has previously determined that an item is not subject to the jurisdiction of the ITAR and the item was not listed in a then existing "018" series ECCN (for purposes of the "600 series" ECCNs, or the 0x5zz ECCNs) or in a then existing ECCN 9A004.b or related software or technology ECCN (for purposes of the 9x515 ECCNs), then the item is per se not within the scope of a "600 series" ECCN, a 0x5zz ECCN, or a 9x515 ECCN. If the

item was not listed elsewhere on the CCL at the time of such determination (*i.e.*, the item was designated EAR99), the item shall remain designated as EAR99 unless specifically enumerated by BIS or DDTC in an amendment to the CCL or to the USML, respectively.

(4) Voluntary Self-Disclosure. Parties to transactions involving transitioning items are cautioned to monitor closely their compliance with the EAR and the ITAR. Should a possible or actual violation of the EAR, or of any license or authorization issued thereunder, be discovered, the person or persons involved are strongly encouraged to submit a Voluntary Self-Disclosure to the Office of Export Enforcement, in

accordance with § 764.5 of the EAR. Permission from the Office of Exporter Services, in accordance with § 764.5(f) of the EAR, to engage in further activities in connection with that item may also be necessary. Should a possible or actual violation of the ITAR, or of any license or authorization issued thereunder, be discovered, the person or persons involved are strongly encouraged to submit a Voluntary Disclosure to DDTC, in accordance with § 127.12 of the ITAR. For possible or actual violations of both the EAR and ITAR, the person or persons involved are strongly encouraged to submit disclosures to both BIS and DDTC, indicating to each agency that they also have made a disclosure to the other agency.

SUPPLEMENT NO. 2 TO PART 736 - ADMINISTRATIVE ORDERS

Administrative Order One: Disclosure of License Issuance and Other Information. Consistent with section 12(c) of the Export Administration Act of 1979, as amended, information obtained by the U.S. Department of Commerce for the purpose of consideration of or concerning license applications, as well as related information, will not be publicly disclosed without the approval of the Secretary of Commerce. Electronic Export Information (EEI) filings via the Automated Export System (AES) are also exempt from public disclosure, except with the approval of the Secretary of Commerce, in accordance with §301(g) of Title 13, United States Code.

Administrative Order Two: Conduct of Business and Practice in Connection with Export Control Matters.

(a) Exclusion of persons guilty of unethical conduct or not possessing required integrity and ethical standards

(1) Who may be excluded. Any person, whether acting on his own behalf or on behalf of another, who shall be found guilty of engaging in any unethical activity or who shall be demonstrated not to possess the required integrity and ethical standards, may be excluded from (denied) export privileges on his own behalf, or may be excluded from practice before BIS on behalf of another, in connection with any export control matter, or both, as provided in part 764 of the EAR.

(2) Grounds for exclusion. Among the grounds for exclusion are the following:

(i) Inducing or attempting to induce by gifts, promises, bribes, or otherwise, any officer or employee of BIS or any customs or post office official, to take any action with respect to the issuance of licenses or any other aspects of the

administration of the Export Administration Act, whether or not in violation of any regulation;

(ii) Offering or making gifts or promises thereof to any such officer or employee for any other reason;

(iii) Soliciting by advertisement or otherwise the handling of business before BIS on the representation, express or implied, that such person, through personal acquaintance or otherwise, possesses special influence over any officer or employee of BIS;

(iv) Charging, or proposing to charge, for any service performed in connection with the issuance of any license, any fee wholly contingent upon the granting of such license and the amount or value thereof. This provision will not be construed to prohibit the charge of any fee agreed to by the parties; provided that the out-of-pocket expenditures and the reasonable value of the services performed, whether or not the license is issued and regardless of the amount thereof, are fairly compensated; and

(v) Knowingly violating or participating in the violation of, or an attempt to violate, any regulation with respect to the export of commodities or technical data, including the making of or inducing another to make any false representations to facilitate any export in violation of the Export Administration Act or any order or regulation issued thereunder.

(3) Definition. As used in this Administrative Order, the terms “practice before BIS” and “appear before BIS” include:

(i) The submission on behalf of another of applications for export licenses or other documents required to be filed with BIS, or the execution of the same;

Administrative Orders

(ii) Conferences or other communications on behalf of another with officers or employees of BIS for the purpose of soliciting or expediting approval by BIS of applications for export licenses or other documents, or with respect to quotas, allocations, requirements or other export control actions, pertaining to matters within the jurisdiction of BIS;

(iii) Participating on behalf of another in any proceeding pending before BIS;

(iv) Submission on behalf of another of a license or other export control document to U.S. Customs and Border Protection (CBP); and

(v) Reporting on behalf of another Electronic Export Information via the Automated Export System (AES) to CBP.

Supplement No. 2 to Part 736-page 2

(4) Proceedings. All proceedings under this Administrative Order shall be conducted in the same manner as provided in part 766 of the EAR.

(b) Employees and former employees

Persons who are or at any time have been employed on a full-time or part-time, compensated or uncompensated, basis by the U.S. Government are subject to the provisions of 18 U.S.C. 203, 205, and 207 (Pub. L. 87-849, 87th Congress) in connection with representing a private party or interest before the U.S. Department of Commerce in connection with any export control matter.

Table of Contents

§ 738.1 INTRODUCTION 1

§ 738.2 COMMERCE CONTROL LIST (CCL) STRUCTURE..... 1

§ 738.3 COMMERCE COUNTRY CHART STRUCTURE 5

§ 738.4 DETERMINING WHETHER A LICENSE IS REQUIRED 6

SUPPLEMENT NO. 1 TO PART 738 - COMMERCE COUNTRY CHART..... 1

§ 738.1 INTRODUCTION

(a) Commerce Control List scope

(1) In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. The Bureau of Industry and Security (BIS) maintains the Commerce Control List (CCL) within the Export Administration Regulations (EAR), which includes items (i.e., commodities, software, and technology) subject to the export licensing authority of BIS. The CCL does not include those items exclusively controlled for export or reexport by another department or agency of the U.S. Government. In instances where agencies other than the Department of Commerce administer controls over related items, entries in the CCL contain a reference to these controls.

(2) The CCL is contained in Supplement No. 1 to part 774 of the EAR. Supplement No. 2 to part 774 of the EAR contains the General Technology and Software Notes relevant to entries contained in the CCL.

(3) *Items that warrant control for export or reexport but currently are not permanently classified on the CCL.* Items subject to temporary CCL controls are classified under the ECCN

0Y521 series (i.e., 0A521, 0B521, 0C521, 0D521, and 0E521) pursuant to § 742.6(a)(8) of the EAR while a determination is made as to whether classification under a revised or new ECCN, or an EAR99 designation, is appropriate.

(b) Commerce Country Chart scope

BIS also maintains the Commerce Country Chart. The Commerce Country Chart, located in Supplement No. 1 to part 738, contains licensing requirements based on destination and Reason for Control. In combination with the CCL, the Commerce Country Chart allows you to determine whether a license is required for items on the CCL to any country in the world.

§ 738.2 COMMERCE CONTROL LIST (CCL) STRUCTURE

(a) Categories

The CCL is divided into 10 categories, numbered as follows:

- 0-Nuclear Materials, Facilities and Equipment and Miscellaneous
- 1-Materials, Chemicals, “Microorganisms,” and Toxins
- 2-Materials Processing
- 3-Electronics
- 4-Computers
- 5-Telecommunications and Information Security
- 6-Lasers and Sensors
- 7-Navigation and Avionics
- 8-Marine
- 9-Aerospace and Propulsion

(b) Groups

Within each category, items are arranged by group. Each category contains the same five groups. Each Group is identified by the letters A through E, as follows:

A-Equipment, Assemblies and Components
 B-Test, Inspection and Production Equipment
 C-Materials
 D-Software
 E-Technology

9: Anti-terrorism, Crime Control, Regional Stability, Short Supply, UN Sanctions, etc.

(c) Order of review

The CCL includes a Supplement No. 4 to part 774 – Commerce Control List Order of Review. This supplement establishes the steps (i.e., the order of review) that should be followed in classifying items that are “subject to the EAR.”

(d) Entries

(1) Composition of an entry. Within each group, individual items are identified by an Export Control Classification Number (ECCN). Each number consists of a set of digits and a letter. The first digit identifies the general category within which the entry falls (e.g., 3A001). The letter immediately following this first digit identifies under which of the five groups the item is listed (e.g., 3A001). The second digit differentiates individual entries by identifying the type of controls associated with the items contained in the entry (e.g., 3A001). Listed below are the Reasons for Control associated with this second digit.

- 0: National Security reasons (including Dual Use and Wassenaar Arrangement Munitions List) and Items on the NSG Dual Use Annex and Trigger List
- 1: Missile Technology reasons
- 2: Nuclear Nonproliferation reasons
- 3: Chemical & Biological Weapons reasons
- 5: Items warranting national security or foreign policy controls at the determination of the Department of Commerce.
- 6: “600 series” controls items because they are items on the Wassenaar Arrangement Munitions List (WAML) or formerly on the U.S. Munitions List (USML).

(i) Since Reasons for Control are not mutually exclusive, numbers are assigned in order of precedence. As an example, if an item is controlled for both National Security and Missile Technology reasons, the entry’s third alphanumeric character will be a “0”. If the item is controlled only for Missile Technology the third alphanumeric character will be “1”.

(ii) The numbers in either the second or third digit (e.g., 3A001) serve to differentiate between multilateral and unilateral entries. An entry with the number “9” as the second digit, identifies the entire entry as controlled for a unilateral concern (e.g., 2B991 for anti-terrorism reasons). If the number “9” appears as the third digit, the item is controlled for unilateral purposes based on a proliferation concern (e.g., 2A290 is controlled for unilateral purposes based on nuclear nonproliferation concerns).

(iii) The last digit within each entry (e.g., 3A001) is used for the sequential numbering of ECCNs to differentiate between entries on the CCL.

(iv) Last two characters in a “600 series” ECCN. The last two characters of each “600 series” ECCN generally track the Wassenaar Arrangement Munitions List (WAML) categories for the types of items at issue. The WAML ML21 (“software”) and ML22 (“technology”) are, however, included in D (“software”) and E (“technology”) CCL product groups to remain consistent with the structure of the CCL.

(2) Reading an ECCN. An ECCN is made up of four sections, the “Heading,” “License Requirements,” “License Exceptions,” and “List of Items Controlled” sections. A brief description of each section and its use follows:

(i) *Heading.* A description of the items controlled is provided next to each ECCN. In certain ECCNs, the description is a summary and will direct you to “see List of Items Controlled” for a complete list of items classified under those respective ECCNs. The “Items” paragraph in the List of Items Controlled section will describe all of the items that the ECCN controls for the portions of the heading that precede the “see List of Items Controlled” phrase. Portions of the heading that follow the phrase are complete descriptions of the items controlled by that portion of the heading. If “see List of Items Controlled” appears at the end of the heading, the “Items” paragraph in the List of Items Controlled section is the exclusive, complete list of the items the ECCN controls.

(ii) *License Requirements.* This section contains a separate line identifying all possible Reasons for Control in order of precedence, and two columns entitled “Control(s)” and “Country Chart”.

(A) The “Controls” header identifies all applicable Reasons for Control, in order of restrictiveness, and to what extent each applies (e.g., to the entire entry or only to certain subparagraphs). Those requiring licenses for a larger number of countries and/or items are listed first. As you read down the list, the number of countries and/or items requiring a license declines. Since Reasons for Control are not mutually exclusive, items controlled within a particular ECCN may be controlled for more than one reason. The following is a list of all possible Reasons for Control:

- AT Anti-Terrorism
- CB Chemical & Biological Weapons
- CC Crime Control
- CW Chemical Weapons Convention
- EI Encryption Items
- FC Firearms Convention
- MT Missile Technology
- NS National Security

- NP Nuclear Nonproliferation
- RS Regional Stability
- SS Short Supply
- UN United Nations Embargo
- SI Significant Items
- SL Surreptitious Listening

(B) The “Country Chart” header identifies, for each applicable Reason for Control, a column name and number (e.g., CB Column 1). These column identifiers are used to direct you from the CCL to the appropriate column identifying the countries requiring a license. Consult part 742 of the EAR for an in-depth discussion of the licensing requirements and policies applicable to each Country Chart column.

(iii) *License Exceptions.* This section provides a brief eligibility statement for each ECCN-driven License Exception that may be applicable to your transaction, and should be consulted only AFTER you have determined a license is required based on an analysis of the entry and the Country Chart. The brief eligibility statement in this section is provided to assist you in deciding which ECCN-driven License Exception related to your particular item and destination you should explore prior to submitting an application. The term “Yes” (followed in some instances by the scope of Yes) appears next to each available ECCN-driven License Exception. Some ECCNs have License Exception STA exclusion paragraphs. These paragraphs identify items for which the License Exception STA provisions in § 740.20(c)(2) of the EAR may not be used, but do not otherwise affect License Exception STA availability. The term “N/A” will be noted for License Exceptions that are not available within a particular entry. In some “600 series” ECCNs, the STA license exception paragraph or a note to the License Exceptions section contains additional information on the availability of License Exception STA for that ECCN. If one or more License Exceptions appear to apply to your transaction, you must consult part 740 of the EAR to review the conditions and restrictions

applicable to each available License Exception. The list of License Exceptions contained within each ECCN is not an all-exclusive list. Other License Exceptions, not based on particular ECCNs, may be available. Consult part 740 of the EAR to determine eligibility for non-ECCN-driven License Exceptions.

(iv) List of Items Controlled.

(A) *Related definitions.* This header identifies, where appropriate, definitions or parameters that apply to all items controlled by the entry. The information provided in this section is unique to the entry, and hence not listed in the definitions contained in part 772 of the EAR.

(B) *Related controls.* If another U.S. government agency or department has export licensing authority over items related to those controlled by an entry, a statement is included identifying the agency or department along with the applicable regulatory cite. An additional cross-reference may be included in instances where the scope of controls differs between a CCL entry and its corresponding entry on list maintained by the European Union. This information is provided to assist readers who use both lists.

(C) *Items.* This paragraph describes the relationship between the “items” paragraph and ECCN headings and will assist your understanding as you classify items on the CCL. When the heading contains the phrase “see List of Items Controlled,” the portion of the heading preceding that phrase is only a summary of the items controlled by the ECCN and the “items” paragraph contains an exclusive list of items described in the heading. Paragraphs (d)(2)(iv)(C)(1), (2) and (3) of this section provide examples of the three different uses of the phrase “(see List of Items Controlled)” in ECCN headings. Each heading on the CCL uses one of these three structures. Understanding the

relationship between the heading and the “items” paragraph is important when classifying items that are “subject to the EAR” on the CCL.

(1) “(See List of Items Controlled)” is at the end of the ECCN heading. An example of an ECCN where all of the heading text precedes the phrase “(see List of Items Controlled)” is ECCN 8A002 Marine systems, equipment, “parts” and “components,” as follows (see List of Items Controlled). ECCNs 1A001, 3A001, 6A001, 7A004 and 9A012 are other examples where all of the heading text precedes the phrase “(see List of Items Controlled).” In these types of headings, the items paragraphs must be reviewed to determine whether your item is contained within the heading and classified under that ECCN.

(2) “(See List of Items Controlled)” is in the middle of the ECCN heading. If the phrase “(see List of Items Controlled)” appears in the middle of the ECCN heading, then all portions of the heading that follow the phrase “(see List of Items Controlled)” will list items controlled in addition to the list in the “items” paragraph. An example of such a heading is ECCN 2B992 Non-“numerically controlled” machine tools for generating optical quality surfaces, (see List of Items Controlled) and “specially designed” “parts” and “components” therefor. Under the ECCN 2B992 example, the “items” paragraph must be reviewed to determine whether your item is contained within the first part of the heading (“non-‘numerically controlled’ machine tools for generating optical quality surfaces”) and classified under 2B992. The second part of the ECCN 2B992 heading (“and ‘specially designed’ ‘parts’ and ‘components’ therefor”) contains the exclusive list described in the heading. ECCNs 1A006, 3B992, 4A001, 6A006 and 7A001 are other examples where the phrase “(see List of Items Controlled)” appears in the middle of the ECCN heading.

(3) ECCNs that do not use the phrase “(see List of Items controlled).” When all items

classified in the ECCN are listed in the heading, a sentence is generally included in the “items” paragraph to direct you to the heading. An example of such a heading is ECCN 4E980 “Technology” for the “development,” “production” or “use” of commodities controlled by 4A980. ECCNs 0A982, 5D101, 8D001 and 9A002 are other examples where the heading is the exclusive description of the items classified under those respective ECCNs.

§ 738.3 COMMERCE COUNTRY CHART STRUCTURE

(a) Scope

The Commerce Country Chart allows you to determine the Commerce Control List (CCL) export and reexport license requirements for most items listed on the CCL. Such license requirements are based on the Reasons for Control listed in the Export Control Classification Number (ECCN) that applies to the item. Some ECCNs, however, impose license requirements either without reference to a reason for control code that is listed on the Commerce Country Chart, or in addition to such a reference. Those ECCNs may state their license requirements in full in their “Reasons for Control” sections or they may refer the reader to another provision of the EAR for license requirement information. In addition, some ECCNs do not impose license requirements, but refer the reader to the regulations of another government agency that may impose license requirements on the items described in that ECCN.

(1) ECCNs 0A983, 5A001.f.1, 5A980, 5D001 (for 5A001.f.1, or for 5E001.a (for 5A001.f.1 or for 5D001.a (for 5A001.f.1))), 5D980, 5E001.a (for 5A001.f.1, or for 5D001.a (for 5A001.f.1)) and 5E980. A license is required for all destinations for items controlled under these entries. For items controlled by 0A983, 5E001.a

(for 5A001.f.1, or for 5D001.a (for 5A001.f.1)) and 5E980, no license exceptions apply. For items controlled by 5A001.f.1, 5A980, 5D001 (for 5A001.f.1 or for 5E001.a (for 5A001.f.1, or for 5D001.a (for 5A001.f.1))) and 5D980, License Exception GOV may apply if your item is consigned to and for the official use of an agency of the U.S. Government (see § 740.2(a)(3)). If your item is controlled by 0A983, 5A001.f.1, 5A980, 5D001 (for 5A001.f.1 or for 5E001.a (for 5A001.f.1, or for 5D001.a (for 5A001.f.1))), 5D980, 5E001.a (for 5A001.f.1, or for 5D001.a (for 5A001.f.1)) or 5E980 you should proceed directly to Part 748 of the EAR for license application instructions and §§ 742.11 or 742.13 of the EAR for information on the licensing policy relevant to these types of applications.

(2) [RESERVED]

(b) Countries

The first column of the Country Chart lists countries in alphabetical order. There are a number of destinations that are not listed in the Country Chart contained in Supplement No. 1 to part 738. If your destination is not listed on the Country Chart and such destination is a territory, possession, dependency or department of a country included on the Country Chart, the EAR accords your destination the same licensing treatment as the country of which it is a territory, possession, dependency or department. For example, if your destination is the Cayman Islands, a dependent territory of the United Kingdom, refer to the United Kingdom on the Country Chart for licensing requirements. In addition, if your destination is Liechtenstein, which serves as one territory with Switzerland for purposes of the EAR, refer to Switzerland on the Country Chart for licensing requirements.

(c) Columns

Stretching out to the right are horizontal headers identifying the various Reasons for Control. Under each Reason for Control header are diagonal column identifiers capping individual columns. Each column identifier consists of the two letter Reason for Control and a column number (e.g., CB Column 1). The column identifiers correspond to those listed in the “Country Chart” header within the “License Requirements” section of each ECCN.

(d) Cells

The symbol “X” is used to denote licensing requirements on the Country Chart. If an “X” appears in a particular cell, transactions subject to that particular Reason for Control/Destination combination require a license. There is a direct correlation between the number of “X”s applicable to your transaction and the number of licensing reviews your application will undergo.

§ 738.4 DETERMINING WHETHER A LICENSE IS REQUIRED

(a) Using the CCL and the Country Chart

(1) Overview. Once you have determined that your item is classified under a specific ECCN, you must use information contained in the “License Requirements” section of that ECCN in combination with the Country Chart to decide whether a license is required. Note that not all license requirements set forth under the “License Requirements” section of an ECCN refer you to the Commerce Country Chart, but in some cases this section will contain references to a specific section in the EAR for license requirements. In such cases, this section would not apply.

(2) License decision making process. The following decision making process must be followed in order to determine whether a license

is required to export or reexport a particular item to a specific destination:

(i) *Examine the appropriate ECCN in the CCL.* Is the item you intend to export or reexport controlled for a single Reason for Control?

(A) If *yes*, identify the single Reason for Control and the relevant Country Chart column identifier (e.g., CB Column 1).

(B) If *no*, identify the Country Chart column identifier for each applicable Reason for Control (e.g., NS Column 1, NP Column 1, etc.).

(ii) *Review the Country Chart.* With each of the applicable Country Chart Column identifiers noted, turn to the Country Chart (Supplement No. 1 to part 738). Locate the correct Country Chart column identifier on the diagonal headings, and determine whether an “X” is marked in the cell next to the country in question for each Country Chart column identified in the applicable ECCN. If your item is subject to more than one reason for control, repeat this step using each unique Country Chart column identifier.

(A) If *yes*, a license application must be submitted based on the particular reason for control and destination, unless a License Exception applies. If “Yes” is noted next to any of the listed License Exceptions, you should consult part 740 of the EAR to determine whether you can use any of the available ECCN-driven License Exceptions to effect your shipment, rather than applying for a license. Each affirmative license requirement must be overcome by a License Exception. If you are unable to qualify for a License Exception based on each license requirement noted on the Country Chart, you must apply for a license. Note that other License Exceptions, not related to the CCL, may also apply to your transaction (See part 740 of the EAR).

(B) If no, a license is not required based on the particular Reason for Control and destination. Provided that General Prohibitions Four through Ten do not apply to your proposed transaction and the License Requirement section does not refer you to any other part of the EAR to determine license requirements. For example, any applicable encryption classification requirements described in § 740.17(b) of the EAR must be met for certain mass market encryption items to affect your shipment using the symbol “NLR.” Proceed to parts 758 and 762 of the EAR for information on export clearance procedures and recordkeeping requirements. Note that although you may stop after determining a license is required based on the first Reason for Control, it is best to work through each applicable Reason for Control. A full analysis of every possible licensing requirement based on each applicable Reason for Control is required to determine the most advantageous License Exception available for your particular transaction and, if a license is required, ascertain the scope of review conducted by BIS on your license application.

(b) Sample analysis using the CCL and Country Chart

(1) Scope. The following sample entry and related analysis is provided to illustrate the type of thought process you must complete in order to determine whether a license is required to export or reexport a particular item to a specific destination using the CCL in combination with the Country Chart.

(2) Sample CCL entry.

2A000: Entry heading.

License requirements

Reason for Control: NS, NP, AT

<i>Control(s)</i>	<i>Country chart</i>
-------------------	----------------------

	<i>(See Supp. No. 1 to part 738).</i>
NS applies to entire entry	NS Column 2
NP applies to 2A000.b entire entry	NP Column 1
AT applies to entire entry	AT Column 1

List Based License Exceptions (See Part 740 for a description of all license exceptions)

LVS: \$5,000

GBS: Yes

List of items controlled

Related Definition: N/A

Related Controls: N/A

Items:

a. Having x.

b. Having z.

(3) Sample analysis. After consulting the CCL, I determine my item, valued at \$10,000, is classified under ECCN 2A000.a. I read that the entire entry is controlled for national security, and anti-terrorism reasons. Since my item is classified under paragraph .a, and not .b, I understand that though nuclear nonproliferation controls apply to a portion of the entry, they do not apply to my item. I note that the appropriate Country Chart column identifiers are NS Column 2 and AT Column 1. Turning to the Country Chart, I locate my specific destination, Chad, and see that an “X” appears in the NS Column 2 cell for Chad, but not in the AT Column 1 cell. I understand that a license is required, unless my transaction qualifies for a License Exception. From the License Exception LVS value listed in the entry, I know immediately that my proposed transaction exceeds the value limitation associated with LVS. Noting that License Exception GBS is “Yes” for this entry, I turn to part 740 of the EAR to review the provisions related to use of GBS.

§ 740.1 INTRODUCTION

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C.

(a) Scope

A “License Exception” is an authorization contained in this part that allows you to export or reexport under stated conditions, items subject to

the Export Administration Regulations (EAR) that would otherwise require a license under General Prohibition One, Two, Three, or Eight as indicated under one or more of the Export Control Classification Numbers (ECCNs) in the Commerce Control List (CCL) in Supplement No. 1 to part 774 of the EAR and items subject to the EAR that would require a license based on the embargo policies described in part 746 of the EAR. If your export or reexport is subject to General Prohibition Six for embargoed destinations, refer to part 746 of the EAR to determine the availability of any License Exceptions. Special commodity controls apply to short supply items. License Exceptions for items listed on the CCL as controlled for Short Supply reasons are found in part 754 of the EAR. If your export or reexport is to subject to General Prohibition Five, consult part 744 of the EAR. If your export or reexport is subject to General Prohibitions Four, Seven, Nine, or Ten, then no License Exceptions apply. Any license exception authorizing reexports also authorizes in-country transfers, provided the terms and conditions for reexports under that license exception are met.

(b) Certification

By using any of the License Exceptions you are certifying that the terms, provisions, and conditions for the use of the License Exception described in the EAR have been met. Please refer to part 758 of the EAR for clearance of shipments and documenting the use of License Exceptions.

(c) License Exception symbols

Each License Exception bears a three-letter symbol that will be used for export clearance purposes (see paragraph (d) of this section).

(d) Electronic Export Information (EEI) filing.

You must enter on any required EEI filing the correct License Code that corresponds to the appropriate license exception symbol (e.g., LVS, GBS, CIV) and the correct Export Control Classification Number (ECCN) (e.g., 4A003,

5A002) for all exports of items under a license exception. Items temporarily in the United States meeting the provisions of License Exception TMP, under § 740.9(b)(3), are excepted from this requirement. See § 758.1 of the EAR and 15 CFR Part 30 of the FTR for EEI requirements.

(e) Destination Control Statement

You may be required to enter an appropriate Destination Control Statement on commercial documents in accordance with Destination Control Statement requirements of § 758.6 of the EAR.

(f) Recordkeeping

Records of transactions involving exports under any of the License Exceptions must be maintained in accordance with the recordkeeping requirements of part 762 of the EAR.

§ 740.2 RESTRICTIONS ON ALL LICENSE EXCEPTIONS

(a) You may not use any License Exception if any one or more of the following apply:

- (1)** Your authorization to use a License Exception has been suspended or revoked, or your intended export does not qualify for a License Exception.
- (2)** The export or reexport is subject to one of the ten General Prohibitions, is not eligible for a License Exception, and has not been authorized by BIS.
- (3)** The item is primarily useful for surreptitious interception of wire, oral, or electronic communications, or related software, controlled under ECCNs 5A001.f.1, 5A980, 5D001 (for 5A001.f.1 or for 5E001.a (for 5A001.f.1, or for 5D001.a (for 5A001.f.1))), or 5D980, unless the item is consigned to and for the official use of an agency of the U.S. Government (see § 740.11(b)(2)(ii) of this part, Governments (GOV)). No license exceptions apply for 5E001.a

(for 5A001.f.1, or for 5D001.a (for 5A001.f.1)) or for 5E980.

(4) The item being exported or reexported is subject to the license requirements described in §742.7 of the EAR and the export or reexport is not:

(i) Being made to Australia, India, Japan, New Zealand, or a NATO (North Atlantic Treaty Organization) member state (see NATO membership listing in §772.1 of the EAR);

(ii) Authorized by §740.11(b)(2)(ii) (official use by personnel and agencies of the U.S. government);

(iii) Authorized by §740.14(e) of the EAR (certain shotguns and shotgun shells for personal use); or

(iv) Authorized by § 740.20 of the EAR (License Exception STA).

(5)(i) The item is controlled for missile technology (MT) reasons, except that the items described in ECCNs 6A008, 7A001, 7A002, 7A004, 7A101, 7A102, 7A103, 7A104, 7A105, 7B001, 7D001, 7D002, 7D003, 7D101, 7D102, 7E003, 7E101 or 9A515, may be exported as part of a spacecraft, manned aircraft, land vehicle or marine vehicle or in quantities appropriate for replacement parts for such applications under § 740.9(a)(4) (License Exception TMP for kits consisting of replacement parts), § 740.10 (License Exception RPL), § 740.13 (License Exception TSU), or § 740.15(b) (License Exception AVS for equipment and spare parts for permanent use on a vessel, aircraft or spacecraft).

(ii) MT controlled commodities described in ECCN 2A001 or 2A101 may be exported or reexported under § 740.9(a)(4) (License Exception TMP) or §740.10 (License Exception RPL) as one-for-one replacement for equipment previously legally exported or reexported.

(6) The export or reexport is to a sanctioned destination (Cuba, Iran, North Korea, Syria,

Crimea region of Ukraine, and the so-called Donetsk People’s Republic (DNR) and Luhansk People’s Republic (LNR) regions of Ukraine) or a license is required based on a limited sanction (Russia or Belarus) unless a license exception or portion thereof is specifically listed in the license exceptions paragraph pertaining to a particular sanctioned country in part 746 of the EAR.

(7) With the exception of License Exception GOV (§ 740.11(b)(2)), license exceptions are not available for the following 6E001 or 6E002 technology:

(i) Technology required for the “development” or “production” of photon detector, microbolometer detector, pyroelectric, or multispectral detector, infrared focal plane arrays (IRFPAs), described in ECCN 6A002, having a peak response within the wavelength range exceeding 900 nm but not exceeding 30,000 nm, excluding lead sulfide or lead selenide IRFPAs having a peak response within the wavelength range exceeding 1,000 nm but not exceeding 5,000 nm and not exceeding 16 detector elements; or

(ii) Technology required for the “development” or “production” of third generation or greater (e.g., Electron Bombarded Active Pixel Sensor (EBAPS)) image intensifier tubes described in ECCN 6A002.

(8) The item is controlled under ECCNs 2A983, 2A984, 2D983, 2D984, 2E983 or 2E984 and the License Exception is other than:

(i) RPL, under the provisions of §740.10, including § 740.10(a)(3)(v), which prohibits exports and reexports of replacement parts to countries in Country Group E:1 (see Supplement 1 to part 740));

(ii) GOV, restricted to eligibility under the provisions of §740.11(b)(2)(ii); or

(iii) TSU, under the provisions of § 740.13(a) and (c).

(9) The item is identified in paragraphs (a)(9)(i) and(ii) of this section, being exported, reexported, or transferred (in-country) to or within the People’s Republic of China (PRC) or Macau, and the license exception is other than: RPL (excluding 3B090, 3D001 (for 3B090), and 3E001 (for 3B090)), under the provisions of § 740.10, including § 740.10(a)(3)(v), which prohibits exports and reexports of replacement parts to countries in Country Group E:1 (see supplement no. 1 to part 740)); GOV, restricted to eligibility under the provisions of § 740.11(b)(2)(ii); or TSU (excluding 3B090, 3D001 (for 3B090), and 3E001 (for 3B090)), under the provisions of § 740.13(a) and (c). Items restricted to eligibility only for the foregoing license exceptions are:

(i) Controlled under ECCNs 3A090, 3B090, 4A090, or associated software and technology in 3D001, 3E001, 4D090, and 4E001; or

(ii) A computer, integrated circuit, “electronic assembly” or “component” specified elsewhere on the CCL which meets or exceeds the performance parameters of ECCN 3A090 or 4A090.

(10) The commodity being exported or reexported is subject to the license requirements of §742.11 of the EAR.

(11) The item is a “military commodity” subject to ECCN 0A919, except that such military commodities may be reexported in accordance with § 740.11(b)(2)(ii) (official use by personnel and agencies of the U.S. Government).

(12) The item is described in a 9x515 or “600 series” ECCN and is destined to, shipped from, or was manufactured in a destination listed in Country Group D:5 or Hong Kong (see Supplement No.1 to part 740 of the EAR), except that:

(i) “9x515 or 600 series” items destined to, or in, Country Group D:5 are eligible for License Exception GOV (§ 740.11(b)(2) of the EAR); and

(ii) 1A613.c or .d items destined to, or in, Country Group D:5 are eligible for License Exception TMP (§ 740.9(a)(11) of the EAR) or License Exception BAG (§ 740.14(h)(2) of the EAR).

(13) “600 series” items that are controlled for missile technology (MT) reasons may not be exported, reexported, or transferred (in-country) under License Exception STA (§ 740.20 of the EAR). Items controlled under ECCNs 9D610.b, 9D619.b, 9E610.b, or 9E619.b or .c are not eligible for license exceptions except for License Exception GOV (§ 740.11(b)(2) of the EAR). Only the following license exceptions may be used to export “600 series” items to destinations other than those identified in Country Group D:5 or Hong Kong (see Supplement No.1 to part 740 of the EAR):

(i) License Exception LVS (§ 740.3 of the EAR);

(ii) License Exception TMP (§ 740.9 of the EAR);

(iii) License Exception RPL (§ 740.10 of the EAR);

(iv) License Exception TSU (§ 740.13(a), (b), (f) and (g) of the EAR);

(v) License Exception GOV (§ 740.11(b) or (c) of the EAR);

(vi) License Exception BAG (§ 740.14); and

(vii) License Exception STA under § 740.20(c)(1) of the EAR, provided all of the applicable terms and conditions, including those specific to the “600 series” are met.

(14) Items classified under ECCNs 0A521, 0B521, 0C521, 0D521 and 0E521 may only be authorized by License Exception GOV (§ 740.11(b)(2)(ii)) or an item-specific license exception identified in Supplement No. 5 to part 774 for a particular ECCN 0Y521 item.

NOTE TO PARAGRAPH (a)(14): *Item-specific license exception availability is specific to each ECCN 0Y521 entry in Supplement No. 5 to part 774 and may not be used for any other ECCN 0Y521 entries in the Supplement. The U.S. Government makes a determination at the time items are classified under ECCNs 0A521, 0B521, 0C521, 0D521 and 0E521 regarding whether any license exceptions will be available, in addition to License Exception GOV (§ 740.11(b)(2)(ii)).*

(15) If they are sold under a contract that includes \$14,000,000 or more of “600 Series Major Defense Equipment” (as defined in § 772.1), exports of “600 series” items to a country not listed in Country Group A:5 (see Supplement No. 1 to Part 740 of the EAR), are not eligible for any license exception except to U.S. Government end users under License Exception GOV (§ 740.11(b) of the EAR).

(16) If they are sold under a contract that includes \$25,000,000 or more of “600 Series Major Defense Equipment” (as defined in § 772.1), exports of “600 series” items to a country listed in Country Group A:5 (see Supplement No. 1 to Part 740 of the EAR), are not eligible for any license exception except to U.S. Government end users under License Exception GOV (§ 740.11(b) of the EAR).

(17) A party to the transaction, as described in § 748.5 of the EAR, is listed on the Unverified List in Supplement No. 6 to Part 744, see § 744.15 of the EAR.

(18) 9x515 items that are controlled for missile technology (MT) reasons may not be exported, reexported, or transferred (in-country) under License Exception STA (§ 740.20 of the EAR).

(19) The exporter or reexporter to Hong Kong of any item subject to the EAR and controlled on the CCL for NS, MT, NP Column 1, or CB reasons has not received one of the following with respect to the item:

(i) A copy of an import license issued to the Hong Kong importer by the Government of the Hong Kong Special Administrative Region, pursuant to the Hong Kong Import and Export (Strategic Commodities) Regulations, that covers all items to be exported or reexported pursuant to that license exception for which a Hong Kong import license is required and that is valid on the date of the export or reexport that is subject to the EAR; or

(ii) A copy of a written statement issued by the Government of the Hong Kong Special Administrative Region that no import license is required to import into Hong Kong the item(s) to be exported or reexported. The statement may have been issued directly to the Hong Kong importer or it may be a written statement available to the general public. The statement may be used for more than one export or reexport to Hong Kong so long as it remains an accurate statement of Hong Kong law.

(20) The reexporter from Hong Kong of any item subject to the EAR controlled on the CCL for NS, MT, NP column 1, or CB reasons has not received one of the following with respect to the item:

(i) An export license issued by the Government of the Hong Kong Special Administrative Region, pursuant to the Hong Kong Import and Export (Strategic Commodities) Regulations, that covers all items to be reexported pursuant to that license exception for which a Hong Kong export license is required and that is valid on the date of the reexport that is subject to the EAR; or

(ii) A copy of a written statement issued by the Government of the Hong Kong Special Administrative Region that no Hong Kong export license is required for the item(s) to be reexported. The statement may have been issued directly to the Hong Kong reexporter or it may be a written statement available to the general public. The statement may be used for more than one reexport from Hong Kong so long as it remains an accurate statement of Hong Kong law.

(21) The reexport or transfer (in-country) of firearms classified under ECCNs 0A501 or 0A502 if a part or component that is not “subject to the ITAR,” but would otherwise meet the criteria in USML Category I(h)(2) (*i.e.*, parts and components specially designed for conversion of a semiautomatic firearm to a fully automatic firearm) is incorporated into the firearm or is to be reexported or transferred (in-country) with the firearm with “knowledge” the part or component will be subsequently incorporated into the firearm. (*See* USML Category I(h)(2)). In such instances, no license exceptions are available except for License Exception GOV (§ 740.11(b)(2)(ii)).

(22) The export, reexport, or transfer (in-country) of any item classified under a 0x5zz ECCN when a party to the transaction is designated on the Department of the Treasury, Office of Foreign Assets Control (OFAC), Specially Designated Nationals and Blocked Persons (SDN) list under the designation [SDNT], pursuant to the Narcotics Trafficking Sanctions Regulations, 31 CFR part 536, or under the designation [SDNTK], pursuant to the Foreign Narcotics Kingpin Sanctions Regulations, 31 CFR part 598.

Note to paragraph (a): Items subject to the exclusive export control jurisdiction of another agency of the U.S. Government may not be authorized by a license exception or any other authorization under the EAR. If your item is subject to the exclusive jurisdiction of another agency of the U.S. Government, you must determine your export licensing requirements pursuant to the other agency’s regulations. See § 734.3(b) and Supplement No. 3 to part 730 of the EAR for other U.S. Government departments and agencies with export control responsibilities.

(23) Exports of semiautomatic firearms controlled by ECCN 0A501.a sold under a contract or otherwise part of an export that includes \$4,000,000 or more of such items are not eligible for any license exceptions except to personnel and agencies of the U.S. Government under License Exception GOV (§ 740.11(b) of the EAR), for official use by an agency of NATO,

or where a license exception would otherwise be available for the export of such items to a country listed in Country Groups A:5 or A:6 (see supplement no. 1 to part 740 of the EAR) except Mexico, South Africa, or Turkey.

(b) All License Exceptions are subject to revision, suspension, or revocation, in whole or in part, without notice. It may be necessary for BIS to stop a shipment or an export transaction at any stage of its progress, e.g., in order to prevent an unauthorized export or reexport. If a shipment is already en route, it may be further necessary to order the return or unloading of the shipment at any port of call.

(c) BIS may by informing the exporter, suspend or revoke any License Exception in order to comply with U.S. Wassenaar obligations. In addition, BIS may inform an exporter, that before using any License Exception, a notice be submitted with BIS concerning the proposed export.

(d) See §746.3 for restrictions on certain transfers within Iraq of items exported or reexported to Iraq pursuant to a License Exception.

§ 740.3 SHIPMENTS OF LIMITED VALUE (LVS)

(a) Scope

License Exception LVS authorizes the export and reexport in a single shipment of eligible commodities as identified by “LVS - \$(value limit)” on the CCL.

(b) Eligible Destinations

This License Exception is available for all destinations in Country Group B (see Supplement No. 1 to part 740), provided that the net value of the commodities included in the same order and controlled under the same ECCN entry on the CCL does not exceed the amount specified in the LVS paragraph for that entry.

(c) Definitions

(1) Order. The term “order” as used in this § 740.3 means a communication from a person in a foreign country, or that person's representative, expressing an intent to import commodities from the exporter. Although all of the details of the order need not be finally determined at the time of export, terms relating to the kinds and quantities of the commodities to be exported, as well as the selling prices of these commodities, must be finalized before the goods can be exported under License Exception LVS.

(2) Net value: for LVS shipments. The actual selling price of the commodities that are included in the same order and are controlled under the same entry on the CCL, less shipping charges, or the current market price of the commodities to the same type of purchaser in the United States, whichever is the larger. In determining the actual selling price or the current market price of the commodity, the value of containers in which the commodity is being exported may be excluded. The value for LVS purposes is that of the controlled commodity that is being exported, and may not be reduced by subtracting the value of any content that would not, if shipped separately, be subject to licensing. Where the total value of the containers and their contents must be shown on Shipper's Export Declarations under one Schedule B Number, the exporter, in effecting a shipment under this License Exception, must indicate the “net value” of the contained commodity immediately below the description of the commodity.

(3) Single shipment. All commodities moving at the same time from one exporter to one consignee or intermediate consignee on the same exporting carrier even though these commodities will be forwarded to one or more ultimate consignees. Commodities being transported in this manner will be treated as a single shipment even if the commodities represent more than one order or are in separate containers.

(d) Additional eligibility requirements**and restrictions**

(1) Eligible orders. To be eligible for this License Exception, orders must meet the following criteria:

(i) Orders must not exceed the applicable “LVS” dollar value limits. An order is eligible for shipment under LVS when the “net value” of the commodities controlled under the same entry on the CCL does not exceed the amount specified in the “LVS” paragraph for that entry. An LVS shipment may include more than one eligible order.

(ii) Orders may not be split to meet the applicable LVS dollar limits. An order that exceeds the applicable LVS dollar value limit may not be misrepresented as two or more orders, or split among two or more shipments, to give the appearance of meeting the applicable LVS dollar value limit. However, an order that meets all the LVS eligibility requirements, including the applicable LVS dollar value limit, may be split among two or more shipments.

(iii) Orders must be legitimate. Exporters and consignees may not, either collectively or individually, structure or adjust orders to meet the applicable LVS dollar value limits.

(2) Restriction on annual value of LVS orders. The total value of exports per calendar year to the same ultimate or intermediate consignee of commodities classified under a single ECCN may not exceed 12 times the LVS value limit for that ECCN; however, there is no restriction on the number of shipments provided that value is not exceeded. This annual value limit applies to shipments to the same ultimate consignee even though the shipments are made through more than one intermediate consignee. There is no restriction on the number of orders that may be included in a shipment, except that the annual value limit per ECCN must not be exceeded.

(3) Orders where two or more LVS dollar value limits apply. An order may include

commodities that are controlled under more than one entry on the CCL. In this case, the net value of the entire order may exceed the LVS dollar value for any single entry on the CCL. However, the net value of the commodities controlled under each ECCN entry shall not exceed the LVS dollar value limit specified for that entry.

Example to paragraph (3): An order includes commodities valued at \$8,000. The order consists of commodities controlled under two ECCN entries, each having an LVS value limit of \$5000. Commodities in the order controlled under one ECCN are valued at \$3,500 while those controlled under the other ECCN are valued at \$4,500. Since the net value of the commodities controlled under *each* entry falls within the LVS dollar value limits applicable to that entry, the order may be shipped under this License Exception.

(4) Prohibition against evasion of license requirements. Any activity involving the use of this License Exception to evade license requirements is prohibited. Such devices include, but are not limited to, the splitting or structuring of orders to meet applicable LVS dollar value limits, as prohibited by paragraphs (d)(1)(ii) and (iii) of this section.

(5) Exports and reexports of encryption components or spare parts. For components or spare parts controlled for “EI” reasons under ECCN 5A002, exports and reexports under this License Exception must be destined to support a commodity previously authorized for export or reexport.

(e) Reexports

Commodities may be reexported under this License Exception, provided that they could be exported from the United States to the new country of destination under LVS.

(f) Reporting requirements

See §743.1 of the EAR for reporting requirements for exports of certain commodities under License Exception LVS.

**§ 740.4 SHIPMENTS TO COUNTRY
GROUP B COUNTRIES (GBS)**

License Exception GBS authorizes exports and reexports to Country Group B (see Supplement No. 1 to part 740), except Sudan and Ukraine, of those commodities where the Commerce Country Chart (Supplement No. 1 to part 738 of the EAR) indicates a license requirement to the ultimate destination for national security reasons only and identified by “GBS—Yes” on the CCL. See § 743.1 of the EAR for reporting requirements for exports of certain commodities under License Exception GBS.

§ 740.5 [RESERVED]

**§ 740.6 TECHNOLOGY AND
SOFTWARE UNDER RESTRICTION
(TSR)**

(a) Scope

License Exception TSR permits exports and reexports of technology and software where the Commerce Country Chart (Supplement No. 1 to part 738 of the EAR) indicates a license requirement to the ultimate destination for national security reasons only and identified by “TSR—Yes” in entries on the CCL, provided the software or technology is destined to Country Group B, except Sudan and Ukraine. (See Supplement No. 1 to part 740.) A written assurance is required from the consignee before exporting or reexporting under this License Exception.

(1) Required assurance for export of technology. You may not export or reexport technology under this License Exception until

you have received from the importer a written assurance that, without a BIS license or License Exception, the importer will not:

(i) Reexport or release the technology to a national of a country in Country Groups D:1, E:1, or E:2; or

(ii) Export to Country Groups D:1, E:1, or E:2 the direct product of the technology, if such foreign produced direct product is subject to national security controls as identified on the CCL (See General Prohibition Three, §736.2(b)(3) of the EAR); or

(iii) If the direct product of the technology is a complete plant or any major component of a plant, export to Country Groups D:1, E:1, or E:2 of the direct product of the plant or major component thereof, if such foreign produced direct product is subject to national security controls as identified on the CCL or is “subject to the ITAR” (see 22 CFR parts 120 through 130).

(2) Required assurance for export of software. You may not export or reexport software under this License Exception until you have received from the importer a written assurance that, without a BIS license or License Exception, the importer will neither:

(i) Reexport or release the software or the source code for the software to a national of a country in Country Groups D:1, E:1, or E:2; nor

(ii) Export to Country Groups D:1, E:1, or E:2 the direct product of the software, if such foreign produced direct product is subject to national security controls as identified on the CCL. (See General Prohibition Three, §736.2(b)(3) of the EAR).

(3) Form of written assurance. The required assurance may be made in the form of a letter or any other written communication from the importer, including communications via facsimile, or the assurance may be incorporated into a licensing agreement that specifically

includes the assurances. An assurance included in a licensing agreement is acceptable only if the agreement specifies that the assurance will be honored even after the expiration date of the licensing agreement. If such a written assurance is not received, License Exception TSR is not applicable and a license is required. The license application must include a statement explaining why assurances could not be obtained.

(4) Other License Exceptions. The requirements in this License Exception do not apply to the export of technology or software under other License Exceptions, or to the export of technology or software included in an application for the foreign filing of a patent, provided the filing is in accordance with the regulations of the U.S. Patent Office.

(b) Reporting requirements

See §743.1 of the EAR for reporting requirements for exports of certain items under License Exception TSR. Note that reports are not required for release of technology or source code subject to the EAR to foreign nationals in the U.S. under the provisions of License Exception TSR.

§ 740.7 COMPUTERS (APP)

(a) Scope

(1) Commodities. License Exception APP authorizes exports, reexports and transfers (in-country) of computers, including “electronic assemblies” and specially designed components therefor controlled by ECCN 4A003 exported or reexported separately or as part of a system for consumption in Computer Tier countries as provided by this section. When evaluating your computer to determine License Exception APP eligibility, use the APP parameter to the exclusion of other technical parameters in ECCN 4A003.

(2) Technology and software. License Exception APP authorizes exports of technology and software controlled by ECCNs 4D001 and

4E001 specially designed or modified for the “development,” “production,” or “use” of computers, including “electronic assemblies” and specially designed components therefor classified in ECCN 4A003 to Computer Tier countries as provided by this section.

(b) Restrictions

(1) Related equipment controlled under ECCN 4A003.g may not be exported or reexported under this License Exception when exported or reexported separately from eligible computers authorized under this License Exception.

(2) Access and release restrictions.

(i) [RESERVED]

(ii) Technology and source code.

Technology and source code eligible for License Exception APP may not be released to nationals of Cuba, Iran, North Korea, or Syria.

(3) Computers and software eligible for License Exception APP may not be reexported or transferred (in country) without prior authorization from BIS, *i.e.*, a license, a permissive reexport, another License Exception, or “No License Required”. This restriction must be conveyed to the consignee, via the Destination Control Statement, see §758.6 of the EAR. Additionally, the end-use and end-user restrictions in paragraph (b)(5) of this section must be conveyed to any consignee in Computer Tier 3.

(4) You may not use this License Exception to export or reexport items that you know will be used to enhance the APP beyond the eligibility limit allowed to your country of destination.

(5) License Exception APP does not authorize exports, reexports and transfers (in-country) for nuclear, chemical, biological, or missile end-users and end-uses subject to license requirements under §744.2, §744.3, §744.4, and §744.5 of the EAR. Such exports, reexports and transfers (in-country) will continue to require a

license and will be considered on a case-by-case basis. Reexports and transfers (in-country) to these end-users and end-uses in eligible countries are strictly prohibited without prior authorization.

(6) Foreign nationals in an expired visa status are not eligible to receive deemed exports of technology or source code under this License Exception. It is the responsibility of the exporter to ensure that, in the case of deemed exports, the foreign national maintains a valid U.S. visa, if required to hold a visa from the United States.

(c) Computer Tier 1 destinations

(1) Eligible destinations. The destinations that are eligible to receive exports and reexports under paragraph (c) of this section include: Albania, Antigua and Barbuda, Argentina, Aruba, Australia, Austria, Bahamas (The), Bangladesh, Barbados, Belgium, Belize, Benin, Bhutan, Bolivia, Botswana, Brazil, Brunei, Bulgaria, Burkina Faso, Burundi, Cameroon, Cape Verde, Central African Republic, Chad, Chile, Colombia, Congo (Democratic Republic of the), Congo (Republic of the), Costa Rica, Cote d'Ivoire, Croatia, Curaçao, Cyprus, Czech Republic, Denmark, Dominica, Dominican Republic, Ecuador, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, Fiji, Finland, France, Gabon, Gambia (The), Germany, Ghana, Greece, Grenada, Guatemala, Guinea, Guinea-Bissau, Guyana, Haiti, Honduras, Hungary, Iceland, Indonesia, Ireland, Italy, Jamaica, Japan, Kenya, Kiribati, Korea (Republic of), Latvia, Lesotho, Liberia, Lithuania, Luxembourg, Madagascar, Malawi, Malaysia, Maldives, Mali, Malta, Marshall Islands, Mauritius, Mexico, Micronesia (Federated States of), Monaco, Mozambique, Namibia, Nauru, Nepal, Netherlands, New Zealand, Nicaragua, Niger, Nigeria, Norway, Palau, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Romania, Rwanda, St. Kitts & Nevis, St. Lucia, St. Vincent and the Grenadines, Sao Tome & Principe, Samoa, San Marino, Senegal, Seychelles, Sierra Leone, Singapore, Sint Maarten (the Dutch two-fifths of the island of Saint Martin), Slovakia, Slovenia, Solomon

Islands, Somalia, South Africa, Spain, Sri Lanka, Surinam, Swaziland, Sweden, Switzerland, Taiwan, Tanzania, Togo, Tonga, Thailand, Timor-Leste, Trinidad and Tobago, Turkey, Tuvalu, Uganda, United Kingdom, Uruguay, Vatican City, Venezuela, Western Sahara, Zambia, and Zimbabwe.

(2) Eligible commodities. All computers, including electronic assemblies and specially designed components therefor are eligible for export or reexport under License Exception APP to Tier 1 destinations, subject to the restrictions in paragraph (b) of this section.

(3) Eligible technology and software.

(i) Technology and software described in paragraph (a)(2) of this section for computers of unlimited APP are eligible for export, reexport, transfer (in-country) under License Exception APP to countries listed in Country Group A:5, see Supplement No. 1 to this part; and

(ii) “Development” and “production” technology and source code described in paragraph (a)(2) of this section for computers with a APP less than or equal to 175 Weighted TeraFLOPS (WT) are eligible for deemed exports under License Exception APP to foreign nationals of Tier 1 destinations, other than the destinations that are listed in paragraph (c)(3)(i) of this section, subject to the restrictions in paragraph (b) of this section.

(iii) “Use” technology and source code described in paragraph (a)(2) of this section for computers with a APP less than or equal to 500 WT are eligible for deemed exports under License Exception APP to foreign nationals of Tier 1 destinations, other than the destinations that are listed in paragraph (c)(3)(i) of this section, subject to the restrictions in paragraph (b) of this section.

(d) Computer Tier 3 destinations

(1) Eligible destinations. Eligible destinations under paragraph (d) of this section are:

Afghanistan, Algeria, Andorra, Angola, Armenia, Azerbaijan, Bahrain, Belarus, Bosnia & Herzegovina, Burma, Cambodia, China (People's Republic of), Comoros, Djibouti, Egypt, Georgia, India, Iraq, Israel, Jordan, Kazakhstan Kosovo, Kuwait, Kyrgyzstan, Laos, Lebanon, Libya, Macau, Macedonia (The Former Yugoslav Republic of), Mauritania, Moldova, Mongolia, Montenegro, Morocco, Oman, Pakistan, Qatar, Russia, Saudi Arabia, Serbia, Sudan, Tajikistan, Tunisia, Turkmenistan, Ukraine, United Arab Emirates, Uzbekistan, Vanuatu, Vietnam, and Yemen.

(2) Eligible commodities. None.

(3) Eligible technology and source code.

(i) “Development” and “production” technology and source code described in paragraph (a)(2) of this section for computers with an APP less than or equal to 50 Weighted TeraFLOPs (WT) are eligible for deemed exports under License Exception APP to foreign nationals of Tier 3 destinations as described in paragraph (d)(1) of this section, subject to the restrictions in paragraph (b) of this section.

(ii) “Use” technology and source code described in paragraph (a)(2) of this section for computers with an APP less than or equal to 140 WT are eligible for deemed exports under License Exception APP to foreign nationals of Tier 3 destinations as described in paragraph (d)(1) of this section, subject to the restrictions in paragraph (b) of this section.

(e) Reporting requirements

See §743.1 of the EAR for reporting requirements of certain items under License Exception APP.

§ 740.8 [RESERVED]

§ 740.9 TEMPORARY IMPORTS, EXPORTS, REEXPORTS, AND TRANSFERS (IN-COUNTRY) (TMP)

This License Exception authorizes various temporary exports and reexports; exports and reexports of items temporarily in the United States; and exports and reexports of beta test software.

(a) Temporary exports, reexports, and transfers (in-country)

License Exception TMP authorizes exports, reexports, and transfers (in-country) of items for temporary use abroad (including use in or above international waters) subject to the conditions specified in this paragraph (a). No item may be exported, reexported, or transferred (in-country) under this paragraph (a) if an order to acquire the item, such as a purchase order, has been received before shipment; with prior knowledge that the item will stay abroad beyond the terms of this License Exception; or when the item is for subsequent lease or rental abroad. The references to various countries and country groups in these TMP-specific provisions do not limit or amend the prohibitions in § 740.2 of the EAR on the use of license exceptions generally, such as for exports of 9x515 or “600 series” items to destinations in Country Group D:5. This paragraph (a) does not authorize any export of a commodity controlled under ECCNs 0A501.a or .b, or shotguns with a barrel length less than 18 inches controlled under ECCN 0A502 to, or any export of such an item that was imported into the United States from, a country in Country Group D:5 (Supplement No. 1 to this part), or from Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan. The only provisions of this paragraph (a) that are eligible for use to export such items are paragraph (a)(5) of this section (“Exhibition and demonstration”) and paragraph (a)(6) of this section (“Inspection, test, calibration, and

repair”). In addition, this paragraph (a) may not be used to export more than 75 firearms per shipment. In accordance with the requirements in § 758.1(b)(9) and (g)(4) of the EAR, the exporter or its agent must provide documentation that includes the serial number, make, model, and caliber of each firearm being exported by filing these data elements in an EEI filing in AES. In accordance with the exclusions in License Exception TMP under paragraph (b)(5) of this section, the entry clearance requirements in § 758.1(b)(9) do not permit the temporary import of: firearms controlled in ECCN 0A501.a or .b that are shipped from or manufactured in a Country Group D:5 country, or that are shipped from or manufactured in Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan (except for any firearm model designation (if assigned) controlled by 0A501 that is specified under Annex A in Supplement No. 4 to this part); or shotguns with a barrel length less than 18 inches controlled in ECCN 0A502 that are shipped from or manufactured in a Country Group D:5 country, or from Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan, because of the exclusions in License Exception TMP under paragraph (b)(5) of this section.

(1) Tools of trade. Exports, reexports, or transfers (in-country) of commodities and software as tools of trade for use by the exporter or employees of the exporter may be made only to destinations other than Country Group E:1. The tools of trade must remain under the “effective control” of the exporter or the exporter's employee. Eligible items are usual and reasonable kinds and quantities of tools of trade for use in a lawful enterprise or undertaking of the exporter. Tools of trade include, but are not limited to, commodities and software as is necessary to commission or service items, provided that the commodity or software is appropriate for this purpose and that all items to be commissioned or serviced are of foreign origin, or if subject to the EAR, have been lawfully exported, reexported, or transferred. Tools of trade may accompany the individual

departing from the United States or may be shipped unaccompanied within one month before the individual's departure from the United States, or at any time after departure. Software used as a tool of trade must be protected against unauthorized access. Examples of security precautions to help prevent unauthorized access include the following:

(i) Use of secure connections, such as Virtual Private Network connections, when accessing IT networks for activities that involve the transmission and use of the software authorized under this license exception;

(ii) Use of password systems on electronic devices that store the software authorized under this license exception; and

(iii) Use of personal firewalls on electronic devices that store the software authorized under this license exception.

(2) [Reserved]

(3) "Technology," regardless of media or format, may be exported, reexported, or transferred (in-country) by or to a U.S. person, or a foreign person employee of a U.S. person traveling or on temporary assignment abroad, subject to the following restrictions:

(i) Foreign persons may only export, reexport, transfer (in country) or receive such "technology" as they are authorized to receive through a license, license exception other than TMP or because no license is required.

(ii) "Technology" exported, reexported, or transferred under this authorization may only be possessed or used by a U.S. person or authorized foreign person. Sufficient security precautions must be taken to prevent the unauthorized release of the "technology." Such security precautions may include encryption of the "technology," the use of secure network connections, such as Virtual Private Networks, the use of passwords or other access restrictions on the electronic device or media on which the "technology" is stored, and

the use of firewalls and other network security measures to prevent unauthorized access.

(iii) The individual is an employee of the U.S. Government or is directly employed by a U.S. person and not, e.g., by a foreign subsidiary.

(iv) "Technology" authorized under this exception may not be used for foreign production purposes or for technical assistance unless authorized through a license or license exception other than TMP.

(4) **Kits consisting of replacement parts or components.** Kits consisting of replacement parts or components may be exported, reexported, or transferred (in-country) to all destinations except Country Group E:1 (see Supplement No. 1 to part 740 of the EAR), provided that:

(i) The parts and components would qualify for shipment under paragraph (a)(4)(iii) of this section if exported as one-for-one replacements;

(ii) The kits remain under effective control of the exporter or an employee of the exporter; and

(iii) All parts and components in the kit are returned, except that one-for-one replacements may be made in accordance with the requirements of License Exception RPL and the defective parts and components returned (see Parts, Components, Accessories and Attachments in § 740.10(a) of this part).

(5) **Exhibition and demonstration.** This paragraph (a)(5) authorizes exports, reexports, and transfers (in-country) of commodities and software for exhibition or demonstration in all destinations except Country Group E:1 (see Supplement No. 1 to this part) provided that the exporter maintains ownership of the commodities and software while they are abroad and provided that the exporter, an employee of the exporter, or the exporter's designated sales representative retains "effective control" over the commodities

and software while they are abroad. The commodities and software may not be used when abroad for more than the minimum extent required for effective demonstration. The commodities and software may not be exhibited or demonstrated at any one site for longer than 120 days after installation and debugging, unless authorized by BIS. However, before or after an exhibition or demonstration, pending movement to another site, return to the United States or the foreign reexporter, or BIS approval for other disposition, the commodities and software may be placed in a bonded warehouse or a storage facility provided that the exporter retains “effective control” over their disposition. The export documentation for this type of transaction must show the exporter as ultimate consignee, in care of the person who will have control over the commodities and software abroad.

(6) Inspection, test, calibration, and repair. Commodities to be inspected, tested, calibrated, or repaired abroad may be exported, reexported, and transferred (in-country) under this paragraph (a)(6) to all destinations except Country Group E:1.

(7) Containers. Containers for which another license exception is not available and that are necessary for shipment of commodities may be exported, reexported, and transferred (in-country) under this paragraph (a)(7). However, this paragraph does not authorize the export of the container's contents, which, if not exempt from licensing, must be separately authorized for export under either a license exception or a license.

(8) Assembly in Mexico. Commodities may be exported to Mexico under Customs entries that require return to the United States after processing, assembly, or incorporation into end products by companies, factories, or facilities participating in Mexico's in-bond industrialization program (IMMEX) under this paragraph (a)(8), provided that all resulting end-products (or the commodities themselves) are returned to the United States as soon as practicable but no later than four years after the

date of export or reexport.

(9) News media.

(i) Commodities necessary for news-gathering purposes (and software necessary to use such commodities) may be temporarily exported, reexported, or transferred (in-country) for accredited news media personnel (*i.e.*, persons with credentials from a news-gathering or reporting firm) to or within Belarus, Cuba, North Korea, Russia, and Syria (see supplement no. 1 to part 740), or the Crimea region of Ukraine and covered regions of Ukraine (as specified in § 746.6) if the commodities:

(A) Are retained under “effective control” of the exporting news-gathering firm in the country of destination;

(B) Remain in the physical possession of the news media personnel in the country of destination. The term physical possession for purposes of this paragraph (a)(9) means maintaining effective measures to prevent unauthorized access (e.g., securing equipment in locked facilities or hiring security guards to protect the equipment); and

(C) Are removed with the news media personnel at the end of the trip.

(ii) When exporting under this paragraph (a)(9) from the United States, the exporter must email a copy of the packing list or similar identification of the exported commodities, to bis.compliance@bis.doc.gov specifying the destination and estimated dates of departure and return. The Office of Export Enforcement (OEE) may check returns to assure that the provisions of this paragraph (a)(9) are being used properly.

(iii) Commodities or software necessary for news-gathering purposes that accompany news media personnel to all other destinations shall be exported, reexported, or transferred (in-country) under paragraph (a)(1), *tools of trade*, of this section if owned by the news gathering firm, or if

they are personal property of the individual news media personnel. Note that paragraphs (a)(1), *tools of trade* and (a)(9), *news media*, of this section do not preclude independent accredited contract personnel, who are under control of news-gathering firms while on assignment, from using these provisions, provided that the news gathering firm designates an employee of the contract firm to be responsible for the equipment.

(10) Temporary exports to a U.S. person's foreign subsidiary, affiliate, or facility abroad.

Components, parts, tools, accessories, or test equipment exported by a U.S. person to a subsidiary, affiliate, or facility owned or controlled by the U.S. person, if the components, parts, tools, accessories, or test equipment are to be used to manufacture, assemble, test, produce, or modify items, provided that such components, parts, tools, accessories or test equipment are not transferred (in-country) or reexported from such subsidiary, affiliate, or facility, alone or incorporated into another item, without prior authorization by BIS.

(11) Personal protective "equipment" classified under ECCN 1A613.c or .d and individual protection "equipment" classified under ECCN 1A607.f.

(i) Temporary exports, reexports, or in-country transfers to countries not identified in Country Group D:5. U.S. persons may temporarily export or reexport one set of body armor classified under ECCN 1A613.d (which may include one helmet classified under ECCN 1A613.c) or one set of chemical or biological agent protective gear classified under ECCN 1A607.f (which may include one additional filter canister classified under ECCN 1A607.x) to countries not identified in Country Group D:5, provided that:

(A) The items are with the U.S. person's baggage or effects, whether accompanied or unaccompanied (but not mailed); *and*

(B) The items are for that U.S. person's exclusive use and not for transfer of ownership

unless reexported or transferred (in-country) to another U.S. person.

(ii) Temporary exports, reexports, or transfers (in-country) to countries identified in Country Group D:5.

(A) Iraq. U.S. persons may temporarily export or reexport one set of body armor classified under ECCN 1A613.d (which may include one helmet classified under ECCN 1A613.c) or one set of chemical or biological agent protective gear classified under ECCN 1A607.f (which may include one additional filter canister classified under ECCN 1A607.x) to Iraq, for personal use, provided that the requirements in paragraph (a)(11)(i) of this section are met. In addition, the U.S. person must be affiliated with the U.S. Government and traveling on official business or traveling in support of a U.S. Government contract, or the U.S. person must be traveling to Iraq under a direct authorization by the Government of Iraq and engaging in activities for, on behalf of, or at the request of, the Government of Iraq. Documentation regarding direct authorization from the Government of Iraq shall include an English translation.

(B) Other countries in Country Group D:5. U.S. persons may temporarily export or reexport one set of body armor classified under ECCN 1A613.d (which may include one helmet classified under ECCN 1A613.c) or one set of chemical or biological agent protective gear classified under ECCN 1A607.f (which may include one additional filter canister classified under ECCN 1A607.x) to countries in Country Group D:5 (except Iraq), for personal use, provided that the requirements in paragraph (a)(11)(i) of this section are met, and the U.S. person is affiliated with the U.S. Government traveling on official business or is traveling in support of a U.S. Government contract.

(iii) Items exported, reexported, or transferred (in-country) under paragraph (a)(11) of this section, if not consumed or destroyed in the normal course of authorized temporary use abroad, must be returned to the United States or

other country from which the items were so transferred as soon as practicable but no later than four years after the date of export, reexport or transfer (in-country).

(12) U.S. persons. For purposes of this § 740.9, a U.S. person is defined as follows: an individual who is a citizen of the United States, an individual who is a lawful permanent resident as defined by 8 U.S.C. 1101(a)(2) or an individual who is a protected individual as defined by 8 U.S.C. 1324b(a)(3). U.S. person also means any juridical person organized under the laws of the United States, or any jurisdiction within the United States (e.g., corporation, business association, partnership, society, trust, or any other entity, organization or group that is authorized to do business in the United States).

(13) Destinations. Destination restrictions apply to temporary exports, reexports, or transfers (in-country) to and for use on any vessel, aircraft or territory under ownership, control, lease, or charter by any country specified in any authorizing paragraph of this section, or any national thereof.

(14) Return or disposal of items. With the exception of items described in paragraphs (a)(8) and (11) of this section, all items exported, reexported, or transferred (in-country) under this section must, if not consumed or destroyed in the normal course of authorized temporary use abroad, be returned to the United States or other country from which the items were so transferred as soon as practicable but no later than one year after the date of export, reexport, or transfer (in-country). Items not returned shall be disposed of or retained in one of the following ways:

(i) Permanent export, reexport, or transfer (in-country). An exporter or reexporter who wants to sell or otherwise dispose of the items abroad, except as permitted by this or other applicable provision of the EAR, must apply for a license in accordance with §§ 748.1, 748.4 and 748.6 of the EAR. (Part 748 of the EAR contains more information about license applications.) The application must be supported

by any documents that would be required in support of an application for export license for shipment of the same items directly from the United States to the proposed destination.

(ii) Use of a license. An outstanding license may also be used to dispose of items covered by the provisions of this paragraph (a), provided that the outstanding license authorizes direct shipment of the same items to the same new ultimate consignee or end-user.

(iii) Authorization to retain item abroad beyond one year. An exporter, reexporter or transferor who wants to retain an item at the temporary location beyond one year must apply for a license in accordance with §§ 748.1, 748.4 and 748.6 of the EAR to BIS at least 90 days prior to the expiration of the one-year period. The application must include the name and address of the exporter, the date the items were exported, a brief product description, and the justification for the extension. If BIS approves the extension, the applicant will receive authorization for an extension not to exceed four years from the date of initial export, reexport, or transfer. Any request for retaining the items abroad for a period exceeding four years must be made in accordance with the requirements of paragraph (a)(14)(i) of this section.

(b) Exports of items temporarily in the United States.

No provision of this paragraph (b), other than paragraph (b)(3), (4), or (5), may be used to export firearms controlled by ECCN 0A501.a, .b, or shotguns with a barrel length less than 18 inches controlled in ECCN 0A502.

(1) Items moving in transit through the United States. Subject to the following conditions, the provisions of this paragraph (b)(1) authorize export of items moving in transit through the United States under a Transportation and Exportation (T.&E.) customs entry or an Immediate Exportation (I.E.) customs entry made at a U.S. Customs and Border Protection Office.

(i) Items controlled for national security (NS) reasons, nuclear proliferation (NP) reasons, or chemical and biological weapons (CB) reasons may not be exported to Country Group D:1, D:2, or D:3 (see Supplement No. 1 to part 740), respectively, under this paragraph (b)(1).

(ii) Items may not be exported to Country Group E:1 under this section.

(iii) The following may *not* be exported from the United States under this paragraph (b)(1):

(A) Commodities shipped to the United States under an International Import Certificate, Form BIS-645P;

(B) Chemicals controlled under ECCN 1C350; or

(C) Horses for export by sea (refer to short supply controls in part 754 of the EAR).

(iv) The authorization to export in paragraph (b)(1) shall apply to all shipments from Canada moving in transit through the United States to any foreign destination, regardless of the nature of the commodities or software or their origin, notwithstanding any other provision of this paragraph (b)(1).

(2) Items imported for marketing, or for display at U.S. exhibitions or trade fairs. Subject to the following conditions, the provisions of this paragraph (b)(2) authorize the export of items that were imported into the United States for marketing, or for display at an exhibition or trade fair *and* were either entered under bond or permitted temporary free import under bond providing for their export and are being exported in accordance with the terms of that bond.

(i) Items may be exported to the country from which imported into the United States. However, items originally imported from Cuba may not be exported unless the U.S. Government had licensed the import from that country.

(ii) Items may be exported to any destination

other than the country from which imported except:

(A) Items imported into the United States under an International Import Certificate;

(B) Exports to Country Group E:1 (see Supplement No. 1 to part 740); or

(C) Exports to Country Group D:1, D:2, or D:3 (see Supplement No. 1 to part 740) of items controlled for national security (NS) reasons, nuclear nonproliferation (NP) reasons, or chemical and biological weapons (CB) reasons, respectively.

(3) Return of foreign-origin items. A foreign-origin item may be returned under this license exception to the country from which it was imported if its characteristics and capabilities have not been enhanced while in the United States, except that no foreign-origin items may be returned to Cuba.

(4) Return of shipments refused entry. Shipments of items refused entry by the U.S. Customs and Border Protection, the Food and Drug Administration, or other U.S. Government agency may be returned to the country of origin, except to:

(i) A destination in Cuba; or

(ii) A destination from which the shipment has been refused entry because of the Foreign Assets Control Regulations of the Treasury Department, unless such return is licensed or otherwise authorized by the Treasury Department, Office of Foreign Assets Control (31 CFR parts 500-599).

(5) Exports of firearms and certain shotguns temporarily in the United States. This paragraph (b)(5) authorizes the export of no more than 75 end item firearms per shipment controlled by ECCN 0A501.a or .b, or shotguns with a barrel length less than 18 inches controlled in ECCN 0A502 that are temporarily in the United States

for a period not exceeding one year, provided that:

(i) The firearms were not shipped from or manufactured in a U.S. arms embargoed country, *i.e.*, destination listed in Country Group D:5 in Supplement No. 1 to this part;

(ii) The firearms were not shipped from or manufactured in Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan, except for any firearm model controlled by 0A501 that is specified under Annex A in Supplement No. 4 to this part; and

(iii) The firearms are not ultimately destined to a U.S. arms embargoed country, *i.e.*, destination listed in Country Group D:5 in Supplement No. 1 to this part, or to Russia;

(iv) When the firearms entered the U.S. as a temporary import, the temporary importer or its agent:

(A) Provided the following statement to U.S. Customs and Border Protection: “This shipment will be exported in accordance with and under the authority of License Exception TMP (15 CFR 740.9(b)(5))”;

(B) Provided to U.S. Customs and Border Protection an invoice or other appropriate import-related documentation (or electronic equivalents) that includes a complete list and description of the firearms being temporarily imported, including their model, make, caliber, serial numbers, quantity, and U.S. dollar value; and

(C) Provided (if temporarily imported for a trade show, exhibition, demonstration, or testing) to U.S. Customs and Border Protection the relevant invitation or registration documentation for the event and an accompanying letter that details the arrangements to maintain effective control of the firearms while they are in the United States; and

(v) In addition to the export clearance requirements of part 758 of the EAR, the exporter

or its agent must provide the import documentation related to paragraph (b)(5)(iv)(B) of this section to U.S. Customs and Border Protection at the time of export.

NOTE 1 to paragraph (b)(5): In addition to complying with all applicable EAR requirements for the export of commodities described in paragraph (b)(5) of this section, exporters and temporary importers should contact U.S. Customs and Border Protection (CBP) at the port of temporary import or export, or at the CBP website, for the proper procedures for temporarily importing or exporting firearms controlled in ECCN 0A501.a or .b or shotguns with a barrel length less than 18 inches controlled in ECCN 0A502, including regarding how to provide any data or documentation required by BIS.

NOTE 2 to paragraph (b): A commodity withdrawn from a bonded warehouse in the United States under a ‘withdrawal for export’ customs entry is considered as ‘moving in transit’ if it is withdrawn from a bonded warehouse under any other type of customs entry or if its transit has been broken for a processing operation, regardless of the type of customs entry.

NOTE 3 to paragraph (b): Items shipped on board a vessel or aircraft and passing through the United States from one foreign country to another may be exported without a license provided that (a) while passing in transit through the United States, they have not been unladen from the vessel or aircraft on which they entered, and (b) they are not originally manifested to the United States.

NOTE 4 to paragraph (b): A shipment originating in Canada or Mexico that incidentally transits the United States en route to a delivery point in the same country does not require a license.

(c) Exports of beta test software

(1) Scope. The provisions of this paragraph (c) authorize exports and reexports to eligible countries of beta test software intended for distribution to the general public.

(2) Eligible countries. Encryption software controlled under ECCN 5D002 is not eligible for export or reexport to country in Country Group E:1 under the provisions of this paragraph (c). All other beta test software is eligible for export or reexport to all destinations, except Cuba, and Iran under the provisions of this paragraph (c).

(3) Eligible software. All software that is controlled by the Commerce Control List (Supplement No.1 to part 774 of the EAR), and under Commerce licensing jurisdiction, is eligible for export and reexport, subject to the restrictions of this paragraph (c). Encryption software controlled for “EI” reasons under ECCN 5D002 is eligible for export and reexport under this paragraph (c), provided that the exporter has submitted the information described in paragraph (c)(8) of this section by the time of export. Final encryption products produced by the testing consignee are subject to any applicable provisions in §742.15(b) of the EAR (for mass market encryption commodities and software with symmetric key length exceeding 64-bits) or §740.17 of the EAR (License Exception ENC), including review and reporting requirements.

(4) Conditions for use. Exports or reexports of beta test software programs under the provisions of this paragraph (c) must meet all of the following conditions:

(i) The software producer intends to market the software to the general public after completion of the beta testing, as described in the General Software Note (see Supplement No. 2 to part 774 of the EAR) or the Cryptography Note in Category 5, Part 2 (“Information Security”), of the Commerce Control List (see Supplement No.1 to part 774 of the EAR);

(ii) The software producer provides the software to the testing consignee free-of-charge

or at a price that does not exceed the cost of reproduction and distribution; and

(iii) The software is designed for installation by the end-user without further substantial support from the supplier.

(5) Importer Statement. Prior to exporting or reexporting any eligible software under this paragraph (c), the exporter or reexporter must obtain the following statement from the testing consignee, which may be included in a contract, non-disclosure agreement, or other document that identifies the importer, the software to be exported, the country of destination, and the testing consignee.

“We certify that this beta test software will only be used for beta testing purposes, and will not be rented, leased, sold, sublicensed, assigned, or otherwise transferred. Further, we certify that we will not transfer or export any product, process, or service that is the direct product of the beta test software.”

(6) Use limitations. Only testing consignees that provide the importer statement required by paragraph (c)(5) of this section may execute any beta test software that was exported or reexported to them under the provisions of this paragraph (c).

(7) Return or disposal of software. All beta test software exported must be destroyed abroad or returned to the exporter within 30 days of the end of the beta test period as defined by the software producer or, if the software producer does not define a test period, within 30 days of completion of the consignee's role in the test. Among other methods, this requirement may be satisfied by a software module that will destroy the software and all its copies at or before the end of the beta test period.

(8) Notification of beta test encryption software implementing “non-standard cryptography.” For beta test encryption software eligible under this license exception that provides or performs “non-standard cryptography” as defined in part 772 of the EAR,

by the time of export or reexport you must submit the information described in paragraphs (a) through (d) of supplement No. 6 to part 742 of the EAR by e-mail to BIS at crypt@bis.doc.gov and to the ENC Encryption Request Coordinator at enc@nsa.gov.

§ 740.10 SERVICING AND REPLACEMENT OF PARTS AND EQUIPMENT (RPL)

License Exception RPL authorizes exports and reexports associated with one-for-one replacement of parts, components, accessories, and attachments. License Exception RPL also authorizes exports and reexports of certain items currently “subject to the EAR” to or for, or to replace, a defense article described in an export or reexport authorization issued under the authority of the Arms Export Control Act. It does not, however, authorize the export or reexport of defense articles subject to the ITAR, i.e., described on the United States Munitions List (22 CFR 121.1).

(a) *Parts, Components, Accessories, and Attachments.*

(1) Scope. The provisions of this paragraph (a) authorize the export and reexport of one-for-one replacement parts, components, accessories, and attachments for previously exported equipment or other end items.

(2) **One-for-one replacement of parts, components, accessories, or attachments.**

(i) The terms *replacement parts, components, accessories, or attachments* as used in this section mean parts, components, accessories, or attachments needed for the immediate repair of equipment or other end items, including replacement of defective or worn parts or components. (These terms include ‘subassemblies,’ but do not include test instruments or operating supplies. The term ‘*subassembly*’ means a number of parts or components assembled to perform a specific function or functions within a commodity. One

example would be printed circuit boards with components mounted thereon. This definition does not include major subsystems such as those composed of a number of ‘subassemblies.’) Items that improve or change the basic design characteristics, e.g., as to accuracy, capability, performance or productivity, of the equipment or other end item upon which they are installed, are not deemed to be replacement parts, components, accessories, or attachments. For kits consisting of replacement parts or components, consult § 740.9(a)(4) of this part.

(ii) Parts, components, accessories, and attachments may be exported only to replace, on a one-for-one basis, parts, components, accessories, or attachments, respectively, contained in commodities that were: lawfully exported from the United States; lawfully reexported; or made in a foreign country incorporating authorized parts, components, accessories, or attachments “subject to the EAR” (see § 734.2(a) of the EAR). (For exports or reexports to the installed base in Libya, see § 764.7 of the EAR.) The conditions of the original U.S. authorization must not have been violated. Accordingly, the export of replacement parts, components, accessories, and attachments may be made only by the party who originally exported or reexported the commodity to be repaired, or by a party that has confirmed the existence of appropriate authority for the original transaction.

(iii) The parts, components, accessories, or attachments to be replaced must either be destroyed abroad or returned promptly to the person who supplied the replacements, or to a foreign firm that is under the effective control of that person.

(3) **Exclusions to License Exception RPL.**

(i) No replacement parts, components, accessories, or attachments may be exported to repair a commodity exported under a license or other authorization if that license or other authorization included a condition that any subsequent replacements may be exported only

under a license.

(ii) No parts, components, accessories, or attachments may be exported to be held abroad as spares for future use. Replacements may be exported to replace spares that were authorized to accompany the export of equipment or other end items as those spares are used in the repair of the equipment or other end item. This allows maintenance of the stock of spares at a consistent level as the parts, components, accessories, or attachments are used.

(iii) No parts, components, accessories, or attachments may be exported to any destination, except the countries listed in Supplement No. 3 to part 744 of the EAR (Countries Not Subject to Certain Nuclear End Use Restrictions in § 744.2(a)), if the item is to be incorporated into or used in nuclear weapons, nuclear explosive devices, nuclear testing related to activities described in § 744.2(a) of the EAR, the chemical processing of irradiated special nuclear or source material, the production of heavy water, the separation of isotopes of source and special nuclear materials, or the fabrication of nuclear reactor fuel containing plutonium, as described in § 744.2(a) of the EAR.

(iv) No replacement parts, components, accessories, or attachments may be exported to countries in Country Group E:1 (see Supplement No. 1 to this part) (countries designated by the Secretary of State as supporting acts of international terrorism) if the commodity to be repaired is an “aircraft” (as defined in § 772.1 of the EAR) or is controlled for national security (NS) reasons.

(v) No replacement parts, components, accessories, or attachments may be exported to countries in Country Group E:1 (see Supplement No. 1 to this part) if the commodity to be repaired is explosives detection equipment classified under ECCN 2A983 or related software classified under ECCN 2D983.

(vi) No replacement parts, components, accessories, or attachments may be exported to

countries in Country Group E:1 (see Supplement No. 1 to this part) if the commodity to be repaired is concealed object detection equipment classified under ECCN 2A984 or related software classified under ECCN 2D984.

(vii) The conditions described in this paragraph (a)(3) relating to replacement of parts, components, accessories, or attachments do not apply to reexports to a foreign country of parts, components accessories, or attachments as replacements in foreign-origin products, if at the time the replacements are furnished, the foreign-origin product is eligible for export to such country under any of the license exceptions in this part or the exceptions in § 734.4 of the EAR (*De minimis* U.S. content).

(viii) “Parts,” “components,” “accessories,” and “attachments” classified in 9x515 or “600 series” ECCNs may not be exported or reexported to a destination listed in Country Group D:5 (see Supplement No. 1 to this part).

(4) Reexports.

(i) Parts, components, accessories, and attachments exported from the United States may be reexported to a new country of destination, provided that the conditions established in paragraphs (a)(2) and (3) of this section are met. A party reexporting one-for-one replacement parts, components, accessories, or attachments “subject to the EAR” shall ensure that the commodities being repaired were shipped to their present location in accordance with U.S. law and continue to be lawfully used, and that either before or promptly after reexport of the replacement parts, components, accessories, or attachments, the replaced commodities and software are either destroyed or returned to the United States, or to the foreign firm in Country Group B (see Supplement No. 1 to this part) that shipped the replacement parts.

(ii) The conditions described in paragraph (a)(3) relating to replacement of “parts,” “components,” “accessories,” or “attachments”

(excluding 9x515 and “600 series” ECCNs) do not apply to reexports to a foreign country of “parts,” “components,” “accessories,” or “attachments” as replacements in foreign-origin products, if at the time the replacements are furnished, the foreign-origin product is eligible for export to such country under any of the License Exceptions in this part or the foreign-origin product is not subject to the EAR pursuant to § 734.4.

(b) Servicing and replacement.

(1) The provisions of this paragraph (b) authorize the export and reexport to any destination, except for 9x515 or “600 series” items to destinations identified in Country Group D:5 (see Supplement No. 1 to this part) or otherwise prohibited under the EAR, of commodities and software that were sent to the United States or to a foreign party for servicing and replacement of commodities and software “subject to the EAR” (see § 734.2(a) of the EAR) that are defective or that an end user or ultimate consignee has found unacceptable. The export of firearms controlled by ECCN 0A501.a or .b, or shotguns with a barrel length less than 18 inches controlled in ECCN 0A502 temporarily in the United States for servicing and replacement may be exported under paragraph (b)(2) or (3) of this section only if the additional requirements in paragraph (b)(4) of this section are also met.

(2) Commodities and software sent to a United States or foreign party for servicing.

(i) Definition. “Servicing” as used in this section means inspection, testing, calibration or repair, including overhaul and reconditioning. The servicing shall not have improved or changed the basic characteristics (e.g., the accuracy, capability, performance, or productivity) of the commodity or software as originally authorized for export or reexport.

(ii) Return of serviced commodities and software. When the serviced commodity or software is returned, it may include any replacement or rebuilt parts, components,

accessories, or attachments necessary to its repair and may be accompanied by any spare parts, components, tools, accessories, attachments or other items sent with it for servicing.

(iii) Commodities and software imported from Country Group D:1 except the People’s Republic of China (PRC). Commodities and software legally exported or reexported to a consignee in Country Group D:1 (except the People’s Republic of China (PRC)) (see Supplement No. 1 to this part) that are sent to the United States or a foreign party for servicing may be returned to the country from which it was sent, provided that both of the following conditions are met:

(A) The exporter making the shipment is the same person or firm to whom the original license was issued; and

(B) The end use and the end user of the serviced commodities or software and other particulars of the transaction, as set forth in the application and supporting documentation that formed the basis for issuance of the license have not changed.

(iv) Terrorist supporting countries. No repaired commodity or software may be exported or reexported to countries in Country Group E:1 (see Supplement No. 1 to this part).

(3) Replacements for defective or unacceptable equipment “subject to the EAR.”

(i) Subject to the following conditions, commodities or software may be exported or reexported to replace defective or otherwise unusable (e.g., erroneously supplied) items.

(A) The commodity or software is “subject to the EAR” (see § 734.2(a) of the EAR).

(B) The commodity or software to be replaced must have been previously exported or reexported in its present form under a license or authorization granted by BIS or an authorization,

e.g., a license or exemption, issued under the authority of the Arms Export Control Act.

(C) No commodity or software may be exported or reexported to replace equipment that is worn out from normal use, nor may any commodity or software be exported to be held in stock abroad as spare equipment for future use.

(D) The replacement item may not improve the basic characteristic, e.g., as to accuracy, capability, performance, or productivity, of the equipment as originally authorized, e.g., under a license, license exception or an exemption, for export or reexport.

(E) No shipment may be made to countries in Country Group E:1 (see Supplement No. 1 to this part), or to any other destination to replace defective or otherwise unusable equipment owned or controlled by, or leased or chartered to, a national of any of those countries.

(F) Commodities or “software” “subject to the EAR” and classified in 9x515 or “600 Series” ECCNs may not be exported or reexported to a destination identified in Country Group D:5 (see Supplement No. 1 to this part).

(ii) *Special conditions applicable to exports to Country Group B and Country Group D:1.* In addition to the general conditions in paragraph (b)(3)(i) of this section, the following conditions apply to exports or reexports of replacements for defective or unacceptable commodities or software “subject to the EAR” (see § 734.2(a) of the EAR) to a destination in Country Group B or Country Group D:1 (see Supplement No. 1 to this part):

(A) By making such an export or reexport, the exporter represents that all the requirements of this paragraph (b) have been met and undertakes to destroy or return the replaced parts as provided in paragraph (b)(3)(ii)(C) of this section.

(B) The defective or otherwise unusable equipment must be replaced free of charge,

except for transportation and labor charges. If exporting to the countries listed in Country Group D:1 (except the PRC), the exporter shall replace the commodity or software within the warranty period or within 12 months of its shipment to the ultimate consignee in the country of destination, whichever is shorter.

(C) The commodity or software to be replaced must either be destroyed abroad or returned to the United States, or to a foreign firm in Country Group B that is under the effective control of the exporter, or to the foreign firm that is providing the replacement part or equipment. The destruction or return must be effected before, or promptly after, the replacement item is exported from the United States.

(D) A party reexporting replacements for defective or unacceptable U.S.-origin equipment must ensure that the commodities or software being replaced were shipped to their present location in accordance with U.S. law and continue to be legally used. See § 764.7 of the EAR for exports or reexports to the installed base in Libya.

(4) This paragraph (b)(4) authorizes the export of firearms controlled by ECCN 0A501.a or .b, or shotguns with a barrel length less than 18 inches controlled in ECCN 0A502 that are temporarily in the United States for servicing or replacement for a period not exceeding one year or the time it takes to service or replace the commodity, whichever is shorter, provided that the requirements of paragraph (b)(2) or (3) of this section are met and:

(i) The firearms were not shipped from or manufactured in Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan, except for any firearm model controlled by 0A501 that is specified under Annex A in Supplement No. 4 to this part;

(ii) When the firearms entered the U.S. as a temporary import, the temporary importer or its agent:

(A) Provided the following statement to U.S. Customs and Border Protection: “This shipment will be exported in accordance with and under the authority of License Exception RPL (15 CFR 740.10(b))”;

(B) Provided to U.S. Customs and Border Protection an invoice or other appropriate import-related documentation (or electronic equivalents) that includes a complete list and description of the firearms being temporarily imported, including their model, make, caliber, serial numbers, quantity, and U.S. dollar value; and

(C) Provided (if temporarily imported for servicing or replacement) to U.S. Customs and Border Protection the name, address and contact information (telephone number and/or email) of the organization or individual in the U.S. that will be receiving the item for servicing or replacement; and

(iii) In addition to the export clearance requirements of part 758 of the EAR, the exporter or its agent must provide the import documentation related to paragraph (b)(4)(iii)(B) of this section to U.S. Customs and Border Protection at the time of export.

Note 1 to paragraph (b)(4): In addition to complying with all applicable EAR requirements for the export of commodities described in paragraph (b)(4) of this section, exporters and temporary importers should contact U.S. Customs and Border Protection (CBP) at the port of temporary import or export, or at the CBP website, for the proper procedures for temporarily importing or exporting firearms controlled in ECCN 0A501.a or .b or shotguns with a barrel length less than 18 inches controlled in ECCN 0A502, including regarding how to provide any data or documentation required by BIS.

(c) *Special recordkeeping requirements: ECCNs 2A983, 2A984, 2D983 and 2D984, and “600 Series” ECCNs.*

(1) In addition to the other recordkeeping

requirements set forth elsewhere in the EAR, exporters are required to maintain records, as specified in this section, for any items exported or reexported pursuant to License Exception RPL to repair, replace, or service previously lawfully exported or reexported items classified under ECCNs 2A983, 2A984, 2D983 and 2D984 or a “600 Series” ECCN. The following information must be maintained for each such export or reexport transaction:

(i) A description of the item replaced, repaired or serviced;

(ii) The type of repair or service;

(iii) Certification of the destruction or return of item replaced;

(iv) Location of the item replaced, repaired or serviced;

(v) The name and address of those who received the items for replacement, repair, or service;

(vi) Quantity of items shipped; and

(vii) Country of ultimate destination.

(2) Records maintained pursuant to this section may be requested at any time by an appropriate BIS official as set forth in § 762.7 of the EAR. Records that must be included in the annual or semi-annual reports of exports and reexports of “600 Series” items under the authority of License Exception RPL are described in § 743.4 and § 762.2(b).

**§ 740.11 GOVERNMENTS,
INTERNATIONAL ORGANIZATIONS,
INTERNATIONAL INSPECTIONS UNDER
THE CHEMICAL WEAPONS
CONVENTION, AND THE
INTERNATIONAL SPACE STATION
(GOV)**

This License Exception authorizes exports and

reexports for international nuclear safeguards; U.S. government agencies or personnel; agencies of cooperating governments; international inspections under the Chemical Weapons Convention; and the International Space Station. Commodities listed in ECCN 0A501 are eligible only for transactions described in paragraphs (b)(2)(i) and (ii) of this section. Any item listed in a 0x5zz ECCN for export, reexport, or transfer (in-country) to an E:1 country is eligible only for transactions described in paragraphs (b)(2)(i) and (ii) solely for U.S. Government official use of this section.

(a) *International Safeguards.*

(1) Scope. The International Atomic Energy Agency (IAEA) is an international organization that establishes and administers safeguards, including Additional Protocols, designed to ensure that special nuclear materials and other related nuclear facilities, equipment, and material are not diverted from peaceful purposes to non-peaceful purposes. European Atomic Energy Community (Euratom) is an international organization of European countries with headquarters in Luxembourg. Euratom establishes and administers safeguards designed to ensure that special nuclear materials and other related nuclear facilities, equipment, and material are not diverted from peaceful purposes to non-peaceful purposes. This paragraph (a) authorizes exports and reexports of commodities or software to the IAEA and Euratom, and reexports by IAEA and Euratom for official international safeguard use, as follows:

(i) Commodities or software consigned to the IAEA at its headquarters in Vienna, Austria or its field offices in Toronto, Ontario, Canada or in Tokyo, Japan for official international safeguards use.

(ii) Commodities or software consigned to the Euratom Safeguards Directorate in Luxembourg, Luxembourg for official international safeguards use.

(iii) Commodities or software consigned to

IAEA or Euratom may be reexported to any country for IAEA or Euratom international safeguards use provided that IAEA or Euratom maintains control of or otherwise safeguards the commodities or software and returns the commodities or software to the locations described in paragraphs (a)(1)(i) and (a)(1)(ii) of this section when they become obsolete, are no longer required, or are replaced.

(iv) Commodity or software shipments may be made by persons under direct contract with IAEA or Euratom, or by Department of Energy National Laboratories as directed by the Department of State or the Department of Energy.

(v) The monitoring functions of IAEA and Euratom are not subject to the restrictions on prohibited safeguarded nuclear activities described in § 744.2(a)(3) of the EAR.

(vi) When commodities or software originally consigned to IAEA or Euratom are no longer in IAEA or Euratom official safeguards use, such commodities may be disposed of by destruction or by reexport or transfer in accordance with the EAR.

(2) Restrictions.

(i) Items on the Sensitive List (see Supplement No. 6 to part 774 of the EAR) may not be exported, reexported, or transferred (in-country) under this paragraph (a), *except* to the countries listed in Country Group A:5 (See Supplement No.1 to part 740 of the EAR).

(ii) Items on the Very Sensitive List (see Supplement No. 7 to part 774 of the EAR) may not be exported, reexported, or transferred (in-country) under this paragraph (a).

(iii) Encryption items controlled for EI reasons under ECCNs 5A002, 5A004, 5D002, or 5E002 may not be exported, reexported, or transferred (in-country) under this paragraph (a). See §740.17 of the EAR (License Exception ENC) for possible alternative license exception authorization.

(iv) Without prior authorization from the Bureau of Industry and Security, nationals of countries in Country Group E:1 (see Supplement No. 1 to this part) may not physically or computationally access computers that have been enhanced by “electronic assemblies,” which have been exported or reexported under License Exception GOV and have been used to enhance such computers by aggregation of processors so that the APP of the aggregation exceeds the APP parameter set forth in ECCN 4A003.b.

(v) “600 series” items may not be exported or reexported under this paragraph (a), *except* to the countries listed in Country Group A:5 (see Supplement No.1 to this part).

(b) United States Government.

(1) Scope. The provisions of this paragraph (b) authorize exports, reexports, and transfers (in-country) to personnel and agencies of the U.S. Government and certain exports by the Department of Defense. “Agency of the U.S. Government” includes all civilian and military departments, branches, missions, government-owned corporations, and other agencies of the U.S. Government, but does not include such national agencies as the American Red Cross or international organizations in which the United States participates such as the Organization of American States. Therefore, shipments may not be made to these non-governmental national or international agencies, except as provided in paragraph (b)(2)(i) of this section for U.S. representatives to these organizations.

(2) Eligibility.

(i) Items for personal use by personnel and agencies of the U.S. Government. This provision is available for items in quantities sufficient only for the personal use of members of the U.S. Armed Forces or civilian personnel of the U.S. Government (including U.S. representatives to public international organizations), and their

immediate families and household employees. Items for personal use include household effects, food, beverages, and other daily necessities.

(ii) Exports, reexports, and transfers (in-country) made by or consigned to a department or agency of the U.S. Government. This paragraph authorizes exports, reexports, and transfers of items when made by or consigned to a department or agency of the U.S. Government solely for its official use or for carrying out any U.S. Government program with foreign governments or international organizations that is authorized by law and subject to control by the President by other means. This paragraph does not authorize a department or agency of the U.S. Government to make any export, reexport, or transfer that is otherwise prohibited by other administrative provisions or by statute. Contractor support personnel of a department or agency of the U.S. Government are eligible for this authorization when in the performance of their duties pursuant to the applicable contract or other official duties. ‘Contractor support personnel’ for the purpose of this provision means those persons who provide administrative, managerial, scientific or technical support under contract to a U.S. Government department or agency (*e.g.*, contractor employees of Federally Funded Research Facilities or Systems Engineering and Technical Assistance contractors). The term ‘contractor support personnel’ for purposes of this paragraph (b)(2)(ii) is limited to those individuals who are providing such support within a U.S. Government owned or operated facility or under the direct supervision of a U.S. government employee (*i.e.*, an individual directly employed by the U.S. Government). Private security contractors are not ‘contractor support personnel’ for purposes of this paragraph (b)(2)(ii) because although they may work within a U.S. Government owned or operated facility, such contractors do not provide administrative, managerial, scientific or technical support under contract to the U.S. Government. This authorization is not available when a department or agency of the U.S. Government acts as a transmittal agent on behalf of a non-U.S. Government person, either as a convenience or in

satisfaction of security requirements.

(iii) Exports, reexports, and transfers (in-country) made for or on behalf of a department or agency of the U.S. Government.

(A) This paragraph authorizes exports, reexports, and transfers (in-country) of items solely for use by a department or agency of the U.S. Government, when:

(1) The items are destined to a U.S. person; and

(2) The item is exported, reexported, or transferred (in-country) pursuant to a contract between the exporter and a department or agency of the U.S. Government;

(B) This paragraph authorizes exports, reexports, and transfers (in-country) of items to implement or support any U.S. Government cooperative program, project, agreement, or arrangement with a foreign government or international organization or agency that is authorized by law and subject to control by the President by other means, when:

(1) The agreement is in force and in effect, or the arrangement is in operation;

(2) The exporter, reexporter, or transferor obtains a written authorization from the Secretary or agency head of the U.S. Government department or agency responsible for the program, agreement, or arrangement, or his or her designee, authorizing the exporter, reexporter, or transferor to use this license exception. The written authorization must include the scope of items to be shipped under this license exception; the end users and consignees of the items; and any restrictions on the export, reexport, or transfer (in-country) (including any restrictions on the foreign release of technology);

(3) The exporter, reexporter, or transferor has a contract with a department or agency of the U.S. Government for the provision of the items in furtherance of the agreement, or arrangement;

and

(4) The items being exported, reexported, or transferred (in-country) are not controlled for Chemical Weapons Convention (CW) or proliferation of chemical and biological weapons (CB) reasons;

(C) This paragraph authorizes the ‘temporary’ export, reexport, or transfer (in-country) of an item in support of any foreign assistance or sales program authorized by law and subject to the control of the President by other means, when:

(1) The item is provided pursuant to a contract between the exporter, reexporter, or transferor and a department or agency of the U.S. Government; and

(2) The exporter, reexporter, or transferor obtains a written authorization from the Secretary or agency head of the U.S. Government department or agency responsible for the program, or his or her designee, authorizing the exporter, reexporter, or transferor to use this license exception. The written authorization must include the scope of items to be shipped under this license exception; the end users and consignees of the items; and any restrictions on the export, reexport, or transfer (in-country) (including any restrictions on the foreign release of technology);

Note 1 to paragraph (b)(2)(iii)(C): ‘Temporary,’ for purposes of paragraph (b)(2)(iii)(C) of this section, means that four years from the date of an item’s initial export, reexport, or transfer (in-country), it must be returned to the exporter, reexporter, or transferor or its disposition otherwise authorized (e.g., pursuant to a license or another license exception) in accordance with the EAR.

Note 2 to paragraph (b)(2): Items controlled for NS, MT, CB, NP, FC, or AT reasons may not be exported, reexported, or transferred (in-country) to, or for the use of military, police, intelligence entities, or other sensitive end users (e.g., contractors or other

governmental parties performing functions on behalf of military, police, or intelligence entities) of a government in a Country Group E:1 or E:2 country.

(D) This paragraph authorizes the export, reexport, or transfer of commodities or software at the direction of the U.S. Department of Defense for an end use in support of an Acquisition and Cross Servicing Agreement (ACSA), when:

(1) The ACSA is between the U.S. Government and a foreign government or an international organization and is in force and in effect;

(2) The exporter, reexporter, or transferor has a contract with the department or agency of the U.S. government in furtherance of the ACSA; and

(3) The exporter, reexporter, or transferor obtains a written authorization from the Secretary or agency head of the U.S. Government department or agency responsible for the ACSA, or his or her designee, authorizing the exporter, reexporter, or transferor to use this license exception. The written authorization must include the scope of items to be shipped under this license exception; the end-users and consignees of the items; and any restrictions on the export, reexport, or transfer (in-country);

(E) This paragraph authorizes the export, reexport, or transfer (in-country) of Government Furnished Equipment (GFE) made by a U.S. Government contractor, when:

(1) The GFE will not be provided to any foreign person;

(2) The export, reexport, or transfer (in-country) is pursuant to a contract with a department or agency of the U.S. Government; and

(3) Shipment documents must include the following statement: “Property of [insert U.S. Government department,

agency, or service]. Property may not enter the trade of the country to which it is shipped. Authorized under License Exception GOV. U.S. Government point of contact: [insert name and telephone number].”

(F) **Electronic Export Information.** Electronic Export Information (EEI) must be filed in the Automated Export System (AES) for any export made pursuant to paragraph (b)(iii) of this section. The EEI must identify License Exception GOV as the authority for the export and indicate that the applicant has received the relevant documentation from the contracting U.S. Government department, agency, or service. The Internal Transaction Number assigned by AES must be properly annotated on shipping documents (bill of lading, airway bill, other transportation documents, or commercial invoice).

(G) The exporter, reexporter, or transferor must obtain an authorization, if required, before any item previously exported, reexported, or transferred (in-country) under this paragraph is resold, transferred, reexported, transshipped, or disposed of to an end user for any end use, or to any destination other than as authorized by this paragraph (e.g., property disposal of surplus items outside of the United States), unless:

(1) The transfer is pursuant to a grant, sale, lease, loan, or cooperative project under the Arms Export Control Act or the Foreign Assistance Act of 1961, as amended; or

(2) The item has been destroyed or rendered useless beyond the possibility of restoration.

(iv) **Items exported at the direction of the U.S. Department of Defense.** This paragraph authorizes items to be exported, reexported, or transferred (in-country) pursuant to an official written request or directive from the U.S. Department of Defense.

(v) This paragraph authorizes items sold,

leased, or loaned by the U.S. Department of Defense to a foreign country or international organization pursuant to the Arms Export Control Act or the Foreign Assistance Act of 1961 when the items are delivered to representatives of such a country or organization in the United States and exported, reexported, or transferred on a military aircraft or naval vessel of that government or organization or via the Defense Transportation Service.

(vi) This paragraph authorizes transfer of technology in furtherance of a contract between the exporter and an agency of the U.S. Government, if the contract provides for such technology and the technology is not “development” or “production” technology for “600 series” items.

(c) Cooperating Governments and the North Atlantic Treaty Organization.

(1) Scope. The provisions of this paragraph (c) authorize exports, reexports, and transfers (in-country) of the items listed in paragraph (c)(2) of this section to agencies of cooperating governments or agencies of the North Atlantic Treaty Organization (NATO). ‘Agency of a cooperating government’ includes all civilian and military departments, branches, missions, and other governmental agencies of a cooperating national government. ‘Cooperating governments’ are the national governments of countries listed in Country Group A:1 (see Supplement No. 1 to this part) and the national governments of Singapore and Taiwan.

Note 3 to paragraph (c)(1): *Civil intergovernmental organizations (such as the European Space Agency (ESA)) where the membership is limited to national governments that are ‘cooperating governments’ are also considered ‘cooperating governments’ for purposes of paragraph (c)(1) of this section. If the membership of the civil intergovernmental organization includes any national governments or other organizations that are not ‘cooperating governments,’ such civil intergovernmental organizations are not considered ‘cooperating*

governments’ for purposes of paragraph (c)(1) of this section. For example, civil intergovernmental organizations such as the European Aviation Safety Agency (EASA), the United Nations, and the World Bank do not fall within paragraph (c)(1) of this section because their membership includes governments that are not ‘cooperating governments.’

(2) Eligibility.

(i) Items for official use within national territory by agencies of cooperating governments. This license exception is available for all items consigned to and for the official use of any ‘agency of a cooperating government’ within the territory of any cooperating government, except items excluded by paragraph (c)(3) of this section.

(ii) Items for official use by agencies of cooperating governments for military purposes or NATO. With the exception of items excluded by paragraph (c)(3) of this section, this license exception is available for all items consigned to and for the official use of:

(A) A military end user of or for the military end use of cooperating governments, or

(B) An agency of NATO.

(iii) Diplomatic and consular missions of a cooperating government. This license exception is available for all items consigned to and for the official use of a diplomatic or consular mission of a cooperating government located in any country in Country Group B (see Supplement No. 1 to this part), except items excluded by paragraph (c)(3) of this section.

(3) Exclusions. The following items may not be exported, reexported, or transferred (in-country) under this paragraph (c):

(i) Items on the Sensitive List (see Supplement No. 6 to part 774 of the EAR), *except* to or for the use by governments of countries

listed in Country Group A:5 (see Supplement No.1 to this part) or an agency of NATO;

(ii) Items on the Very Sensitive List (see Supplement No. 7 to part 774 of the EAR);

(iii) Encryption items controlled for EI reasons under ECCNs 5A002, 5A004, 5D002, or 5E002 (see §740.17 of the EAR for License Exception ENC);

(iv) Regional stability items controlled under ECCNs 6A002.a.1.c, 6E001 “technology” according to the General Technology Note for the “development” of equipment in 6A002.a.1.c, and 6E002 “technology” according to the General Technology Note for the “production” of equipment in 6A002.a.1.c.;

(v) “600 series” items, *except* to or for the use by governments of countries listed in Country Group A:5 (see Supplement No. 1 to this part) or an agency of NATO;

(vi) Items controlled for nuclear nonproliferation (NP) reasons;

(vii) Items listed as not eligible for License Exception STA in § 740.20(b)(2)(ii) of the EAR; or

(viii) Cybersecurity items as defined in §740.22(b)(1) of the EAR.

(d) International inspections under the Chemical Weapons Convention (CWC or Convention).

(1) The Organization for the Prohibition of Chemical Weapons (OPCW) is an international organization that establishes and administers an inspection and verification regime under the Convention designed to ensure that certain chemicals and related facilities are not diverted from peaceful purposes to non-peaceful purposes. This paragraph (d) authorizes exports and reexports to the OPCW and exports and reexports by the OPCW for official international inspection and verification use under the terms of the

Convention as follows:

(i) Commodities and software consigned to the OPCW at its headquarters in The Hague for official international OPCW use for the monitoring and inspection functions set forth in the Convention, and technology relating to the maintenance, repair, and operation of such commodities and software. The OPCW must maintain “effective control” of such commodities, software and technology.

(ii) Controlled technology relating to the training of the OPCW inspectorate.

(iii) Controlled technology relating to a CWC inspection site, including technology released as a result of:

(A) Visual inspection of U.S.-origin equipment or facilities by foreign nationals of the inspection team;

(B) Oral communication of controlled technology to foreign nationals of the inspection team in the U.S. or abroad; and

(C) The application to situations abroad of personal knowledge or technical experience acquired in the U.S.

(2) **Exclusions.** The following items may not be exported or reexported under the provisions of this paragraph (d):

(i) Inspection samples collected in the U.S. pursuant to the Convention;

(ii) Commodities and software that are no longer in OPCW official use. Such items must be transferred in accordance with the EAR.

(iii) “600 series” items, *except* to the countries listed in Country Group A:5 (see Supplement No.1 to this part).

(3) **Confidentiality.** The application of the provisions of this paragraph (d) is subject to the condition that the confidentiality of business

information is strictly protected in accordance with applicable provisions of the EAR and other U.S. laws regarding the use and transfer of U.S. goods and services.

(4) Restrictions. Without prior authorization from the Bureau of Industry and Security, nationals of countries in Country Group E:1 (see Supplement No. 1 to this part) may not physically or computationally access computers that have been enhanced by “electronic assemblies,” which have been exported or reexported under License Exception GOV and have been used to enhance such computers by aggregation of processors so that the APP of the aggregation exceeds the APP parameter set forth in ECCN 4A003.b.

(e) International Space Station (ISS).

(1) Scope. The ISS is a research facility in a low-Earth orbit approximately 190 miles (350 km) above the surface of the Earth. The ISS is a joint project among the space agencies of the United States, Russia, Japan, Canada, Europe and Italy. This paragraph (e) authorizes exports and reexports required on short notice of certain commodities subject to the EAR that are classified under ECCN 9A004 to launch sites for supply missions to the ISS.

(2) Eligible commodities. Any commodity subject to the EAR that is classified under ECCN 9A004 and that is required for use on the ISS on short notice.

NOTE 4 to paragraph (e)(2): *This license exception is not available for the export or reexport of “parts,” “components,” “accessories,” and “attachments” to overseas manufacturers for the purpose of incorporation into other items destined for the ISS.*

NOTE 5 to paragraph (e)(2): *For purposes of this paragraph (e), ‘short notice’ means the exporter is required to have a commodity manifested and at the scheduled launch site for hatch-closure (final stowage) no more than forty-five (45) days from the time the exporter or reexporter received complete documentation.*

‘Complete documentation’ means the exporter or reexporter received the technical description of the commodity and purpose for use of the commodity on the ISS. ‘Hatch-closure (final stowage)’ means the final date specified by a launch provider by which items must be at a specified location in a launch country in order to be included on a mission to the ISS. The exporter or reexporter must receive the notification to supply the commodity for use on the ISS in writing. That notification must be kept in accordance with paragraph (e)(8) of this section and the Recordkeeping requirements in part 762 of the EAR.

(3) Eligible destinations. Eligible destinations are France, Japan, Kazakhstan, and Russia. To be eligible, a destination needs to have a launch for a supply mission to the ISS scheduled by a country participating in the ISS.

(4) Requirement for commodities to be launched on an eligible space launch vehicle (SLV). Only commodities that will be delivered to the ISS using United States, Russian, ESA (French), or Japanese space launch vehicles (SLVs) are eligible under this authorization. Commodities to be delivered to the ISS using SLVs from any other countries are excluded from this authorization.

(5) Authorizations.

(i) Authorization to retain commodity at or near launch site for up to six months. If there are unexpected delays in a launch schedule for reasons such as mechanical failures in a launch vehicle or weather, commodities exported or reexported under this paragraph (e) may be retained at or near the launch site for a period of six (6) months from the time of initial export or reexport before the commodities must be destroyed, returned to the exporter or reexporter, or be the subject of an individually validated license request submitted to BIS to authorize further disposition of the commodities.

(ii) Authorization to retain commodity abroad at launch country beyond six months. If,

after the commodity is exported or reexported under this authorization, a delay occurs in the launch schedule that would exceed the 6-month deadline in paragraph (e)(5)(i) of this section, the exporter or reexporter or the person in control of the commodities in the launch country may request a one-time 6-month extension by submitting written notification to BIS requesting a 6-month extension and noting the reason for the delay. If the requestor is not contacted by BIS within 30 days from the date of the postmark of the written notification and if the notification meets the requirements of this subparagraph, the request is deemed granted. The request must be sent to BIS at the address listed in part 748 of the EAR and should include the name and address of the exporter or reexporter, the name and address of the person who has control of the commodity, the date the commodities were exported or reexported, a brief product description, and the justification for the extension. To retain a commodity abroad beyond the 6-month extension period, the exporter, reexporter or person in control of the commodity must request authorization by submitting a license application in accordance with §§ 748.1, 748.4 and 748.6 of the EAR to BIS 90 days prior to the expiration of the 6-month extension period.

(iii) *Items not delivered to the ISS because of a failed launch.* If the commodities exported or reexported under this paragraph (e) of this section are not delivered to the ISS because a failed launch causes the destruction of the commodity prior to its being delivered, exporters and reexporters must make note of the destruction of the commodities in accordance with the recordkeeping requirements under paragraph (e)(8)(ii) of this section and part 762 of the EAR.

(6) Reexports to an alternate launch country. If a mechanical or weather related issue causes a change from the scheduled launch country to another foreign country after a commodity was exported or reexported, then that commodity may be subsequently reexported to the new scheduled launch country, provided all of the terms and conditions of paragraph (e) of this section are met, along with any other applicable EAR

provisions. In such instances, the 6-month time limitation described in paragraph (e)(5)(i) of this section would start over again at the time of the subsequent reexport transaction. Note that if the subsequent reexport may be made under the designation No License Required (NLR) or pursuant to an authorization under the EAR, a reexporter does not need to rely on the provisions contained in this paragraph (e).

(7) Eligible recipients. Only persons involved in the launch of commodities to the ISS may receive and have access to commodities exported or reexported pursuant to this paragraph (e), except that:

(i) No commodities may be exported, reexported, or transferred (in-country) under paragraph (e) to any national of an E:1 country (see Supplement No. 1 to this part), and

(ii) No person may receive commodities authorized under paragraph (e) of this section who is subject to an end-user or end-use control described in part 744 of the EAR, including the entity list in Supplement No. 4 to part 744.

(8) Recordkeeping requirements. Exporters and reexporters must maintain records regarding exports or reexports made using this paragraph (e) of this section as well as any other applicable recordkeeping requirements under part 762 of the EAR.

(i) Exporters and reexporters must retain a record of the initial written notification they received requesting these commodities be supplied on short notice for a supply mission to the ISS, including the date the exporter or reexporter received complete documentation (i.e., the day on which the 45-day clock begins).

(ii) Exporters and reexporters must maintain records of the date of any exports or reexports made using this paragraph (e) and the date on which the commodities were launched into space for delivery to the ISS. If the commodities are not delivered to the ISS because of a failed launch whereby the item is destroyed prior to being

delivered to the ISS, this must be noted for recordkeeping purposes.

(iii) The return or destruction of defective or worn out parts or components is not required. However, if defective or worn out parts or components originally exported or reexported pursuant to this paragraph (e) are returned from the ISS, then those parts and components may be either: returned to the original country of export or reexport; destroyed; or reexported or transferred (in-country) to a destination that has been designated by NASA for conducting a review and analysis of the defective or worn part or component. Documentation for this activity must be kept for recordkeeping purposes. No commodities that are subject to the EAR may be returned, under the provisions of this paragraph, to a country listed in Country Group E:1 (see Supplement No. 1 to this part) or to any person if that person is subject to an end-user or end-use control described in part 744 of the EAR. For purposes of paragraph (e) of this section, a ‘defective or worn out’ part or component is a part or component that no longer performs its intended function.

§ 740.12 GIFT PARCELS AND HUMANITARIAN DONATIONS (GFT)

(a) Gift Parcels

(1) **Scope.** The provisions of paragraph (a) authorize exports and reexports of gift parcels by an individual (donor) addressed to an individual, or a religious, charitable or educational organization (donee) located in any destination for the use of the donee or the donee's immediate family (and not for resale). The gift parcel must be provided free of charge to the donee. However, payment by the donee of any handling

¹ Many foreign countries permit the entry, duty-free, of gift parcels that conform to regulations regarding contents and marking. To secure this advantage, the sender should show the words “U.S.A. Gift Parcel” on the addressee side of the package and on any required

charges or of any fees levied by the importing country (e.g., import duties, taxes, etc.) is not considered to be a cost to the donee for purposes of this definition of “gift parcel.”¹

(2) Commodity, value and other limitations.

(i) Item limitations.

(A) Prohibited items.

(1) For Cuba no items listed on the Commerce Control List other than items listed in § 740.19(b) of the EAR may be included in a gift parcel.

(2) For all destinations, no items controlled for chemical and biological weapons (CB), missile technology (MT), national security (NS), nuclear proliferation (NP) or encryption items (EI) reasons on the Commerce Control List (Supplement no. 1 to part 774 of the EAR) may be included in a gift parcel.

(3) **Items prohibited for destinations in Country Group D:1 or E:2.** For destinations in Country Group D:1 or E:2, military wearing apparel may not be included in a gift parcel regardless of whether all distinctive U.S. military insignia, buttons, and other markings are removed.

(4) Gold bullion, gold taels, and gold bars are prohibited as are items intended for resale or reexport.

(B) **Eligible items.** For all destinations, eligible items are food (including vitamins); medicines, medical supplies and devices (including hospital supplies and equipment and equipment for the handicapped); receive-only radio equipment for reception of

customs declarations. Information regarding the foreign postal regulations is available at local post offices. Senders of gift parcels who wish information regarding import duties of a foreign country should contact the nearest Commercial Office, Consulate or Embassy of the country concerned.

commercial/civil AM/FM and short wave publicly available frequency bands, and batteries for such equipment; clothing; personal hygiene items; seeds; veterinary medicines and supplies; fishing equipment and supplies; soap-making equipment; as well as all other items of a type normally sent as gifts between individuals (including items listed in § 740.19(b) of the EAR) except for those items prohibited in paragraph (a)(2)(i)(A) of this section. Items in gift parcels must be in quantities normally given as gifts between individuals.

Example to paragraph (a)(2)(i)(B) of this section. *A watch or piece of jewelry is normally sent as a gift. However, multiple watches, either in one package or in subsequent shipments, would not qualify for such gift parcels because the quantity would exceed that normally given between individuals. Similarly, a sewing machine or bicycle within the value limit of this License Exception may be an appropriate gift. However, subsequent shipments of the same item to the same donee would not be a gift normally given between individuals.*

(ii) Import requirements. The commodities must be acceptable in type and quantity by the recipient country for import as gifts. Commodities exceeding the import limits may not be included in gift parcels.

(iii) Frequency.

(A) Except for gift parcels of food to Cuba, not more than one gift parcel may be sent from the same donor to the same donee in any one calendar month.

(B) There is no frequency limit on gift parcels of food to Cuba.

(C) Parties seeking authorization to exceed the frequency limit due to compelling humanitarian concerns (e.g., for certain gifts of medicine) should submit a license application in accordance with §§ 748.1, 748.4 and 748.6 of the EAR to BIS with complete justification.

(iv) Value. The combined total domestic retail value of all commodities and software in a single gift parcel may not exceed \$800. This limit does not apply to food sent in a gift parcel to Cuba.

(v) Ineligible recipients.

(A) No gift parcel may be sent to any of the following officials of the Cuban government: Ministers and Vice-Ministers; members of the Council of State; members of the Council of Ministers; members and employees of the National Assembly of People's Power; members of any provincial assembly; local sector chiefs of the Committees for the Defense of the Revolution; Director Generals and sub-Director Generals and higher of all Cuban ministries and state agencies; employees of the Ministry of the Interior (MININT); employees of the Ministry of Defense (MINFAR); secretaries and first secretaries of the Confederation of Labor of Cuba (CTC) and its component unions; chief editors, editors and deputy editors of Cuban state-run media organizations and programs, including newspapers, television, and radio; or members and employees of the Supreme Court (Tribuno Supremo Nacional).

(B) No gift parcel may be sent to any member of the Politburo.

(C) No gift parcel may be sent to organizations administered or controlled by the Cuban Government or the Cuban Communist Party.

(3) How to export gift parcels.

(i) A gift parcel must be sent directly to the donee by the individual donor, or for such donor by a commercial or other gift-forwarding service or organization. Each gift parcel must show, on the outside wrapper, the name and address of the donor, as well as the name and address of the donee, regardless of whether sent by the donor or by a forwarding service.

(ii) Each parcel must have the notation “GIFT — Export License Not Required” written on the addressee side of the package and the symbol “GFT” written on any required customs declaration.

(b) Humanitarian donations

(1) Scope. The provisions of paragraph (b) authorize exports or reexports by groups or organizations of donations to meet basic human needs when those groups or organizations have experience in maintaining a verifiable system of distribution that ensures delivery to the intended beneficiaries.

(2) Basic human needs. Basic human needs are defined as those requirements essential to individual well-being: health, food, clothing, shelter, and education. These needs are considered to extend beyond those of an emergency nature and those that meet direct needs for mere subsistence.

(3) Eligible donors. Eligible donors are U.S. charitable organizations that have an established record of involvement in donative programs and experience in maintaining and verifying a system of distribution to ensure delivery of commodities and software to the intended beneficiaries. Eligible distribution arrangements may consist of any one or more of the following:

(i) A permanent staff maintained in the recipient country to monitor the receipt and distribution of the donations to the intended beneficiaries;

(ii) Periodic spot-checks in the recipient country by members of the exporter's staff; or

(iii) An agreement to utilize the services of a charitable organization that has a monitoring system in place.

(4) Donations. To qualify for export under the provisions of this paragraph (b), the items must be provided free of charge to the beneficiary. The payment by the beneficiary, however, of

normal handling charges or fees levied by the importing country (e.g., import duties, taxes, etc.) is not considered to be a cost to the beneficiary for purposes of this paragraph b.

(5) Ineligible commodities and software. The following commodities and software are not eligible:

(i) Commodities and software controlled for national security, chemical or biological weapons, and nuclear non-proliferation, missile technology or crime control reasons (see Supplement No. 1 to part 774 of the EAR);

(ii) Exports for large-scale projects of the kind associated with comprehensive economic growth, such as dams and hydroelectric plants; or

(iii) Exports to Cuba of medical items excluded by §746.2(b)(1) of the EAR.

(6) Eligible items. Eligible commodities and software are those listed in Supplement No. 2 to part 740.

(7) Additional recordkeeping requirements. In addition to the recordkeeping requirements in part 762 of the EAR, donors must keep records containing the following information:

(i) The donor organization's identity and past experience as an exporter of goods to meet basic human needs;

(ii) Past and current countries to which the donative programs have been and are being directed, with particular reference to donative programs in embargoed destinations;

(iii) Types of projects and commodities involved in the donative programs;

(iv) Specific class(es) of beneficiaries of particular donated goods intended to be exported under this License Exception; and

(v) Information concerning the source of funding for the donative programs and the

projected annual value of exports of humanitarian donations.

§ 740.13 TECHNOLOGY AND SOFTWARE UNRESTRICTED (TSU)

This license exception authorizes exports and reexports of operation technology and software; sales technology and software; software updates (bug fixes); “mass market” software subject to the General Software Note; and release of technology and source code in the United States by U.S. universities to their bona fide and full time regular employees. Note that encryption software subject to the EAR is not subject to the General Software Note (see paragraph (d)(2) of this section).

(a) Operation technology and software

(1) Scope. The provisions of paragraph (a) permit exports and reexports of operation technology and software. “Operation technology” is the minimum technology necessary for the installation, operation, maintenance (checking), or repair of those commodities or software that are lawfully exported or reexported under a license, a License Exception, or NLR. The “minimum necessary” operation technology does not include technology for development or production and includes use technology only to the extent required to ensure safe and efficient use of the commodities or software. Individual entries in the software and technology subcategories of the CCL may further restrict the export or reexport of operation technology. This paragraph (a) authorizes training, provided the training is limited to the operation, maintenance and repair technology identified in this paragraph.

(2) Provisions and Destinations.

(i) Provisions. Operation software may be exported or reexported provided that both of the following conditions are met:

(A) The operation software is the minimum necessary to operate equipment authorized for export or reexport; and

(B) The operation software is in object code.

(ii) Destinations. Operation software and technology may be exported or reexported to any destination to which the equipment for which it is required has been or is being legally exported or reexported.

(b) Sales technology

(1) Scope. The provisions of paragraph (b) authorize exports and reexports of sales technology. “Sales technology” is data supporting a prospective or actual quotation, bid, or offer to sell, lease, or otherwise supply any item.

(2) Provisions and destinations.

(i) Provisions. Sales technology may be exported or reexported provided that:

(A) The technology is a type customarily transmitted with a prospective or actual quotation, bid, or offer in accordance with established business practice; and

(B) Neither the export nor the reexport will disclose the detailed design, production, or manufacture technology, or the means of reconstruction, of either the quoted item or its product. The purpose of this limitation is to prevent disclosure of technology so detailed that the consignee could reduce the technology to production.

(ii) Destinations. Sales technology may be exported or reexported to any destination.

NOTE: Neither this section nor its use means that the U.S. Government intends, or is committed, to approve a license application for any commodity, plant, software, or technology that may be the subject of the transaction to which

such quotation, bid, or offer relates. Exporters are advised to include in any quotations, bids, or offers, and in any contracts entered into pursuant to such quotations, bids, or offers, a provision relieving themselves of liability in the event that a license (when required) is not approved by the Bureau of Industry and Security.

(c) Software updates

The provisions of paragraph (c) authorize exports and reexports of software updates that are intended for and are limited to correction of errors (“fixes” to “bugs”) in software lawfully exported or reexported (original software). Such software updates may be exported or reexported only to the same consignee to whom the original software was exported or reexported, and such software updates may not enhance the functional capacities of the original software. Such software updates may be exported or reexported to any destination to which the software for which they are required has been legally exported or reexported.

**(d) General Software Note:
mass market software**

(1) Scope. The provisions of paragraph (d) authorize exports and reexports of mass market software subject to the General Software Note (see Supplement No. 2 to part 774 of the EAR; also referenced in this section).²

(2) Exclusions. The provisions of this paragraph (d) are not available for encryption software controlled for “EI” reasons under ECCN 5D002 or for encryption software with symmetric key length exceeding 64-bits that qualifies as mass market encryption software under the criteria in the Cryptography Note (Note 3) of Category 5, Part 2, of the CCL (supplement No. 1 to part 774 of the EAR). (Once such mass market encryption software has been released from “EI” and “NS” controls pursuant to § 740.17(b) of the EAR, it is controlled under ECCN 5D992.c and is thus

² Pursuant to 15 CFR § 30.37(f) of the Foreign Trade Regulations (FTR), Electronic Export Information

outside the scope of License Exception TSU.) See § 740.17(b) of the EAR for exports and reexports of mass market encryption products controlled under ECCN 5D992.c.

(3) Provisions and destinations.

(i) Destinations. Mass market software is available to all destinations except destinations in Country Group E:1 (see Supplement No. 1 to this part).

(ii) Provisions. Mass market treatment is available for software that is generally available to the public by being:

(A) Sold from stock at retail selling points, without restriction, by means of:

- (1)** Over the counter transactions;
- (2)** Mail order transactions; or
- (3)** Telephone call transactions; *and*

(B) Designed for installation by the user without further substantial support by the supplier.

(e) [Reserved]

(f) Release of technology and source code in the U.S. by U.S. universities to their bona fide and full time regular employees.

(1) Scope. This paragraph authorizes the release in the United States of “technology” and source code that is subject to the EAR by U.S. universities to foreign nationals who are their bona fide and full time regular employees.

(2) Eligible foreign nationals (i.e., bona fide and full time regular employees of U.S. universities). This exception is only available if:

(EEI) via the Automated Export System (AES) is required for mass-market software.

(i) The employee’s permanent residence throughout the period of employment is in the U.S.;

(ii) The employee is not a national of a destination listed in Country Group D:5 (see Supplement No. 1 to part 740 of the EAR); and

(iii) The university informs the individual in writing that the “technology” or source code may not be transferred to other foreign nationals without prior U.S. Government authorization. The obligation not to transfer technology extends beyond the tenure of employment at the university.

(3) Regular employee. A regular employee means:

(i) An individual permanently and directly employed by the university; or

(ii) An individual in a long-term contractual relationship with the university where the individual works at the university’s facilities; works under the university’s direction and control; works full time and exclusively for the university; executes nondisclosure certifications for the university; and where the staffing agency that has seconded the individual has no role in the work the individual performs (other than providing that individual for that work) and the staffing agency would not have access to any controlled technology (other than where specifically authorized by a license or where a license exception is available).

(4) Exclusions.

(i) No “technology” or source code may be released to a foreign national who is subject to a part 744 end-use or end-user control or where the release would otherwise be inconsistent with part 744; and

(ii) No “technology” controlled for “EI” (encryption) reasons or “technology” or source code controlled for “MT” (Missile Technology) reasons may be released under this paragraph (f).

(g) Copies of technology previously authorized for export to same recipient.

This paragraph authorizes the export, reexport, or transfer (in-country) of copies of technology previously authorized for export, reexport, or transfer (in-country) to the same recipient. This paragraph also authorizes the export, reexport, or transfer (in-country) of revised copies of such technology provided the following three conditions are met:

(1) The item that the technology pertains to is the identical item;

(2) The revisions to the technology are solely editorial and do not add to the content of technology previously exported, reexported, or transferred (in-country) or authorized for export, reexport, or transfer (in-country) to the same recipient; and

(3) The exporter, reexporter, or transferor has no reason to believe the same recipient has used the technology in violation of the original authorization.

(h) Special Recordkeeping Requirements: ECCNs 2D983, 2D984, 2E983 and 2E984

In addition to any other recordkeeping requirements set forth elsewhere in the EAR, exporters are required to maintain records, as specified in this paragraph, when exporting operation software or technology controlled under ECCNs 2D983, 2D984, 2E983, and 2E984, respectively, under License Exception TSU. Records maintained pursuant to this section may be requested at any time by an appropriate BIS official as set forth in §762.7 of the EAR. The following information must be specially maintained for each export or reexport transaction, under License Exception TSU, of operation software and technology controlled by ECCNs 2D983, 2D984, 2E983, and 2E984:

(1) A description of the software or technology exported or reexported, including the ECCN, as identified on the CCL;

- (2) A description of the equipment for which the software or technology is intended to be used, including the ECCN, as identified on the CCL;
- (3) The intended end-use of the software or technology;
- (4) The name and address of the end-user;
- (5) The quantity of software shipped; and
- (6) The location of the equipment for which the software or technology is intended to be used, including the country of destination.

§ 740.14 BAGGAGE (BAG)

(a) *Scope*

This License Exception authorizes individuals leaving the United States either temporarily (i.e., traveling) or longer-term (i.e., moving) and crew members of exporting or reexporting carriers to take to any destination, as personal baggage, the classes of commodities, software and technology described in this section.

(b) *Eligibility*

Individuals leaving the United States may export or reexport any of the following commodities or software for personal use of the individuals or members of their immediate families traveling with them to any destination or series of destinations. Individuals leaving the United States who are U.S. persons, as defined in paragraph (b)(4)(i), may export or reexport technology as a tool of trade under paragraph (b)(4) for their personal use or for the personal use of members of their immediate families who are traveling or moving with them, provided they are also U.S. persons, as defined in paragraph (b)(4)(i), to any destination or series of destinations. Technology exports and reexports authorized under paragraph (b)(4) of this section may be made as actual shipments, transmissions, or releases. Individuals leaving the United States temporarily (i.e., traveling)

must bring back items exported and reexported under this License Exception unless they consume the items abroad or are otherwise authorized to dispose of them under the EAR. Crew members may export or reexport only commodities and software described in paragraphs (b)(1) and (b)(2) of this section to any destination.

(1) Personal effects. Usual and reasonable kinds and quantities for personal use of wearing apparel, articles of personal adornment, toilet articles, medicinal supplies, food, souvenirs, games, and similar personal effects, and their containers.

(2) Household effects. Usual and reasonable kinds and quantities for personal use of furniture, household effects, household furnishings, and their containers.

(3) Vehicles. Usual and reasonable kinds and quantities of vehicles, such as passenger cars, station wagons, trucks, trailers, motorcycles, bicycles, tricycles, perambulators, and their containers.

(4) Tools of trade. Usual and reasonable kinds and quantities of tools, instruments, or equipment and their containers and also technology for use in the trade, occupation, employment, vocation, or hobby of the traveler or members of the household who are traveling or moving. For special provisions regarding firearms and ammunition, see paragraph (e) of this section. For special provisions regarding encryption commodities and software subject to EI controls, see paragraph (f) of this section. For a special provision that specifies restrictions regarding the export or reexport of technology under this paragraph (b)(4), see paragraph (g) of this section. For special provisions regarding personal protective equipment under ECCN 1A613.c or .d, see paragraph (h) of this section.

(i) For purposes of this paragraph (b), U.S. person is defined as follows: an individual who is a citizen of the United States, an individual who is a lawful permanent resident as defined by 8

U.S.C. 1101(a)(2) or an individual who is a protected individual as defined by 8 U.S.C. 1324b(a)(3).

(ii) [RESERVED]

(c) Limits on eligibility

The export of any item is limited or prohibited, if the kind or quantity is in excess of the limits described in this section. In addition, the items must be:

- (1)** Owned by the individuals (or by members of their immediate families) or by crew members of exporting carriers on the dates they depart from the United States;
- (2)** Intended for and necessary and appropriate for the use of the individuals or members of their immediate families traveling with them, or by the crew members of exporting carriers;
- (3)** Not intended for sale or other disposal; and
- (4)** Not exported under a bill of lading as cargo if exported by crew members.

(d) Special provision: unaccompanied baggage

Individuals departing the United States may ship unaccompanied baggage, which is baggage sent from the United States on a carrier other than that on which an individual departs. Crew members of exporting carriers may not ship unaccompanied baggage. Unaccompanied shipments under this License Exception shall be clearly marked “BAGGAGE.” Shipments of unaccompanied baggage may be made at the time of, or within a reasonable time before or after departure of the consignee or owner from the United States. Personal baggage controlled for chemical and biological weapons (CB), missile technology (MT), national security (NS), encryption items (EI) or nuclear nonproliferation (NP) must be shipped within 3 months before or after the month in which the consignee or owner departs the United States. However, commodities

controlled for CB, MT, NS, EI or NP may not be exported under this License Exception as unaccompanied baggage to Country Groups D:1, D:2, D:3, D:4, or E:1. (See Supplement No. 1 of this part).

(e) Special provisions for firearms and ammunition.

(1) A United States citizen or a permanent resident alien leaving the United States may export or reexport shotguns with a barrel length of 18 inches or over and shotgun shells under this License Exception, subject to the following limitations:

(i) Not more than three shotguns may be taken on any one trip.

(ii) The shotguns and shotgun shells must be with the person's baggage but they may not be mailed.

(iii) The shotguns and shotgun shells must be for the person's exclusive use for legitimate hunting or lawful sporting purposes, scientific purposes, or personal protection, and not for resale or other transfer of ownership or control. Accordingly, except as provided in (e)(2) of this section, shotguns may not be exported permanently under this License Exception. All shotguns and unused shotgun shells must be returned to the United States. Note that since certain countries may require an Import Certificate or a U.S. export license before allowing the import of a shotgun, you should determine the import requirements of your country of destination in advance.

(2) A nonresident alien leaving the United States may export or reexport under this License Exception only such shotguns and shotgun shells as he or she brought into the United States under the provisions of the Department of Justice Regulations (27 CFR 478.115(d)).

(3) A United States citizen or a permanent resident alien leaving the United States may export under this License Exception firearms,

“parts,” “components,” “accessories,” or “attachments” controlled under ECCN 0A501 and ammunition controlled under ECCN 0A505.a, subject to the following limitations:

(i) Not more than three firearms and 1,000 rounds of ammunition may be taken on any one trip.

(ii) “Parts,” “components,” “accessories,” and “attachments” exported pursuant to this paragraph (e)(3) must be of a kind and limited to quantities that are reasonable for the activities described in paragraph (e)(3)(iv) of this section or that are necessary for routine maintenance of the firearms being exported.

(iii) The commodities must be with the person’s baggage.

(iv) The commodities must be for the person’s exclusive use and not for resale or other transfer of ownership or control. Accordingly, except as provided in paragraph (e)(4) of this section, firearms, “parts,” “components,” “accessories,” “attachments,” and ammunition, may not be exported permanently under this License Exception. All firearms, “parts,” “components,” “accessories,” or “attachments” controlled under ECCN 0A501 and all unused ammunition controlled under ECCN 0A505.a exported under this License Exception must be returned to the United States.

(v) Travelers leaving the United States temporarily are required to declare the firearms, “parts,” “components,” “accessories,” “attachments,” and ammunition being exported under this License Exception to a Customs and Border Protection (CBP) officer prior to departure from the United States and present such items to the CBP officer for inspection, confirming that the authority for the export is License Exception BAG and that the exporter is compliant with its terms.

(4) A nonimmigrant alien leaving the United States may export or reexport under this License Exception only such firearms controlled under

ECCN 0A501 and ammunition controlled under ECCN 0A505 as he or she brought into the United States under the relevant provisions of Department of Justice regulations at 27 CFR part 478.

(f) Special provisions: encryption commodities and software subject to EI controls on the Commerce Control List

(1) A U.S. citizen or permanent resident alien of the United States as defined by 8 U.S.C. 1101(a)(20) may use this license exception to export or reexport encryption commodities and software to any destination not in Country Group E:1 of Supplement No. 1 of this part.

(2) A person other than a U.S. citizen or permanent resident alien of the United States as defined by 8 U.S.C. 1101(a)(20) (except a national of a country listed in Country Group E:1 of Supplement No. 1 of this part who is not a U.S. citizen or permanent resident alien of the United States) may also use this license exception to export or reexport encryption commodities and software to any destination not in Country Group E:1 of Supplement No. 1 of this part.

(g) Special provision: restrictions for Export or Reexport of Technology.

This authorization for the export or reexport of technology under the tools of trade provisions of paragraph (b)(4) of this section may be used only if:

(1) The technology is to be used overseas solely by individuals or members of their immediate families traveling with them provided they are U.S. persons as defined in paragraph (b)(4)(i).

(2) The exporting or reexporting party and the recipient take adequate security precautions to protect against unauthorized access to the technology while the technology is being transmitted and used overseas. Examples of security precautions to help prevent unauthorized access include the following:

(i) Use of secure connections, such as Virtual Private Network connections when accessing IT networks for e-mail and other business activities that involve the transmission and use of the technology authorized under this license exception;

(ii) Use of password systems on electronic devices that will store the technology authorized under this license exception; and

(iii) Use of personal firewalls on electronic devices that will store the technology authorized under this license exception.

(3) The technology authorized under these provisions may not be used for foreign production purposes or for technical assistance unless authorized by BIS;

(4) Any encryption item controlled under ECCN 5E002 is not exported or reexported to any destination listed in Country Group E:1 of Supplement No. 1 of this part.

(h) *Special provisions: personal protective “equipment” classified under ECCN 1A613.c or .d and individual protection “equipment” classified under ECCN 1A607.f.*

(1) *Exports, reexports, or in-country transfers to countries not identified in Country Group D:5.* U.S. persons may export, reexport, or transfer (in-country) one set of body armor classified under ECCN 1A613.d (which may include one helmet classified under ECCN 1A613.c) or one set of chemical or biological agent protective gear classified under ECCN 1A607.f (which may include one additional filter canister classified under ECCN 1A607.x) to countries not identified in Country Group D:5, provided that:

(i) The items are with the U.S. person’s baggage or effects, whether accompanied or unaccompanied (but not mailed); and

(ii) The items are for that person’s exclusive use and not for transfer of ownership unless

reexported or transferred (in-country) to another U.S. person.

(2) *Exports, reexports, or in-country transfers to countries identified in Country Group D:5.*

(i) *Iraq.* U.S. persons may export, reexport, or transfer (in-country) one set of body armor classified under ECCN 1A613.d (which may include one helmet classified under ECCN 1A613.c) or one set of chemical or biological agent protective gear classified under ECCN 1A607.f (which may include one additional filter canister classified under ECCN 1A607.x) to Iraq, for personal use, provided that the requirements in paragraph (h)(1) of this section are met. In addition, the U.S. person must be affiliated with the U.S. Government and traveling on official business or traveling in support of a U.S. Government contract, or the U.S. person must be traveling to Iraq under a direct authorization by the Government of Iraq and engaging in activities for, on behalf of, or at the request of, the Government of Iraq. Documentation regarding direct authorization from the Government of Iraq shall include an English translation.

(ii) *Other countries in Country Group D:5.* U.S. persons may export, reexport, or transfer (in-country) one set of body armor classified under ECCN 1A613.d (which may include one helmet classified under ECCN 1A613.c) or one set of chemical or biological agent protective gear classified under ECCN 1A607.f (which may include one additional filter canister classified under ECCN 1A607.x) to countries in Country Group D:5 (except Iraq), for personal use, provided that the requirements in paragraph (h)(1) of this section are met, and the U.S. person is affiliated with the U.S. Government traveling on official business or is traveling in support of a U.S. Government contract.

Note to paragraph (h): Body armor controlled under ECCN 1A005 is eligible for this License Exception under paragraph (b) of this section.

§ 740.15 AIRCRAFT, VESSELS AND SPACECRAFT (AVS)

This License Exception authorizes departure from the United States of foreign registry civil aircraft on temporary sojourn in the United States and of U.S. civil aircraft for temporary sojourn abroad; the export of equipment and spare parts for permanent use on a vessel or aircraft; exports to vessels or planes of U.S. or Canadian registry and U.S. or Canadian Airlines' installations or agents; the export or reexport of cargo that will transit Cuba on an aircraft or vessel on temporary sojourn; and the export of spacecraft and components for fundamental research. Generally, no License Exception symbol is necessary for export clearance purposes; however, when necessary, the symbol "AVS" may be used.

(a) Aircraft on temporary sojourn

(1) Foreign registered aircraft. An operating civil aircraft of foreign registry that has been in the United States on a temporary sojourn may depart from the United States under its own power for any destination, provided that:

(i) No sale or transfer of operational control of the aircraft to a national of a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part) has occurred while in the United States;

(ii) The aircraft is not departing for the purpose of sale or transfer of operational control to a national of a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part); and

(iii) It does not carry from the United States any item for which an export license is required and has not been granted by the U.S. Government.

(2) U.S. registered aircraft.

(i) A civil aircraft of U.S. registry operating under an Air Carrier Operating Certificate, Commercial Operating Certificate, or Air Taxi Operating Certificate issued by the Federal

Aviation Administration (FAA) or conducting flights under operating specifications approved by the FAA pursuant to 14 CFR part 129, or an air ambulance of U.S. registry operating under 14 CFR part 135, may depart from the United States under its own power for any destination, provided that:

(A) The aircraft does not depart for the purpose of sale, lease or other disposition of operational control of the aircraft, or its equipment, parts, accessories, or components to a foreign country or any national thereof;

(B) The aircraft's U.S. registration will not be changed while abroad;

(C) The aircraft is not to be used in any foreign military activity while abroad; and

(D) The aircraft does not carry from the United States any item for which a license is required and has not been granted by the U.S. Government.

(ii) Any other operating civil aircraft of U.S. registry may depart from the United States under its own power for any destination, except to or a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part) (flights to these destinations require a license), provided that:

(A) The aircraft does not depart for the purpose of sale, lease or other disposition of operational control of the aircraft, or its equipment, parts, accessories, or components to a foreign country or any national thereof;

(B) The aircraft's U.S. registration will not be changed while abroad;

(C) The aircraft is not to be used in any foreign military activity while abroad;

(D) The aircraft does not carry from the United States any item for which an export license is required and has not been granted by the U.S. Government; and

(E) The aircraft will be operated while abroad by a U.S. licensed pilot, except that during domestic flights within a foreign country, the aircraft may be operated by a pilot currently licensed by that foreign country.

(3) **Criteria.** The following ten criteria each must be met if the flight is to qualify as a temporary sojourn. To be considered a temporary sojourn, the flight must not be for the purpose of sale or transfer of operational control. An export is for the transfer of operational control unless the exporter retains each of the following indicia of control:

(i) **Hiring of cockpit crew.** Right to hire and fire the cockpit crew.

(ii) **Dispatch of aircraft.** Right to dispatch the aircraft.

(iii) **Selection of routes.** Right to determine the aircraft's routes (except for contractual commitments entered into by the exporter for specifically designated routes).

(iv) **Place of maintenance.** Right to perform or obtain the principal maintenance on the aircraft, which principal maintenance is conducted outside a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part), under the control of a party who is not a national of any of these countries. (The minimum necessary in-transit maintenance may be performed in any country).

(v) **Location of spares.** Spares are not located in a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part).

(vi) **Place of registration.** The place of registration is not changed to a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part).

(vii) **No transfer of technology.** No technology is transferred to a national of a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part), except the

minimum necessary for in-transit maintenance to perform flight line servicing required to depart safely.

(viii) **Color and logos.** The aircraft does not bear the livery, colors, or logos of a national of a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part).

(ix) **Flight number.** The aircraft does not fly under a flight number issued to a national of a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part) as such number appears in the Official Airline Guide.

(x) **Lease or charter.** The aircraft is not leased to or chartered by a national of a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part).

(4) **Reexports.** Civil aircraft legally exported from the United States may be reexported under this section, provided the restrictions described in this paragraph (a) are met.

Note to paragraph (a). An aircraft exported or reexported to a country pursuant to this paragraph (a) may not remain in that country for more than seven consecutive days before it departs for a country to which it may be exported without a license or the United States.

(b) Equipment and spare parts for permanent use on a vessel or aircraft, and ship and plane stores

(1) **Vessel.** Equipment and spare parts for permanent use on a vessel, when necessary for the proper operation of such vessel, may be exported or reexported for use on board a vessel of any registry, except a vessel registered in Country Group D:1 (see Supplement No. 1 to part 740), Cuba, or owned or controlled by, or under charter or lease to any of these countries or their nationals. In addition, other equipment and services for necessary repair to fishing and fishery support vessels of Country Group D:1 may be exported for use on board such vessels

when admitted into the United States under governing international fishery agreements.

(2) Aircraft. Equipment and spare parts for permanent use on an aircraft, when necessary for the proper operation of such aircraft, may be exported or reexported for use on board an aircraft of any registry, except an aircraft registered in, owned or controlled by, or under charter or lease to a country included in Country Group D:1, Cuba, or a national of any of these countries.

(3) Ship and plane stores. Usual and reasonable kinds and quantities of the following commodities may be exported for use or consumption on board an aircraft or vessel of any registry during the outgoing and immediate return flight or voyage.

(i) Deck, engine, and steward department stores, provisions, and supplies for both port and voyage requirements;

(ii) Medical and surgical supplies;

(iii) Food stores;

(iv) Slop chest articles;

(v) Saloon stores or supplies.

(4) Cuba. Only items designated as EAR99 or controlled on the Commerce Control List (CCL) (Supplement No. 1 to part 774 of the EAR) only for anti-terrorism reasons (*i.e.*, anti-terrorism must be the only reason for control that applies to the item as set forth in the Export Control Classification Number (ECCN) that controls the item) are eligible for export or reexport to Cuba pursuant to this paragraph (b).

(c) Shipments to U.S. or Canadian vessels, planes and airline installations or agents

³ Where a license is required, see §§ 748.1, 748.4 and 748.6 of the EAR.

(1) Exports to vessels or planes of U.S. or Canadian registry. Export may be made of the commodities set forth in paragraph (c)(3) of this section, for use by or on a specific vessel or plane of U.S. or Canadian registry located at any seaport or airport outside the United States or Canada except a port in Cuba or Country Group D:1 (excluding the PRC), (see Supplement No. 1 to part 740) provided that such commodities are all of the following:³

(i) Ordered by the person in command or the owner or agent of the vessel or plane to which they are consigned;

(ii) Intended to be used or consumed on board such vessel or plane and necessary for its proper operation;

(iii) In usual and reasonable kinds and quantities during times of extreme need; and

(iv) Shipped as cargo for which Electronic Export Information (EEI) is filed to the Automated Export System (AES) in accordance with the requirements of the Foreign Trade Regulations (FTR) (15 CFR Part 30), except EEI is not required to be filed when any of the commodities, other than fuel, is exported by U.S. airlines to their own aircraft abroad for their own use, see 15 CFR 30.37(o) of the FTR.

(2) Exports to U.S. or Canadian airline's installation or agent. Exports of the commodities set forth in paragraph (c)(3) of this section, except fuel, may be made to a U.S. or Canadian airline's⁴ installation or agent in any foreign destination except Cuba or Country Group D:1 (excluding the PRC), (see Supplement No. 1 to part 740) provided such commodities are all of the following:

(i) Ordered by a U.S. or Canadian airline and consigned to its own installation or agent abroad;

⁴ See Part 772 of the EAR for definitions of United States and Canadian airlines.

(ii) Intended for maintenance, repair, or operation of aircraft registered in either the United States or Canada, and necessary for the aircraft's proper operation, except where such aircraft is located in, or owned, operated or controlled by, or leased or chartered to, Cuba or Country Group D:1 (excluding the PRC) (see Supplement No. 1 to part 740) or a national of such country;

(iii) In usual and reasonable kinds and quantities; and

(iv) Shipped as cargo for which Electronic Export Information (EEI) is filed to the Automated Export System (AES) in accordance with the requirements of the Foreign Trade Regulations (FTR) (15 CFR Part 30), except EEI is not required to be filed when any of these commodities is exported by U.S. airlines to their own installations and agents abroad for use in their aircraft operations, see 15 CFR 30.37(o) of the FTR.

(3) Applicable commodities. This paragraph (c) applies to the following commodities, subject to the provisions in paragraph (c)(1) and (c)(2) of this section:

(i) Deck, engine, and steward department stores, provisions, and supplies for both port and voyage requirements;

(ii) Medical and surgical supplies;

(iii) Food stores;

(iv) Slop chest articles;

(v) Saloon stores or supplies; and

(vi) Equipment and spare parts.

(d) Vessels on temporary sojourn

(1) Foreign flagged vessels. A foreign flagged vessel in the United States may depart

from the United States under its own power for any destination, provided that:

(i) No sale or transfer of operational control of the vessel to a national of a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part) has occurred while in the United States;

(ii) The vessel is not departing for the purpose of sale or transfer of operational control to a national of a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part); and

(iii) The vessel does not carry from the United States any item for which a license is required and has not been granted by the U.S. Government.

(2) U.S. flagged vessels. A U.S. flagged vessel may depart from the United States under its own power for any destination, provided that:

(i) The vessel does not depart for the purpose of sale, lease, or transfer of operational control of the vessel, or its equipment, parts, accessories, or components, to a foreign country or any national thereof;

(ii) The vessel's U.S. flag will not be changed while abroad;

(iii) The vessel will not be used in any foreign military activity while abroad;

(iv) The vessel will not carry from the United States any item for which a license is required and has not been granted by the U.S. Government;

(v) Spares for the vessel are not located in a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part);

(vi) Technology is not transferred to a national of a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part), except the minimum necessary in-transit maintenance to perform servicing required to depart and enter a port safely; and

(vii) The vessel does not bear the livery, colors, or logos of a national of a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part).

(3) Criteria for temporary sojourn of vessels.

The following criteria must be met if a voyage is to be considered a temporary sojourn under this paragraph (d). To be considered a temporary sojourn, the voyage must not be for the purpose of sale or transfer of operational control. A transfer of operational control occurs unless the exporter or reexporter retains each of the following indicia of control:

(i) **Hiring of crew.** Right to hire and fire the crew.

(ii) **Dispatch of vessel.** Right to dispatch the vessel.

(iii) **Selection of routes.** Right to determine the vessel's routes (except for contractual commitments entered into by the exporter for specifically designated routes).

(iv) **Place of maintenance.** Right to perform or obtain the principal maintenance on the vessel, which principal maintenance is conducted outside a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part), under the control of a party who is not a national of any of these countries. (The minimum necessary in-transit maintenance may be performed in any country).

(v) **Lease or charter.** The vessel is not leased to or chartered by a national of a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part).

(4) Reexports. Vessels subject to the EAR may be reexported under this section on temporary sojourn, provided that:

(i) The vessel does not depart for the purpose of sale, lease, or transfer of operational control of the vessel, or its equipment, parts, accessories, or

components, to a foreign country or any national thereof;

(ii) The vessel's flag will not be changed while abroad;

(iii) The vessel will not be used in any foreign military activity while abroad;

(iv) The vessel will not carry any item for which a license is required and has not been granted by the U.S. Government;

(v) Spares for the vessel are not located in a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part);

(vi) Technology is not transferred to a national of a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part), except the minimum necessary in-transit maintenance to perform servicing required to depart and enter a port safely; and

(vii) The vessel does not bear the livery, colors, or logos of a national of a destination in Country Group E:1 or E:2 (see supplement no. 1 to this part).

(5) No vessels may be exported or reexported under this License Exception to a country in Country Group E:1.

(6) Cuba, eligible vessels and purposes. For Cuba, only cargo vessels for hire for use in the transportation of items are eligible for this paragraph (d).

Note 1 to paragraph (d). *A vessel exported or reexported to a country pursuant to this paragraph (d) may not remain in that country for more than 14 consecutive days before it departs for a country to which it may be exported without a license or the United States.*

(e) Intransit cargo

Cargo laden on board an aircraft or vessel may

transit Cuba provided:

(1) The aircraft or vessel is exported or reexported on temporary sojourn to Cuba pursuant to paragraph (a) or (d) of this section or a license from BIS; and

(2) The cargo departs with the aircraft or vessel at the end of its temporary sojourn to Cuba, is not removed from the aircraft or vessel for use in Cuba and is not transferred to another aircraft or vessel while in Cuba.

(f) Spacecraft for launch

This paragraph (e) authorizes the export by accredited U.S. institutions of higher learning of commodities subject to the EAR fabricated only for fundamental research purposes when all of the following conditions are met:

(1) The export is to an accredited institution of higher learning, a governmental research center, or an established government funded private research center located in a country other than Country Group D:5 (see Supp. No. 1 to this part) and involves exclusively nationals of such countries;

(2) All the information about the commodity, including its design, and all of the resulting information obtained through fundamental research involving the commodity will be published and shared broadly within the scientific community, and is not restricted for proprietary reasons or specific U.S. government access and dissemination controls or other restrictions accepted by the institution or its researchers on publication of scientific and technical information resulting from the project or activity (see §734.11 of the EAR); and

(3) If the commodity is for permanent export, the platform or system into which the commodity will be incorporated must be a scientific, research, or experimental satellite and must be exclusively concerned with fundamental research and may only be launched into space from

countries and by nationals of countries not identified in Country Group D:5.

§ 740.16 ADDITIONAL PERMISSIVE REEXPORTS (APR)

This License Exception allows the following reexports:

(a) Reexports from Country Group A:1

Reexports may be made from countries in Country Group A:1 provided that:

(1) The reexport is made in accordance with the conditions of an export authorization from the government of the reexporting country;

(2) The commodities being reexported are not controlled for NP, CB, MT, SI, or CC reasons or described in ECCNs 0A919, 3A001.b.2 or b.3 (except those that are being reexported for use in civil telecommunications applications), 6A002, 6A003; or commodities classified under a 0x5zz ECCN; and

(3) The reexport is destined to *either*:

(i) A country in Country Group B that is not also included in Country Group D:2, D:3, or D:4; and the commodity being reexported is both controlled for national security reasons and not controlled for export to Country Group A:1; or

(ii) A country in Country Group D:1 (National Security) (see Supplement No. 1 to part 740), other than North Korea and the commodity being reexported is controlled for national security reasons.

(b) Reexports to and among specified countries.

(1) Eligible commodities may be reexported to and among destinations in Country Group A:1 for use or consumption within a destination in Country Group A:1 (see Supplement No. 1 to part

740) , or for reexport from such country in accordance with other provisions of the EAR.

(2) Commodities not eligible for reexport under paragraph (b)(1) are:

(i) Commodities controlled for nuclear nonproliferation or missile technology reasons;

(ii) Commodities in 3A001.b.2 or b.3 (except those that are being reexported for use in civil telecommunications applications);

(iii) “Military commodities” described in ECCN 0A919;

(iv) Commodities described in ECCN 0A504 that incorporate an image intensifier tube;

(v) Commodities described in ECCN 6A002; or

(vi) Commodities classified under a 0x5zz ECCN.

(3) Cameras described in ECCNs 6A003 may be exported or reexported to and among countries in Country Group A:1 (see Supplement No. 1 to this part) if:

(i) Such cameras are fully packaged for use as consumer ready civil products; or

(ii) Such cameras with not more than 111,000 elements are to be embedded in civil products.

(c) Reexports to a destination to which direct shipment from the United States is authorized under an unused outstanding license may be made under the terms of that license. Such reexports shall be recorded in the same manner as exports are recorded, regardless of whether the license is partially or wholly used for reexport purposes. (See part 762 of the EAR for recordkeeping requirements.)

(d) Reexports of any item from Canada that, at the time of reexport, may be exported directly from the United States to the new country of destination under any License Exception.

(e) Reexports (return) to the United States of any item. If the reexporting party requests written authorization because the government of the country from which the reexport will take place requires formal U.S. Government approval, such authorization will generally be given.

(f) Reexports from a foreign destination to Canada of any item if the item could be exported to Canada without a license.

(g) [RESERVED]

(h) Shipments of foreign-made products that incorporate U.S.-origin components may be accompanied by U.S.-origin controlled spare parts, provided that they do not exceed 10 percent of the value of the foreign-made product, subject to the restrictions in §734.4 of the EAR.

(i) [Reserved]

(j) Reexports of items controlled by NP Column 1 (see Supplement No. 1 to part 774 of the EAR) to, among, and from countries described in Country Group A:4 (see Supplement No. 1 to part 740), except:

(1) Reexports from countries that are not identified in Country Group A:1 of items that are controlled for NS reasons to destinations in Country Group D:1; and

(2) Reexports to destinations in Country Group E:2 and Country Group D:2.

§ 740.17 ENCRYPTION COMMODITIES, SOFTWARE AND TECHNOLOGY (ENC)

License Exception ENC authorizes export, reexport, and transfer (in-country) of systems, equipment, commodities, and components therefor that are classified under ECCNs 5A002, 5B002, equivalent or related software and technology therefor classified under 5D002 or 5E002, and “cryptanalytic items” classified under

ECCNs 5A004, 5D002 or 5E002. This License Exception ENC does not authorize export or reexport to, transfer (in-country) in, or provision of any service in any country listed in Country Groups E:1 or E:2 in Supplement No. 1 to part 740 of the EAR, or release of source code or technology to any national of a country listed in Country Groups E:1 or E:2. Reexports and transfers (in-country) under License Exception ENC are subject to the criteria set forth in paragraph (c) of this section. Paragraphs (b) and (d) of this section set forth information about classifications required by this section. Items described in paragraphs (b)(1) and (b)(3)(i), (b)(3)(ii) or (b)(3)(iv) of this section that meet the criteria set forth in Note 3 to Category 5 - Part 2 of the Commerce Control List (the “mass market” note) are classified under ECCN 5A992.c or 5D992.c following self-classification or classification by BIS and are no longer subject to “EI” and “NS” controls. Paragraph (e) sets forth reporting required by this section. For items exported under paragraphs (b)(1), (b)(3)(i), (b)(3)(ii) or (b)(3)(iv) of this section and therefore excluded from paragraph (e) reporting requirements, exporters are reminded of the recordkeeping requirements in part 762 of the EAR and that they may be required to make such records available upon request. All classification requests, and reports submitted to BIS pursuant to this section for encryption items will be reviewed by the ENC Encryption Request Coordinator, Ft. Meade, MD.

(a) No classification request or reporting required

License Exception ENC authorizes the export, reexport, or transfer (in-country) to the end users and for the end uses set forth in paragraphs (a)(1), (a)(2), and (a)(3) of this section, without submission of a classification request, self-classification report or sales report to BIS.

(1) Certain exports, reexports, transfers (in-country) to ‘private sector end users.’

(i) Internal “development” or “production” of new products. License Exception ENC

authorizes certain exports, reexports, and transfers (in-country) of items described in paragraph (a) of this section for the internal “development” or “production” of new products by ‘private sector end users,’ wherever located, that are headquartered in a country listed in Supplement No. 3 of this part.

(ii) Certain exports, reexports, transfers (in-country) to related parties, not involving “development” or “production” of new products. For internal end uses among ‘private sector end users’ other than the “development” or “production” of new products, License Exception ENC authorizes exports, reexports, and transfers (in-country) of non-U.S.-origin items, described in paragraph (a) of this section, to ‘private sector end users’ wherever located provided that:

(A) That item became subject to the EAR after it was produced;

(B) All parties to the transaction are subsidiaries of the same parent company headquartered in a country listed in Supplement No. 3 of this part; and

(C) The characteristics or capabilities of the existing item are not enhanced, unless otherwise authorized by license or license exception.

Note to paragraph (a)(1): A ‘private sector end user’ is either: An individual who is not acting on behalf of any foreign government; or a commercial firm (including its subsidiary and parent firms, and other subsidiaries of the same parent) that is not wholly owned by, otherwise controlled by or acting on behalf of, any foreign government.

(2) Exports, reexports, transfers (in-country) to “U.S. Subsidiaries.” License Exception ENC authorizes export, reexport, and transfer (in-country) of items described in paragraph (a) of this section to any “U.S. subsidiary,” wherever located. License Exception ENC also authorizes export, reexport, transfer (in-country) of such items by a U.S. company and its subsidiaries to foreign nationals who are employees, individual

contractors or interns of a U.S. company or its subsidiaries if the items are for internal company use, including the “development” or “production” of new products, without prior review by the U.S. Government.

Note to paragraph (a)(1) and (a)(2): All items produced or developed with items exported, reexported, or transferred (in-country) under paragraphs (a)(1) or (a)(2) of this section are subject to the EAR. These items may require the submission of a classification request before sale, reexport or transfer to non-“U.S. subsidiaries,” unless otherwise authorized by license or license exception.

(3) Reexports and transfers (in-country) of non-U.S. products developed with or incorporating U.S.-origin encryption source code, components, or toolkits. License Exception ENC authorizes the reexport and transfer (in-country) of non-U.S. products developed with or incorporating U.S.-origin encryption source code, components or toolkits that are subject to the EAR, provided that the U.S.-origin encryption items have previously been classified or reported and authorized by BIS and the cryptographic functionality has not been changed. Such products include non-U.S. developed products that are designed to operate with U.S. products through a cryptographic interface.

Note to paragraph (a)(3): This exception from classification and reporting requirements does not apply to non-U.S.-origin products exported from the United States.

(b) Classification request or self-classification

For certain products described in paragraph (b)(1) of this section that are self-classified, a self-classification report in accordance with paragraph (e)(3) of this section is required from specified exporters, reexporters and transferors; for products described in paragraph (b)(1) of this section that are classified by BIS via a CCATS, a self-classification report is not required. For

products described in paragraphs (b)(2) and (b)(3) of this section, a thirty-day (30-day) classification request is required in accordance with paragraph (d) of this section. An exporter, reexporter, or transferor may rely on the producer’s self-classification (for products described in (b)(1), only) or CCATS for an encryption item eligible for export or reexport under License Exception ENC under paragraph (b)(1), (b)(2), or (b)(3) of this section. Exporters are still required to comply with semi-annual sales reporting requirements under paragraph (e)(1) or (2) of this section, even if relying on a CCATS issued to a producer for specified encryption items described in paragraphs (b)(2) and (b)(3)(iii) of this section.

Note to paragraph (b) introductory text: Mass market encryption software that would be considered publicly available under §734.3(b)(3) of the EAR, and is authorized for export under this paragraph (b), remains subject to the EAR until all applicable classification or self-classification requirements set forth in this section are fulfilled.

(1) Immediate authorization. This paragraph (b)(1) authorizes the exports, reexports, and transfers (in-country) of the associated commodities self-classified under ECCNs 5A002.a or 5B002, and equivalent or related software therefor classified under 5D002, except any such commodities, software, or components described in (b)(2) or (b)(3) of this section, subject to submission of a self-classification report in accordance with § 740.17(e)(3) of the EAR. Items described in this paragraph (b)(1) that meet the criteria set forth in Note 3 to Category 5 - Part 2 of the Commerce Control List (the “mass market” note) are classified as ECCN 5A992.c or 5D992.c following self-classification or classification by BIS and are removed from “EI” and “NS” controls.

(2) Classification request required. Thirty (30) days after the submission of a classification request with BIS in accordance with paragraph (d) of this section and subject to the reporting requirements in paragraph (e) of this section, this

paragraph under License Exception ENC authorizes certain exports, reexports, and transfers (in-country) of the items specified in paragraph (b)(2) and submitted for classification.

Note to introductory text of paragraph (b)(2): *Immediately after the classification request is submitted to BIS in accordance with paragraph (d) of this section and subject to the reporting requirements in paragraph (e) of this section, this paragraph also authorizes exports, reexports, and transfers (in-country) of:*

1. *All submitted encryption items described in this paragraph (b)(2), except “cryptanalytic items,” to any end user located or headquartered in a country listed in Supplement No. 3 to this part;*

2. *Encryption source code as described in paragraph (b)(2)(i)(B) to non-“government end users” in any country;*

3. *“Cryptanalytic items” to non-“government end users,” only, located or headquartered in a country listed in Supplement No. 3 to this part; and*

4. *Items described in paragraphs (b)(2)(iii) and (b)(2)(iv)(A) of this section, to specified destinations and end users.*

(i) Cryptographic commodities, software, and components. License Exception ENC authorizes exports, reexports, and transfers (in-country) of the items in paragraph (b)(2)(i)(A) of this section to “less sensitive government end users” and non- “government end users” located or headquartered in a country not listed in Supplement No. 3 to this part, and the items in paragraphs (B) – (H) to non “government end users” located or headquartered in a country not listed in Supplement No. 3.

(A) ‘Network Infrastructure.’ ‘Network infrastructure’ commodities and software, and components therefor, meeting any of the following with key lengths exceeding 80-bits for symmetric algorithms:

(J) WAN, MAN, VPN, backhaul and long-haul. Aggregate encrypted WAN, MAN, VPN, backhaul or long-haul throughput (including communications through wireless network elements such as gateways, mobile switches, and controllers) equal to or greater than 250 Mbps;

(2) [Reserved]

(3) Satellite infrastructure. Transmission over satellite at data rates exceeding 10 Mbps;

(4) Media gateways and other unified communications (UC) infrastructure, including Voice-over-Internet Protocol (VoIP) services. Media (voice/video/data) encryption or encrypted signaling to more than 2,500 endpoints, including centralized key management therefor; *or*

(5) Terrestrial wireless infrastructure. Air interface coverage (e.g., through base stations, access points to mesh networks, and bridges) exceeding 1,000 meters, where any of the following applies:

(i) Maximum transmission data rates exceeding 10 Mbps (at operating ranges beyond 1,000 meters); *or*

(ii) Maximum number of concurrent full-duplex voice channels exceeding 30;

Notes to paragraph (b)(2)(i)(A):

1. *The License Exception ENC eligibility restrictions of paragraphs (b)(2)(i)(A)(3) (satellite infrastructure) and (b)(2)(i)(A)(5) (terrestrial wireless infrastructure) do not apply to satellite terminals or modems meeting all of the following:*

a. The encryption of data over satellite is exclusively from the user terminal to the gateway earth station, and limited to the air interface; and

b. The items meet the requirements of the Cryptography Note (Note 3) in Category 5 - Part 2 of the Commerce Control List.

2. ‘Network infrastructure’ (as applied to encryption items). A ‘network infrastructure’ commodity or software is any “end item,” commodity or “software” for providing one or more of the following types of communications:”

- (a) Wide Area Network (WAN);*
- (b) Metropolitan Area Network (MAN);*
- (c) Virtual Private Network (VPN);*
- (d) Satellite;*
- (e) Digital packet telephony/media (voice, video, data) over Internet protocol;*
- (f) Cellular; or*
- (g) Trunked.*

Note 1 to paragraph 2: *‘Network infrastructure’ end items are typically operated by, or for, one or more of the following types of end users:*

- (1) Medium- or large- sized businesses or enterprises;*
- (2) Governments;*
- (3) Telecommunications service providers; or*
- (4) Internet service providers.*

Note 2 to paragraph 2: *Commodities, software, and components for the “cryptographic activation” of a ‘network infrastructure’ item are also considered ‘network infrastructure’ items.*

(B) Certain “encryption source code.” “Encryption source code” that is not publicly available as that term is used in § 742.15(b) of the EAR;

(C) Customized items. Encryption software, commodities and components therefor, where any of the following applies:

(1) Customized for government end users or end uses. The item has been designed, modified, adapted, or customized for “government end user(s);” or

(2) Custom or changeable cryptography. The cryptographic functionality of the item has been designed or modified to customer specification or can be easily changed by the user;

(D) Quantum cryptography. ECCN 5A002.c or 5D002 “quantum cryptography” commodities or software;

(E) [Reserved]

(F) Network penetration tools. Encryption commodities and software that provide penetration capabilities that are capable of attacking, denying, disrupting or otherwise impairing the use of cyber infrastructure or networks;

(G) Public safety / first responder radio (private mobile radio (PMR)). Public safety / first responder radio (e.g., implementing Terrestrial Trunked Radio (TETRA) and/or Association of Public-Safety Communications Officials International (APCO) Project 25 (P25) standards);

(H) Specified cryptographic ultra-wideband and “spread spectrum” items. Encryption commodities and components therefor, classified under ECCNs 5A002.d or .e, and equivalent or related software therefor classified under ECCN 5D002.

(ii) Cryptanalytic commodities and software. “Cryptanalytic items” classified in ECCN 5A004 or 5D002 to non- “government end users” located or headquartered in countries not listed in Supplement No. 3 to this part.

(iii) “Open cryptographic interface” items. Items that provide an “open cryptographic interface,” to any end user located or headquartered in a country listed in Supplement No. 3 to this part.

(iv) Specific encryption technology. Specific encryption technology as follows:

(A) Technology for “non-standard cryptography.” Encryption technology classified under ECCN 5E002 for “non-standard cryptography,” to any end user located or headquartered in a country listed in Supplement No. 3 to this part;

(B) Other technology. Encryption technology classified under ECCN 5E002 except technology for “cryptanalytic items,” “non-standard cryptography” or any “open cryptographic interface,” to any non-“government end user” located in a country not listed in Country Group D:1, E:1, or E:2 of Supplement No. 1 to part 740 of the EAR.

Note to paragraph (b)(2): *Commodities, components, and software classified under ECCNs 5A002.b or 5D002.b, for the “cryptographic activation” of commodities or software specified by paragraph (b)(2) of this section are also controlled under paragraph (b)(2) of this section.*

(3) Classification request required for specified commodities, software, and components. Thirty (30) days after a classification request is submitted to BIS in accordance with paragraph (d) of this section and subject to the reporting requirements in paragraph (e) of this section, this paragraph authorizes exports, reexports, and transfers (in-country) of the items submitted for classification, as further described in this paragraph (b)(3), to any end user, provided the item does not perform the functions, or otherwise meet the specifications, of any item described in paragraph (b)(2) of this section. Items described in paragraph (b)(3)(ii) or (iv) of this section that meet the criteria set forth in Note 3 to Category 5 - Part 2 of the CCL (the

“mass market” note) are classified under ECCN 5A992.c or 5D992.c following classification by BIS.

Note to introductory text of paragraph (b)(3): *Immediately after the classification request is submitted to BIS in accordance with paragraph (d) of this section and subject to the reporting requirements in paragraph (e) of this section, this paragraph also authorizes exports, reexports, transfers (in-country) of the items described in this paragraph (b)(3) to any end user located or headquartered in a country listed in Supplement No. 3 to this part.*

(i) Non-“mass market” “components,” toolsets, and toolkits. Specified components classified under ECCN 5A002.a and equivalent or related software classified under ECCN 5D002 that do not meet the criteria set forth in Note 3 to Category 5 - Part 2 of the CCL (the “mass market” note) and are not described by paragraph (b)(2) or (b)(3)(ii) of this section, as follows:

(A) Chips, chipsets, electronic assemblies and field programmable logic devices;

(B) Cryptographic libraries, modules, development kits and toolkits, including for operating systems and cryptographic service providers (CSPs).

(ii) “Non-standard cryptography” (by items not otherwise described in paragraph (b)(2) of this section.) Encryption commodities, software and components not described by paragraph (b)(2) of this section, that provide or perform “non-standard cryptography” as defined in part 772 of the EAR.

(iii) Advanced network vulnerability analysis and digital forensics. Encryption commodities and software not described by paragraph (b)(2) of this section, that provide or perform vulnerability analysis, network forensics, or computer forensics functions characterized by any of the following:

(A) Automated network vulnerability analysis and response. Automated network analysis, visualization, or packet inspection for profiling network flow, network user or client behavior, or network structure/topology and adapting in real-time to the operating environment; *or*

(B) Digital forensics and investigative tools. Items specified in ECCN 5A004.b, 5D002.a.3.b, or 5D002.c.3.b, see supplement no. 1 to part 774 Commerce Control List.

(iv) “Cryptographic activation” commodities, components, and software. Commodities, components, and software classified under ECCNs 5A002.b or 5D002.b where the product or cryptographic functionality is not otherwise described in paragraphs (b)(2) or (b)(3)(i) of this section.

(c) Reexport and transfer (in-country)

Distributors, resellers or other entities who are not original manufacturers of encryption commodities and software are permitted to use License Exception ENC only in instances where the reexport or transfer (in-country) meets the applicable terms and conditions of this section. Transfers of encryption items listed in paragraph (b)(2) of this section to “government end users,” or for government end uses, within the same country are prohibited, unless otherwise authorized by license or license exception.

(d) Classification request procedures

(1) Submission requirements and instructions. To submit a classification request to BIS, you must submit an application to BIS in accordance with the procedures described in §§ 748.1 and 748.3 of the EAR and the instructions in paragraph (r) of Supplement No. 2 to part 748 “Unique Application and Submission Requirements,” along with other required information as follows:

(i) [Reserved]

(ii) Technical information submission requirements. For all submissions of encryption classification requests for items described under paragraph (b)(2) or (b)(3) of this section, you must submit the applicable information described in paragraphs (a) through (d) of Supplement No. 6 to part 742 of the EAR (Technical Questionnaire for Encryption Items). For items eligible for self-classification that are submitted to BIS for classification you may be required to provide BIS this Supplement No. 6 to part 742 information on an as-needed basis, upon request by BIS.

(iii) Changes in encryption functionality following a previous classification. A new product encryption classification request (under paragraphs (b)(2) or (b)(3) of this section) is required if a change is made to the cryptographic functionality (e.g., algorithms) or other technical characteristics affecting License Exception ENC eligibility (e.g., encrypted throughput) of the originally classified product. However, a new product classification request is not required when a change involves: the subsequent bundling, patches, upgrades or releases of a product; name changes; or changes to a previously reviewed encryption product where the change is limited to updates of encryption software components where the product is otherwise unchanged.

(2) Action by BIS.

(i) [Reserved]

(ii) For items requiring classification by BIS under paragraphs (b)(2) and (b)(3) of this section.

(A) For classifications that require a thirty (30-day) waiting period, if BIS has not, within thirty days (30 days) from registration in SNAP-R of your complete classification request, informed you that your item is not authorized for License Exception ENC, you may export, reexport, or transfer (in-country) under the applicable provisions of License Exception ENC.

(B) Upon completion of its classification, BIS will issue a Commodity Classification Automated Tracking System (CCATS) to you.

(C) *Hold Without Action (HWA) for classification requests.* BIS may hold your classification request without action if necessary to obtain additional information or for any other reason necessary to ensure an accurate classification. Time on such “hold without action” status shall not be counted towards fulfilling the thirty-day (30-day) processing period specified in this paragraph.

(iii) BIS may require you to supply additional relevant technical information about your encryption item(s) or information that pertains to their eligibility for License Exception ENC at any time, before or after the expiration of the thirty-day (30-day) processing period specified in this paragraph and in paragraphs (b)(2) and (b)(3) of this section. If you do not supply such information within 14 days after receiving a request for it from BIS, BIS may return your classification request(s) without action or otherwise suspend or revoke your eligibility to use License Exception ENC for that item(s). At your request, BIS may grant you up to an additional 14 days to provide the requested information. Any request for such an additional number of days must be made prior to the date by which the information was otherwise due to be provided to BIS, and may be approved if BIS concludes that additional time is necessary.

(e) Reporting requirements

(1) **Semiannual reporting requirement.** Semiannual reporting is required for exports to all destinations other than Canada, and for reexports from Canada for items described under paragraphs (b)(2) and (b)(3)(iii) of this section. Certain encryption items and transactions are excluded from this reporting requirement, see paragraph (e)(1)(iii) of this section. For information about what must be included in the report and submission requirements, see paragraphs (e)(1)(i) and (e)(1)(ii) of this section respectively.

(i) **Information required.** Exporters must include for each item, the Commodity Classification Automated Tracking System (CCATS) number and the name of the item(s) exported (or reexported from Canada), and the following information in their reports:

(A) **Distributors or resellers.** For items exported (or reexported from Canada) to a distributor or other reseller, including subsidiaries of U.S. firms, the name and address of the distributor or reseller, the item and the quantity exported or reexported and, if collected by the exporter as part of the distribution process, the end user’s name and address;

(B) **Direct Sales.** For items exported (or reexported from Canada) through direct sale, the name and address of the recipient, the item, and the quantity exported; or

(C) **Foreign manufacturers and products that use encryption items.** For exports (i.e., from the United States) or direct transfers (e.g., by a “U.S. subsidiary” located outside the United States) of encryption components, source code, general purpose toolkits, equipment controlled under ECCN 5B002, technology, or items that provide an “open cryptographic interface,” to a foreign developer or manufacturer headquartered in a country not listed in Supplement No. 3 to this part when intended for use in foreign products developed for commercial sale, the names and addresses of the manufacturers using these encryption items and, if known, when the product is made available for commercial sale, a non-proprietary technical description of the foreign products for which these encryption items are being used (e.g., brochures, other documentation, descriptions or other identifiers of the final foreign product; the algorithm and key lengths used; general programming interfaces to the product, if known; any standards or protocols that the foreign product adheres to; and source code, if available).

(ii) **Submission requirements.** For exports occurring between January 1 and June 30, a report

is due no later than August 1 of that year. For exports occurring between July 1 and December 31, a report is due no later than February 1 the following year. These reports must be provided in electronic form. Recommended file formats for electronic submission include spreadsheets, tabular text or structured text. Exporters may request other reporting arrangements with BIS to better reflect their business models. Reports may be sent electronically to BIS at crypt@bis.doc.gov and to the ENC Encryption Request Coordinator at enc@nsa.gov, or disks and CDs containing the reports may be sent to the following addresses:

(A) Department of Commerce, Bureau of Industry and Security, Office of National Security and Technology Transfer Controls, 14th Street and Pennsylvania Ave., NW, Room 2705, Washington, DC 20230, Attn: Encryption Reports, and

(B) Attn: ENC Encryption Request Coordinator, 9800 Savage Road, Suite 6940, Ft. Meade, MD 20755-6000.

(iii) Exclusions from reporting requirement. Reporting is not required for the following items and transactions:

(A) [RESERVED]

(B) Encryption commodities or software with a symmetric key length not exceeding 64 bits;

(C) Encryption items exported (or reexported from Canada) via free and anonymous download;

(D) Encryption items from or to a U.S. bank, financial institution or its subsidiaries, affiliates, customers or contractors for banking or financial operations;

(E) [Reserved]

(F) Foreign products developed by bundling or compiling of source code.

(2) Key length increases. Reporting is required for commodities and software that, after having been classified and authorized for License Exception ENC in accordance with paragraphs (b)(2) or (b)(3) of this section, are modified only to upgrade the key length used for confidentiality or key exchange algorithms. Such items may be exported, reexported or transferred (in-country) under the previously authorized provision of License Exception ENC without a classification resubmission.

(i) Information required.

(A) A certification that no change to the encryption functionality has been made other than to upgrade the key length for confidentiality or key exchange algorithms.

(B) The original Commodity Classification Automated Tracking System (CCATS) authorization number issued by BIS and the date of issuance.

(C) The new key length.

(ii) Submission requirements.

(A) The report must be received by BIS and the ENC Encryption Request Coordinator before the export, reexport or transfer (in-country) of the upgraded product; and

(B) The report must be e-mailed to crypt@bis.doc.gov and enc@nsa.gov.

(3) Self-classification reporting for certain encryption commodities, software, and components. This paragraph (e)(3) sets forth requirements for self-classification reporting to BIS and the ENC Encryption Request Coordinator (Ft. Meade, MD) of certain encryption commodities, software, and components exported or reexported meeting the criteria specified in paragraph (b)(1) of this section. Specifically, this reporting requirement applies to “mass market” encryption components and ‘executable software’ that meet the criteria of the Cryptography Note - Note 3 to Category 5 -

Part 2 of the CCL (“mass market” note) and are classified under ECCN 5A992.c or 5D992.c following self-classification, as well as to non-“mass market” encryption commodities and software that remain classified in ECCN 5A002, 5B002 or 5D002 following self-classification, provided these items are not further described by paragraph (b)(2) or (3) of this section.

Note to introductory text of paragraph (e)(3): For the purposes of this paragraph (e)(3), ‘executable software’ means “software” in executable form, from an existing hardware component excluded from ECCN 5A002 by the Cryptography Note. ‘Executable software’ does not include complete binary images of the “software” running on an end item.

(i) When to report. Your self-classification report for applicable encryption commodities, software and components exported or reexported during a calendar year (January 1 through December 31) must be received by BIS and the ENC Encryption Request Coordinator no later than February 1 the following year.

(ii) How to report. Encryption self-classification reports must be sent to BIS and the ENC Encryption Request Coordinator via e-mail or regular mail. In your submission, specify the timeframe that your report spans and identify points of contact to whom questions or other inquiries pertaining to the report should be directed. Follow these instructions for your submissions:

(A) Submissions via e-mail. Submit your encryption self-classification report electronically to BIS at crypt-supp8@bis.doc.gov and to the ENC Encryption Request Coordinator at enc@nsa.gov, as an attachment to an e-mail. Identify your e-mail with subject “self-classification report.”

(B) Submissions on disks and CDs. The self-classification report may be sent to the following addresses, in lieu of e-mail:

(1) Department of Commerce, Bureau of Industry and Security, Office of National Security and Technology Transfer Controls, 14th Street and Pennsylvania Ave., NW, Room 2099B, Washington, DC 20230, Attn: Encryption Reports, and

(2) Attn: ENC Encryption Request Coordinator, 9800 Savage Road, Suite 6940, Ft. Meade, MD 20755-6000.

(iii) Information to report. Your encryption self-classification report must include the information described in paragraph (a) of Supplement No. 8 to part 742 for each applicable encryption commodity, software and component made eligible for export or reexport under § 740.17(b)(1) of the EAR. Each product must be included in a report only one time. However, if no new products are made eligible for export or reexport during a calendar year, you must send an e-mail to the addresses listed in paragraph (e)(3)(ii)(A) of this section stating that nothing has changed since the previous report.

(iv) File format requirements. The information described in paragraph (a) of Supplement No. 8 to part 742 must be provided to BIS and the ENC Encryption Request Coordinator in tabular or spreadsheet form, as an electronic file in comma separated values format (.csv) adhering to the specifications set forth in paragraph (b) of Supplement No. 8 to part 742.

(f) End-use restrictions

Notwithstanding the other provisions and authorizations of this section, License Exception ENC is not authorized for any of the following items if the exporter, reexporter, or transferor “knows” or has “reason to know” at the time of export, reexport, or transfer (in-country), including deemed exports and reexports, that the item will be used to affect the confidentiality, integrity, or availability of information or information systems, without authorization by the owner, operator, or administrator of the information system (including the information and processes within such systems):

- (1) “Cryptanalytic items,” classified in ECCN 5A004.a, 5D002.a.3.a or c.3.a, or 5E002;
- (2) Network penetration tools described in paragraph (b)(2)(i)(F) of this section, and ECCN 5E002 “technology” therefor; or
- (3) Automated network vulnerability analysis and response tools described in paragraph (b)(3)(iii)(A) of this section, and ECCN 5E002 “technology” therefor.

Note to paragraph (f): See also § 740.22(c)(4).

§ 740.18 AGRICULTURAL COMMODITIES (AGR)

(a) Eligibility requirements

License Exception AGR permits the export of agricultural commodities to Cuba, as well as the reexport of U.S. origin agricultural commodities to Cuba, provided your transaction meets *all* of the following criteria:

- (1) The commodity meets the definition of “agricultural commodities” in part 772 of the EAR;
- (2) The commodity is EAR99. You must have an official commodity classification of EAR99 from BIS for fertilizers, western red cedar and live horses before you submit a notification under this license exception. See §748.3 of the EAR for information on how to submit a commodity classification request;
- (3) The export or reexport is made pursuant to a written contract, except for donations and commercial samples which are not subject to this contract requirement;
- (4) The export or reexport is made within 12 months of the signing of the contract or within 12 months of notification that no objections were raised (if no contract is required). In the case of multiple partial shipments, all such shipments

must be made within the 12 months of the signing of the contract or within 12 months of notification that no objections were raised (if no contract is required); and

- (5) You notify BIS prior to exporting or reexporting according to the procedures set forth in paragraph (c) of this section. If you intend to engage in multiple shipments during the one-year period after the signing of the contract, you need only notify BIS prior to the first shipment.

(b) Restrictions

(1) No export or reexport to any individual or entity designated as a Specially Designated Terrorist or Foreign Terrorist Organization may be made under License Exception AGR (see part 744 of the EAR).

(2) No export or reexport to or for use in biological, chemical, nuclear warfare or missile proliferation activities may be made under License Exception AGR (see part 744 of the EAR).

(3) No U.S.-owned or controlled foreign firm may export from abroad to Cuba a foreign produced agricultural commodity containing more than 25% U.S.-origin content. Such U.S.-owned or controlled foreign firms require a specific license from BIS as well as the Department of the Treasury’s Office of Foreign Assets Control (OFAC). Transactions not subject to the EAR (under 25% U.S.-origin content) require a license from OFAC.

(c) Prior notification

(1) **General requirement.** You must notify BIS prior to any export or reexport (or prior to the first of multiple shipments) under License Exception AGR.

(2) **Procedures.** You must provide prior notification of exports and reexports under License Exception AGR by submitting a completed application in accordance with § 748.1 of the EAR. The following blocks must be

completed, as appropriate: Blocks 1, 2, 3, 4, 5 (by marking box 5 “Other”), 14, 16, 17, 18, 19, 21, 22 (a), (e), (f), (g), (h), (i), (j), 23, and 25 according to the instructions described in Supplement No. 1 to part 748 of the EAR. If your commodity is fertilizer, western red cedar or live horses, you must confirm that BIS has previously classified your commodity as EAR99 by placing the Commodity Classification Automatic Tracking System (CCATS) number in block 22(d). BIS will not initiate the registration of an AGR notification unless the application is complete.

(3) Action by BIS. Within two business days of the registration of the AGR notification, BIS will refer the notification for interagency review, or if necessary return the notification without action (e.g., if the information provided is incomplete). Registration is defined as the point at which the notification is entered into BIS's electronic system.

(4) Review by other departments or agencies. The Departments of Defense, State, and other agencies, as appropriate, may review the AGR notification. BIS must receive department or agency objections within nine business days of the referral. Unlike the provisions described in §750.4(b) of the EAR, there are no provisions for stopping the processing time of the AGR notification. If, within 11 business days after the date of registration, any reviewing agency provides a written objection that the recipient may promote international terrorism or the transaction raises nonproliferation concerns, you may not use License Exception AGR. In such cases, BIS will notify you that a license is required for the export or reexport. BIS will then process the AGR notification as a license application in accordance with the provisions described in §750.4 of the EAR, and the licensing policies set forth in the EAR. At this time, BIS may request additional information. When BIS confirms that no agency has raised an objection within eleven business days (as described in paragraph (c)(5) of this section), you may proceed with the transaction provided that you satisfy all other requirements of License Exception AGR, including the requirement to

have a written contract prior to any shipment (unless a donation or commercial sample). (Note that the fact that you have been advised that no agency has objected to the transaction does not exempt you from other licensing requirements under the EAR, such as those based on knowledge of a prohibited end-use or end-user as referenced in general prohibition five (part 736 of the EAR) and set forth in part 744 of the EAR.)

(5) Status of pending AGR notification requests. You must contact BIS's System for Tracking Export License Applications (STELA) (<https://snapr.bis.doc.gov/stela>) for status of your pending AGR notification or verify the status in BIS's Simplified Network Applications Processing Redesign (SNAP-R) System. STELA will provide the date of registration of the AGR notification. If no department or agency objection is raised within 11 business days, STELA will, on the twelfth business day following the date of registration, provide you with confirmation of that fact. You may not proceed with your shipment unless you confirm with either STELA or SNAP-R that no objection has been raised. If an objection is raised, STELA and SNAP-R will indicate that a license is required. The AGR notification will then be processed as a license application. In addition, BIS may provide notice of an objection by telephone, fax, courier service, or other means.

(d) Donations

(1) Donations of agricultural commodities are eligible for export and reexport to Cuba under License Exception AGR, provided the transaction meets the requirements and procedures of this license exception (except the written contract requirement).

(2) Donations of food items to non-governmental organizations (NGOs) and individuals in Cuba may also be eligible for License Exception GFT. See §740.12 for eligibility requirements of gift parcels and humanitarian donations under License Exception GFT.

§ 740.19 CONSUMER COMMUNICATIONS DEVICES (CCD)

(a) Authorizations

This section authorizes the export, reexport, or transfer (in-country) of commodities and software to Cuba, Russia, and Belarus subject to the requirements stated in this section. This section does not authorize U.S. owned or controlled entities in third countries to engage in reexports of foreign produced commodities to Cuba for which no license would be issued by the Department of the Treasury pursuant to 31 CFR 515.559.

(b) Eligible commodities and software

Commodities and software in paragraphs (b)(1) through (16) of this section are eligible for export, reexport, or transfer (in-country) under this section to and within Cuba, Russia, and Belarus.

(1) Consumer computers, tablets, and peripherals including microphones, speakers, and headphones designated EAR99 or classified under Export Control Classification Numbers (ECCN) 5A992.c or 4A994.b;

(2) Consumer disk drives and solid-state storage equipment classified under ECCN 5A992 or designated EAR99;

(3) Graphics accelerators and graphics coprocessors designated EAR99;

(4) Monitors classified under ECCN 5A992.c or designated EAR99;

(5) Printers, including multifunctional printers, classified under ECCN 5A992.c or designated EAR99;

(6) Modems, network interface cards, routers, switches, and WiFi access points, designated EAR99 or classified under ECCNs 5A992.c or 5A991; drivers, communications, and connectivity software for such hardware

designated EAR99 or classified under ECCN 5D992.c;

(7) Network access controllers and communications channel controllers classified under ECCN 5A991.b.4, 5A992.c, or designated EAR99;

(8) Keyboards, mice and similar devices designated EAR99;

(9) Mobile phones, including cellular and satellite telephones, personal digital assistants, and subscriber information module (SIM) cards, accessories for such devices and similar devices classified under ECCNs 5A992.c or 5A991 or designated EAR99; drivers and connectivity software for such hardware designated EAR99 or classified under ECCN 5D992.c;

(10) Memory devices classified under ECCN 5A992.c or designated EAR99;

(11) Consumer “information security” equipment, “software” (except “encryption source code”), such as firewalls, virtual private network clients, antivirus, user authentication, password managers, identification verification and peripherals classified under ECCNs 5A992.c or 5D992.c or designated EAR99;

(12) Digital cameras (including webcams) and memory cards classified under ECCN 5A992 or designated EAR99;

(13) Television and radio receivers, set top boxes, video decoders and antennas, classified under ECCNs 5A991, 5A992, or designated EAR99;

(14) Recording devices classified under ECCN 5A992 or designated EAR99;

(15) Batteries, chargers, carrying cases and accessories for the equipment described in paragraphs (b)(1) through (15) of this section that are designated EAR99;

(16) Consumer “software” (except “encryption source code”) classified under

ECCNs 4D994, 5D991 or 5D992.c or designated EAR99 to be used for equipment described in paragraphs (b)(1) through (16) of this section.

Note 1 to paragraph (b): In this paragraph, the term “consumer” refers to items that are:

1. Generally available to the public by being sold, without restriction, from stock at retail selling points by means of any of the following:

- a. Over-the-counter transactions;
- b. Mail order transactions;
- c. Electronic transactions; or
- d. Telephone call transactions; and

2. Designed for installation by the user without further substantial support by the supplier.

(c) Eligible and ineligible end users

(1) Organizations.

(i) The license exception in this section may be used to export, reexport, or transfer (in-country) eligible commodities and software to and for the use of independent non-governmental organizations in Cuba, Russia, or Belarus.

(ii) The Cuban Government, the Cuban Communist Party, the Russian Government, the Belarusian Government, and organizations administered or controlled by the Cuban Government, the Cuban Communist Party, the Russian Government, or the Belarusian Government are not eligible end users.

(iii) [Reserved]

(2) Individuals. The license exception in this section may be used to export, reexport, or transfer (in-country) eligible commodities and software to and for the use of individuals other than the following:

(i) Ineligible Cuban Government officials. Ministers and Vice-Ministers; members of the Council of State; members of the Council of Ministers; members and employees of the National Assembly of People’s Power; members of any provincial assembly; local sector chiefs of the Committees for the Defense of the Revolution; Director Generals and sub-Director Generals and higher of all Cuban ministries and state agencies; employees of the Ministry of the Interior (MININT); employees of the Ministry of Defense (MINFAR); secretaries and first secretaries of the Confederation of Labor of Cuba (CTC) and its component unions; chief editors, editors and deputy editors of Cuban state-run media organizations and programs, including newspapers, television, and radio; or members and employees of the Supreme Court (Tribuno Supremo Nacional).

(ii) Ineligible Cuban Communist Party officials. Members of the Politburo.

(iii) Ineligible Russian Government officials. The President, Prime Minister, and Deputy Prime Ministers; Federal Ministers; Chairman, Deputy Chairman, and Secretary of the Security Council; members and employees of the Federal Assembly (the State Duma and the Federation Council); members and employees of the Supreme Court and the Constitutional Court; Chief and all employees of the General Staff of the armed forces; employees of the Ministry of Defence; Director and employees of the Federal Security Service, Director and employees of the Foreign Intelligence Service; employees of the Ministry of the Interior; employees of state committees, chief editors, editors and deputy editors of Russian state-run media organizations and programs, including newspapers, television, and radio; offices, services, agencies and other entities organized under or reporting to the federal government.

(iv) Ineligible Belarusian Government officials. Alyaksandr Lukashenko; Prime Minister and Deputy Prime Ministers; members of the Council of Ministers; members of the Security Council of Belarus; members and

employees of the National Assembly of the Republic of Belarus; members and employees of the Supreme Court and the Constitutional Court; Chief and all employees of the General Staff of the armed forces; employees of the Ministry of Defence, including the National Armed Services (Army and Air Force), the National Guard and National Police; and employees of Government Intelligence or Reconnaissance Organizations of the Republic of Belarus, including the Director and employees of the State Security Committee (BKGB); employees of the Ministry of Internal Affairs; employees of state committees; employees of the State Authority for the Military Industry; employees of the Border Control Committee of the Republic of Belarus; chief editors, editors and deputy editors of Belarusian state-run media organizations and programs, including newspapers, television, and radio; offices, services, agencies and other entities organized under or reporting to the federal government.

§ 740.20 LICENSE EXCEPTION STRATEGIC TRADE AUTHORIZATION (STA)

(a) Introduction

This section authorizes exports, reexports, and transfers (in-country), including releases within a single country of software source code and technology to foreign nationals, in lieu of a license that would otherwise be required pursuant to part 742 of the EAR.

Note 1 to paragraph (a): License Exception STA authorizes transfers (in-country) but is only needed to authorize a transfer (in-country) when an EAR authorization is required. If a transfer (in-country) is not being made under STA, the requirements specified in this section do not apply (see Note 1 to paragraphs (b)(2) and (b)(3) of this section for requirements specific to staying within the scope of the original License Exception STA authorization and the concept of ‘completing the chain’ for purposes of “600 series” items originally authorized under License Exception STA).

(b) Requirements and limitations

(1) Requirements for using License Exception STA.

(i) All of the reasons for control that impose a part 742 license requirement on the *export, reexport or in country transfer* must be addressed in at least one authorizing paragraph of this section.

(ii) The party using License Exception STA must comply with all of the requirements in paragraph (d) of this section.

(2) Limitations on use of License Exception STA. The prohibitions and limits of this paragraph (b)(2) apply notwithstanding the authorizations in paragraph (c) of this section.

(i) License Exception STA may not be used in lieu of any license requirement imposed by “Part 744—Control Policy: End User and End Use Based” or by “Part 746—Embargoes and other Special Controls” of the EAR.

(ii) License Exception STA may not be used for:

(A) Any item controlled in ECCNs 0A501.a, .b, .c, .d, or .e; 0A981; 0A982; 0A983; 0A503; 0E504; 0E982; or

(B) Shotguns with barrel length less than 18 inches controlled in 0A502.

(iii) License Exception STA may not be used for any item that is controlled for reason of encryption items (EI), short supply (SS), surreptitious listening (SL), missile technology (MT) or chemical weapons (CW).

(iv) License Exception STA may not be used for any item identified on the CCL as being subject to the exclusive export control jurisdiction of another agency, such as the Department of State, the Department of Energy, or the Nuclear Regulatory Commission.

(v) License Exception STA may not be used for any item controlled by ECCN 1C351.a, .b, .c, .d.14, .d.15 or .e, ECCNs 1C353, 1C354, 1E001 (i.e., for technology, as specified in ECCN 1E001, for items controlled by ECCN 1C351.a, .b, .c, .d.14, .d.15 or .e or ECCNs 1C353 or 1C354) or ECCN 1E351.

(vi) Toxins controlled by ECCN 1C351.d.1 through 1C351.d.13 and 1C351.d.16 through 1C351.d.21 are authorized under License Exception STA to destinations indicated in Country Group A:5 (See supplement no. 1 to this part 740), subject to the following limits. For purposes of this paragraph (b)(2)(vi), all such toxins that are sent from one exporter, reexporter or transferor to a single end-user, on the same day, constitute one shipment.

(A) The maximum amount of any one toxin in any one shipment may not exceed 100 milligrams.

(B) No exporter, reexporter or transferor may send more than six shipments of any one toxin to any one end user in a single calendar year.

(vii) Commerce Control List Category 7 limitation on use of License Exception STA. License Exception STA may not be used for 7E004 “technology,” except for “technology” controlled under 7E004.a.7.

(viii) Commerce Control List Category 9 limitations on use of License Exception STA.

(A) License Exception STA may not be used for 9B001 when destined to a country in Country Group A:6.

(B) License Exception STA may not be used for 9D001 or 9D002 “software” that is specially designed or modified for the “development” or “production” of:

(J) Components of engines controlled by ECCN 9A001 if such components

incorporate any of the “technologies” controlled by 9E003.a.1, 9E003.a.2, 9E003.a.3, 9E003.a.4, 9E003.a.5, 9E003.c, 9E003.i (other than technology for fan or power turbines), 9E003.h; or

(2) Equipment controlled by 9B001.

(C) License Exception STA may not be used for 9D001 “software” that is specially designed or modified for the “development” of “technology” controlled by 9E003.a.1, 9E003.a.2, 9E003.a.3, 9E003.a.4, 9E003.a.5, 9E003.c, 9E003.i (other than technology for fan or power turbines) or 9E003.h.

(D) License Exception STA may not be used for 9D004.f or 9D004.g “software”.

(E) License Exception STA may not be used for 9E001 “technology” according to the General Technology Note for the “development” of 9A001.b engines or components of engines controlled by 9A001.b if such components incorporate:

(J) Any of the “technologies” controlled by 9E003.a.1, 9E003.a.2, 9E003.a.3, 9E003.a.4, 9E003.a.5, 9E003.c, 9E003.i (other than technology for fan or power turbines) or 9E003.h;

(2) Any of the 9D001 or 9D002 software in paragraphs (b)(2)(viii)(A) or (B) of this section.

(F) License Exception STA may not be used for 9E002 “technology” according to the General Technology Note for the “production” of components of engines controlled by 9A001.b if such components incorporate any of the “technologies” controlled by 9E003.a.1, 9E003.a.2, 9E003.a.3, 9E003.a.4, 9E003.a.5, 9E003.c, 9E003.i (other than technology for fan or power turbines) 9E003.h.

(G) License Exception STA may not be used for “technology” in 9E003.a.1,

9E003.a.2, 9E003.a.3, 9E003.a.4, 9E003.a.5, 9E003.c, 9E003.i (other than technology for fan or power turbines) 9E003.h.

(ix) [RESERVED]

(x) License Exception STA may not be used for items controlled by ECCNs 6A002; 6D002 (software “specially designed” for the “use” of commodities controlled under 6A002.b); 6D003.c; 6D991 (software “specially designed” for the “development,” “production,” or “use” of commodities controlled under 6A002 or 6A003); 6E001 (“technology” for the “development” of commodities controlled under ECCNs 6A002 or 6A003); or 6E002 “technology” (for the “production” of commodities controlled under ECCNs 6A002 or 6A003).

(xi) License Exception STA may not be used for any commodity controlled by ECCN 3A001.b.2 or b.3 (except those that are being exported or reexported for use in civil telecommunications applications), or any “technology” controlled by 3E001 for the “production” or “development” of commodities controlled by 3A001.b.2 or b.3.

(3) Limitations on the Use of STA that are Specific to “600 series” Items.

(i) License Exception STA may not be used for any “600 series” items identified in the relevant ECCN as not being eligible for STA.

(ii) License Exception STA may be used to export, reexport, and transfer (in-country) “600 series” items to persons, whether non-governmental or governmental, if they are in and, for natural persons, nationals of a country listed in Country Group A:5 (See Supplement No.1 to part 740 of the EAR) or the United States and if:

(A) The *ultimate* end user for such items is the armed forces, police, paramilitary, law enforcement, customs, correctional, fire, or a search and rescue agency of a government of one of the countries listed in Country Group A:5, or the United States Government;

(B) For the “development,” “production,” operation, installation, maintenance, repair, overhaul, or refurbishing of an item in one of the countries listed in Country Group A:5 or the United States that will be for one, or more, of the following purposes:

(1) Ultimately to be used by any such government agencies in one of the countries listed in Country Group A:5 or the United States Government; or

(2) Sent to a person in the United States and not for subsequent export under § 740.9(b)(1) (License Exception TMP for items moving in transit through the United States); or

(C) The United States Government has otherwise authorized the ultimate end use, the license or other authorization is in effect, and the consignee verifies in writing that such authorization exists and has provided the license or other approval identifier to the exporter, reexporter or transferor (as applicable).

(iii) License Exception STA may not be used to export, reexport, or transfer (in-country) end items described in ECCN 0A606.a, ECCN 8A609.a, ECCN 8A620.a or .b, or ECCN 9A610.a until after BIS has approved their export under STA under the procedures set out in § 740.20(g).

(iv) License Exception STA may not be used to export, reexport, or transfer (in-country) “600 series” items if they are “600 Series Major Defense Equipment” and the value of such items in the contract requiring their export exceeds \$25,000,000.

Note 1 to paragraphs (b)(2) and (b)(3): Any export, reexport, or transfer (in-country) originally authorized under License Exception STA must stay within the scope of the original authorization. For example, for “600 series” items authorized under License Exception STA, such items must be provided to an eligible ultimate end user, such as a Country Group A:5

military, to stay in compliance with the original authorization. This requirement for the “600 series” is referred to as ‘completing the chain,’ meaning regardless of how many times the “600 series” item is transferred (in-country) or whether the “600 series” item is incorporated into higher level assemblies or other items, the “600 series” item must ultimately be provided to an eligible ultimate end user, or be otherwise authorized under the EAR. This applies regardless of whether the “600 series” item has been incorporated into a foreign-made item that may no longer be “subject to the EAR.” Because the other items eligible for authorization under License Exception STA (9x515 and other non-600 series ECCNs) do not include the “600 series” requirements specific to ultimate end user, this ‘completing the chain’ concept does not apply to 9x515 and other non-600 series ECCNs authorized under License Exception STA. However, the original export, reexport, or transfer (in-country) made under License Exception STA for 9x515 and other non-600 series ECCNs still must comply with the original authorization – meaning the terms and conditions of License Exception STA.

(c) Authorizing paragraphs

(1) Multiple reasons for control. Exports, reexports, and transfers (in-country) in which the only applicable reason(s) for control is (are) national security (NS); chemical or biological weapons (CB); nuclear nonproliferation (NP); regional stability (RS); crime control (CC), and/or significant items (SI) are authorized for destinations in or nationals of Country Group A:5 (See Supplement No.1 to part 740 of the EAR).

Note to paragraph (c)(1). *License Exception STA under § 740.20(c)(1) may be used to authorize the export, reexport, or transfer (in-country) of “600 series” items only if the purchaser, intermediate consignee, ultimate consignee, and end user have previously been approved on a license or other approval, i.e., Directorate of Defense Trade Controls (DDTC)*

Manufacturing License Agreement (MLA), Technical Assistance Agreement (TAA), Warehouse Distribution Agreement (WDA), or General Correspondence approval (GC) issued by BIS or DDTC at the U.S. Department of State.

(2) Controls of lesser sensitivity. Exports, reexports and transfers (in-country) in which the only applicable reason for control is national security (NS) and the item being exported, reexported or transferred (in-country) is not designated in the STA paragraph in the License Exception section of the ECCN that lists the item are authorized for destinations in or nationals of Country Group A:6 (See Supplement No.1 to this part).

(d) Conditions

(1) Requirement to furnish Export Control Classification Number.

(i) The exporter must furnish to the consignee the ECCN of each item to be exported pursuant to this section. Once furnished to a particular consignee, the ECCN that applies to any item need not be refurnished to that consignee at the time the same exporter makes an additional export of the same item, if the information remains accurate at the time of the additional export.

(ii) A reexporter or transferor must furnish to subsequent consignees the ECCN, provided by the exporter or a prior reexporter or transferor, of each item to be reexported or transferred (in-country) pursuant to this section. Once furnished to a particular consignee, the ECCN that applies to any item need not be refurnished to that consignee at the time the same reexporter or transferor makes an additional reexport or transfer (in-country) of the same item, if the information remains accurate at the time of the additional reexport or transfer (in-country).

(iii) For purposes of determining reexport or transfer eligibility under this section, the consignee may rely on the ECCN provided to it

by the party required to furnish the ECCN under paragraph (d)(1)(i) or (ii) of this section unless the consignee knows that the ECCN is incorrect or has changed. The word “knows” has the same meaning as the term “knowledge” in § 772.1 of the EAR.

(2) Prior Consignee Statement. The requirements in this paragraph (d)(2) apply to each party using License Exception STA to export, reexport, or transfer (in-country), including reexporters and transferors of items previously received under License Exception STA. The exporter, reexporter, or transferor must obtain the following statement in writing from its consignee(s) prior to exporting, reexporting, or transferring (in-country) the item and must retain the statement in accordance with part 762 of the EAR. One statement may be used for multiple exports, reexports, or transfers (in-country) of the same items between the same parties so long as the party names, the description(s) of the item(s) and the ECCNs are correct. The exporter, reexporter, or transferor must maintain a log or other record (such as documents created in the ordinary course of business) that identifies each shipment made pursuant to this section and the specific consignee statement that is associated with each shipment. For purposes of this paragraph (d)(2), a log or other record is not required for intangible (*i.e.*, electronic or in an otherwise intangible form) exports, reexports, or transfers (in-country) made under License Exception STA, but an exporter, reexporter, or transferor is required, prior to making any export, reexport, or transfer (in-country), to ensure that a prior consignee statement has been obtained pursuant to the requirements of this paragraph (d)(2). (*See* Note 1 to paragraph (d)(3) of this section for additional guidance on intangible exports, reexports, and transfers (in-country), including best practices). Paragraphs (d)(2)(i) through (vi) of this section are required for all transactions. In addition, paragraph (d)(2)(vii) is required for all transactions in “600 series” items and paragraph (viii) of this section is required for transactions in “600 series” items if the consignee is not the government of a country listed in Country Group

A:5 (See supplement no. 1 to part 740 of the EAR). Paragraph (d)(2)(viii) is also required for transactions including 9x515 items.

[INSERT NAME(S) OF CONSIGNEE(S)]:

(i) Is aware that [INSERT GENERAL DESCRIPTION AND APPLICABLE ECCN(S) OF ITEMS TO BE SHIPPED (*e.g.*, aircraft parts and components classified under ECCN 9A610)] will be shipped pursuant to License Exception Strategic Trade Authorization (STA) in § 740.20 of the United States Export Administration Regulations (15 CFR 740.20);

(ii) Has been informed of the ECCN(s) noted above by [INSERT NAME OF EXPORTER, REEXPORTER OR TRANSFEROR];

(iii) Understands that items shipped pursuant to License Exception STA may not subsequently be reexported pursuant to paragraphs (a) or (b) of License Exception APR (15 CFR 740.16(a) or (b));

(iv) Agrees to obtain a prior consignee statement when using License Exception STA for any reexport or transfer (in-country) of items previously received under License Exception STA;

(v) Agrees not to export, reexport, or transfer these items to any destination, use or user prohibited by the United States’ Export Administration Regulations;

(vi) Agrees to provide copies of this document and all other export, reexport, or transfer records (*i.e.*, the documents described in 15 CFR part 762) relevant to the items referenced in this statement to the U.S. Government as set forth in 15 CFR 762.7;

(vii) Understands that License Exception STA may be used to export, reexport, and transfer (in-country) “600 series” items to persons, whether non-governmental or governmental, only if they are in and, for natural persons, nationals of a country listed in Country Group A:5 (See supplement no. 1 to part 740 of the EAR) or the

United States and if:

(A) The *ultimate* end user for such items is the armed forces, police, paramilitary, law enforcement, customs, correctional, fire, or a search and rescue agency of a government of one of the countries listed in Country Group A:5 or the United States Government;

(B) For the “development,” “production,” operation, installation, maintenance, repair, overhaul, or refurbishing of an item in one of the countries listed in Country Group A:5 or the United States that will be for one, or more, of the following purposes:

(1) Ultimately to be used by any such government agencies in one of the countries listed in Country Group A:5 or the United States Government; or

(2) Sent to a person in the United States and not for subsequent export under § 740.9(b)(1) (License Exception TMP for items moving in transit through the United States); or

(C) The United States Government has otherwise authorized the ultimate end use, the license or other authorization is in effect, and the consignee verifies in writing that such authorization exists and has provided the license or other approval identifier to the exporter, reexporter or transferor (as applicable).

(viii) Agrees to permit a U.S. Government end-use check with respect to the items.

[INSERT NAME(S) AND TITLE(S) OF PERSON(S) SIGNING THIS DOCUMENT, AND DATE(S) DOCUMENT IS SIGNED].

Note 1 to paragraph (d)(2): When multiple consignees who form a network engaged in a production process (or other type of collaborative activity, such as joint development) will be receiving items under License Exception STA, a single prior consignee statement for multiple consignees may be used for any item eligible for export, reexport, or transfer (in-

country) under License Exception STA, provided all of the applicable requirements of License Exception STA are met, including those specified in paragraph (d)(2).

Note 2 to paragraph (d)(2): Country Group A:5 and A:6 government consignees are not required to sign or provide a prior consignee statement.

(3) Notification to consignee of STA shipment. With each shipment under License Exception STA, the exporter (or reexporter or transferor as applicable), must notify the consignee in writing that the shipment is made pursuant to License Exception STA. The notice must either specify which items are subject to License Exception STA or state that the entire shipment is made pursuant to License Exception STA. The notice must clearly identify the shipment to which it applies. The written notice may be conveyed by paper documents or by electronic methods such as facsimile or email.

Note 1 to paragraph (d)(3): While the exporter, reexporter, and transferor must furnish the applicable ECCN and obtain a consignee statement prior to export, reexport or transfer (in-country) made under License Exception STA in accordance with the requirements of paragraphs (d)(1) and (d)(2) of this section, intangible (i.e., electronic or in an otherwise intangible form) exports, reexports, and transfers (in-country) made under License Exception STA are not subject to the notification requirements of paragraph (d)(3) of this section. However, any export, reexport, or transfer (in-country) made under STA must stay within the scope of the original authorization.

(4) Requirements for releases of software source code or technology within a single country. Instead of the requirement of paragraphs (d)(1) through (d)(3) of this section, the party releasing software source code or technology to a national of a country listed in Country Group A:5 or A:6 (See Supplement No.1 to this part) must notify the recipient of the software source code or technology of the

restrictions upon further release of the software source code or technology. The notification must either expressly inform the recipient that the EAR impose limits on further disclosure or must be in the form of an agreement in which the recipient agrees to limits on further disclosure. Any such agreement must impose limits that are equivalent to or more restrictive than all limits on further disclosure that are imposed by the EAR. The notification must be in writing and a copy of it must be retained by the party making the release and the recipient of the release. The notification may be in a separate document or included in a document such as a contract or a nondisclosure agreement. If the document has an expiration date, it must provide that the restrictions on disclosure do not expire.

(e) Limitation on subsequent exports, reexports or in country transfers.

If a commodity has been exported, reexported or transferred in-country pursuant to this section, it may not be subsequently exported, reexported or transferred in-country pursuant to paragraphs (a) or (b) of License Exception APR (§ 740.16(a) or (b) of the EAR). Paragraphs (a) and (b) of License Exception APR do not authorize exports of software or technology.

(f) Applicability of Wassenaar Arrangement reporting requirements.

See § 743.1 of the EAR for special reporting requirements that apply to some exports made pursuant to this section.

(g) License Exception STA eligibility requests for 9x515 and “600 series” items.

(1) Applicability. Any person may request License Exception STA eligibility for end items described in ECCN 0A606.a, ECCN 8A609.a, ECCNs 8A620.a or .b, “spacecraft” in ECCNs 9A515.a.1, .a.2, .a.3, .a.4, or .g, 9A610.a, or technology ECCNs 9E515.b, .d, .e, or .f.

(2) Required information and manner of

requests. Requests for License Exception STA eligibility must be made via the BIS Simplified Network Application Process –Redesign (SNAP-R) system unless BIS authorizes submission via the paper BIS-748-P Multipurpose Application form. For situations in which BIS 748-P submissions may be authorized, see § 748.1(d)(1). For required information specific to License Exception STA eligibility requests, see Supplement No 1 to part 748, Blocks 5 and 6 and Supplement No. 2 to part 748, paragraph (w). In SNAP-R the work type for these applications is “Export.”

(3) Timeline for USG review. The Departments of Commerce, Defense and State will review License Exception STA eligibility requests in accordance with the timelines set forth in Executive Order 12981 and § 750.4. If the License Exception STA request is approved, the process outlined in paragraph (g)(5)(i) of this section is followed.

(4) Review criteria. The Departments of Commerce, Defense and State will determine whether the “end item” is eligible for this license exception based on an assessment of whether it provides a critical military or intelligence advantage to the United States or is otherwise available in countries that are not regime partners or close allies. If the “end item” does not provide a critical military or intelligence advantage to the United States or is otherwise available in countries that are not regime partners or close allies, the Departments will determine that License Exception STA is available unless an overarching foreign policy rationale for restricting STA availability can be articulated. Consensus among the Departments is required in order for an “end item” to be eligible for License Exception STA. Such determinations are made by the departments’ representatives to the Advisory Committee on Export Policy (ACEP), or their designees.

(5) Disposition of License Exception STA eligibility requests.

(i) Approvals. If the request for STA

eligibility is approved, the applicant will receive notification from BIS authorizing the use of the additional License Exception STA for the specific end items requested. This will be in the form of a notice generated by SNAP-R to the applicant. Applicants who receive an approval notification may share it with companies affiliated with them, such as a branch or distributor, and may also take steps to make it public (e.g., on their website) if the applicants so wish. In addition, BIS will add a description of the approved end item in the relevant ECCN and in an online table posted on the BIS website, which removes the restriction on the use of License Exception STA for the end item identified in the approved request. BIS will publish, as needed, a final rule adding this license exception eligibility to the EAR for that ECCN entry or end item.

(ii) **Denials.** If the STA eligibility request is not approved, the applicant will receive written notification from BIS. This will be in the form of a notice generated by SNAP-R to the applicant. Applicants may re-submit STA eligibility requests at any time.

§ 740.21 SUPPORT FOR THE CUBAN PEOPLE (SCP)

(a) *Introduction*

This License Exception authorizes certain exports and reexports to Cuba that are intended to support the Cuban people by improving their living conditions and supporting independent economic activity; strengthening civil society in Cuba; and improving the free flow of information to, from, and among the Cuban people.

(b) *Improving living conditions and supporting independent economic activity*

This paragraph authorizes the export or reexport to Cuba of items designated as EAR99, or controlled on the Commerce Control List (CCL) (Supplement No. 1 to Part 774 of the EAR) only for anti-terrorism reasons (*i.e.*, anti-terrorism

must be the only reason for control that applies to the item as set forth in the Export Control Classification Number (ECCN) that controls the item). If any other reason for control applies to the item, it is not authorized for export or reexport by this paragraph. The item must be within one or more of the following categories:

(1) Items for use by the Cuban private sector for private sector economic activities, except for items that would be used to:

(i) Primarily generate revenue for the state; or

(ii) Contribute to the operation of the state, including through the construction or renovation of state-owned buildings.

(2) Items sold directly to individuals in Cuba for their personal use or their immediate family's personal use, other than officials identified in paragraphs (d)(4)(ii) or (iii) of this section.;

(c) *Strengthening civil society*

This paragraph authorizes the export or reexport to Cuba of certain items for use in specified activities that can strengthen civil society. The items authorized pursuant this paragraph are limited to those designated as EAR99 or controlled only for anti-terrorism reasons on the CCL (*i.e.*, anti-terrorism must be the only reason for control that applies to the item as set forth in the ECCN that controls the item). If any other reason for control applies to the item, it is not authorized for export or reexport by this paragraph. The export or reexport must be within one or more of the following categories:

(1) The export or reexport to Cuba of *donated* items for use in scientific, archaeological, cultural, ecological, educational, historic preservation, or sporting activities. The items may not be donated to organizations administered or controlled by the Cuban government or communist party, and must support eligible activities independent of the Cuban government and communist party. The activities may not relate to the “development,” “production,” “use,”

operation, installation, maintenance, repair, overhaul or refurbishing of any item enumerated or otherwise described on the United States Munitions List (22 CFR part 121) or of any item enumerated or otherwise described on the Commerce Control List (supplement no. 1 to part 774 of the EAR) unless the only reason for control that applies to that item, as set forth in the ECCN that controls that item, is anti-terrorism.

(2) The *temporary* export or reexport to Cuba of items by travelers to Cuba for the travelers' use in scientific, archeological, cultural, ecological, educational, historic preservation, or sporting activities, or professional meetings or research. The following requirements apply:

(i) The research must be directly related to traveler's profession, professional background or area of expertise, including area of graduate-level full-time study.

(ii) The activities or research may not relate to the "development," "production," "use," operation, installation, maintenance, repair, overhaul or refurbishing of any item enumerated or otherwise described on the United States Munitions List (22 CFR Part 121) or of any item enumerated or otherwise described on the Commerce Control List (Supplement No. 1 to Part 774 of the EAR) unless the only reason for control that applies to that item as set forth in the ECCN that controls that item is anti-terrorism.

(iii) The items must remain under the traveler's "effective control" while in Cuba.

(iv) Items authorized for temporary export by this paragraph must be returned to the United States within two years of the date of export from the United States unless:

(A) The items are consumed in Cuba; or

(B) The exporter applies for and receives a license from BIS, prior to the expiration of the two year period, authorizing the items to remain in Cuba for longer than two years.

(v) Paragraph (c)(2) does not authorize exports if, at the time of the export, the exporter has "knowledge" that the item exported will remain in Cuba for more than two years.

(3) The export or reexport to Cuba of items to human rights organizations, individuals or non-governmental organizations that promote independent activity intended to strengthen civil society.

(d) Improving communications

This paragraph authorizes the export or reexport to Cuba of certain items intended to improve the free flow of information to, from, and among the Cuban people. The items authorized pursuant to this paragraph are limited to those designated as EAR99 or controlled only for anti-terrorism reasons on the CCL (*i.e.*, anti-terrorism must be the only reason for control that applies to the item as set forth in the ECCN that controls the item). If any other reason for control applies to the item, it is not authorized for export or reexport by this paragraph. The export or reexport must be within one or more of the following categories:

(1) The export or reexport to Cuba of items for the creation and upgrade of telecommunications *infrastructure* to improve the free flow of information to, from, and among the Cuban people, including infrastructure that enables access to the Internet and use of Internet services. For infrastructure items that would be used to connect specific end users, those items may be used to connect individual Cubans or the Cuban private sector only (*e.g.*, not Cuban government ministries or state-owned enterprises).

(2) The export or reexport to Cuba of items for use by news media personnel engaged in the gathering and dissemination of news to the general public and who are:

(i) Regularly employed as journalists by a news reporting organization;

(ii) Regularly employed as supporting broadcast or technical personnel;

(iii) Freelance journalists with a record of previous journalistic experience working on a freelance journalistic project; or

(iv) Broadcast or technical personnel with a record of previous broadcast or technical experience who are supporting a freelance journalist working on a freelance journalistic project.

(3) The export or reexport to Cuba of items for use by U.S. news bureaus engaged in the gathering and dissemination of news to the general public.

(4) The export or reexport to Cuba of commodities or software that will be used by individuals or private sector entities to develop software that will improve the free flow of information or that will support the private sector activities described in paragraph (b) of this section. The following are ineligible end-users:

(i) The Cuban Government or the Cuban Communist Party and organizations they administer or control;

(ii) Ministers and Vice-Ministers; members of the Council of State; members of the Council of Ministers; members and employees of the National Assembly of People's Power; members of any provincial assembly; local sector chiefs of the Committees for the Defense of the Revolution; Director Generals and sub-Director Generals and higher of all Cuban ministries and state agencies; employees of the Ministry of the Interior (MININT); employees of the Ministry of Defense (MINFAR); secretaries and first secretaries of the Confederation of Labor of Cuba (CTC) and its component unions; chief editors, editors and deputy editors of Cuban state-run media organizations and programs, including newspapers, television, and radio; or members and employees of the Supreme Court (Tribuno Supremo Nacional); and

(iii) Members of the Politburo.

(e) *Facilitating engagement, communications, and commerce*

This paragraph (e) authorizes the export or reexport to Cuba of certain items intended to facilitate engagement between the U.S. and Cuban people; the free flow of information to, from, and among the Cuban people; and independent economic activity in Cuba. The export or reexport must be within one or more of the following categories:

(1) The export or reexport to Cuba of items for use by persons authorized by the Department of the Treasury, Office of Foreign Assets Control (OFAC) to establish and maintain a physical or business presence in Cuba pursuant to 31 CFR 515.573 or pursuant to a specific license issued by OFAC. The items authorized pursuant to this paragraph (e)(1) are limited to those designated as EAR99 (*i.e.*, items subject to the EAR but not specified in any ECCN) or controlled on the CCL only for anti-terrorism reasons.

(2) [Reserved]

Note to paragraph (e). Any resulting payments associated with establishing or maintaining a physical or business presence in Cuba, such as lease payments, are permitted only to the extent authorized by 31 CFR 515.573 or a specific license issued by OFAC.

(f) *Temporary exports and reexports to Cuba*

This paragraph (f) authorizes the export or reexport to Cuba, for periods not exceeding one year, of certain items designated as EAR99 or controlled only for anti-terrorism reasons on the CCL (*i.e.*, anti-terrorism must be the only reason for control that applies to the item as set forth in the ECCN that controls the item). If any other reason for control applies to the item, it is not authorized for export or reexport by this paragraph. This paragraph does not authorize any transaction if the exporter or reexporter has “knowledge” that the item is intended to remain in Cuba for more than one year; if an order to

acquire the item, such as a purchase order, has been received before shipment; or when the item is for subsequent lease or rental. The export or reexport must be within one or more of the following categories.

(1) Tools of trade – commodities and software.

Commodities or software to be used by the exporter or reexporter or its employees for the installation, servicing or repair of items that are subject to the EAR and that have been exported or reexported to Cuba under a license or license exception, or foreign-origin items that are not subject to the EAR that are owned and used exclusively by private sector entities in Cuba, may be exported or reexported under this paragraph (f). The commodities or software must remain under the “effective control” of the exporter or reexporter or its employees. Examples of security precautions to help prevent unauthorized access include the following:

(i) Use of secure connections, such as Virtual Private Network connections, when accessing IT networks for activities that involve the transmission and use of the software authorized under this license exception;

(ii) Use of password systems on electronic devices that store the software authorized under this license exception; and

(iii) Use of personal firewalls on electronic devices that store the software authorized under this license exception.

(2) Tools of trade – technology. Technology to be used by a ‘U.S. person’ exporter or reexporter or its employees who are traveling to or on temporary assignment in Cuba for the installation, servicing or repair of items that are subject to the EAR and that have been exported or reexported to Cuba under a license or license exception, or foreign-origin items that are not subject to the EAR that are owned and used exclusively by private sector entities in Cuba, may be exported or reexported under this paragraph (f). For purposes of this paragraph (f)(2), a ‘U.S. person’ is: an individual who is a

citizen of the United States, an individual who is “lawfully admitted for permanent residence” in the United States as defined by 8 U.S.C. 1101(a)(20) or an individual who is a protected individual as defined by 8 U.S.C. 1324b(a)(3). ‘U.S. person’ also means any juridical person organized under the laws of the United States, or any jurisdiction within the United States (*e.g.*, corporation, business association, partnership, society, trust, or any other entity, organization or group that is authorized to do business in the United States). If the employee who will use the technology is not a ‘U.S. person,’ the release of that technology to that employee must either not require a license or be authorized by a license or a license exception other than this section before it may be exported or reexported to that employee under this paragraph. The exporter or reexporter and the recipient of the technology must take security precautions to protect against unauthorized release of the technology while the technology is being shipped or transmitted and used overseas. Examples of security precautions to help prevent unauthorized access include the following:

(i) Use of secure connections, such as Virtual Private Network connections, when accessing IT networks for e-mail and other business activities that involve the transmission and use of the technology authorized under this license exception;

(ii) Use of password systems on electronic devices that will store the technology authorized under this license exception; and

(iii) Use of personal firewalls on electronic devices that will store the technology authorized under this license exception.

(3) Kits of replacement “parts” or “components.” Kits consisting of replacement “parts” or “components” for items that have been exported or reexported to Cuba under a license or license exception, or foreign-origin items that are not subject to the EAR that are owned and used exclusively by private sector entities in Cuba, may be exported or reexported under this paragraph (f)(3) provided:

(i) The kits remain under “effective control” of the exporter or reexporter or its employees; and

(ii) All parts and components in the kit are returned, except that one-for-one replacements may be made in accordance with the requirements of License Exception Servicing and Replacement of Parts and Equipment (RPL) and the defective parts and components returned (see Parts, Components, Accessories and Attachments in § 740.10(a)).

(4) Exhibition and demonstration. Commodities or software for exhibition or demonstration at trade shows, or to any entity that would be eligible to receive the commodities or software under paragraphs (a) through (e) of this section, may be exported or reexported under this paragraph (f). The commodities or software must remain under the “effective control” of the exporter or reexporter or its private sector agent, may not be exhibited or demonstrated at any one location for more than 30 days and may not be used for more than the minimum extent required for effective exhibition or demonstration.

(5) Containers. Containers that would require a license for export or reexport to Cuba but that are necessary for shipment of commodities being exported to Cuba under a license or license exception may be exported or reexported to Cuba. However, this paragraph (f) does not authorize the export of the container’s contents, which, if not exempt from licensing, must be separately authorized for export or reexport under either a license or a license exception.

§ 740.22 AUTHORIZED CYBERSECURITY EXPORTS (ACE)

(a) Scope

License Exception ACE authorizes export, reexport, and transfer (in-country), including deemed exports and reexports, of ‘cybersecurity items,’ as set forth in paragraph (b) of this section, subject to the restrictions set forth in paragraph

(c) of this section. Deemed exports and reexports are authorized under this license exception, except for deemed exports or reexports to E:1 and E:2 nationals as described in paragraph (c)(1) of this section, to certain ‘government end users’ as described in paragraph (c)(2) of this section, and subject to the end use restrictions described in paragraph (c)(4) of this section. Even if License Exception ACE is not available for a particular transaction, other license exceptions may be available. For example, License Exception GOV (§ 740.11) authorizes certain exports to U.S. Government agencies and personnel. License Exception TMP (§ 740.9(a)(1)) authorizes the export, reexport, and transfer (in country) of tools of the trade in certain situations.

(b) Definitions

The following terms and definitions are for the purpose of License Exception ACE only.

(1) ‘Cybersecurity Items’ are ECCNs 4A005, 4D001.a (for 4A005 or 4D004), 4D004, 4E001.a (for 4A005, 4D001.a (for 4A005 or 4D004) or 4D004), 4E001.c, 5A001.j, 5B001.a (for 5A001.j), 5D001.a (for 5A001.j), 5D001.c (for 5A001.j or 5B001.a (for 5A001.j)), and 5E001.a (for 5A001.j or 5D001.a (for 5A001.j)).

(2) ‘Digital artifacts’ are items (*e.g.*, “software” or “technology”) found or discovered on an information system that show past or present activity pertaining to the use or compromise of, or other effects on, that information system.

(3) ‘Favorable treatment cybersecurity end user’ is any of the following:

- (i) A “U.S. subsidiary”;
- (ii) Providers of banking and other financial services;
- (iii) Insurance companies; or
- (iv) Civil health and medical institutions

providing medical treatment or otherwise conducting the practice of medicine, including medical research.

(4) ‘**Government end user**,’ for the purpose of this section, is a national, regional, or local department, agency, or entity that provides any governmental function or service, including entities or individuals who are acting on behalf of such an entity. This term does not include any ‘favorable treatment cybersecurity end user’ listed in paragraph (b)(3) of this section. This term includes, but is not limited to:

- (i) International governmental organizations;
- (ii) Government operated research institutions;
- (iii) “More-sensitive government end users”;
- (iv) “Less-sensitive government end users”;
- (v) Utilities (including telecommunications service providers and internet service providers) that are wholly operated or owned by a government or governmental authority or ‘partially operated or owned by a government or governmental authority’;
- (vi) Transportation hubs and services (*e.g.*, airlines and airports; ships and ports; railways and rail stations; buses, trucking and highways) that are wholly operated or owned by a government or governmental authority or ‘partially operated or owned by a government or governmental authority’; and
- (vii) Retail or wholesale firms that are wholly operated or owned by a government or governmental authority or ‘partially operated or owned by a government or governmental authority’, engaged in the manufacture, distribution, or provision of items or services specified in the Wassenaar Arrangement Munitions List.

(5) For the purposes of this section, ‘**partially operated or owned by a government or governmental authority**’ means that a foreign

government or governmental authority beneficially owns or controls (whether directly or indirectly) 25 percent or more of the voting securities of the foreign entity, or a foreign government or governmental authority has the authority to appoint a majority of the members of the board of directors of the foreign entity.

(c) **Restrictions**

License Exception ACE does not authorize deemed exports and reexports, exports, reexports, or transfers (in-country) of ‘cybersecurity items’ as follows:

- (1) **To a destination** that is listed in Country Group E:1 or E:2 in supplement no.1 to this part.
- (2) **To a ‘government end user’**, as defined in this section, of any country listed in Country Group D:1, D:2, D:3, D:4 or D:5 in supplement no. 1 to this part, *except*:
 - (i) **‘Digital artifacts’** (that are related to a cybersecurity incident involving information systems owned or operated by a ‘favorable treatment cybersecurity end user’) to police or judicial bodies in Country Group D countries that are also listed in Country Group A:6 for purposes of criminal or civil investigations or prosecutions of such cybersecurity incidents; *or*
 - (ii) **To national computer security incident response teams** in Country Group D countries that are also listed in Country Group A:6 of ‘cybersecurity items’ for purposes of responding to cybersecurity incidents, for purposes of “vulnerability disclosure”, or for purposes of criminal or civil investigations or prosecutions of such cybersecurity incidents.
- (3) The restrictions in paragraphs (c)(1) and (2) of this section also apply to activities, including exports, reexports, and transfers (in-country), related to “vulnerability disclosure” and “cyber incident response”.

Note 1 to paragraph (c)(3): For paragraphs (c)(1) and (2) of this section, see Note 1 to ECCN

4E001 in the CCL (supplement no. 1 to part 774 of the EAR) excluding “vulnerability disclosure” and “cyber incident response” from control under 4E001.a or .c.

(4) To a non-‘government end user’ located in any country listed in Country Group D:1 or D:5 of supplement no. 1 to this part, *except*:

(i) Cybersecurity items classified under ECCNs 4A005, 4D001.a (for 4A005 or 4D004), 4D004, 4E001.a (for 4A005, 4D001.a (for 4A005 or 4D004) or 4D004) and 4E001.c, to any ‘favorable treatment cybersecurity end user’.

(ii) “Vulnerability disclosure” or “cyber incident response”.

(iii) Deemed exports.

(5) If the exporter, reexporter, or transferor “knows” or has “reason to know” at the time of export, reexport, or transfer (in-country), including deemed exports and reexports, that the ‘cybersecurity item’ will be used to affect the confidentiality, integrity, or availability of information or information systems, without authorization by the owner, operator, or administrator of the information system (including the information and processes within such systems).

SUPPLEMENT NO. 1 TO PART 740 – COUNTRY GROUPS

Supplement No. 1 to part 740 is in a separate electronic file.

**SUPPLEMENT NO. 2 TO PART 740 - ITEMS THAT MAY BE DONATED TO MEET
BASIC HUMAN NEEDS UNDER THE HUMANITARIAN LICENSE EXCEPTION**

(a) Health

Equipment for the Handicapped
Hospital Supplies and Equipment
Laboratory Supplies and Equipment
Medical Supplies and Devices
Medicine-Processing Equipment
Medicines
Vitamins
Water Resources Equipment

Food

Agricultural Materials and Machinery Suited to
Small-Scale Farming Operations

Agricultural Research and Testing Equipment

Fertilizers

Fishing Equipment and Supplies Suited to
Small-Scale Fishing Operations

(b) Food

Insecticides

Pesticides

Seeds

Small-Scale Irrigation Equipment

Veterinary Medicines and Supplies

(c) Clothes and Household Goods

Bedding

Clothes

Cooking Utensils

Fabric

Personal Hygiene Items

Soap-Making Equipment

Weaving and Sewing Equipment

(d) Shelter

Building Materials

Hand Tools

(e) Education

Books

Individual School Supplies

School Furniture

Special Education Supplies and Equipment for
the Handicapped

***(f) Basic Support Equipment and Supplies
Necessary to Operate and Administer the
Donative Program***

Audio-Visual Aids for Training

Generators

Office Supplies and Equipment

**SUPPLEMENT NO. 3 TO PART 740 - LICENSE EXCEPTION ENC FAVORABLE
TREATMENT COUNTRIES**

SUPPLEMENT NO. 4 TO PART 740 – ANNEX A FIREARM MODELS**(a) Pistols/revolvers.**

- (1) German Model P08 Pistol = SMCR.
- (2) IZH 34M, .22 Target pistol.
- (3) IZH 35M, .22 caliber Target pistol.
- (4) Mauser Model 1896 pistol = SMCR.
- (5) MC-57-1 pistol.
- (6) MC-1-5 pistol.
- (7) Polish Vis Model 35 pistol = SMCR.
- (8) Soviet Nagant revolver = SMCR.
- (9) TOZ 35, .22 caliber Target pistol.
- (10) MTs 440.
- (11) MTs 57-1.
- (12) MTs 59-1.
- (13) MTs 1-5.
- (14) TOZ-35M (starter pistol).
- (15) Biathlon-7K.

(b) Rifles.

- (1) BARS-4 Bolt Action carbine.
- (2) Biathlon target rifle, .22.
- (3) British Enfield rifle = SMCR.
- (4) CM2, .22 target rifle (also known as SM2, .22).
- (5) German model 98K =SMCR.
- (6) German model G41 = SMCR.
- (7) German model G43=SMCR.
- (8) IZH-94.
- (9) LOS-7, bolt action.
- (10) MC-7-07.
- (11) MC-18-3.
- (12) MC-19-07.
- (13) MC-105-01.
- (14) MC-112-02.

¹ *Note to Country Group D:5:* Countries subject to U.S. arms embargoes are identified by the State Department through notices published in the *Federal Register*. The list of arms embargoed destinations in this table is drawn from 22 CFR 126.1 and State Department *Federal Register* notices related to arms embargoes (compiled at www.pmddtc.state.gov/embargoed_countries/index.html) and will be amended when the State Department publishes subsequent notices. If there are any discrepancies between the list of countries in this table and the countries identified by the State Department as subject to a U.S. arms embargo (in the *Federal Register*), the State Department's list of countries subject to U.S. arms embargoes shall be controlling.

§ 742.1 INTRODUCTION

In this part, references to the Export Administration Regulations (EAR) are References to 15 CFR Chapter VII, Subchapter C.

(a) Scope

This part describes all the reasons for control reflected in the Country Chart in Supplement No.

1 to part 738 of the EAR. In addition, it includes licensing requirements and licensing policies for the following items that are not reflected on the Country Chart: specially designed implements of torture, high performance computers, and communications intercepting devices. In addition to describing the reasons for control and licensing requirements and policies, this part describes any applicable contract sanctity provisions that may apply to specific controls and includes a description of any multilateral regime under which specific controls are maintained.

(b) Reasons for control listed on the CCL not covered by this part

This part describes the license requirements and the licensing policies for all the “Reasons for Control” that are listed on the Commerce Control List (CCL) *except* “Short Supply” and “U.N. Sanctions”, which do not appear on the Country Chart.

(1) Short Supply. ECCNs containing items subject to short supply controls (“SS”) refer the exporter to part 754 of the EAR. These ECCNs are: 0A980 (Horses for export by sea); 1C980 (certain inorganic chemicals); 1C982 (certain other petroleum products); 1C983 (certain natural gas liquids and other natural gas derivatives); 1C984 (certain manufactured gas and synthetic natural gas (except when commingled with natural gas and thus subject to export authorization from the Department of Energy); and 1C988 (Unprocessed western red cedar (*Thuja plicata*) logs and timber, and rough, dressed and worked lumber containing wane).

(2) U.N. Sanctions. The United Nations imposes sanctions, short of complete embargoes, against certain countries which may result in controls that supplement those otherwise maintained under the EAR for that particular country. This part does *not* address license requirements and licensing policies for controls implementing U.N. sanctions. CCL entries

containing items subject to U.N. sanctions will refer the exporter to part 746 of the EAR, Embargoes and Other Special Controls, for any supplemental controls that may apply to exports and reexports involving these countries.

(c) Exports and reexports involving Cuba and Iran

This part does *not* cover license requirements and licensing policies that apply to exports and reexports to embargoed destinations (Cuba and Iran). These comprehensive embargoes cover a broader range of items than those reflected in the CCL. If you are exporting or reexporting to any of these destinations, you should first review part 746 of the EAR, Embargoes and Other Special Controls.

(d) Anti-terrorism Controls on Iran, North Korea, and Syria

Commerce maintains anti-terrorism controls on Iran, North Korea, and Syria under section 6(a) of the Export Administration Act. Items controlled under section 6(a) to Iran, Syria, and North Korea are described in §§ 742.8, 742.9, 742.10, and 742.19, respectively, and in Supplement No. 2 to part 742. Commerce also maintains controls under section 6(j) of the EAA to Iran, North Korea, and Syria. Items controlled to these countries under EAA section 6(j) are also described in Supplement 2 to part 742. The Secretaries of Commerce and State are required to notify appropriate Committees of the Congress 30 days before issuing a license for an item controlled under section 6(j) to North Korea, Iran, or Syria. If you are exporting or reexporting to Iran, North Korea, or Syria, you should review part 746 of the EAR, Embargoes and Other Special Controls.

(e) End-user and end-use based controls

This part does not cover prohibitions and licensing requirements for exports of items not included on the CCL that are subject to end-use and end-user controls: certain nuclear end-uses; certain missile end-uses; certain chemical and biological weapons end-uses; certain naval nuclear propulsion end-uses; certain activities of U.S. persons; and certain exports to and for the use of certain foreign vessels or aircraft. Licensing requirements and policies for these exports are contained in part 744 of the EAR.

(f) Overlapping license policies

Many items on the CCL are subject to more than one type of control (e.g., national security (NS), missile technology (MT), nuclear nonproliferation (NP), regional stability (RS)). In addition, applications for all items on the CCL, other than those controlled for short supply reasons, may be reviewed for missile technology (see §742.5(b)(3) of this part), nuclear nonproliferation (see §742.3(b)(2) of this part), or chemical and biological weapons (see §742.2(b)(3) of this part), if the end-use or end-user may be involved in certain proliferation activities. Finally, many multilaterally controlled items are reviewed for anti-terrorism reasons if they are destined for a terrorism-supporting country (see paragraph (d) of this section). Your application for a license will be reviewed under all applicable licensing policies. A license will be issued only if an application can be approved under *all applicable* licensing policies.

**§ 742.2 PROLIFERATION OF
CHEMICAL AND BIOLOGICAL
WEAPONS**

(a) License requirements

The following controls are maintained in support of the U.S. foreign policy of opposing the proliferation and illegal use of chemical and biological weapons. (See also §742.18 of this part for license requirements pursuant to the Chemical Weapons Convention).

(1) If CB Column 1 of the Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated in the appropriate ECCN, a license is required to all destinations, including Canada, for the following:

(i) Human pathogens, zoonoses, toxins, animal pathogens, genetically modified microorganisms and plant pathogens identified in ECCNs 1C351, 1C353, and 1C354; and

(ii) Technology (ECCNs 1E001 and 1E351) for the production and/or disposal of microbiological commodities described in paragraph (a)(1)(i) of this section.

(2) If CB Column 2 of the Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated in the appropriate ECCN, a license is required to all destinations except countries in Country Group A:3 (see Supplement No. 1 to part 740 of the EAR) (Australia Group members) for the following:

(i) Chemicals identified in ECCN 1C350 (precursor and intermediate chemicals used in the production of chemical warfare agents).

(A) This license requirement includes chemical mixtures identified in ECCN 1C350.b, .c, or .d, except as specified in License Requirements Note 2 to that ECCN.

(B) This licensing requirement does not include chemical compounds created with any chemicals identified in ECCN 1C350, unless those compounds are also identified in ECCN 1C350.

(C) This licensing requirement does not apply to any of the following medical, analytical, diagnostic, and food testing kits that consist of pre-packaged materials of defined composition that are specifically developed, packaged, and marketed for diagnostic, analytical, or public health purposes:

(1) Test kits containing no more than 300 grams of any chemical controlled by ECCN 1C350.b or .c (CB-controlled chemicals also identified as Schedule 2 or 3 chemicals under the CWC) that are destined for export or reexport to CWC States Parties (destinations listed in Supplement No. 2 to part 745 of the EAR). Such test kits are controlled by ECCN 1C395 for CB and CW reasons, to States not Party to the CWC (destinations not listed in Supplement No. 2 to part 745 of the EAR), and for AT reasons.

(2) Test kits that contain no more than 300 grams of any chemical controlled by ECCN 1C350.d (CB-controlled chemicals not also identified as Schedule 1, 2, or 3 chemicals under the CWC). Such test kits are controlled by ECCN 1C995 for AT reasons.

(ii) Software (ECCN 1D390) for process control that is specifically configured to control or initiate production of the chemical precursors controlled by ECCN 1C350.

(iii) Technology (ECCN 1E001) for the development or production of chemical detection systems and dedicated detectors therefore, controlled by ECCN 1A004.c, that also have the technical characteristics described in ECCN 2B351.a.

(iv) Technology (ECCNs 1E001 and 1E350) involving the following for facilities designed or intended to produce chemicals described in 1C350:

(A) Overall plant design;

(B) Design, specification, or procurement of equipment;

(C) Supervision of construction, installation, or operation of complete plant or components thereof;

(D) Training of personnel; or

(E) Consultation on specific problems involving such facilities.

(v) Technology (ECCNs 1E001 and 1E351) for the production and/or disposal of chemical precursors described in ECCN 1C350;

(vi) Equipment and materials identified in ECCN 2B350 or 2B351 on the CCL, chemical detection systems controlled by 1A004.c for detecting chemical warfare agents and having the characteristics of toxic gas monitoring systems described in 2B351.a, and valves controlled by ECCN 2A226 having the characteristics of those described in 2B350.g, which can be used in the production of chemical weapons precursors or chemical warfare agents.

(vii) Equipment and materials identified in ECCN 2B352, which can be used in the production of biological agents.

(viii) Software identified in ECCN 2D351 or 2D352, as follows:

(A) Dedicated software identified in ECCN 2D351 for the “use” of toxic gas monitoring systems and their dedicated detecting components controlled by ECCN 2B351;

(B) Software designed for nucleic acid assemblers and synthesizers controlled by 2B352.j that is capable of designing and building functional genetic elements from digital sequence data.

(ix) Technology identified in ECCN 2E001 for the “development” of software controlled by ECCN 2D351 or 2D352.

(x) Technology identified in ECCN 2E001, 2E002, or 2E301 for:

(A) The development, production, or use of items controlled by ECCN 2B350, 2B351, or 2B352; or

(B) The development or production of valves controlled by ECCN 2A226 having the characteristics of those described in ECCN 2B350.g.

(xi) Technology identified in ECCN 2E201 or 2E290 for the use of valves controlled by ECCN 2A226 having the characteristics of those described in 2B350.g.

(3) If CB Column 3 of the Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated in the appropriate ECCN, a license is required to Country Group D:3 (see Supplement No. 1 to part 740 of the EAR) for medical products identified in ECCN 1C991.c.

(4) A license is required, to States not Party to the CWC (destinations *not* listed in Supplement No. 2 to part 745 of the EAR), for mixtures controlled by ECCN 1C395.a and test kits controlled by ECCN 1C395.b.

(b) Licensing policy

(1) License applications for the items described in paragraph (a) of this section will be considered on a case-by-case basis to determine whether the export or reexport would make a material contribution to the design, development, production, stockpiling or use of chemical or biological weapons. When an export or reexport is deemed to make such a material contribution, the license will be denied. When an export or reexport is intended to be used in a chemical

weapons or biological weapons program, or for chemical or biological weapons terrorism purposes, it is deemed to make a material contribution. The factors listed in paragraph (b)(2) of this section are among those that will be considered to determine what action should be taken on license applications for these items.

(2) The following factors are among those that will be considered to determine what action should be taken on license applications for the items described in paragraph (a) of this section:

(i) The specific nature of the end-use, including the appropriateness of the stated end-use;

(ii) The significance of the export and reexport in terms of its potential contribution to the design, development, production, stockpiling, or use of chemical or biological weapons;

(iii) The nonproliferation credentials of the importing country, including the importing country’s chemical and biological capabilities and objectives;

(iv) The extent and effectiveness of the export control system in the importing country and in any intermediary country through which the items being exported or reexported will transit or be transshipped en route to the importing country;

(v) The risk that the items will be diverted for use in a chemical weapons or biological weapons program, or for chemical weapons or biological weapons terrorism purposes;

(vi) The reliability of the parties to the transaction, including whether:

(A) An export or reexport license application involving any such parties has previously been denied;

(B) Any such parties have been engaged in clandestine or illegal procurement activities;

(C) The end-user is capable of securely handling and storing the items to be exported or reexported;

(vii) Relevant information about proliferation and terrorism activities, including activities involving the design, development, production, stockpiling, or use of chemical or biological weapons by any parties to the transaction;

(viii) The types of assurances or guarantees against the design, development, production, stockpiling, or use of chemical or biological weapons that are given in a particular case, including any relevant assurances provided by the importing country or the end-user;

(ix) The applicability of other multilateral export control or nonproliferation agreements (e.g., the Chemical Weapons Convention and the Biological and Toxin Weapons Convention) to the transaction; and

(x) The existence of a pre-existing contract.

(3) BIS will review license applications in accordance with the licensing policy described in paragraph (b)(1) of this section for items not described in paragraph (a) of this section that:

(i) Require a license for reasons other than short supply; *and*

(ii) Could be destined for the design, development, production, stockpiling, or use of chemical or biological weapons, or for a facility engaged in such activities.

(4) License applications for items described in paragraph (a) of this section, when destined for the People's Republic of China will be reviewed in accordance with the licensing policies in both

paragraph (b) of this section and § 742.4(b)(7). When such items are destined to Russia or Belarus, license applications will be reviewed under a policy of denial. However, exports and reexports of items to Russia or Belarus in support of U.S.-Russia or U.S.-Belarus civil space cooperation activities will be reviewed on a case-by-case basis, as well as certain other certain specified activities specified in § 746.8 of the EAR. See § 746.8(b).

(c) Contract sanctity

Contract sanctity dates are set forth in Supplement No. 1 to part 742. Applicants who wish that a pre-existing contract be considered in reviewing their license applications must submit documentation sufficient to establish the existence of such a contract.

(d) Australia Group

The Australia Group, a multilateral body that works to halt the spread of chemical and biological weapons, has developed common control lists of items specifically related to chemical and biological weapons. Australia Group members are listed in Country Group A:3 (see Supplement No. 1 to part 740 of the EAR). Controls on items listed in paragraph (a) of this section are consistent with lists agreed to in the Australia Group.

(e) License application requirements and instructions

Unique application and submission requirements for chemicals, medicinals, and pharmaceuticals are described in paragraph (a) of Supplement No. 2 to part 748 of the EAR.

**§ 742.3 NUCLEAR
NONPROLIFERATION**

(a) License requirements

Section 309(c) of the Nuclear Non-Proliferation Act of 1978 requires BIS to identify items subject to the EAR that could be of significance for nuclear explosive purposes if used for activities other than those authorized at the time of export or reexport. ECCNs on the CCL that include the symbols “NP” or “NP 2” in the “Country Chart” column of the “License Requirements” section identify items that could be of significance for nuclear explosive purposes and are therefore subject to licensing requirements under this part and under section 309(c) of the Nuclear Non-Proliferation Act of 1978. These items are referred to as “The Nuclear Referral List” and are subject to the following licensing requirements:

(1) If NP Column 1 of the Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated in the appropriate ECCN, a license is required to all destinations, except those Nuclear Suppliers Group (NSG) member countries that are listed under Country Group A:4 in Supplement No. 1 to part 740 of the EAR.

(2) If NP Column 2 of the Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated in the applicable ECCN, a license is required to Country Group D:2 (see Supplement No. 1 to part 740 of the EAR).

(3) Other nuclear-related license requirements are described in §§744.2 and 744.5 of the EAR.

(b) Licensing policy

(1) To implement the controls in paragraph (a) of this section, the following factors are among those used to determine what action should be taken on individual applications:

(i) Whether the items to be transferred are appropriate for the stated end-use and whether that stated end-use is appropriate for the end-user;

(ii) The significance for nuclear purposes of the particular item;

(iii) Whether the items to be exported or reexported are to be used in research on, or for the development, design, manufacture, construction, operation, or maintenance of, any reprocessing or enrichment facility;

(iv) The types of assurances or guarantees given against use for nuclear explosive purposes or proliferation in the particular case;

(v) Whether any party to the transaction has been engaged in clandestine or illegal procurement activities;

(vi) Whether an application for a license to export or reexport to the end-user has previously been denied, or whether the end-user has previously diverted items received under a general license, a License Exception, or a validated license to unauthorized activities;

(vii) Whether the export or reexport would present an unacceptable risk of diversion to a nuclear explosive activity or unsafeguarded nuclear fuel-cycle activity described in §744.2(a) of the EAR;

(viii) The nonproliferation credentials of the importing country, based on consideration of the following factors:

(A) Whether the importing country is a party to the Nuclear Non-Proliferation Treaty (NPT) or to the Treaty for the Prohibition of Nuclear Weapons in Latin America (Treaty of Tlatelolco) or to a similar international legally-binding nuclear nonproliferation agreement;

(B) Whether the importing country has all of its nuclear activities, facilities, or installations that are operational, being designed, or under construction under International Atomic

Energy Agency (IAEA) safeguards or equivalent full scope safeguards;

(C) Whether there is an agreement for cooperation in the civil uses of atomic energy between the U.S. and the importing country;

(D) Whether the actions, statements, and policies of the government of the importing country are in support of nuclear nonproliferation and whether that government is in compliance with its international obligations in the field of non-proliferation;

(E) The degree to which the government of the importing country cooperates in non-proliferation policy generally (e.g., willingness to consult on international nonproliferation issues); and

(F) Information on the importing country's nuclear intentions and activities; and

(ix) Whether the recipient state has sufficient national export controls (as described in paragraph 3 of United Nations Security Council Resolution 1540 (2004)) to prevent an unacceptable risk of retransfer or diversion to a nuclear explosive activity or unsafeguarded nuclear fuel-cycle activity described in § 744.2(a) of the EAR.

(2) In addition, BIS will review license applications in accordance with the licensing policy described in paragraph (b) of this section for items *not* on the Nuclear Referral List that:

(i) Require a license on the CCL for reasons other than “short supply;” and

(ii) Are intended for a nuclear related end-use or end-user.

(3) For the People's Republic of China, the general licensing policy for applications for those items that would make a direct and significant

contribution to nuclear weapons and their delivery systems is extended review or denial.

(4) License applications for items described in paragraph (a) of this section, when destined for the People's Republic of China will be reviewed in accordance with the licensing policies in both paragraph (b) of this section and § 742.4(b)(7). When such items are destined to Russia or Belarus, license applications will be reviewed under a policy of denial. However, exports and reexports of items to Russia or Belarus in support of U.S.-Russia or U.S.-Belarus civil space cooperation activities or in support of Russian manufactured nuclear power plants in Russia or other destinations will be reviewed on a case-by-case basis. See § 746.8(b) of the EAR.

(c) Contract sanctity

Contract sanctity provisions are not available for license applications reviewed under this section.

(d) Nuclear Suppliers Group

Most items on the Nuclear Referral List that require a license under NP Column No. 1 on the Country Chart (see Supplement No. 1 to part 738 of the EAR) are contained in the Annex to the “Guidelines for Transfers of Nuclear-Related Dual-Use Equipment, Material, and Related Technology” (the Annex), as published by the International Atomic Energy Agency in INFCIRC/254/Revision 1/Part 2. The adherents to INFCIRC/254/Revision 1/Part 2, which includes the Nuclear Suppliers Guidelines, have agreed to establish export licensing procedures for the transfer of items identified in the Annex. Items that are listed as requiring a license under NP Column No. 2 on the Country Chart (see Supplement No. 1 to part 738 of the EAR) are not included in the Annex and are controlled only by the United States.

§ 742.4 NATIONAL SECURITY

(a) License requirements

It is the policy of the United States to restrict the export and reexport of items that would make a significant contribution to the military potential of any other country or combination of countries that would prove detrimental to the national security of the United States. Accordingly, a license is required for exports and reexports to all destinations, except Canada, for all items in ECCNs on the CCL that include NS Column 1 in the Country Chart column of the “License Requirements” section. A license is required to all destinations except those in Country Group A:1 (see Supplement No. 1 to part 740), for all items in ECCNs on the CCL that include NS column 2 in the Commerce Country Chart column of the “License Requirements” section except those cameras in ECCN 6A003.b.4.b that have a focal plane array with 111,000 or fewer elements and a frame rate of 60 Hz or less. A license is required to all destinations except those in Country Group A:1 (see Supplement No. 1 to part 740) for those cameras in ECCN 6A003.b.4.b that have a focal plane array with 111,000 or fewer elements and a frame rate of 60 Hz or less and for cameras being exported or reexported pursuant to an authorization described in §742.6(a)(2)(iii) or (v) of the EAR. The purpose of the controls is to ensure that these items do not make a contribution to the military potential of countries in Country Group D:1 (see Supplement No. 1 to part 740 of the EAR) that would prove detrimental to the national security of the United States. License Exception GBS is available for the export and reexport of certain national security controlled items to Country Group B (see §740.4 and Supplement No. 1 to part 740 of the EAR).

(b) Licensing policy

(1)(i) The policy for national security controlled items exported or reexported to any country except a country in Country Group D:1 (see Supplement No. 1 to part 740 of the EAR) is to approve applications unless there is a significant risk that the items will be diverted to a country in Country Group D:1.

(ii) When destined to a country listed in Country Group D:5 in Supplement No. 1 to Part 740 of the EAR, however, items classified under 9x515 or “600 series” ECCNs will be reviewed consistent with United States arms embargo policies in § 126.1 of the ITAR.

(iii) When destined to the People’s Republic of China or a country listed in Country Group E:1 in Supplement No. 1 to Part 740 of the EAR, items classified under any 9x515 ECCN will be subject to a policy of denial.

(2) Except for those countries described in paragraphs (b)(5) through (b)(7) of this section, the general policy for exports and reexports of items to Country Group D:1 (see Supplement No. 1 to part 740 of the EAR) is to approve applications when BIS determines, on a case-by-case basis, that the items are for civilian use or would otherwise not make a significant contribution to the military potential of the country of destination that would prove detrimental to the national security of the United States.

(3) To permit such policy judgments to be made, each application is reviewed in the light of prevailing policies with full consideration of all aspects of the proposed transaction. The review generally includes:

(i) An analysis of the kinds and quantities of items to be shipped;

(ii) Their military or civilian uses;

(iii) The unrestricted availability abroad of the same or comparable items;

- (iv) The country of destination;
- (v) The ultimate end-users in the country of destination; and
- (vi) The intended end-use.

(4) Although each proposed transaction is considered individually, items described in Advisory Notes on the Commerce Control List are more likely to be approved than others.

(5) In recognition of efforts made to adopt safeguard measures for exports and reexports, Kazakhstan and Mongolia are accorded enhanced favorable consideration licensing treatment.

(6) The general policy for Laos is to approve license applications when BIS determines, on a case-by-case basis, that the items are for an authorized use in Laos and are not likely to be diverted to another country or use contrary to the national security or foreign policy controls of the United States.

(7)(i) For Burma, Cambodia, the People's Republic of China (China), and Venezuela, all applications will be reviewed to determine the risk of diversion to a military end user or military end use. There is a general policy of approval for license applications to export, reexport, or transfer items determined to be for civil end users for civil end uses. There is a presumption of denial for license applications to export reexport, or transfer items that would make a material contribution to the "development," "production," maintenance, repair, or operation of weapons systems, subsystems, and assemblies, such as, but not limited to, those described in supplement no. 7 to this part, of Burma, Cambodia, China, or Venezuela.

(ii) The following factors are among those that will be considered in reviewing license applications described in paragraph (b)(7)(i) of this section:

(A) The appropriateness of the export, reexport, or transfer for the stated end use;

(B) The significance of the item for the weapon systems capabilities of the importing country;

(C) Whether any party is a 'military end user' as defined in § 744.21(g) of the EAR;

(D) The reliability of the parties to the transaction, including whether:

(1) An export or reexport license application has previously been denied;

(2) Any parties are or have been engaged in unlawful procurement or diversion activities;

(3) The parties are capable of securely handling and storing the items; and

(4) End-use checks have been and may be conducted by BIS or another U.S. Government agency on parties to the transaction;

(E) The involvement of any party to the transaction in military activities, including activities involving the "development," "production," maintenance, repair, or operation of weapons systems, subsystems, and assemblies;

(F) Government strategies and policies that support the diversion of exports from their stated civil end use and redirection towards military end use; and

(G) The scope and effectiveness of the export control system in the importing country.

(iii) The review will also include an assessment of the impact of a proposed export of an item on the United States defense industrial base and the denial of an

application for a license that would have a significant negative impact, as defined in section 1756(d)(3) of the Export Control Reform Act of 2018 (50 U.S.C. 4815(d)(3)), on such defense industrial base.

(8) For India, there is a general policy of approval for license applications to export, reexport, or transfer items, including "600 series" items, for civil or military end uses in India, for ultimate end use by the Government of India, for reexport to countries in Country Group A:5, or for return to the United States, so long as such items are not for use in nuclear, "missile," or chemical or biological weapons activities.

(9) For the Russian Federation and Belarus, all applications will be reviewed in accordance with the licensing policy set forth in § 746.8(b) of the EAR.

(c) Contract sanctity

Contract sanctity provisions are not available for license applications reviewed under this section.

(d) [RESERVED]

§ 742.5 MISSILE TECHNOLOGY

(a) License requirements

(1) In support of U.S. foreign policy to limit the proliferation of missiles, a license is required to export and reexport items related to the design, development, production, or use of missiles. These items are identified in ECCNs on the CCL as MT Column No. 1 in the Country Chart column of the "License Requirements" section. Licenses for these items are required to all destinations, except Canada, as indicated by MT Column 1 of the Country Chart (see Supplement No. 1 to part 738 of the EAR).

(2) The term "missiles" is defined as rocket systems (including ballistic missiles, space launch vehicles, and sounding rockets) and unmanned aerial vehicle systems (including cruise missiles, target drones, and reconnaissance drones) capable of delivering at least 500 kilograms (kg) payload to a range of at least 300 kilometers (km). See §746.3 of the EAR for definition of a "ballistic missile" to be exported or reexported to Iraq.

(b) Licensing policy

(1) Applications to export and reexport items identified in ECCNs on the CCL as MT Column No. 1 in the Country Chart column of the "License Requirements" section will be considered on a case-by-case basis to determine whether the export or reexport would make a material contribution to the proliferation of missiles. Applications for exports and reexports of such items contained in Category 7A or described by ECCN 9A101 on the CCL will be considered favorably if such exports or reexports are destined to a manned aircraft, satellite, land vehicle, or marine vessel, in quantities appropriate for replacement "parts" and "components" for such applications. When an export or reexport is deemed to make a material contribution to the proliferation of missiles, the license will be denied.

Note 1 to paragraph (b)(1): Applications to export and reexport an Unmanned Aerial Vehicle (UAV) that has a range and payload capability equal to or greater than 300 km/500 kg but a maximum true airspeed of less than 800 km/hr, and items controlled for Missile Technology reasons for the design, development, production, or use of UAV systems that meet these parameters, will not be subject to a policy of denial but will instead be reviewed on a case-by-case basis to determine whether the export or reexport will be used in support of WMD activities or military activities contrary to U.S.

national security, or whether there is a risk of diversion to support such activities.

(2) The following factors are among those that will be considered in reviewing individual applications.

(i) The specific nature of the end-use;

(ii) The significance of the export and reexport in terms of its contribution to the design, development, production, or use of missiles;

(iii) The capabilities and objectives of the missile and space programs of the recipient country;

(iv) The nonproliferation credentials of the importing country;

(v) The types of assurances or guarantees against design, development, production, or use of missiles that are given in a particular case; and

(vi) The existence of a pre-existing contract.

(3)(i) Consistent with the MTCR Annex *General Minimum Software Note*, MTCR Annex *General Technology Note* and § 750.7(c)(1)(x) of the EAR, the approval of any item controlled for MT reasons on a BIS license also authorizes the export, reexport, or transfer (in-country) to the same ultimate consignee(s) and end user(s) specified on the license of the minimum “software,” excluding source code, controlled for MT reasons that is required for the installation, operation, maintenance or repair of the item and the “technology” required for the installation, operation, maintenance, or repair of the item in order to ensure the item’s safe operation as originally intended. The approval of any item controlled for MT reasons on a BIS license also authorizes the later export, reexport, or transfer (in-country) of “software” controlled for MT reasons intended to correct defects (bug fixes) in a previously legally exported item under a BIS

license to the same ultimate consignee(s) and end user(s) specified on the license, provided that the capability and/or performance of the item are not otherwise enhanced. This MT licensing policy is implemented concurrent with § 750.7(c)(1)(x) because it applies to all MT licenses, except when a condition is placed on the license which excludes the use of § 750.7(c)(1)(x), as described in paragraph (b)(3)(ii) of this section.

(ii) Applicants are not required to identify or provide any support documentation for such minimum “software” or “technology” on a license application for MT controlled items because such minimum “software” or “technology” is authorized within the scope of the license, consistent with § 750.7(c)(1)(x). Applicants will be informed when such minimum “software” and/or “technology” in § 750.7(c)(1)(x) is excluded from the license by a BIS condition on the license, which will state the following: *“This license does not authorize the export, reexport or transfer (in-country) of the minimum “software” and/or “technology” specified in paragraph (c)(1)(x) of § 750.7 (See paragraph (b)(3) of § 742.5).”*

Note to paragraph (b)(3): License Exception TSU under § 740.13 of the EAR is available for the ECCNs controlled for MT reasons specified in paragraph (a)(5) in § 740.2, provided the software or technology is for an end use specified in that paragraph and meets the requirements of License Exception TSU. (See §§ 740.2(a)(5) and 740.13). The licensing policy in paragraph (b)(3) is only available for licensed exports (or reexports, or transfers (in-country)).

(4) **Controls on other items.** BIS will review license applications, in accordance with the licensing policy described in paragraph (b)(1) of this section, for items *not* described in paragraph (a) of this section that:

(i) Require a validated license for reasons other than short supply; and

(ii) Could be destined for the design, development, production, or use of missiles, or for a facility engaged in such activities.

(5) License applications for items described in paragraph (a) of this section, when destined for the People’s Republic of China, will be reviewed in accordance with the licensing policies in both paragraph (b) of this section and § 742.4(b)(7). When such items are destined to Russia or Belarus, license applications will be reviewed under a policy of denial. However, exports and reexports of items to Russia or Belarus in support of U.S.-Russia or U.S.-Belarus civil space cooperation activities will be reviewed on a case-by-case basis. See § 746.8(b) of the EAR.

(c) Contract sanctity

The following contract sanctity dates have been established:

(1) License applications for batch mixers specified in ECCN 1B117 involving contracts that were entered into prior to January 19, 1990, will be considered on a case-by-case basis.

(2) License applications subject to ECCN 1B115.b or .c that involve a contract entered into prior to March 7, 1991, will be considered on a case-by-case basis.

(3) Applicants who wish that a pre-existing contract be considered in reviewing their license applications must submit documentation sufficient to establish the existence of a contract.

(d) Missile Technology Control Regime

Missile Technology Control Regime (MTCR) members are listed in Country Group A:2 (see Supplement No. 1 to part 740 of the EAR). Controls on items identified in paragraph (a) of this section are consistent with the list agreed to in the MTCR and included in the MTCR Annex.

§ 742.6 REGIONAL STABILITY

(a) License requirements

The following controls are maintained in support of U.S. foreign policy to maintain regional stability:

(1) RS Column 1 license requirements in general. A license is required for exports and reexports to all destinations, except Canada, for all items in ECCNs on the CCL that include RS Column 1 in the Country Chart column of the “License Requirements” section. Transactions described in paragraphs (a)(2),(3), or (9) of this section are subject to the RS Column 1 license requirements set forth in those paragraphs rather than the license requirements set forth in this paragraph (a)(1).

(2) Special RS Column 1 license requirements applicable to certain thermal imaging cameras.

(i) As indicated in the CCL and in RS Column 1 of the Commerce Country Chart, cameras described in 6A003 b.4.b require a license to all destinations other than Canada if such cameras have a frame rate greater than 60 Hz.

(ii) Except as noted in paragraph (a)(2)(iii) of this section, as indicated in the CCL and in RS Column 1 of the Commerce Country Chart, cameras described in 6A003 b.4.b require a license to all destinations other than Canada if such cameras incorporate a focal plane array with more than 111,000 elements and a frame rate of 60 Hz or less, or cameras described in 6A003 b.4.b that are being exported or reexported to be embedded in a civil product.

(iii) BIS may issue licenses for cameras subject to the license requirement of paragraph

(a)(2)(ii) of this section that are fully-packaged for use as consumer-ready civil products that, in addition to the specific transactions authorized by such license, authorize exports and reexports of such cameras without a license to any civil end-user to whom such exports or reexport are not otherwise prohibited by U.S. law in a destination in Country Group A:1 (see Supplement No. 1 to part 740) . The license requirements of this paragraph (a)(2) shall not apply to exports or reexports so authorized. In this paragraph, the term “civil end-user” means any entity that is not a national armed service (army, navy, marine, air force, or coast guard), national guard, national police, government intelligence organization or government reconnaissance organization, or any person or entity whose actions or functions are intended to support “military end-uses” as defined in § 744.17(d).

(iv) Except as noted in paragraph (a)(2)(v) of this section, as indicated in the CCL and in RS Column 1 of the Commerce Country Chart, cameras described in 6A003 b.4.b require a license to all destinations other than Canada if such cameras incorporate a focal plane array with 111,000 elements or less and a frame rate of 60 Hz or less and are being exported or reexported to be embedded in a civil product.

(v) BIS may also issue licenses for the cameras described in paragraph (a)(2)(iv) that, in addition to the specific transactions authorized by such license, authorize exports and reexports to authorized companies described in the license for the purpose of embedding such cameras into a completed product that will be distributed only in countries in Country Group A:1 (see Supplement No. 1 to part 740). The license requirements of this paragraph (a)(2) shall not apply to exports or reexports so authorized. In this paragraph, the term “authorized companies” means companies that have been previously licensed for export, are not the subject of relevant negative intelligence or open source information, have not been the subject of a Department of Commerce or

Department of State enforcement action within the past two years, have demonstrable production capacity, and do not pose an unacceptable risk of diversion.

(3) Special RS Column 1 license requirement applicable to military commodities. A license is required for reexports to all destinations except Canada for items classified under ECCN 0A919 except when such items are being reexported as part of a military deployment by a unit of the government of a country in Country Group A:1 (see Supplement No. 1 to part 740) or the United States.

(4) RS Column 2 license requirements.

(i) *License Requirements Applicable to Most RS Column 2 Items.* As indicated in the CCL and in RS Column 2 of the Commerce Country Chart (see Supplement No. 1 to part 738 of the EAR), a license is required to any destination except those in Country Group A:1 (see Supplement No. 1 to part 740 of the EAR) and India for all items in ECCNs on the CCL that include RS Column 2 in the Country Chart column of the “License Requirements” section. A license continues to be required for items controlled under ECCNs 6A003.b.4.b and 9A515.e for RS Column 2 reasons when destined to India.

(ii) *Special RS Column 2 license requirements applicable only to certain cameras.* As indicated by the CCL, and RS column 2 and footnote number 4 to the Commerce Country Chart, a license is required to any destination except a country in Country Group A:1 (see Supplement No. 1 to part 740) for fully-packaged thermal imaging cameras for use as consumer-ready civil products controlled by 6A003.b.4.b when incorporating “focal plane arrays” that have not more than 111,000 elements and a frame rate of 60Hz or less and that are not being exported or reexported to be embedded in a civil product.

(5) RS requirements that apply to Iraq. As indicated on the CCL, a license is required for the export or reexport to Iraq or transfer within Iraq of the following items controlled for RS reasons on the CCL: 0B999, 0D999, 1B999, 1C992, 1C995, 1C997, 1C999 and 6A992. The Commerce Country Chart is not designed to determine RS licensing requirements for these ECCNs.

(6) RS Requirement that applies to the People’s Republic of China (China) and Macau for advanced computing and semiconductor manufacturing items.

(i) Exports, reexports, transfers (in-country). A license is required for items specified in ECCNs 3A090, 3B090, 4A090, 5A992 (that meet or exceed the performance parameters of ECCNs 3A090 or 4A090) and associated software and technology in 3D001 (for 3A090 or 3B090), 3E001 (for 3A090 or 3B090), 3B090, or 3D001 (for 3A090 or 3B090), 4D090, 4E001 (for 4A090 and 4D090), and 5D992 (that meet or exceed the performance parameters of ECCNs 3A090 or 4A090) being exported, reexported, or transferred (in-country) to or within China or Macau. A license is also required for the export from China or Macau to any destination worldwide of 3E001 (for 3A090) technology developed by an entity headquartered in China or Macau that is the direct product of software subject to the EAR and is for the “production” of commodities identified in ECCNs 3A090, 4A090, or identified elsewhere on the CCL that meet or exceed the performance parameters of ECCNs 3A090 or 4A090, consistent with §§ 734.9(h)(1)(i)(B)(1) and (h)(2)(ii) of the EAR.

(ii) Deemed exports. The license requirements in (a)(6) do not apply to deemed exports or deemed reexports.

(7) RS requirement that applies to the People’s Republic of China (China), Russia, or Venezuela. A license is required to export or reexport to China, Russia, or Venezuela any item described in a .y paragraph of a 9x515 or “600 series” ECCN, except for exports or reexports to Russia for use in, with, or for the International Space Station (ISS), including launch to the ISS. (See § 740.11(e)(1) of the EAR for a definition of the ISS.)

(8) RS Column 1 license requirements and related policies for ECCN 0Y521 items.

(i) Scope. This paragraph (a)(8) supplements the information in the 0Y521 ECCNs and in Supplement No. 5 to part 774 (Items Classified Under ECCNs 0A521, 0B521, 0C521, 0D521 and 0E521). This paragraph alerts exporters, reexporters and transferors to the procedures that apply to items classified under the 0Y521 ECCNs.

(ii) 0Y521 Items. Items subject to the EAR that are not listed elsewhere in the CCL, but which the Department of Commerce, with the concurrence of the Departments of Defense and State, has determined should be controlled for export because the items provide at least a significant military or intelligence advantage to the United States or for foreign policy reasons are classified under ECCNs 0A521, 0B521, 0C521, 0D521 and 0E521. These items are typically emerging technologies (including emerging commodities, software and technology) that are not yet included in the CCL, so such items are listed on the CCL in 0Y521 ECCNs while the U.S. Government determines whether classification under a revised or new ECCN, or an EAR 99 designation, is appropriate. The list of items classified under a 0Y521 ECCN is limited to those listed in Supplement No. 5 to part 774.

(iii) Requirement to be classified under another ECCN within one calendar year of

classification under ECCN 0Y521. Items classified under an ECCN 0Y521 entry must be re-classified under another ECCN within one calendar year from the date they are listed in Supplement No. 5 to part 774 of the EAR. If such re-classification does not occur within that period, classification under an ECCN 0Y521 entry expires, and such items are designated as EAR99 items unless either the CCL is amended to impose a control on such items under another ECCN or the ECCN 0Y521 classification is extended. BIS may extend an item's ECCN 0Y521 classification for two one-year periods, provided that the U.S. Government has submitted a proposal to the relevant multilateral regime(s) to obtain multilateral controls over the item. Further extension beyond three years may occur only if the Under Secretary for Industry and Security makes a determination that such extension is in the national security or foreign policy interests of the United States. Any extension or re-extension of control of an ECCN 0Y521 item, including the determination by the Under Secretary, shall be published in the *Federal Register*.

(9) Special RS Column 1 license requirement applicable to certain spacecraft and related items. A license is required for all destinations, including Canada, for spacecraft and related items classified under ECCN 9A515.a.1, .a.2., .a.3., .a.4., .g, and ECCN 9E515.f.

(b) Licensing policy

(1) Licensing policy for RS Column 1 items.
(i) Applications for exports and reexports of ECCN 0A501, 0A504, 0A505, 0B501, 0B505, 0D501, 0D505, 0E501, 0E504, and 0E505 items; 9x515 items and “600 series” items will be reviewed on a case-by-case basis to determine whether the transaction is contrary to the national security or foreign policy interests of the United States, including the foreign policy interest of promoting the observance of human rights throughout the world. Other applications for

exports and reexports described in paragraph (a)(1), (2), (6), or (8) of this section will be reviewed on a case-by-case basis to determine whether the export or reexport could contribute directly or indirectly to any country's military capabilities in a manner that would alter or destabilize a region's military balance contrary to the foreign policy interests of the United States. Applications for reexports of items described in paragraph (a)(3) of this section will be reviewed applying the policies for similar commodities that are subject to the ITAR. Applications for export or reexport of items classified under any 9x515 or “600 series” ECCN requiring a license in accordance with paragraph (a)(1) or (9) of this section will also be reviewed consistent with United States arms embargo policies in § 126.1 of the ITAR (22 CFR 126.1) if destined to a country set forth in Country Group D:5 in Supplement No. 1 to part 740 of the EAR. Applications for export or reexport of “parts,” “components,” “accessories,” “attachments,” “software,” or “technology” “specially designed” or otherwise required for the F-14 aircraft will generally be denied. When destined to China or a country listed in Country Group E:1 in Supplement No. 1 to part 740 of the EAR, items classified under ECCN 0A501, 0A505, 0B501, 0B505, 0D501, 0D505, 0E501, 0E504, and 0E505 or any 9x515 ECCN will be subject to a policy of denial. In addition, applications for exports and reexports of ECCN 0A501, 0A505, 0B501, 0B505, 0D501, 0D505, 0E501, 0E504, and 0E505 items when there is reason to believe the transaction involves criminal organizations, rebel groups, street gangs, or other similar groups or individuals, that may be disruptive to regional stability, including within individual countries, will be subject to a policy of denial.

(ii) Applications for exports and reexports to a country listed in Country Group D:5 (in supplement no. 1 to part 740 of the EAR) of technology controlled under 6E001 for the development of focal plane arrays, read-out integrated circuits (ROICs) or image intensifier

tubes described in 6A002 or technology controlled under 6E002 for the production of focal plane arrays, read-out integrated circuits (ROICs) or image intensifier tubes described in 6A002 will be reviewed with a presumption of denial.

(2) Licensing policy for RS Column 2 items.

(i) Except as described in paragraph (b)(2)(ii), applications to export and reexport commodities described in paragraph (a)(4) of this section will generally be considered favorably on a case-by-case basis unless there is evidence that the export or reexport would contribute significantly to the destabilization of the region to which the equipment is destined.

(ii) Applications to export and reexport items controlled under ECCNs 2A984, 2D984 and 2E984 will be reviewed under a presumption of approval when exported or reexported to Austria, Cyprus, Finland, Ireland, Israel, Malta, Mexico, Singapore or Sweden, provided the items to be exported or reexported are being made to a government end-user or to a person designated by the government end-user pursuant to contract. License applications to export to a designated person must include a statement from the government end-user that the person is so designated. See Supplement No. 2 to part 748, paragraph (k)(2).

(3) For terrorist-designated countries, the applicable licensing policies are found in parts 742 and 746 of the EAR

(4) See §746.3(b) of the EAR for the applicable licensing policies for items controlled for RS reasons to Iraq.

(5) Spacecraft for launch.

(i) Applications to export or reexport a “spacecraft” controlled under ECCN 9A515.a for

launch in or by a country that is not a member of the North Atlantic Treaty Organization (NATO) or a major non-NATO ally of the United States (as defined in 22 CFR 120.31 and 120.32), will require a technology transfer control plan approved by the Department of Defense, an encryption technology control plan approved by the National Security Agency, and Department of Defense monitoring of all launch activities.

(ii) Applications to export or reexport a “spacecraft” controlled under ECCN 9A515.a for launch in or by a country that is a member of the North Atlantic Treaty Organization (NATO) or a major non-NATO ally of the United States (as defined in 22 CFR 120.31 and 120.32), may require a technology transfer control plan approved by the Department of Defense, an encryption technology control plan approved by the National Security Agency, or Department of Defense monitoring of launch activities.

(6) Remote sensing spacecraft. Applications to export or reexport a “spacecraft” described in ECCN 9A515.a.1,.a.2, a.3, or .a.4, sensitive remote sensing components described in 9A515.g, or “technology” described in ECCN 9E515.f may require a government-to-government agreement at the discretion of the U.S. Government.

(7) For India, there is a general policy of approval for license applications to export, reexport, or transfer items, including “600 series” items, for civil or military end uses in India, for ultimate end use by the Government of India, for reexport to countries in Country Group A:5, or for return to the United States, so long as such items are not for use in nuclear, “missile,” or chemical or biological weapons activities.

(8) China or Venezuela. Applications to export or reexport items described in paragraph (a)(7) of this section to China or Venezuela will be reviewed on a case-by-case basis to determine

whether the transaction is contrary to the national security or foreign policy interests of the United States, including the foreign policy interest of promoting the observance of human rights throughout the world. Such applications will also be reviewed consistent with United States arms embargo policies in § 126.1 of the ITAR (22 CFR 126.1). When destined to China, items classified under any 9x515.y ECCN will be subject to a policy of denial consistent with paragraph (b)(1) of this section.

(9) Russia or Belarus. Applications to export or reexport items described in paragraph (a)(7) of this section will be reviewed pursuant to the licensing policy set forth in § 746.8(b) of the EAR, as well as the foreign policy interest of promoting the observance of human rights throughout the world and consistent with United States arms embargo policies in § 126.1 of the ITAR (22 CFR 126.1).

(10) Advanced computing and semiconductor manufacturing items when destined to China or Macau. There is a presumption of denial for applications for items specified in paragraph (a)(6) of this section being exported, reexported, or transferred (in-country) to or within China or Macau. See § 744.11(a)(2)(ii) of the EAR for license requirements, license review policy, and license exceptions applicable to specific entities. License applications for semiconductor manufacturing items, such as semiconductor equipment, destined to end users in China or Macau that are headquartered in the United States or in a country in Country Group A:5 or A:6 will be considered on a case-by-case basis, taking into account factors including technology level, customers and compliance plans.

(c) Contract sanctity

(1) Contract sanctity date: March 21, 2003. This contract sanctity date applies only to items controlled under ECCNs 2A983, 2D983 and 2E983 destined for countries not listed in Country

Group E (Supplement 1 to part 740). See parts 742 and 746 for the contract sanctity requirements applicable to exports and reexports to countries listed in Country Group E.

(2) Contract sanctity date: March 19, 2010. This contract sanctity date applies only to items controlled under ECCNs 2A984, 2D984 and 2E984 destined for countries not listed in Country Group E (Supplement 1 to part 740). See parts 742 and 746 for the contract sanctity requirements applicable to exports and reexports to countries listed in Country Group E.

(d) U.S. controls

Although the United States seeks cooperation from like-minded countries in maintaining regional stability controls, at this time these controls are maintained only by the United States.

§ 742.7 CRIME CONTROL AND DETECTION

(a) License requirements

In support of U.S. foreign policy to promote the observance of human rights throughout the world, a license is required to export and reexport crime control and detection equipment, related technology and software as follows:

(1) Crime control and detection instruments and equipment and related “technology” and “software” identified in the appropriate ECCNs on the CCL under CC Column 1 in the Country Chart column of the “License Requirements” section. A license is required to countries listed in CC Column 1 (Supplement No. 1 to part 738 of the EAR). Items affected by this requirement are identified on the CCL under the following ECCNs: 0A502, 0A504, 0A505.b, 0A977, 0A978, 0A979, 0D977, 0E502, 0E505 (“technology” for “development” or for

“production” of buckshot shotgun shells controlled under ECCN 0A505.b), 0E977, 1A984, 1A985, 3A980, 3A981, 3D980, 3E980, 4A003 (for fingerprint computers only), 4A980, 4D001 (for fingerprint computers only), 4D980, 4E001 (for fingerprint computers only), 4E980, 6A002 (for police-model infrared viewers only), 6E001 (for police-model infrared viewers only), 6E002 (for police-model infrared viewers only), and 9A980.

(2) Shotguns with a barrel length greater than or equal to 24 inches, identified in ECCN 0A502 on the CCL under CC Column 2 in the Country Chart column of the “License Requirements” section regardless of end user to countries listed in CC Column 2 (Supplement No. 1 to part 738 of the EAR).

(3) Shotguns with barrel length greater than or equal to 24 inches, identified in ECCN 0A502 on the CCL under CC Column 3 in the Country Chart column of the “License Requirements” section only if for sale or resale to police or law enforcement entities in countries listed in CC Column 3 (Supplement No. 1 to part 738 of the EAR).

(4) Certain crime control items require a license to all destinations, except Canada. These items are identified under ECCNs 0A982, 0A503, and 0E982. Controls for these items appear in each ECCN; a column specific to these controls does not appear in the Country Chart (Supplement No. 1 to part 738 of the EAR).

(5) Items designed for the execution of human beings as identified in ECCN 0A981 require a license to all destinations including Canada.

(6) See §742.11 of the EAR for further information on items controlled under ECCN 0A983, which require a license to all destinations, including Canada.

(b) Licensing policy

(1) Applications for items controlled under this section will generally be considered favorably on a case-by-case basis, unless there is civil disorder in the country or region or unless there is a risk that the items will be used to violate or abuse human rights. The judicious use of export controls is intended to deter human rights violations and abuses, distance the United States from such violations and abuses, and avoid contributing to civil disorder in a country or region.

(2) BIS will review license applications in accordance with the licensing policy in paragraph (b)(1) of this section for items that are not controlled under this section but that require a license pursuant to another section for any reason other than short supply and could be used by the recipient Government or other end user specifically to violate or abuse human rights.

(c) Contract sanctity

Contract sanctity date: August 22, 2000. Contract sanctity applies only to items controlled under ECCNs 0A982, 0A503, and 0E982 destined for countries not listed in CC Column 1 of the Country Chart (Supplement No. 1 to part 738 of the EAR).

(d) U.S. controls

In maintaining its controls on crime control and detection items, the United States considers international norms regarding human rights and the practices of other countries that control exports to promote the observance of human rights. However, these controls are not based on the decisions of any multinational export control regime and may differ from controls imposed by other countries.

§ 742.8 ANTI-TERRORISM: IRAN

(a) License requirements

(1) A license is required for anti-terrorism purposes to export or reexport to Iran any item for which AT column 1 or AT column 2 is indicated in the Country Chart column of the applicable ECCN or any item described in ECCNs 1C350, 1C355, 1C395, 2A994, 2D994 and 2E994. See paragraph (a)(5) of this section for controls maintained by the Department of the Treasury. See §746.7 of the EAR for additional EAR license requirements that apply to Iran.

(2) [RESERVED]

(3) The Secretary of State has designated Iran as a country whose Government has repeatedly provided support for acts of international terrorism.

(4) In support of U.S. foreign policy applicable to terrorism- supporting countries, the EAR imposes anti-terrorism license requirements on exports and reexports to Iran pursuant to sections 6(j) and 6(a) of the Export Administration Act.

(i) Section 6(j) anti-terrorism controls. Section 6(j) requirements apply to all exports and reexports destined to the police, military or other sensitive end-users of items listed on the Commerce Control List (Supp. No. 1 to part 774 of the EAR) for which any listed reason for control in the applicable ECCN is NS (national security), CB (chemical or biological weapons proliferation), MT (missile proliferation), NP (nuclear weapons proliferation) or an Export Control Classification Number ending in "18" (military related items). BIS may not issue a license for a transaction subject to section 6(j) controls until 30 days after the notification described in Section 6(j)(2) of the Export Administration Act is delivered to the committees of Congress specified in that section. License applications for all other items controlled under section 6(a) are also reviewed to determine whether section 6(j) applies.

(ii) Section 6(a) anti-terrorism controls.

Section 6(a) requirements apply to all exports and reexports regardless of the end user of items described in paragraph (a)(1) of this section.

(5) Exports and certain reexports to Iran are subject to a comprehensive embargo administered by the Department of the Treasury's Office of Foreign Assets Control (OFAC). If you wish to export or reexport to Iran, the Government of Iran or any entity owned or controlled by that Government, you should review part 746 of the EAR and consult with OFAC. Please note that authorization from OFAC constitutes authorization under the EAR and no separate license or authorization from BIS is required.

(b) Licensing policy

(1) The Iran-Iraq Arms Non-Proliferation Act of October 23, 1992, requires BIS to deny licenses for items controlled to Iran for national security (section 5 of the 1979 EAA) or foreign policy reasons (section 6 of the 1979 EAA), absent contract sanctity or a Presidential waiver. License applications for which contract sanctity is established may be considered under policies in effect prior to the enactment of that Act. Otherwise, licenses for such items to Iran are subject to a general policy of denial.

(2) License applications for items controlled under section 6(a) of the EAA will also be reviewed to determine whether requirements of section 6(j) apply. Whenever the Secretary of State determines that an export or reexport could make a significant contribution to the military potential of Iran, including its military logistics capability, or could enhance Iran's ability to support acts of international terrorism, the Secretaries of State and Commerce will notify the Congress 30 days prior to the issuance of a license.

(c) Contract sanctity

Section 6(f) of the Export Administration Act requires that a report be delivered to Congress before foreign policy based export controls are imposed, expanded or extended. Consistent with section 6(p) of the Export Administration Act, certain exports or reexports in fulfillment of contracts entered into before such delivery of the report applicable to a particular license requirement or licensing policy may be subject to the license requirements and licensing policy that were in force before the report was delivered. License applicants who wish to have their application considered under such pre-existing requirements or policy must include evidence of the pre-existing contract with their license applications.

(d) U.S. controls

Although the United States seeks cooperation from like-minded countries in maintaining anti-terrorism controls, at this time these controls are maintained only by the United States.

§ 742.9 ANTI-TERRORISM: SYRIA**(a) License requirements**

(1) If AT Column 1 of the Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated in the appropriate ECCN, a license is required for export and reexport to Syria for anti-terrorism purposes.

(2) The Secretary of State has designated Syria as a country whose government has repeatedly provided support for acts of international terrorism.

(3) In support of U.S. foreign policy against terrorism, BIS maintains two types of anti-terrorism controls on the export and reexport to

Syria of items described in Supplement No. 2 to part 742.

(i) Items described in paragraphs (c)(1) through (c)(5) of Supplement No. 2 to part 742, if destined to military, police, intelligence or other end-users in Syria, are controlled under section 6(j) of the Export Administration Act, as amended (EAA).

(ii) Items listed in paragraphs (c)(1) through (c)(5) of Supplement No. 2 to part 742 destined to other end-users in Syria, as well as items to all end-users listed in (c)(6) through (c)(8), (c)(10) through (c)(14), (c)(16) through (c)(19), and (c)(22) through (c)(44) of Supplement No. 2 to part 742, are controlled to Syria under section 6(a) of the EAA.

(b) Licensing policy

(1) Applications for export and reexport to all end-users in Syria of the following items will generally be denied:

(i) **Items that are controlled for chemical and biological weapons proliferation reasons to any destination.** These are items that contain CB Column 1, CB Column 2, or CB Column 3 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL.

(ii) **Military-related items controlled for national security reasons to any destination.** These are items that contain NS Column 1 in the Country Chart column of the “License Requirements” section in an ECCN on the CCL and are controlled by equipment or material entries ending in the number “18.”

(iii) **Items that are controlled for missile proliferation reasons to any destination.** These are items that have an MT Column 1 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL.

(iv) All aircraft (powered and unpowered), helicopters, engines, and related spare parts and components, except that parts and components intended to ensure the safety of civil aviation and the safe operation of commercial passenger aircraft will be reviewed on a case-by-case basis, with a presumption of approval. These are items controlled to any destination for national security and missile technology reasons and items controlled to Syria for anti-terrorism purposes. Such items contain an NS Column 1, NS Column 2, MT Column 1, or AT Column 1 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL. Note that, consistent with the general rule that applies to computing U.S. parts and components content incorporated into foreign made products, all aircraft-related items that require a license to Syria will be included as controlled U.S. content, except for ECCNs 6A998, 7A994, and 9A991.d, for purposes of such licensing requirements.

(v) *Cryptographic, cryptoanalytic, and crypto-logic items controlled to any destination for national security reasons.* Such items contain an AT Column 1 and an NS Column 1 or NS Column 2 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL.

(vi) Explosives detection equipment controlled under ECCN 2A983.

(vii) “Software” (ECCN 2D983) specially designed or modified for the “development”, “production” or “use” of explosives detection equipment controlled by 2A983.

(viii) “Technology” (ECCN 2E983) specially designed or modified for the “development”, “production” or “use” of explosives detection equipment controlled by 2A983.

(ix) Commercial charges and devices controlled under ECCN 1C992.

(x) Ammonium nitrate, including certain fertilizers containing ammonium nitrate, controlled under ECCN 1C997.

(xi) Technology for the production of Chemical Weapons Convention (CWC) Schedule 2 and 3 chemicals controlled under ECCN 1E355.

(xii) Concealed object detection equipment controlled under ECCN 2A984.

(xiii) “Software” (ECCN 2D984) “required” for the “development”, “production” or “use” of concealed object detection equipment controlled by 2A984.

(xiv) “Technology” (ECCN 2E984) “required” for the “development”, “production” or “use” of concealed object detection equipment controlled by 2A984, or the “development” of “software” controlled by 2D984.

(2) Applications for export and reexport to Syria of all other items described in paragraph (a) of this section, and not described by paragraph (b)(1) of this section, will generally be denied if the export or reexport is destined to a military end-user or for military end-use. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(3) Notwithstanding the provisions of paragraphs (b)(1) and (b)(2), of this section, applications for Syria will be considered on a case-by-case basis if:

(i) The transaction involves the reexport to Syria of items where Syria was not the intended ultimate destination at the time of original export from the United States, provided that the exports from the U.S. occurred prior to the applicable contract sanctity date (or, where the contract sanctity date is December 16, 1986, prior to June 18, 1987).

(ii) The U.S. content of foreign-produced commodities is 20% or less by value; or

(iii) The commodities are medical items.

Note to paragraph (b) of this section: Applicants who wish any of the factors described in paragraph (b) of this section to be considered in reviewing their license applications must submit adequate documentation demonstrating the value of the U.S. content, the specifications and medical use of the equipment, or the date of export from the United States.

(4) License applications for items reviewed under 6(a) controls will also be reviewed to determine the applicability of 6(j) controls to the transaction. When it is determined that an export or reexport could make a significant contribution to the military potential of Syria, including its military logistics capability, or could enhance Syria's ability to support acts of international terrorism, the Secretaries of State and Commerce will notify the Congress 30 days prior to issuance of a license.

(c) Contract sanctity

Contract sanctity dates and related licensing policies for Syria are set forth in Supplement No. 2 to part 742. Applicants who wish a pre-existing contract to be considered must submit sufficient documentation to establish the existence of a contract.

(d) U.S. controls

Although the United States seeks cooperation from like-minded countries in maintaining anti-terrorism controls, at this time these controls are maintained only by the United States.

(e) Section 746.9 (Syria) of the EAR sets forth the export and reexport controls for Syria.

Section 746.9 supersedes the provisions of paragraphs (a) through (d) of this section.

§ 742.10 [RESERVED]

§ 742.11 SPECIALLY DESIGNED IMPLEMENTS OF TORTURE, INCLUDING THUMBSCREWS, THUMBCUFFS, FINGERCUFFS, SPIKED BATONS, AND PARTS AND ACCESSORIES, N.E.S.

(a) License requirements

In support of U.S. foreign policy to promote the observance of human rights throughout the world, a license is required to export any commodity controlled by ECCN 0A983 to all destinations including Canada.

(b) Licensing policy

Applications for such licenses will generally be denied to all destinations.

(c) Contract sanctity

The contract sanctity date is November 9, 1995. Contract sanctity will be a factor in considering only applications for export to the NATO countries, Japan, Australia, and New Zealand.

(d) U.S. Controls

In maintaining its controls on specially designed instruments of torture the United States considers international norms regarding human rights and the practices of other countries that control exports to promote the observance of human rights. However, these controls are not based on the decisions of any multinational export control regime and may differ from controls imposed by other countries.

§ 742.12 [RESERVED]

§ 742.13 COMMUNICATIONS INTERCEPTING DEVICES; SOFTWARE AND TECHNOLOGY FOR COMMUNICATIONS INTERCEPTING DEVICES

(a) *License requirement*

(1) In support of U.S. foreign policy to prohibit the export of items that may be used for the surreptitious interception of wire, oral, or electronic communications, a license is required for all destinations, including Canada, for ECCNs having an “SL” under the “Reason for Control” paragraph. These items include any electronic, mechanical, or other device primarily useful for the surreptitious interception of wire, oral, or electronic communications (ECCNs 5A001.f.1 and 5A980); and for related “software” primarily useful for the surreptitious interception of wire, oral, or electronic communications (ECCN 5D001.c and 5D980.a); and “software” primarily useful for the “development”, “production”, or “use” of devices controlled under ECCNs 5A001.f.1 and 5A980 (ECCNs 5D001.a and 5D980.b); and for “technology” primarily useful for the “development”, “production”, or “use” of items controlled by ECCNs 5A001.f.1, 5D001.a (for 5A001.f.1), 5A980 and 5D980 (ECCNs 5E001.a and 5E980); and for “software” primarily useful to support such ECCN 5E001.a “development”, “production”, or “use” “technology” for 5A001.f.1 equipment and certain 5D001.a “software” (ECCN 5D001.b). These licensing requirements do not supersede the requirements contained in the Omnibus Crime Control and Safe Streets Act of 1968, as amended (18 U.S.C. 2512). This license requirement is not reflected on the Commerce Country Chart (Supplement No. 1 to Part 738 of the EAR).

(2) “Communications intercepting devices” are electronic, mechanical, or other devices that can be used for interception of wire, oral, or electronic communications if their design renders them primarily useful for surreptitious listening even though they may also have innocent uses. A device is not restricted merely because it is small or may be adapted to wiretapping or eavesdropping. Some examples of devices to which these restrictions apply are: the martini olive transmitter; the infinity transmitter; the spike mike; and the disguised microphone appearing as a wristwatch, cufflink, or cigarette pack; etc. The restrictions do not apply to devices such as the parabolic microphone or other directional microphones ordinarily used by broadcasters at sports events, since these devices are not primarily useful for surreptitious listening.

(b) *Licensing policy*

(1) License applications, except for those applications for which a license is required for both SL and AT reasons, will generally be approved for exports or reexports requiring a license for SL reasons when the exporter or reexporter is:

(i) A provider of wire or electronic communication services or an officer, agent, or employee of, or person under contract with such a provider, in the normal course of the business of providing that wire or electronic communication service; *or*

(ii) An officer, agent, or employee of, or a person under contract with, the United States, one of the 50 States, or a political subdivision thereof, when engaged in the normal course of government activities.

Note to paragraph (b)(1): For SL reasons, license applications will generally be denied to

countries that are subject to controls for AT reasons.

Note to paragraph (b)(1)(i): The normal course of the business of providing a wire or electronic communications service includes any activity which is a necessary incident to the rendition of the service or to the protection of the rights and property of the provider of that service.

(2) Other license applications will generally be denied for exports or reexports requiring a license for SL reasons.

(c) Contract sanctity

Contract sanctity provisions are not available for license applications involving exports and reexports of communications interception devices.

(d) U.S. controls

Controls on items classified under ECCNs 5A980, 5D980, and 5E980 are maintained by the United States government for foreign policy purposes.

§ 742.14 SIGNIFICANT ITEMS: HOT SECTION TECHNOLOGY FOR THE DEVELOPMENT, PRODUCTION OR OVERHAUL OF COMMERCIAL AIRCRAFT ENGINES, COMPONENTS, AND SYSTEMS

(a) License requirement

Licenses are required for all destinations, except Canada, for ECCNs having an “SI” under the “Reason for Control” paragraph. These items include hot section technology for the development, production or overhaul of commercial aircraft engines controlled under ECCN 9E003.a.1 through a.8, .h, .i and .k, and

related controls.

(b) Licensing policy

Pursuant to section 6 of the Export Administration Act of 1979, as amended, foreign policy controls apply to technology required for the development, production or overhaul of commercial aircraft engines controlled by ECCN 9E003a.1 through a.8, .h, .i, and .k, and related controls. These controls supplement the national security controls that apply to these items. Applications for export and reexport to all destinations will be reviewed on a case-by-case basis to determine whether the export or reexport is consistent with U.S. national security and foreign policy interests. The following factors are among those that will be considered to determine what action will be taken on license applications:

- (1) The country of destination;
- (2) The ultimate end-user(s);
- (3) The technology involved;
- (4) The specific nature of the end-use(s); and
- (5) The types of assurance against unauthorized use or diversion that are given in a particular case.

(c) Contract sanctity

Contract sanctity provisions are not available for license applications reviewed under this §742.14.

(d) [RESERVED]

§ 742.15 ENCRYPTION ITEMS

Encryption items can be used to maintain the secrecy of information, and thereby may be used by persons abroad to harm U.S. national security, foreign policy and law enforcement interests. The United States has a critical interest in

ensuring that important and sensitive information of the public and private sector is protected. Consistent with our international obligations as a member of the Wassenaar Arrangement, the United States has a responsibility to maintain control over the export and reexport of encryption items. As the President indicated in Executive Order 13026 and in his Memorandum of November 15, 1996, exports and reexports of encryption software, like exports and reexports of encryption hardware, are controlled because of this functional capacity to encrypt information, and not because of any informational or theoretical value that such software may reflect, contain, or represent, or that its export or reexport may convey to others abroad. For this reason, export controls on encryption software are distinguished from controls on other software regulated under the EAR.

(a) Licensing requirements and policy

(1) Licensing requirements. A license is required to export or reexport encryption items (“EI”) classified under ECCN 5A002, 5A004, 5D002.a, .c.1 or .d (for equipment and “software” in ECCNs 5A002 or 5A004, 5D002.c.1); or 5E002 for “technology” for the “development,” “production,” or “use” of commodities or “software” controlled for EI reasons in ECCNs 5A002, 5A004 or 5D002, and “technology” classified under 5E002.b to all destinations, except Canada. Refer to part 740 of the EAR, for license exceptions that apply to certain encryption items, and to § 772.1 of the EAR for definitions of encryption items and terms. Most encryption items may be exported under the provisions of License Exception ENC set forth in §740.17 of the EAR. Following classification or self-classification, items that meet the criteria of Note 3 to Category 5 - Part 2 of the Commerce Control List (the “mass market” note), are classified ECCN 5A992.c or 5D992.c and are no longer subject to this Section (see § 740.17 of the EAR). Before submitting a license application, please review License Exception

ENC to determine whether this license exception is available for your item or transaction. For exports, reexports, or transfers (in-country) of encryption items that are not eligible for a license exception, you must submit an application to obtain authorization under a license or an Encryption Licensing Arrangement.

(2) Licensing policy. Applications will be reviewed on a case-by-case basis by BIS, in conjunction with other agencies, to determine whether the export, reexport, or transfer (in-country) is consistent with U.S. national security and foreign policy interests. Encryption Licensing Arrangements (ELAs) may be authorized for exports, reexports, or transfers (in-country) of unlimited quantities of encryption commodities and software described in § 740.17 (b)(2)(i)(A) that have been classified by BIS to “more sensitive government end users,” in all destinations, except countries listed in Country Groups E:1 or E:2 of Supplement No. 1 to part 740. ELAs for “more sensitive government end users” may be authorized for encryption commodities and software described in § 740.17(b)(2)(ii) through (iv) under certain circumstances. ELAs are valid for four years and may require pre-shipment notification. Applicants seeking authorization for Encryption Licensing Arrangements must specify the sales territory on their license applications.

(b) Publicly available encryption source code

(1) Scope and eligibility. Subject to the notification requirements of paragraph (b)(2) of this section, publicly available (see § 734.3(b)(3) of the EAR) encryption source code classified under ECCN 5D002 is not subject to the EAR. Such source code is publicly available even if it is subject to an express agreement for the payment of a licensing fee or royalty for commercial production or sale of any product developed using the source code.

(2) Notification requirement for “non-standard cryptography.” For publicly available encryption source code classified under ECCN 5D002 that provides or performs “non-standard cryptography” as defined in part 772 of the EAR, you must notify BIS and the ENC Encryption Request Coordinator via e-mail of the Internet location (e.g., URL or Internet address) of the source code or provide each of them a copy of the publicly available encryption source code. If you update or modify the source code, you must also provide additional copies to each of them each time the cryptographic functionality of the source code is updated or modified. In addition, if you posted the source code on the Internet, you must notify BIS and the ENC Encryption Request Coordinator each time the Internet location is changed, but you are not required to notify them of updates or modifications made to the encryption source code at the previously notified location. In all instances, submit the notification or copy to crypt@bis.doc.gov and to enc@nsa.gov.

§ 742.16 [RESERVED]

§ 742.17 EXPORTS OF FIREARMS TO OAS MEMBER COUNTRIES

(a) License requirements

BIS maintains a licensing system for the export of firearms and related items to all OAS member countries. This action is based on the Organization of American States (OAS) Model Regulations for the Control of the International Movement of Firearms, their Parts and Components and Munitions (OAS Model Regulations) which were developed to assist OAS member countries to implement the Inter-American Convention Against the Illicit Manufacturing of and Trafficking in Firearms,

Ammunition, Explosives, and Other Related Materials (Firearms Convention)¹. Items subject to these controls are identified by “FC Column 1” in the “License Requirements” section of their Export Control Classification Number (ECCN) on the Commerce Control List (CCL). If “FC Column 1” of the Commerce Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated for a particular country, a license is required for export to that destination. Licenses will generally be issued on a Firearms Convention (FC) Import Certificate or equivalent official document, satisfactory to BIS, issued by the government of the importing OAS member country.

(b) Licensing policy

Applications supported by an FC Import Certificate or equivalent official document issued by the government of the importing country for such items will generally be approved, except there is a policy of denial for applications to export items linked to such activities as drug trafficking, terrorism, and transnational organized crime.

(c) Contract sanctity

Contract sanctity provisions are not available for license applications under this §742.17.

(d) OAS Model Regulations

The OAS Model Regulations on which regulations are based are designed by OAS member countries to combat illicit manufacturing of and trafficking in firearms, ammunition, explosives, and other related materials in North and South America because of their links to such activities as drug trafficking, terrorism, and transnational organized crime.

¹ Status of Convention as of April 13, 1999 had not

entered into force.

(e) OAS member countries to which firearms controls under this section apply

The OAS member countries include: Antigua and Barbuda, Argentina, the Bahamas, Barbados, Belize, Bolivia, Brazil, Canada, Chile, Colombia, Costa Rica, Dominica, Dominican Republic, Ecuador, El Salvador, Grenada, Guatemala, Guyana, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Paraguay, Peru, St. Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Suriname, Trinidad and Tobago, the United States, Uruguay, and Venezuela.

(f) Items/Commodities

Items requiring a license under this section are ECCNs 0A501 (except 0A501.y), 0A502, 0A504 (except 0A504.f), and 0A505 (except 0A505.d). (See Supplement No. 1 to part 774 of the EAR).

(g) Validity period for licenses

Although licenses generally will be valid for a period of four years, your ability to ship items that require an FC Import Certificate or equivalent official document under this section may be affected by the validity of the FC Import Certificate or equivalent official document (see § 748.12(d)(3) of the EAR).

§ 742.18 CHEMICAL WEAPONS CONVENTION (CWC OR CONVENTION)

States that are parties to the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction, also known as the Chemical Weapons Convention (CWC or Convention), undertake never to develop, produce, acquire, stockpile, transfer, or use chemical weapons. As a State Party to the Convention, the United States is subjecting certain toxic chemicals and their

precursors listed in Schedules within the Convention to trade restrictions. Trade restrictions include: a prohibition on the export of Schedule 1 chemicals to States not Party to the CWC; a prohibition on the reexport of Schedule 1 chemicals to all destinations (both States Parties to the CWC and States not Party to the CWC); license requirements for the export of Schedule 1 chemicals to all States Parties; a prohibition on the export of Schedule 2 chemicals to States not Party to the CWC; and an End-Use Certificate requirement for exports of Schedule 3 chemicals to States not Party to the CWC. Exports of CWC chemicals that do not require a license for CW reasons (e.g., exports and reexports of Schedule 2 and Schedule 3 chemicals to States Parties to the CWC) may require a license for other reasons set forth in the EAR. (See, in particular, the license requirements in §742.2 of the EAR that apply to exports and reexports of precursor chemicals controlled by ECCN 1C350, for CB reasons. Also note the end-use and end-user restrictions in part 744 of the EAR and the restrictions that apply to embargoed countries in part 746 of the EAR.)

(a) License requirements

(1) Schedule 1 chemicals and mixtures controlled under ECCN 1C351. A license is required for CW reasons to export or reexport Schedule 1 chemicals controlled under ECCN 1C351.d.14 or .d.15 to all destinations including Canada. CW applies to 1C351.d.14 for ricin in the form of Ricinus Communis AgglutininII (RCA_{II}), which is also known as ricin D or Ricinus Communis LectinIII (RCL_{III}), and Ricinus Communis LectinIV (RCL_{IV}), which is also known as ricin E. CW applies to 1C351.d.15 for saxitoxin identified by C.A.S. #35523-89-8. (Note that the advance notification procedures and annual reporting requirements described in § 745.1 of the EAR also apply to exports of Schedule 1 chemicals.)

(2) Schedule 2 and Schedule 3 chemicals and

mixtures controlled under ECCN 1C350, ECCN 1C355, or ECCN 1C395.

(i) *States Parties to the CWC.* Neither a license nor an End-Use Certificate is required for CW reasons to export or reexport Schedule 2 or 3 chemicals and mixtures controlled under ECCN 1C350, ECCN 1C355, or ECCN 1C395 to States Parties to the CWC (destinations listed in Supplement No. 2 to part 745 of the EAR).

(ii) *States not Party to the CWC.*

(A) *Schedule 2 chemicals.* A license is required for CW reasons to export or reexport Schedule 2 chemicals and mixtures controlled under ECCN 1C350.b, ECCN 1C355.a, or ECCN 1C395 to States not Party to the CWC (destinations *not* listed in Supplement No. 2 to part 745 of the EAR).

(B) *Schedule 3 chemicals.*

(1) *Exports.* A license is required for CW reasons to export Schedule 3 chemicals and mixtures controlled under ECCN 1C350.c, ECCN 1C355.b, or ECCN 1C395.b to States not Party to the CWC (destinations *not* listed in Supplement No. 2 to Part 745 of the EAR), *unless* the exporter obtains from the consignee an End-Use Certificate (issued by the government of the importing country) prior to exporting the Schedule 3 chemicals and submits it to BIS in accordance with the procedures described in §745.2 of the EAR. Note, however, that obtaining an End-Use Certificate does not relieve the exporter from the responsibility of complying with other license requirements set forth elsewhere in the EAR.

(2) *Reexports.*

(i) *Reexports from States Parties to the CWC.* Neither a license nor an End-Use Certificate is required for CW reasons to reexport Schedule 3 chemicals and mixtures

controlled under ECCN 1C350.c, ECCN 1C355.b, or ECCN 1C395.b from States Parties to the CWC (destinations listed in Supplement No. 2 to part 745 of the EAR) to States not Party to the CWC. However, a license may be required for other reasons set forth elsewhere in the EAR. In addition, reexports of Schedule 3 chemicals may be subject to an End-Use Certificate requirement by governments of other countries when the chemicals are destined for States not Party to the CWC.

(ii) *Reexports from States not Party to the CWC.* A license is required for CW reasons to reexport Schedule 3 chemicals and mixtures controlled under ECCN 1C350.c, ECCN 1C355.b, or ECCN 1C395.b from a State not Party to the CWC (a destination *not* listed in Supplement No. 2 to part 745 of the EAR) to any other State not Party to the CWC.

(C) *Technology controlled under ECCN 1E355.* A license is required for CW reasons to export or reexport technology controlled under ECCN 1E355 to all States not Party to the CWC (destinations *not* listed in Supplement No. 2 to part 745 of the EAR), except for Israel and Taiwan.

(b) *Licensing policy*

(1) *Schedule 1 chemicals and mixtures.*

(i) *Exports to States Parties to the CWC.* Applications to export Schedule 1 Chemicals controlled under ECCN 1C351.d.14 or .d.15 to States Parties to the CWC (destinations listed in supplement no. 2 to part 745 of the EAR) generally will be denied, unless all of the following conditions are met:

(A) The chemicals are destined only for purposes not prohibited under the CWC (i.e., research, medical, pharmaceutical, or protective purposes);

(B) The types and quantities of chemicals are strictly limited to those that can be justified for those purposes;

(C) The Schedule 1 chemicals were not previously imported into the United States (this does not apply to Schedule 1 chemicals imported into the United States prior to April 29, 1997, or imported into the United States directly from the same State Party to which they now are to be returned, i.e., exported); *and*

(D) The aggregate amount of Schedule 1 chemicals in the country of destination at any given time is equal to or less than one metric ton *and* receipt of the proposed export will *not* cause the country of destination to acquire or to have acquired one metric ton or more of Schedule 1 chemicals in any calendar year.

(ii) Exports to States not Party to the CWC. Applications to export Schedule 1 chemicals controlled under ECCN 1C351.d.14 or .d.15 to States not Party to the CWC (destinations not listed in supplement no. 2 to part 745 of the EAR) generally will be denied, consistent with U.S. obligations under the CWC to prohibit exports of these chemicals to States not Party to the CWC.

(iii) Reexports. Applications to reexport Schedule 1 chemicals controlled under ECCN 1C351.d.14 or .d.15 generally will be denied to all destinations (including both States Parties to the CWC and States not Party to the CWC).

(2) Schedule 2 chemicals and mixtures. Applications to export or reexport Schedule 2 chemicals and mixtures controlled under ECCN 1C350.b, ECCN 1C355.a, or ECCN 1C395 to States not Party to the CWC (destinations *not* listed in Supplement No. 2 to part 745 of the EAR) generally will be denied, consistent with U.S. obligations under the CWC to prohibit exports of these chemicals to States not Party to the CWC.

(3) Schedule 3 chemicals and mixtures.

(i) Exports. Applications to export Schedule 3 chemicals and mixtures controlled under ECCN 1C350.c, ECCN 1C355.b, or ECCN 1C395.b to States not Party to the CWC (destinations *not* listed in Supplement No. 2 to part 745 of the EAR) generally will be denied.

(ii) Reexports from States not Party to the CWC. Applications to reexport Schedule 3 chemicals and mixtures controlled under ECCN 1C350.c, ECCN 1C355.b, or ECCN 1C395.b from a State not Party to the CWC (a destination *not* listed in Supplement No. 2 to part 745 of the EAR) to any other State not Party to the CWC generally will be denied.

(4) Technology controlled under ECCN 1E355. Exports and reexports of technology controlled under ECCN 1E355 will be reviewed on a case-by-case basis.

(c) Contract sanctity

Contract sanctity provisions are not available for license applications reviewed under this section.

§ 742.19 ANTI-TERRORISM: NORTH KOREA

(a) License requirements

(1) All items on the Commerce Control List (CCL) (i.e., with a designation other than EAR99) that are controlled for anti-terrorism reasons require a license for export or reexport to North Korea. This includes all items on the CCL containing AT column 1 or AT column 2 in the Country Chart column of the License requirements section of an ECCN; and ECCNs 0A505.c, 0A988, 0A999, 0B505.c, 0B999, 0D999, 1A999, 1B999, 1C995, 1C999, 1D999, 2A994, 2A999, 2B999, 2D994, 2E994, 3A999, and 6A999. See also part 746 of the EAR.

(2) The Secretary of State has designated North Korea as a country whose Government has repeatedly provided support for acts of international terrorism.

(3) In support of U.S. foreign policy on terrorism-supporting countries, BIS maintains two types of anti-terrorism controls on the export and reexport of items described in Supplement 2 to part 742.

(i) Items described in paragraphs (c)(1) through (c)(5) of Supplement No. 2 to part 742 are controlled under section 6(j) of the Export Administration Act, as amended (EAA), if destined to military, police, intelligence or other sensitive end-users.

(ii) Items described in paragraphs (c)(1) through (c)(5) of Supplement No. 2 to part 742 destined to non-sensitive end-users, as well as items described in paragraph (c)(6) through (c)(45) to all end-users, are controlled to North Korea under section 6(a) of the EAA. License applications for items reviewed under section 6(a) controls will also be reviewed to determine the applicability of section 6(j) controls to the transaction. When it is determined that an export or reexport could make a significant contribution to the military potential of North Korea, including its military logistics capability, or could enhance North Korea's ability to support acts of international terrorism, the Secretaries of State and Commerce will notify the Congress 30 days prior to issuance of a license. (See Supplement No. 2 to part 742 for more information on items controlled under sections 6(a) and 6(j) of the EAA and §750.6 of the EAR for procedures for processing license applications for items controlled under EAA section 6(j).)

(b) Licensing policy

(1) Applications for export and reexport to all end-users in North Korea of the following items

will generally be denied:

(i) ***Items controlled for chemical and biological weapons proliferation reasons to any destination.*** These items contain CB Column 1, CB Column 2, or CB Column 3 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL.

(ii) Items controlled for missile proliferation reasons to any destination. These items have an MT Column 1 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL.

(iii) ***Items controlled for nuclear weapons proliferation reasons to any destination.*** These items contain NP Column 1 or NP Column 2 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL.

(iv) ***Items controlled for national security reasons to any destination.*** These items contain NS Column 1 or NS Column 2 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL.

(v) ***Military-related items controlled for national security reasons to any destination.*** These items contain NS Column 1 in the Country Chart column of the “License Requirements” section in an ECCN on the CCL *and* are controlled by equipment or material entries ending in the number “18.”

(vi) ***All aircraft (powered and unpowered), helicopters, engines, and related spare parts and components.*** Such items contain an NS Column 1, NS Column 2, MT Column 1, or AT Column 1 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL. (Not including parts and components for safety-of-flight, which will be reviewed on a case-by-case basis in accordance with paragraph (b)(2) of this section.)

(vii) *Cryptographic, cryptanalytic, and crypto-logic items controlled any destination.*

These are items that contain an NS Column 1, NS Column 2, AT Column 1 or AT Column 2 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL.

(viii) Submersible systems controlled under ECCN 8A992.

(ix) Scuba gear and related equipment controlled under ECCN 8A992.

(x) Pressurized aircraft breathing equipment controlled under ECCN 9A991.

(xi) Explosives detection equipment controlled under ECCN 2A983.

(xii) “Software” (ECCN 2D983) specially designed or modified for the “development”, “production” or “use” of explosives detection equipment controlled by 2A983.

(xiii) “Technology” (ECCN 2E983) specially designed or modified for the “development”, “production” or “use” of explosives detection equipment controlled by 2A983.

(xiv) Commercial charges and devices controlled under ECCN 1C992.

(xv) Computer numerically controlled machine tools controlled under ECCN 2B991.

(xvi) Aircraft skin and spar milling machines controlled under ECCN 2B991.

(xvii) Semiconductor manufacturing equipment controlled under ECCN 3B991.

(xviii) Digital computers with an Adjusted Peak Performance (APP) exceeding 0.0004 Weighted TeraFLOPS (WT).

(xix) Microprocessors with a processing speed of 0.5 GFLOPS or above.

(xx) Ammonium nitrate, including certain fertilizers containing ammonium nitrate, controlled under ECCN 1C997.

(xxi) Technology for the production of Chemical Weapons Convention (CWC) Schedule 2 and 3 Chemicals controlled under ECCN 1E355.

(xxii) Concealed object detection equipment controlled under ECCN 2A984.

(xxiii) “Software” (ECCN 2D984) “required” for the “development”, “production” or “use” of concealed object detection equipment controlled by 2A984.

(xxiv) “Technology” (ECCN 2E984) “required” for the “development”, “production” or “use” of concealed object detection equipment controlled by 2A984, or the “development” of “software” controlled by 2D984.

(2) Applications for export and reexport to North Korea of all other items described in paragraph (a) of this section, and not described by paragraph (b)(1) of this section, will generally be denied if the export or reexport is destined to a military end-user or for military end-use. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis. Applications to export or reexport humanitarian items intended for the benefit of the North Korean people; items in support of United Nations humanitarian efforts; and agricultural commodities and medical devices will generally be approved.

(3) Applications for export and reexport to North Korea of items described in paragraphs (c)(12), (c)(24), (c)(34), (c)(37), (c)(38), and (c)(45) of Supplement No. 2 to part 742 will generally be denied if the export or reexport is destined to nuclear end-users or nuclear end-uses. Applications for non-nuclear end-users or for

non-nuclear end-uses, excluding items described in (c)(24)(iv)(A) of Supplement No. 2 to part 742, will be considered on a case-by-case basis.

(4) License applications for items reviewed under section 6(a) controls will also be reviewed to determine the applicability of section 6(j) controls to the transaction. When it is

determined that an export or reexport could make a significant contribution to the military potential of North Korea, including its military logistics capability, or could enhance North Korea's ability to support acts of international terrorism, the Secretaries of State and Commerce will notify the Congress 30 days prior to issuance of a license.

SUPPLEMENT NO. 1 TO PART 742 - NONPROLIFERATION OF CHEMICAL AND BIOLOGICAL WEAPONS

NOTE: *Exports and reexports of items in performance of contracts entered into before the applicable contract sanctity date(s) will be eligible for review on a case-by-case basis or other applicable licensing policies that were in effect prior to the contract sanctity date. The contract sanctity dates set forth in this Supplement are for the guidance of exporters. Contract sanctity dates are established in the course of the imposition of foreign policy controls on specific items and are the relevant dates for the purpose of licensing determinations involving such items. If you believe that a specific contract sanctity date is applicable to your transaction, you should include all relevant information with your license application.*

- (1) The contract sanctity date for exports to Iran or Syria of dimethyl methylphosphonate, phosphorous oxychloride, thiodiglycol, dimethylamine hydrochloride, dimethylamine, ethylene chlorohydrin (2-chloroethanol), and potassium fluoride is April 28, 1986.
- (2) The contract sanctity date for exports to Iran or Syria of dimethyl phosphite (dimethyl hydrogen phosphite), methyl phosphonyldichloride, 3-quinuclidinol, N,N-diisopropylamino-ethane-2-thiol, N,N-diisopropylaminoethyl-2-chloride, 3-hydroxy-1-methylpiperidine, trimethyl phosphite, phosphorous trichloride, and thionyl chloride is July 6, 1987.
- (3) The contract sanctity date for exports to Iran or Syria of items in ECCNs 1C351, 1C353 and 1C354 is February 22, 1989.
- (4) The contract sanctity date for exports to Iran of dimethyl methylphosphonate, phosphorous oxychloride, and thiodiglycol is February 22, 1989.
- (5) The contract sanctity date for exports to Iran or Syria of potassium hydrogen fluoride, ammonium hydrogen fluoride, sodium fluoride, sodium bifluoride, phosphorus pentasulfide, sodium cyanide, triethanolamine, diisopropylamine, sodium sulfide, and N,N-diethylethanolamine is December 12, 1989.
- (6) The contract sanctity date for exports to all destinations (except Iran or Syria) of phosphorous trichloride, trimethyl phosphite, and thionyl chloride is December 12, 1989. For exports to Iran or Syria, paragraph (2) of this Supplement applies.
- (7) The contract sanctity date for exports to all destinations (except Iran or Syria) of 2-chloroethanol and triethanolamine is January 15, 1991. For exports of 2-chloroethanol to Iran or Syria, paragraph (1) of this Supplement applies. For exports of triethanolamine to Iran or Syria, paragraph (5) of this Supplement applies.
- (8) The contract sanctity date for exports to all destinations (except Iran or Syria) of chemicals controlled by ECCN 1C350 is March 7, 1991, except for applications to export the following chemicals: 2-chloroethanol, dimethyl methylphosphonate, dimethyl phosphite (dimethyl hydrogen phosphite), phosphorous oxychloride, phosphorous trichloride, thiodiglycol, thionyl chloride triethanolamine, and trimethyl phosphite. (See also paragraphs (6) and (7) of this Supplement.) For exports to Iran or Syria, see paragraphs (1) through (6) of this Supplement.
- (9) The contract sanctity date for exports and reexports of the following commodities and technical data is March 7, 1991:
 - (i) Equipment (for producing chemical

weapon precursors and chemical warfare agents) described in ECCNs 2B350 and 2B351;

(ii) Equipment and materials (for producing biological agents) described in ECCNs 1C351, 1C353, 1C354, and 2B352; and

(iii) Technology (for the development, production, and use of equipment described in ECCNs 1C351, 1C353, 1C354, 2B350, 2B351, and 2B352) described in ECCNs 2E001, 2E002, and 2E301.

(10) The contract sanctity date for license

applications subject to §742.2(b)(3) of this part is March 7, 1991.

(11) The contract sanctity date for reexports of chemicals controlled under ECCN 1C350 is March 7, 1991, except that the contract sanctity date for reexports of these chemicals to Iran or Syria is December 12, 1989.

(12) The contract sanctity date for reexports of human pathogens, zoonoses, toxins, animal pathogens, genetically modified microorganisms and plant pathogens controlled by ECCNs 1C351, 1C353 and 1C354 is March 7, 1991.

SUPPLEMENT NO. 2 TO PART 742 - ANTI-TERRORISM CONTROLS: NORTH KOREA, SYRIA CONTRACT SANCTITY DATES AND RELATED POLICIES

***NOTE:** Exports and reexports of items in performance of contracts entered into before the applicable contract sanctity date(s) will be eligible for review on a case-by-case basis or other applicable licensing policies that were in effect prior to the contract sanctity date. The contract sanctity dates set forth in this Supplement are for the guidance of exporters. Contract sanctity dates are established in the course of the imposition of foreign policy controls on specific items and are the relevant dates for the purpose of licensing determinations involving such items. If you believe that a specific contract sanctity date is applicable to your transaction, you should include all relevant information with your license application. BIS will determine any applicable contract sanctity date at the time an application with relevant supporting documents is submitted.*

(a) Terrorist-supporting countries

The Secretary of State has designated North Korea, and Syria as countries whose governments have repeatedly provided support for acts of international terrorism under section 6(j) of the Export Administration Act (EAA).

(b) Items controlled under EAA sections 6(j) and 6(a)

Whenever the Secretary of State determines that an export or reexport to any of these countries could make a significant contribution to the military potential of such country, including its military logistics capability, or could enhance the ability of such country to support acts of international terrorism, the item is subject to mandatory control under EAA section 6(j) and the Secretaries of Commerce and State are required to notify appropriate Committees of the Congress 30 days before a license for such an item may be issued.

(1) On December 28, 1993, the Secretary of State determined that the export to North Korea, or Syria of items described in paragraphs (c)(1) through (c)(5) of this Supplement, if destined to military, police, intelligence or other sensitive end-users, are controlled under EAA section 6(j). Therefore, the 30-day advance Congressional notification requirement applies to the export or reexport of these items to sensitive end-users in any of these countries.

(2) License applications for items controlled to designated terrorist-supporting countries under EAA section 6(a) will also be reviewed to determine whether the Congressional notification requirements of EAA section 6(j) apply.

(3) Items controlled for anti-terrorism reasons under section 6(a) to North Korea, and Syria are:

(i) Items described in paragraphs (c)(1) through (c)(5) to non-sensitive end-users, and

(ii) The following items to all end-users: for North Korea, items in paragraph (c)(6) through (c)(45) of this Supplement and for Syria, items in paragraphs (c)(6) through (c)(8), (c)(10) through (c)(14), (c)(16) through (c)(19), and (c)(22) through (c)(44) of this Supplement.

(c) The license requirements and licensing policies for items controlled for anti-terrorism reasons to Syria and North Korea are generally described in §§ 742.9 and 742.19 of this part, respectively. This Supplement provides guidance on licensing policies for North Korea and Syria and related contract sanctity dates that may be available for transactions benefiting from pre-existing contracts involving Syria.

(1) All items subject to national security

controls.

(i) [RESERVED].

(ii) *Syria.* Applications for military end-users or military end-uses in Syria will generally be denied. Applications for non-military end-users or end-uses will be considered on a case-by-case basis, unless otherwise specified in paragraphs (c)(2) through (c)(42) of this Supplement. No contract sanctity date is available for items valued at \$7 million or more to military end-users or end-uses. The contract sanctity date for all other items for all end-users: December 16, 1986.

(iii) [Reserved]

(iv) *North Korea.* Applications for all end-users in North Korea of such equipment will generally be denied.

(2) All items subject to chemical and biological weapons proliferation controls.

Applications for all end-users in North Korea and Syria of these items will generally be denied. See Supplement No. 1 to part 742 for contract sanctity dates for Syria.

(3) All items subject to missile proliferation controls (MTCR). Applications for all end-users in North Korea and Syria will generally be denied. Contract sanctity provisions for Syria are not available.

(4) All items subject to nuclear weapons proliferation controls (NRL).

(i) [RESERVED]

(ii) *Syria.* Applications for military end-users or end-uses to Syria will generally be denied. Applications for non-military end-users or end-uses will be considered on a case-by-case

basis unless otherwise specified in paragraphs (c)(2) through (c)(42) of this Supplement. No contract sanctity date is available.

(iii) *Sudan.* Applications for military end-users or end-uses in Sudan will generally be denied. Applications for export and reexport to non-military end-users or end-uses will be considered on a case-by-case basis unless otherwise specified in paragraphs (c)(2) through (c)(42) of this Supplement. No contract sanctity date is available.

(iv) *North Korea.* Applications for all end-users in North Korea will generally be denied.

(5) All military-related items, i.e., applications for export and reexport of items controlled by CCL entries ending with the number “18”.

(i) [RESERVED]

(ii) *Syria.* Applications for all end-users in Syria will generally be denied. Contract sanctity date: see paragraph (c)(1)(ii) of this Supplement.

(iii) *Sudan.* Applications for all end-users in Sudan will generally be denied. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of December 28, 1993).

(iv) *North Korea.* Applications for all end-users in North Korea will generally be denied.

(6) All aircraft (powered and unpowered), helicopters, engines, and related spare parts and components.

(i) [RESERVED]

(ii) *Syria.* Applications for all end-users in Syria will generally be denied.

(A) There is no contract sanctity for helicopters exceeding 10,000 lbs. empty weight or fixed wing aircraft valued at \$3 million or more; except that passenger aircraft, regardless of value, have a contract sanctity date of December 16, 1986, if destined for a regularly scheduled airline with assurance against military use.

(B) Contract sanctity date for helicopters with 10,000 lbs. empty weight or less: April 28, 1986.

(C) Contract sanctity date for other aircraft and gas turbine engines therefor: December 16, 1986.

(D) Contract sanctity date for helicopter or aircraft parts and components controlled by ECCN 9A991.d: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea*. Applications for all end-users in North Korea will generally be denied.

(7) Heavy duty, on-highway tractors.

(i) [RESERVED]

(ii) *Syria*. Applications for military end-users or for military end-uses in Syria will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis. Contract sanctity date: August 28, 1991.

(iii) *Sudan*. Applications for military end-users or for military end-uses in Sudan will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date: January 19, 1996.

(iv) *North Korea*. Applications for military end-users or for military end-uses in North Korea will generally be denied. Applications for non-

military end-users or for non-military end-uses in North Korea will be considered on a case-by-case basis.

(8) Off-highway wheel tractors of carriage capacity 9t (10 tons) or more.

(i) [RESERVED]

(ii) *Syria*. Applications for military end-users or for military end-uses in Syria will generally be denied. Applications for non-military end-users or for non-military end-uses in

Syria will be considered on a case-by-case basis. Contract sanctity date: August 28, 1991.

(iii) *Sudan*. Applications for military end-users or for military end-uses in Sudan will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date: January 19, 1996.

(iv) *North Korea*. Applications for military end-users or for military end-uses in North Korea will generally be denied. Applications for non-military end-users or for non-military end-uses in North Korea will be considered on a case-by-case basis.

(9) Large diesel engines (greater than 400 horsepower) and parts to power tank transporters.

(i) [RESERVED]

(ii) *Sudan*. Applications for military end-users or for military end-uses in Sudan will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date: January 19, 1996.

(iii) *North Korea*. Applications for military end-users or for military end-uses in North Korea

will generally be denied. Applications for non-military end-users or for non-military end-uses in North Korea will be considered on a case-by-case basis.

(10) Cryptographic, cryptoanalytic, and cryptologic equipment.

(i) [RESERVED]

(ii) *Syria.* A license is required for all national security-controlled cryptographic, cryptoanalytic, and cryptologic equipment to all end-users. Applications for all end-users in Syria will generally be denied. Contract sanctity date for cryptographic, cryptoanalytic, and cryptologic equipment that was subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(iii) [RESERVED]

(iv) *North Korea.* Applications for all end-users in North Korea of any such equipment will generally be denied.

(11) Navigation, direction finding, and radar equipment.

(i) [RESERVED]

(ii) *Syria.* Applications for military end-users or for military end-uses in Syria of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis.

(A) Contract sanctity date for exports of navigation, direction finding, and radar equipment that was subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for all other navigation, direction finding, and radar

equipment: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea.* Applications for military end-users or for military end-uses in North Korea of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in North Korea will be considered on a case-by-case basis.

(12) Electronic test equipment.

(i) [RESERVED]

(ii) *Syria.* Applications for military end-users or for military end-uses in Syria of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis.

(A) Contract sanctity date for electronic test equipment that was subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for all other electronic test equipment: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea.* Applications for military end-users or for military end-uses, or for nuclear end-users or nuclear end-uses, in North Korea of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses, or for non-nuclear end-users or non-nuclear end-uses, in North Korea will be considered on a case-by-case basis.

(13) Mobile communications equipment.

(i) [RESERVED]

(ii) *Syria.* Applications for military end-

users or for military end-uses in Syria of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis.

(A) Contract sanctity date for mobile communications equipment that was subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for exports of all other mobile communications equipment: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea.* Applications for military end-users or for military end-uses in North Korea of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in North Korea will be considered on a case-by-case basis.

(14) Acoustic underwater detection equipment.

(i) [RESERVED]

(ii) *Syria.* A license is required for acoustic underwater detection equipment that was subject to national security controls on August 28, 1991, to all end-users. Applications for military end-users or for military end-uses in Syria will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis. Contract sanctity date for acoustic underwater detection equipment that was subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(iii) [RESERVED]

(iv) *North Korea.* Applications for military end-users or for military end-uses in North Korea

of such equipment of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in North Korea of such equipment will be considered on a case-by-case basis.

(15) Portable electric power generator.

(i) [RESERVED]

(ii) *North Korea.* Applications for military end-users or for military end-uses in North Korea of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in North Korea of such equipment will be considered on a case-by-case basis.

(16) Vessels and boats, including inflatable boats.

(i) [RESERVED]

(ii) *Syria.* A license is required for national security-controlled vessels and boats. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis. Contract sanctity date for vessels and boats that were subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(iii) [RESERVED] date of December 28, 1993).

(iv) *North Korea.* Applications for military end-users or for military end-uses in North Korea of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in North Korea of these items will be considered on a case-by-case basis.

(17) Marine and submarine engines (outboard/inboard, regardless of horsepower).

(i) [RESERVED]

(ii) *Syria*. A license is required for all marine and submarine engines subject to national security controls to all end-users. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis. Contract sanctity date for marine and submarine engines that were subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(iii) [RESERVED]

(iv) *North Korea*. Applications for military end-users or for military end-uses in North Korea of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in North Korea of these items will be considered on a case-by-case basis.

(18) Underwater photographic equipment.

(i) [RESERVED]

(ii) *Syria*. Applications for military end-users or for military end-uses in Syria of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis.

(A) Contract sanctity date for underwater photographic equipment that was subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for all other underwater photographic equipment: August

28, 1991.

(iii) [RESERVED]

(iv) *North Korea*. Applications for all end-users in North Korea of such equipment will generally be denied.

(19) Submersible systems.

(i) [RESERVED]

(ii) *Syria*. Applications for military end-users or for military end-uses in Syria of such systems will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis.

(A) Contract sanctity date for submersible systems that were subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for all other submersible systems: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea*. Applications for all end-users in North Korea of such equipment will generally be denied.

(20) Scuba gear and related equipment.

(i) [RESERVED]

(ii) [RESERVED]

(iii) *North Korea*. Applications for all end-users in North Korea of such equipment will generally be denied.

(21) Pressurized aircraft breathing equipment.

(i) [RESERVED]

(ii) [RESERVED]

(iii) *North Korea.* Applications for all end-users in North Korea of such equipment will generally be denied.

(22) Computer numerically controlled machine tools.

(i) [RESERVED]

(ii) *Syria.* Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for computer numerically controlled machine tools that were subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for exports of all other computer numerically controlled machine tools: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea.* Applications for all end-users in North Korea of such equipment will generally be denied.

(23) Vibration test equipment.

(i) [RESERVED]

(ii) *Syria.* Applications for military end-users or for military end-uses in Syria of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for vibration test equipment that was subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for exports of all other vibration test equipment: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea.* Applications for military end-users or for military end-uses in North Korea of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(24) Digital computers with an APP of .00001 WT or above, assemblies, related equipment, equipment for development or production of magnetic and optical storage equipment, and materials for fabrication of head/disk assemblies.

(i) [RESERVED]

(ii) *Syria.* Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity dates for items that were subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for all other items: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea.*

(A) Computers with an APP exceeding

0.0004 WT: Applications for all end-users will generally be denied.

(B) Computers with an APP equal to or less than 0.0004 WT: Applications for military end-users or for military end-uses, or for nuclear end-users or nuclear end-uses, will generally be denied. Applications for non-military end-users or for non-military end-uses, or for non-nuclear end-users or non- nuclear end-uses, will be considered on a case-by-case basis.

(25) Telecommunications equipment.

(i) A license is required for the following telecommunications equipment:

(A) Radio relay systems or equipment operating at a frequency equal to or greater than 19.7 GHz or “spectral efficiency” greater than 3 bit/s/Hz;

(B) Fiber optic systems or equipment operating at a wavelength greater than 1000 nm;

(C) “Telecommunications transmission systems” or equipment with a “digital transfer rate” at the highest multiplex level exceeding 45 Mb/s.

(ii) [RESERVED]

(iii) *Syria.* Applications for military end-users or for military end-uses in Syria of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for exports of telecommunications equipment that was subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for exports of

all other telecommunications equipment: August 28, 1991.

(iv) [RESERVED],

(v) *North Korea.* Applications for military end-users or for military end-uses in North Korea of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(26) Microprocessors.

(i) Operating at a clock speed over 25 MHz.

(A) [RESERVED]

(B) *Syria.* Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(1) Contract sanctity date for microprocessors that were subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(2) Contract sanctity date for all other microprocessors: August 28, 1991.

(ii) With a processing speed of 0.5 GFLOPS or above.

(A) *North Korea.* Applications for all end-users in North Korea of these items will generally be denied.

(B) [RESERVED]

(27) Semiconductor manufacturing

equipment.

For Syria, Sudan, or North Korea, a license is required for all such equipment described in ECCNs 3B001 and 3B991.

(i) [RESERVED]

(ii) *Syria.* Applications for military end-users or for military end-uses in Syria of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for semiconductor manufacturing equipment that was subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for all other semiconductor manufacturing equipment: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea.* Applications for all end-users in North Korea of such equipment will generally be denied.

(28) Software specially designed for the computer-aided design and manufacture of integrated circuits.

(i) [RESERVED]

(ii) *Syria.* Applications for military end-users or for military end-uses in Syria of such software will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for such

software that was subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for all other such software: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea.* Applications for military end-users or for military end-uses in North Korea of such software will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(29) Packet switches. Equipment described in ECCN 5A991.c.

(i) [RESERVED]

(ii) *Syria.* Applications for military end-users or for military end-uses in Syria of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for packet switches that were subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for all other packet switches: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea.* Applications for military end-users or for military end-uses in North Korea of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(30) Specially designed software for air

traffic control applications that uses any digital signal processing techniques for automatic target tracking or that has a facility for electronic tracking.

(i) [RESERVED]

(ii) *Syria.* Applications for military end-users or for military end-uses in Syria of such software will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for such software that was subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for exports of all other such software: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea.* Applications for military end-users or for military end-uses in North Korea of such software will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(31) Gravity meters having static accuracy of less (better) than 100 microgal, or gravity meters of the quartz element (worden) type.

(i) [RESERVED]

(ii) *Syria.* Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for gravity meters that were subject to national security controls on August 28, 1991: see paragraph

(c)(1)(ii) of this Supplement.

(B) Contract sanctity date for exports of all other such gravity meters: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea.* Applications for military end-users or for military end-uses in North Korea of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(32) Magnetometers with a sensitivity lower (better) than 1.0 nt rms per square root Hertz.

(i) [RESERVED]

(ii) *Syria.* Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for such magnetometers that were subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for all other such magnetometers: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea.* Applications for military end-users or for military end-uses in North Korea of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(33) Fluorocarbon compounds described in ECCN 1C006.d for cooling fluids for radar.

(i) [RESERVED]

(ii) *Syria*. Applications for military end-users or for military end-uses in Syria of such compounds will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for such fluorocarbon compounds that were subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for all other such fluorocarbon compounds: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea*. Applications for military end-users or for military end-uses in North Korea of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(34) High strength organic and inorganic fibers (kevlar) described in ECCN 1C210.

(i) [RESERVED]

(ii) *Syria*. Applications for military end-users or for military end-uses in Syria of such fibers will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for high strength organic and inorganic fibers (kevlar) described in ECCN 1C210 that were subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for all other high strength organic and inorganic fibers (kevlar) described in ECCN 1C210: August 28,

1991.

(iii) [RESERVED]

(iv) *North Korea*. Applications for military end-users or for military end-uses, or for nuclear end-users or nuclear end-uses, in North Korea of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses, or for non-nuclear end-users or non-nuclear end-uses, in North Korea will be considered on a case-by-case basis.

(35) Machines described in ECCNs 2B003 and 2B993 for cutting gears up to 1.25 meters in diameter.

(i) [RESERVED]

(ii) *Syria*. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for machines that were subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for all other machines: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea*. Applications for military end-users or for military end-uses in North Korea of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(36) Aircraft skin and spar milling machines.

(i) [RESERVED]

(ii) *Syria*. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for aircraft skin and spar milling machines that were subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for all other aircraft skin and spar milling machines: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea*. Applications for all end-users in North Korea of such equipment will generally be denied.

(37) Manual dimensional inspection machines described in ECCN 2B996.

(i) [RESERVED]

(ii) *Syria*. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis.

(A) Contract sanctity date for such manual dimensional inspection machines that were subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for all other such manual dimensional inspection machines: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea*. Applications for military

end-users or for military end-uses, or for nuclear end-users or nuclear end-uses, in North Korea of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses, or for non-nuclear end-users or non-nuclear end-uses, in North Korea will be considered on a case-by-case basis.

(38) Robots capable of employing feedback information in real time processing to generate or modify programs.

(i) [RESERVED]

(ii) *Syria*. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by case basis.

(A) Contract sanctity date for such robots that were subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this Supplement.

(B) Contract sanctity date for all other such robots: August 28, 1991.

(iii) [RESERVED]

(iv) *North Korea*. Applications for military end-users or for military end-uses, or for nuclear end-users or nuclear end-uses, in North Korea of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses, or for non-nuclear end-users or non-nuclear end-uses, in North Korea will be considered on a case-by-case basis.

(39) Explosives detection equipment described in ECCN 2A983.

(i) Explosives detection equipment described in ECCN 2A983, controlled prior to April 3, 2003 under ECCN 2A993.

(A) [RESERVED]

(B) *Syria*. Applications for all end-users in Syria of these items will generally be denied. Contract sanctity date: January 19, 1996.

(C) [RESERVED]

(D) *North Korea*. Applications for all end-users in North Korea of these items will generally be denied.

(ii) Explosives detection equipment described in ECCN 2A983, not controlled prior to April 3, 2003 under ECCN 2A993.

(A) [RESERVED]

(B) *Syria*. Applications for all end-users in Syria of these items will generally be denied. Contract sanctity date: March 21, 2003.

(C) *Sudan*. Applications for all end-users in Sudan of these items will generally be denied. Contract sanctity date for reexports by non-U.S. persons: March 21, 2003.

(D) *North Korea*. Applications for all end-users in North Korea of these items will generally be denied. Contract sanctity date: March 21, 2003.

(40) “Software” described in ECCN 2D983 specially designed or modified for the “development”, “production” or “use” of explosives detection equipment.

(i) [RESERVED]

(ii) *Syria*. Applications for all end-users in Syria of these items will generally be denied. Contract sanctity date: March 21, 2003.

(iii) [RESERVED]

(iv) *North Korea*. Applications for all end-users in North Korea of these items will generally be denied. Contract sanctity date: March 21, 2003.

(41) “Technology” described in ECCN 2E983 specially designed or modified for the “development”, “production” or “use” of explosives detection equipment.

(i) [RESERVED]

(ii) *Syria*. Applications for all end-users in Syria of these items will generally be denied. Contract sanctity date: March 21, 2003.

(iii) [RESERVED]

(iv) *North Korea*. Applications for all end-users in North Korea of these items will generally be denied. Contract sanctity date: March 21, 2003.

(42) Production technology controlled under ECCN 1C355 on the CCL.

(i) [RESERVED]

(ii) *Syria*. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis.

(iii) [RESERVED]

(iv) *North Korea*. Applications for military end-users or for military end-uses in North Korea of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(43) Commercial Charges and devices controlled under ECCN 1C992 on the CCL.

(i) [RESERVED]

(ii) *Syria*. Applications for all end-users in Syria of these items will generally be denied.

(iii) RESERVED]

(iv) *North Korea*. Applications for all end-users in North Korea of these items will generally be denied.

(44) Ammonium nitrate, including certain fertilizers containing ammonium nitrate, under ECCN 1C997 on the CCL.

(i) [RESERVED]

(ii) *Syria*. Applications for all end-users in Syria of these items will generally be denied. Contract sanctity date: June 15, 2001.

(iii) [RESERVED]

(iv) *North Korea*. Applications for all end-users in North Korea of these items will generally be denied. Contract sanctity date: June 15, 2001.

(45) Specific processing equipment, materials and software controlled under ECCNs 0A999, 0B999, 0D999, 1A999, 1C999, 1D999, 2A999, 2B999, 3A999, and 6A999 on the CCL.

(i) *North Korea*. Applications for military end-users or for military end-uses, or for nuclear end-users or nuclear end-uses, in North Korea of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses, or for non-nuclear end-users or non-nuclear end-uses, in North Korea will be considered on a case-by-case basis.

(ii) [RESERVED]

(46) Concealed object detection equipment

described in ECCN 2A984.

(i) *Syria*. Applications for all end-users in Syria of these commodities will generally be denied. Contract sanctity date: March 19, 2010.

(ii) [RESERVED]

(iii) *North Korea*. Applications for all end-users in North Korea of these commodities will generally be denied. Contract sanctity date: March 19, 2010.

(47) “Software” described in ECCN 2D984 “required” for the “development”, “production” or “use” of concealed object detection equipment controlled by 2A984.

(i) *Syria*. Applications for all end-users in Syria of these software will generally be denied. Contract sanctity date: March 19, 2010.

(ii) [RESERVED]

(iii) *North Korea*. Applications for all end-users in North Korea of these software will generally be denied. Contract sanctity date: March 19, 2010.

(48) “Technology” described in ECCN 2E984 “required” for the “development”, “production” or “use” of concealed object detection equipment controlled by 2A984, or the “development” of “software” controlled by 2D984.

(i) *Syria*. Applications for all end-users in Syria of these items will generally be denied. Contract sanctity date: March 19, 2010.

(ii) [RESERVED]

(iii) *North Korea*. Applications for all end-users in North Korea of these items will generally be denied. Contract sanctity date: March 19, 2010.

SUPPLEMENT NO. 3 - [RESERVED]

SUPPLEMENT NO. 4 – [RESERVED]

[RESERVED]

Supplement No. 5 to Part 742—page 1

SUPPLEMENT NO. 5 – [RESERVED]

SUPPLEMENT NO. 6 TO PART 742 --TECHNICAL QUESTIONNAIRE FOR ENCRYPTION AND OTHER “INFORMATION SECURITY” ITEMS***(a) For all items:***

(1) State the name(s) of each product being submitted for classification or other consideration (as a result of a request by BIS) and provide a brief non technical description of the type of product (e.g., routers, disk drives, cell phones, and chips) being submitted, and provide brochures, data sheets, technical specifications or other information that describe the item(s).

(2) Indicate whether there have been any prior classifications of the product(s), if they are applicable to the current submission. For products with minor changes in encryption functionality, you must include a cover sheet with complete reference to the previous review (Commodity Classification Automated Tracking System (CCATS) number, Export Control Classification Number (ECCN), authorization paragraph) along with a clear description of the changes.

(3) Describe how encryption is used in the product and the categories of encrypted data (e.g., stored data, communications, management data, and internal data).

(4) For ‘mass market’ encryption products, describe specifically to whom and how the product is being marketed and state how this method of marketing and other relevant information (e.g., cost of product and volume of sales) are described by the Cryptography Note (Note 3 to Category 5, Part 2).

(5) Is any “encryption source code” being provided (shipped or bundled) as part of this offering? If yes, is this source code publicly available source code, unchanged from the code obtained from an open source web site, or is it proprietary “encryption source code?”

(b) For classification requests and other submissions, provide the following information:

(1) Description of all the symmetric and asymmetric encryption algorithms and key lengths and how the algorithms are used, including relevant parameters, inputs and settings. Specify which encryption modes are supported (e.g., cipher feedback mode or cipher block chaining mode).

(2) Describe how encryption keys are generated or managed by your product, including algorithms and modulus sizes supported.

(3) Describe whether the products incorporate or use “non-standard cryptography” defined as incorporating or using proprietary, unpublished cryptographic functionality, including encryption algorithms or protocols that have not been adopted or approved by a duly recognized international standards body. Provide a textual description and the source code of the algorithm.

(4) Describe the pre-processing methods (e.g., data compression or data interleaving) that are applied to the plaintext data prior to encryption.

(5) Describe the post-processing methods (e.g., packetization, encapsulation) that are applied to the cipher text data after encryption.

(6) State all communication protocols (e.g., X.25, Telnet, TCP, IEEE 802.11, IEEE 802.16, SIP ...) and cryptographic protocols and methods (e.g., SSL, TLS, SSH, IPSEC, IKE, SRTP, ECC, MD5, SHA, X.509, PKCS standards...), including application programming interfaces (APIs), that are supported and describe how they are used.

(7) State how the product is written to preclude

user modification of the encryption algorithms, key management and key space.

(8) Describe the cryptographic functionality that is provided by third-party hardware or software encryption components (if any). Identify the manufacturers of the hardware or software components, including specific part numbers and version information as needed to describe the product. Describe whether the encryption software components (if any) are statically or dynamically linked.

(9) Identify the version(s) and type(s) of compilers, runtime interpreters or code assemblers used, as applicable.

(10) With respect to your company’s encryption products, are any of the products (or its encryption components) manufactured outside the United States? If yes, provide manufacturing locations (city and country).

(11) See § 740.17(b)(2) of the EAR. Describe whether the item meets any of the §740.17(b)(2) criteria. Provide a comparison of your item against the criteria listed in each paragraph of § 740.17(b)(2). Give specific data for each of the parameters listed, as applicable (*e.g.*, maximum aggregate encrypted throughput, maximum number of encrypted endpoints, maximum satellite or terrestrial wireless transmission rates, terrestrial wireless operating range, customized cryptography, network penetration capability, cryptanalytic capability and “non-standard cryptography”).

(12) See § 740.17(b)(3) of the EAR. Describe whether the product meets any of the criteria described under each of the paragraphs in § 740.17(b)(3) (*e.g.*, chip, chipset, electronic assembly, programmable logic device, cryptographic library, cryptographic development kit, “non-standard cryptography,” digital forensics, and “cryptographic activation”).

(13) See § 740.17(b)(2)(iii) of the EAR. For products which incorporate an “open cryptographic interface” as defined in part 772 of the EAR, describe the cryptographic interface.

(14) For products with IPsec capabilities:

(a) Please describe your product’s implementation of IKE vendor IDs, including vendor specific and capability IDs; *and*

(b) Please specify which version of IKE you use (IKEv1 or IKEv2).

(c) For classification requests for hardware or software “encryption components” other than source code (i.e., chips, toolkits, executable or linkable modules intended for use in or production of another encryption item) provide the following additional information:

(1) Reference the application for which the components are used in, if known;

(2) State if there is a general programming interface to the component;

(3) State whether the component is constrained by function; *and*

(4) Identify the encryption component and include the name of the manufacturer, component model number or other identifier.

(d) For classification requests for “encryption source code” provide the following information:

(1) If applicable, reference the executable (object code) product that was previously classified by BIS;

(2) Include whether the source code has been modified, and the technical details on how the source code was modified; *and*

(3) *Upon request*, include a copy of the sections of the source code that contain the encryption algorithm, key management routines and their

related calls.

SUPPLEMENT NO. 7 TO PART 742 – DESCRIPTION OF MAJOR WEAPONS SYSTEMS

(1) Battle Tanks: Tracked or wheeled self-propelled armored fighting vehicles with high cross-country mobility and a high-level of self protection, weighing at least 16.5 metric tons unladen weight, with a high muzzle velocity direct fire main gun of at least 75 millimeters caliber.

(2) Armored Combat Vehicles: Tracked, semi-tracked, or wheeled self-propelled vehicles, with armored protection and cross-country capability, either designed and equipped to transport a squad of four or more infantrymen, or armed with an integral or organic weapon of a least 12.5 millimeters caliber or a missile launcher.

(3) Large-Caliber Artillery Systems: Guns, howitzers, artillery pieces combining the characteristics of a gun or a howitzer, mortars or multiple-launch rocket systems, capable of engaging surface targets by delivering primarily indirect fire, with a caliber of 75 millimeters and above.

(4) Combat Aircraft: Fixed-wing or variable-geometry wing aircraft designed, equipped, or modified to engage targets by employing guided missiles, unguided rockets, bombs, guns, cannons, or other weapons of destruction, including versions of these aircraft which perform specialized electronic warfare, suppression of air defense or reconnaissance missions. The term “combat aircraft” does not include primary trainer aircraft, unless designed, equipped, or modified as described above.

(5) Attack Helicopters: Rotary-wing aircraft designed, equipped or modified to engage targets by employing guided or unguided anti-armor, air-to-surface, air-to-subsurface, or air-to-air weapons and equipped with an integrated fire

control and aiming system for these weapons, including versions of these aircraft that perform specialized reconnaissance or electronic warfare missions.

(6) Warships: Vessels or submarines armed and equipped for military use with a standard displacement of 750 metric tons or above, and those with a standard displacement of less than 750 metric tons that are equipped for launching missiles with a range of at least 25 kilometers or torpedoes with a similar range.

(7) Missiles and Missile Launchers:

(a) Guided or unguided rockets, or ballistic, or cruise missiles capable of delivering a warhead or weapon of destruction to a range of at least 25 kilometers, and those items that are designed or modified specifically for launching such missiles or rockets, if not covered by systems identified in paragraphs (1) through (6) of this Supplement. For purposes of this rule, systems in this paragraph include remotely piloted vehicles with the characteristics for missiles as defined in this paragraph but do not include ground-to-air missiles;

(b) Man-Portable Air-Defense Systems (MANPADS); or

(c) Unmanned Aerial Vehicles (UAVs) of any type, including sensors for guidance and control of these systems, except model airplanes.

(8) Offensive Space Weapons: Systems or capabilities that can deny freedom of action in space for the United States and its allies or hinder the United States and its allies from denying an adversary the ability to take action in space. This includes systems such as anti-satellite missiles, or other systems designed to defeat or destroy assets in space.

(9) Command, Control, Communications, Computer, Intelligence, Surveillance, and Reconnaissance (C4ISR): Systems that support military commanders in the exercise of authority and direction over assigned forces across the range of military operations; collect, process, integrate, analyze, evaluate, or interpret information concerning foreign countries or areas; systematically observe aerospace, surface or subsurface areas, places, persons, or things by visual, aural, electronic, photographic, or other means; and obtain, by visual observation or other detection methods, information about the activities and resources of an enemy or potential enemy, or secure data concerning the meteorological, hydrographic, or geographic characteristics of a particular area, including Undersea communications. Also includes sensor technologies.

(10) Precision Guided Munitions (PGMs), including “smart bombs”: Weapons used in precision bombing missions such as specially designed weapons, or bombs fitted with kits to allow them to be guided to their target.

(11) Night vision equipment: Any electro-optical device that is used to detect visible and infrared energy and to provide an image. This includes night vision goggles, forward-looking infrared systems, thermal sights, and low-light level systems that are night vision devices, as well as infrared focal plane array detectors and cameras specifically designed, developed, modified, or configured for military use; image intensification and other night sighting equipment or systems specifically designed, modified or configured for military use; second generation and above military image intensification tubes specifically designed, developed, modified, or configured for military use, and infrared, visible and ultraviolet devices specifically designed, developed, modified, or configured for military application.

SUPPLEMENT NO. 8 TO PART 742 -- SELF-CLASSIFICATION REPORT FOR ENCRYPTION ITEMS

This supplement provides certain instructions and requirements for self-classification reporting to BIS and the ENC Encryption Request Coordinator (Ft. Meade, MD) of encryption commodities, software and components exported or reexported pursuant to §740.17(b)(1) of the EAR. See §740.17(e)(3) of the EAR for additional instructions and requirements pertaining to this supplement, including when to report and how to report.

(a) Information to report

The following information is required in the file format as described in paragraph (b) of this supplement, for each encryption item subject to the requirements of this supplement and §§ 740.17(b)(1) and 740.17(e)(3) of the EAR:

(1) Name of product (50 characters or less.)

(2) Model / series / part number (50 characters or less.) If necessary, enter 'NONE' or 'N/A'.

(3) Primary manufacturer (50 characters or less.) Enter 'SELF' if you are the primary manufacturer of the item. If there are multiple manufacturers for the item but none is clearly primary, either enter the name of one of the manufacturers or else enter 'MULTIPLE'. If necessary, enter 'NONE' or 'N/A'.

(4) Export Control Classification Number (ECCN), selected from one of the following:

- (i) 5A002
- (ii) 5B002
- (iii) 5D002
- (iv) 5A992

(v) 5D992

(5) Encryption authorization type identifier, selected from *one* of the following, which denote eligibility under License Exception ENC § 740.17(b)(1):

- (i) ENC
- (ii) MMKT

(6) Item type descriptor, selected from one of the following:

- (i) Access point;
- (ii) Cellular;
- (iii) Computer or computing platforms;
- (iv) Computer forensics;
- (v) Cryptographic accelerator;
- (vi) Data backup and recovery;
- (vii) Database;
- (viii) Disk / drive encryption;
- (ix) Distributed computing;
- (x) E-mail communications;
- (xi) Fax communications;
- (xii) File encryption;
- (xiii) Firewall;
- (xiv) Gateway;
- (xv) Intrusion detection;

- (xvi) Identity management;
 - (xvii) Key exchange;
 - (xviii) Key management;
 - (xix) Key storage;
 - (xx) Link encryption;
 - (xxi) Local area networking (LAN);
 - (xxii) Metropolitan area networking (MAN);
 - (xxiii) Mobility and mobile applications n.e.s.;
 - (xxiv) Modem;
 - (xxv) Multimedia n.e.s.;
 - (xxvi) Network convergence or infrastructure n.e.s.;
 - (xxvii) Network forensics;
 - (xxviii) Network intelligence;
 - (xxix) Network or systems management (OAM / OAM&P);
 - (xxx) Network security monitoring;
 - (xxxii) Operating system;
 - (xxxiii) Optical networking;
 - (xxxiv) Radio communications;
 - (xxxv) Router;
 - (xxxvi) Satellite communications;
 - (xxxvii) Short range wireless n.e.s.;
 - (xxxviii) Storage Area Networking (SAN);
 - (xxxix) 3G / 4G / 5G / LTE / WiMAX;
 - (xl) Trusted computing;
 - (xli) Videoconferencing;
 - (xlii) Virtual private networking (VPN);
 - (xliii) Voice communications n.e.s.;
 - (xliv) Voice over Internet Protocol (VoIP);
 - (xlv) Wide Area Networking (WAN);
 - (xlvi) Wireless Local Area Networking (WLAN);
 - (xlvii) Wireless Personal Area Networking (WPAN);
 - (xlviii) Test equipment n.e.s.; or
 - (xlix) Other (please specify).
- (7)** Name of company or individual submitting the report (50 characters or less).
- (8)** Telephone number (50 characters or less).
- (9)** E-mail address (50 characters or less).
- (10)** Mailing address (50 characters or less).
- (11)** With respect to your company’s encryption products, do they incorporate encryption components produced or furnished by non-U.S. sources or vendors? Enter ‘YES’, ‘NO’, or if necessary, ‘N/A’ (250 characters or less).
- (12)** With respect to your company’s encryption products, are any of them manufactured in non-

U.S. locations?” If yes, list the non-U.S. manufacturing locations by city and country. If necessary, enter ‘NONE’ or ‘N/A’ (250 characters or less).

(b) File format requirements.

(1) The information described in paragraph (a) of this supplement must be provided in tabular or spreadsheet form, as an electronic file in comma separated values format (.csv), only. No file formats other than .csv will be accepted, as your encryption self-classification report must be directly convertible to tabular or spreadsheet format, where each row (and all entries within a row) properly correspond to the appropriate encryption item.

Note to paragraph (b)(1): An encryption self-classification report data table created and stored in spreadsheet format (e.g., file extension .xls, .numbers, .qpw, .wb, .wrk, and .wks) can be converted and saved into a comma delimited file format directly from the spreadsheet program. This .csv file is then ready for submission.*

(2) Each line of your encryption self-classification report (.csv file) must consist of twelve entries as further described in this supplement.

(3) The first line of the .csv file must consist of the following twelve entries (i.e., match the following) without alteration or variation: PRODUCT NAME, MODEL NUMBER, MANUFACTURER, ECCN, AUTHORIZATION TYPE, ITEM TYPE, SUBMITTER NAME, TELEPHONE NUMBER, E-MAIL ADDRESS, MAILING ADDRESS, NON-U.S. COMPONENTS, NON-U.S. MANUFACTURING LOCATIONS.

Note to paragraph (b)(3): These first twelve entries (i.e., first row) of an encryption self-classification report in .csv format correspond to the twelve column headers of a spreadsheet data file. The responses provided under column

headers 7 through 12 (SUBMITTER NAME through NON-U.S. MANUFACTURING LOCATIONS) relate to the company as a whole, and thus should be entered the same for each product (i.e., only one point of contact, one ‘YES’ or ‘NO’ answer to whether any of the reported products incorporate non-U.S. sourced encryption components, and one list of non-U.S. manufacturing locations, is required for the report). However, even though the information is the same for each product, please duplicate this information into each row of the spreadsheet, leaving no entry blank, so each product has the same identifying company information.

(4) Each subsequent line of the .csv file must correspond to a single encryption item (or a distinguished series of products) as described in paragraph (c) of this supplement.

(5) Each line must consist of six entries as described in paragraph (a)(1), (a)(2), (a)(3), (a)(4), (a)(5), and (a)(6) of this supplement. No entries may be left blank. Each entry must be separated by a comma (.). Certain additional instructions are as follows:

(i) Line entries (a)(1) (‘PRODUCT NAME’) and (a)(4) (‘ECCN’) must be completed with relevant information.

(ii) For entries (a)(2) (‘MODEL NUMBER’) and (a)(3) (‘MANUFACTURER’), if these entries do not apply to your item or situation you may enter ‘NONE’ or ‘N/A’.

(iii) For entries (a)(5) (‘AUTHORIZATION TYPE’), if none of the provided choices apply to your situation, you may enter ‘OTHER’.

(6) Because of .csv file format requirements, the only permitted use of a comma is as the necessary separator between line entries. You may not use a comma for any other reason in your encryption self-classification report.

(c) Other instructions

(1) The information provided in accordance with this supplement and §§ 740.17(b)(1) and 740.17(e)(3) of the EAR must identify product offerings as they are typically distinguished in inventory, catalogs, marketing brochures and other promotional materials.

(2) For families of products where all the information described in paragraph (a) of this supplement is identical except for the model / series / part number (entry (a)(2)), you may list and describe these products with a single line in your .csv file using an appropriate model / series / part number identifier (e.g., ‘300’ or ‘3xx’) for entry (a)(2), provided each line in your .csv file corresponds to a single product series (or product

type) within an overall product family.

(3) For example, if Company A produces, markets and sells both a ‘100’ (‘1xx’) and a ‘300’ (‘3xx’) series of product, in its encryption self-classification report (.csv file) Company A must list the ‘100’ product series in one line (with entry (a)(2) completed as ‘100’ or ‘1xx’) and the ‘300’ product series in another line (with entry (a)(2) completed as ‘300’ or ‘3xx’), even if the other required information is common to all products in the ‘100’ and ‘300’ series.

(4) Only products self-classified by the exporter or reexporter must be reported. Products submitted for classification by the Bureau of Industry and Security for which a CCATS is issued do not need to be reported.

SUPPLEMENT NO. 1 TO PART 743 - WASSENAAR ARRANGEMENT PARTICIPATING STATES..... 1

§ 743.1 WASSENAAR ARRANGEMENT

(a) Scope

This section outlines special reporting requirements for exports of certain commodities, software and technology controlled under the Wassenaar Arrangement. Such reports must be submitted to BIS semiannually in accordance with the provisions of paragraph (f) of this section, and records of all exports subject to the reporting requirements of this section must be kept in accordance with part 762 of the EAR. This section does not require reports for reexports. This section is limited to the Wassenaar Arrangement reporting requirements for items listed on the Wassenaar Arrangement’s Dual-Use list. For reporting requirements for conventional arms listed on the Wassenaar Arrangement Munitions List that are subject to

the EAR (i.e., “600 series” ECCNs), see § 743.4 of this part for Wassenaar Arrangement and United Nations reporting requirements.

NOTE TO PARAGRAPH (a) OF THIS SECTION: For purposes of part 743, the term “you” has the same meaning as the term “exporter”, as defined in part 772 of the EAR.

(b) Requirements

You must submit two (2) copies of each report required under the provisions of this section and maintain accurate supporting records (see §762.2(b) of the EAR) for all exports of items specified in paragraph (c) of this section for the following:

(1) Exports authorized under License Exceptions GBS, CIV, TSR, LVS, APP, and the cooperating government portions (§§740.11(c) of the EAR) of GOV (see part 740 of the EAR). Note that exports of technology and source code under License Exception TSR to foreign nationals located in the U.S. should not be reported; and

(2) [Reserved]

(3) Exports authorized under the Validated End-User authorization (see §748.15 of the EAR).

(4) Exports authorized under License Exception STA (See § 740.20 of the EAR).

(c) Items for which reports are required

You must submit reports to BIS under the provisions of this section only for exports of items on the Sensitive List (see Supplement No. 6 to part 774 of the EAR).

(d) Country Exceptions

You must report each export subject to the provisions of this section, except for exports to Wassenaar member countries, as identified in Supplement No. 1 to part 743.

(e) Information that must be included in each report

(1) Each report submitted to BIS for items other than those identified in paragraph (e)(2) of this section must include the following information for each export during the time periods specified in paragraph (f) of this section:

(i) Export Control Classification Number and paragraph reference as identified on the Commerce Control List;

(ii) Number of units in the shipment; and

NOTE TO PARAGRAPH (e)(1)(ii): *For exports of technology for which reports are required under §743.1(c) of this section, the number of units in the shipment should be reported as one (1) for the initial export of the technology to a single ultimate consignee. Additional exports of the technology must be reported only when the type or scope of technology changes or exports are made to other ultimate consignees. Additionally, do not report the release of technology or source code subject to the EAR to foreign nationals in the U.S.*

(iii) Country of ultimate destination.

(2) [RESERVED]

(f) Frequency and timing of reports

You must submit reports subject to the provisions of this section semiannually. The reports must be labeled with the exporting company's name and address at the top of each page and must include for each such export all the information specified in paragraph (e) of this section. The reports shall cover exports made during six month time periods spanning from January 1 through June 30 and July 1 through December 31.

(1) The first report must be submitted to and received by BIS no later than August 1, 1998 for the partial reporting period beginning January 15, 1998 and ending June 30, 1998. Thereafter, reports are due according to the provisions of paragraphs (f)(2) and (f)(3) of this section.

(2) Reports for the reporting period ending June 30 must be submitted to and received by BIS no later than August 1.

(3) Reports for the reporting period ending December 31 must be submitted to and received by BIS no later than February 1.

(g) Where to submit Wassenaar reports

(1) **E-mail.** Reports may be E-mailed to WAreports@bis.doc.gov.

(2) **Mail.** If mailed, two (2) copies of reports are required to be delivered via courier to: Bureau of Industry and Security, U.S. Department of Commerce, Attn: "Wassenaar Reports", Room 2099B, 14th Street and Pennsylvania Ave., NW., Washington, DC 20230. BIS will not accept reports sent C.O.D.

(3) **Facsimile.** Reports may also be sent by facsimile to: (202) 482-3345 or 202-482-1373, Attn: "Wassenaar Reports".

(h) Contacts

General information concerning the Wassenaar Arrangement and reporting obligations thereof is available from the Office of National Security and Technology Transfer Controls, Tel. (202) 482-4479, Fax: (202) 482-3345 or (202) 482-1373, or E-mail: WAreports@bis.doc.gov.

§ 743.2 HIGH PERFORMANCE COMPUTERS: POST SHIPMENT VERIFICATION REPORTING

(a) Scope

This section outlines special post-shipment reporting requirements for exports of certain computers to destinations in Computer Tier 3, see §740.7(d) for a list of these destinations. Post-shipment reports must be submitted in accordance with the provisions of this section, and all relevant records of such exports must be kept in accordance with Part 762 of the EAR.

(b) Requirement

Exporters must file post-shipment reports and keep records in accordance with recordkeeping requirements in part 762 of the EAR for high performance computer exports to destinations in Computer Tier 3, as well as, exports of commodities used to enhance computers previously exported or reexported to Computer Tier 3 destinations, where the “Adjusted Peak Performance” (“APP”) is greater than that listed in ECCN 4A003.b in the Commerce Control List, Supplement No. 1 to part 774 of the EAR.

(c) Information that must be included in each post-shipment report

No later than the last day of the month following the month in which the export takes place, the exporter must submit the following information to BIS at the address listed in paragraph (d) of this section:

- (1) Exporter name, address, and telephone number;
- (2) License number;
- (3) Date of export;
- (4) End-user name, point of contact, address, telephone number;
- (5) Carrier;
- (6) Air waybill or bill of lading number;
- (7) Commodity description, quantities - listed by model numbers, serial numbers, and APP level in

WT; and

(8) Certification line for exporters to sign and date. The exporter must certify that the information contained in the report is accurate to the best of his or her knowledge.

NOTE TO PARAGRAPH (c) OF THIS SECTION: *Exporters are required to provide the PRC End-User Certificate Number to BIS as part of their post-shipment report. When providing the PRC End-User Certificate Number to BIS, you must identify the transaction in the post shipment report to which that PRC End-User Certificate Number applies.*

(d) Address

A copy of the post-shipment report[s] required under paragraph (b) of this section shall be delivered, via courier, to:

U.S. Department of Commerce
Office of Enforcement Analysis
HPC Team
14th Street and Constitution Ave., NW.
Room 4065
Washington, DC 20230

Note that BIS will not accept reports sent C.O.D.

§ 743.3 THERMAL IMAGING CAMERA REPORTING

(a) General requirement.

Exports of thermal imaging cameras must be reported to BIS as provided in this section.

(b) Transactions to be reported

Exports that are not authorized by an individually validated license of more than 100 thermal imaging cameras in a monocular, biocular or binocular configuration controlled by ECCN 6A003.b.4.b to a destination in Country Group A:1 (see supplement no. 1 to part 740 of the

EAR), except Canada, must be reported to BIS.

(c) Party responsible for reporting

The exporter as defined in § 772.1 of the EAR must ensure the reports required by this section are submitted to BIS.

(d) Information to be included in the reports

For each export described in paragraph (b) of this section, the report must identify: the name, address, and telephone number of the exporter; the date of each export; the name, address and telephone number of the consignee or end user; the model number(s) of each camera exported; the serial number of each exported camera that has a serial number; and the quantity of each model number of camera exported. (NOTE: Technical specifications may be requested on an as needed basis and must be provided to BIS after any such request.)

(e) Where to submit reports

Submit the reports via e-mail to UTICreport@bis.doc.gov.

(f) Reporting periods and due dates

This reporting requirement applies to exports made on or after May 22, 2009. Exports must be reported within one month of the reporting period in which the export takes place. The first reporting period begins on May 22, 2009 and runs through June 30, 2009. Subsequent reporting periods shall begin on January 1 and July 1 of each year, and shall run through June 30, and December 31 respectively. Exports in each reporting period must be reported to BIS no later than the last day of the month following the month in which the reporting period ends.

§ 743.4 CONVENTIONAL ARMS REPORTING

(a) Scope

This section outlines special reporting requirements for exports of certain items listed on the Wassenaar Arrangement Munitions List and the UN Register of Conventional Arms. Participating States of the Wassenaar Arrangement exchange information every six months on deliveries to non-participating states of conventional arms set forth in the *Wassenaar Arrangement's Basic Documents* under Part II Guideline and Procedures, including the Initial Elements, Appendix 3: Specific Information Exchange on Arms Content by Category (at www.wassenaar.org), derived from the categories of the UN Register of Conventional Arms (at www.un.org/disarmament/convarms/Register/). Similar, although not identical, information is also reported by the U.S. Government to the United Nations on an annual basis. The reported information should include the quantity and the name of the recipient state and, except in the category of missiles and missile launchers, details of model and type. Such reports must be submitted to BIS semi-annually in accordance with the provisions of paragraph (f) of this section for items identified in paragraph (c)(1) of this section and annually for items identified in paragraph (c)(2) of this section, and records of all exports subject to the reporting requirements of this section must be kept in accordance with part 762 of the EAR. This section does not require reports for reexports or transfers (in-country). This section does not require reports when the exporter uses the alternative submission method described under paragraph (h) of this section. The alternative submission method under paragraph (h) requires the exporter to submit the information required for conventional arms reporting in this section as part of the required EEI submission in AES, pursuant to § 758.1(b)(9) of the EAR. The Department of Commerce leaves standard method for submitting reports in place in case any additional items are moved from the USML to the CCL, that may require conventional arms reporting.

NOTE 1 TO PARAGRAPH (a): For purposes of this section, the term "you" has the

same meaning as the term “exporter”, as defined in part 772 of the EAR.

(b) Requirements

You must submit one electronic copy of each report required under the provisions of this section, or submit this information using the alternative submission method specified in paragraph (h) of this section, and maintain accurate supporting records (see § 762.2(b) of the EAR) for all exports of items specified in paragraph (c) of this section for the following:

(1) Exports authorized under License Exceptions LVS, TMP, RPL, STA, or GOV (see part 740 of the EAR);

(2) [Reserved]

(3) Exports authorized under the Validated End User authorization (see § 748.15 of the EAR).

(c) Items for which reports are required --

(1) Wassenaar Arrangement reporting. You must submit reports to BIS under the provisions of this section only for exports of items classified under the following ECCNs:

(i) ECCN 0A501.a and .b.

(ii) [RESERVED]

(2) United Nations reporting. You must submit reports to BIS under the provisions of this section only for exports of items classified under the following ECCNs:

(i) ECCN 0A501.a and .b.

(ii) [RESERVED]

(d) Country Exceptions for Wassenaar Arrangement reporting

You must report each export subject to the provisions of this section, except for exports to Wassenaar member countries, identified in

Supplement No. 1 to part 743 for reports required under paragraph (c)(1) of this section.

(e) Information that must be included in each report

(1) Each report submitted to BIS for items other than those identified in paragraph (e)(2) of this section must include the following information for each export during the time periods specified in paragraph (f) of this section:

(i) Export Control Classification Number and paragraph reference as identified on the Commerce Control List;

(ii) Number of units in the shipment; and

NOTE 2 TO PARAGRAPH (e)(1)(ii): For exports of technology for which reports are required under § 743.1(c) of this section, the number of units in the shipment should be reported as one (1) for the initial export of the technology to a single ultimate consignee. Additional exports of the technology must be reported only when the type or scope of technology changes or exports are made to other ultimate consignees.

(iii) Country of ultimate destination.

(f) Frequency and timing of reports –

(1) Semi-annual reports for items identified in paragraph (c)(1) of this section. You must submit reports subject to the provisions of this section semiannually. The reports must be labeled with the exporting company's name and address at the top of each page and must include for each such export all the information specified in paragraph (e) of this section. The reports shall cover exports made during six-month time periods from January 1 through June 30 and July 1 through December 31.

(i) The first report must be submitted to and received by BIS no later than 180 days after the effective date of the rule that revises paragraph

(c)(1) of this section to add the ECCN for the item being reported. Thereafter, reports are due according to the provisions of paragraphs (f)(2) and (f)(3) of this section.

(ii) Reports for the reporting period ending June 30 must be submitted to and received by BIS no later than August 1.

(iii) Reports for the reporting period ending December 31 must be submitted to and received by BIS no later than February 1.

(2) Annual reports for items identified in paragraph (c)(2) of this section. You must submit reports subject to the provisions of this section annually. The reports must be labeled with the exporting company's name and address at the top of each page and must include for each such export all the information specified in paragraph (e) of this section. The reports shall cover exports made during twelve month time periods from January 1 through December 31.

(i) The first report must be submitted to and received by BIS no later than 180 days after the effective date of the rule that revises paragraph (c)(1) of this section to add the ECCN for the item being reported.. Thereafter, reports are due according to the provisions of paragraph (f)(2) of this section.

(ii) Reports for the reporting period ending December 31 must be submitted to and received by BIS no later than February 1.

(g) Submission of reports

Information should be submitted in the form of a spreadsheet and emailed to WAreports@BIS.DOC.GOV or UNreports@BIS.DOC.GOV.

(h) Alternative submission method

This paragraph (h) describes an alternative submission method for meeting the conventional arms reporting requirements of this section. The

alternative submission method requires the exporter, when filing the required EEI submission in AES, pursuant to § 758.1(b)(9) of the EAR, to include the items paragraph classification (*i.e.*, .a, or .b) for ECCN 0A501 as the first text to appear in the Commodity description block. If the exporter properly includes this information in the EEI filing in AES, the Department of Commerce will be able to obtain that export information directly from AES to meet the U.S. Government's commitments to the Wassenaar Arrangement and United Nations for conventional arms reporting. An exporter that complies with the requirements in § 758.1(g)(4)(ii) of the EAR does not have to submit separate annual and semi-annual reports to the Department of Commerce pursuant to this section.

(i) Contacts

General information concerning the Wassenaar Arrangement and reporting obligations thereof is available from the Office of National Security and Technology Transfer Controls, Tel.: (202) 482-0092, Fax: (202) 482-4094. Information concerning the reporting requirements for items identified in paragraphs (c)(1) and (2) of this section is available from the Office of Nonproliferation and Treaty Compliance (NPTC), Tel.: (202) 482-4188, Fax: (202) 482-4145.

§ 743.5 PRIOR NOTIFICATIONS TO CONGRESS OF EXPORTS OF "600 SERIES MAJOR DEFENSE EQUIPMENT"

(a) General requirement

Applications to export items on the Commerce Control List that are "600 Series Major Defense Equipment" will be notified to Congress as provided in this section before licenses for such items are issued.

(1) Exports of "600 Series Major Defense Equipment" to U.S. Government end users under

License Exception GOV (§ 740.11(b) of the EAR) do not require such notification.

(2) Exports of “600 Series Major Defense Equipment” that have been or will be described in a notification filed by the U.S. State Department under the Arms Export Control Act do not require such notification by BIS.

(b) BIS will notify Congress prior to issuing a license authorizing the export of items to a country *outside* the countries listed in Country Group A:5 (see Supplement No.1 to part 740 of the EAR) that are sold under a contract that includes \$14,000,000 or more of “600 Series Major Defense Equipment.”

(c) BIS will notify Congress prior to issuing a license authorizing the export of items to a country listed in Country Group A:5 (see Supplement No.1 to part 740 of the EAR) that are sold under a contract that includes \$25,000,000 or more of “600 Series Major Defense Equipment.”

(d) In addition to information required on the application, the exporter must include a copy of the signed contract (including a statement of the value of the “600 Series Major Defense Equipment” items to be exported under the contract) for any proposed export described in paragraphs (b) or (c) of this section.

(e) *Address*

Munitions Control Division at
mcd_compliance@bis.doc.gov.

**§ 743.6 PRIOR NOTIFICATIONS TO
CONGRESS OF EXPORTS OF
CERTAIN SEMIAUTOMATIC
FIREARMS**

(a) *General requirement.*

Applications to export semiautomatic firearms controlled by ECCN 0A501.a will be notified to

Congress as provided in this section before licenses for such items are issued, except as specified in paragraphs (a)(1) to (2) of this section.

(1) Exports of semiautomatic firearms controlled by ECCN 0A501.a to personnel and agencies of the U.S. Government under License Exception GOV (§ 740.11(b) of the EAR) do not require such notification.

(2) Exports of semiautomatic firearms controlled by ECCN 0A501.a for official use by an agency of NATO do not require such notification.

(b) *Notification criteria.*

Unless excluded in paragraphs (a)(1) to (2) of this section, BIS will notify Congress prior to issuing a license authorizing the export of items to Mexico, South Africa, or Turkey or any other country not listed in Country Group A:5 or A:6 (see supplement no.1 to part 740 of the EAR) if the items are sold under a contract or are otherwise part of an export transaction that includes \$4,000,000 or more of semiautomatic firearms controlled by ECCN 0A501.a.

(c) *License application information.*

In addition to information required on the application, the exporter must include a copy of the signed contract or, if there is no contract, a written explanation from the applicant (including a statement of the value of the firearms controlled by ECCN 0A501.a to be exported) for any proposed export described in paragraph (b) of this section. License applications for semiautomatic firearms controlled by ECCN 0A501.a may include other nonautomatic firearms, shotguns, other 0x5zz items, or other items subject to the EAR, but the applicant must clearly identify the semiautomatic firearms controlled by ECCN 0A501.a. The applicant clearly distinguishing the semiautomatic firearms controlled by ECCN 0A501.a from any other items on the license application will assist BIS in assessing whether the license application requires congressional notification under this section and identifying the information that will need to be reported to

Congress. Any activity intended to circumvent notification requirements is prohibited. Such devices include, but are not limited to, the splitting or structuring of contracts to avoid exceeding applicable notification dollar value limits described in paragraph (a) of this section.

For questions on this section, you may contact the Nuclear and Missile Technology Controls Division, Guns and Ammunition licensing group at firearmsCN@bis.doc.gov.

§ 744.1 GENERAL PROVISIONS

(a)(1) Introduction.

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. This part contains prohibitions against exports, reexports, and selected transfers to certain end users and end uses as introduced under General Prohibitions Five (End use/End users) and Nine (Orders, Terms, and Conditions), unless authorized by BIS. Sections 744.2, 744.3, and 744.4 prohibit exports, reexports, and transfers (in-country) of items subject to the EAR to defined nuclear, missile, and chemical and biological weapons proliferation activities. Section 744.5 prohibits exports, reexports, and transfers (in-country) of items subject to the EAR to defined nuclear maritime end-uses. Consistent with General Prohibition Seven (Support of Proliferation Activities and certain Military-Intelligence End Uses and End Users (“U.S. person” activities)), §744.6 prohibits specific activities by U.S. persons in support of certain nuclear, missile, chemical and biological weapons end uses, and whole plants for chemical weapons precursors, as well as certain military-intelligence end uses and military-intelligence end users. Section 744.7 prohibits exports and reexports of certain items for certain aircraft and vessels. Section 744.8 prohibits exports and reexports without authorization to certain parties who have been designated as proliferators of weapons of mass destruction or as supporters of such proliferators pursuant to Executive Order 13382. Section 744.9 sets forth restrictions on exports, reexports, and transfers (in-country) of certain cameras, systems, or related components. Section 744.10 prohibits exports and reexports of any item subject to the EAR to Russian entities, included in supplement no. 4 of this part. Section 744.11 imposes license requirements, to the extent specified in supplement no. 4 to this part on entities listed in supplement no. 4 to this part for activities contrary to the national security or foreign policy interests of the United States. Sections 744.12, 744.13, and 744.14 prohibit

exports and reexports of any item subject to the EAR to persons designated as Specially Designated Global Terrorists, Specially Designated Terrorists, or Foreign Terrorist Organizations, respectively. Section 744.15 sets forth the conditions for exports, reexports, and transfers (in-country) to persons listed on the Unverified List (UVL) in supplement no. 6 to this part, the criteria for revising the UVL, as well as procedures for requesting removal or modification of a listing on the UVL. Section 744.16 sets forth the license requirements, policies and procedures for the Entity List. Section 744.17 sets forth restrictions on exports, reexports, and transfers (in-country) of microprocessors and associated “software” and “technology” for military end uses and to military end users. Section 744.18 sets forth restrictions on exports, reexports, and transfers to persons designated in or pursuant to Executive Order 13315. Section 744.19 sets forth BIS’s licensing policy for applications for exports or reexports when a party to the transaction is an entity that has been sanctioned pursuant to any of three specified statutes that require certain license applications to be denied. Section 744.20 requires a license, to the extent specified in supplement no. 4 to this part, for exports and reexports of items subject to the EAR destined to certain sanctioned entities listed in supplement no. 4 to this part. In addition, these sections include license review standards for export license applications submitted as required by these sections. It should also be noted that part 764 of the EAR prohibits exports, reexports and certain transfers of items subject to the EAR to denied parties. Section 744.21 imposes restrictions for exports, reexports and transfers (in-country) of items on the CCL for a military end use or military end user in Burma, the People’s Republic of China (PRC or China), Russia, or Venezuela. Section 744.22 imposes restrictions on exports, reexports, and transfers (in-country) for a military-intelligence end use or military-intelligence end user in Burma, China, Russia, or Venezuela; or a country listed in Country Groups E:1 or E:2 (see supplement no. 1 to part 740 of the EAR). Section 744.23 sets forth restrictions

on exports, reexports, and transfers (in-country) for certain “supercomputer” and semiconductor manufacturing end use.

(2) If controls set forth under more than one section of part 744 apply to a person, the license requirements for such a person will be determined based on the requirements of all applicable sections of part 744, and license applications will be reviewed under all applicable licensing policies.

(b) Steps

The following are steps you should follow in using the provisions of this part:

(1) Review end-use and end-user prohibitions. First, review each end-use and end-user prohibition described in this part to learn the scope of these prohibitions.

(2) Determine applicability. Second, determine whether any of the end-use and end-user prohibitions described in this part are applicable to your planned export, reexport, shipment, transmission, transfer (in-country) or other activity. See supplement no. 1 to part 732 for guidance. For exports, reexports, shipments, transmissions, or transfers (in-country) that are in transit at the time you are informed by BIS that a license is required in accordance with §§ 744.2(b), 744.3(b), 744.4(b), 744.6(c), 744.9(b), 744.11(c), 744.17(b), 744.21(b), or 744.22(b) of the EAR, you may not proceed any further with the transaction unless you first obtain a license from BIS (see part 748 of the EAR for instructions on how to apply for a license). The provisions of § 748.4(d)(2) of the EAR shall not apply to license applications submitted pursuant to a notification from BIS that occurs while an export, reexport, or transfer (in-country) is in transit.

**§ 744.2 RESTRICTIONS ON CERTAIN
NUCLEAR END-USES**

(a) General prohibition

In addition to the license requirements for items specified on the CCL, you may not export, reexport, or transfer (in-country) to any destination, other than countries in Supplement No. 3 to this part, an item subject to the EAR without a license if, at the time of export, reexport, or transfer (in-country) you know¹ that the item will be used directly or indirectly in any one or more of the following activities described in paragraphs (a)(1), (a)(2), and (a)(3) of this section:

(1) Nuclear explosive activities. Nuclear explosive activities, including research on or development, design, manufacture, construction, testing or maintenance of any nuclear explosive device, or components or subsystems of such a device.^{2 3}

(2) Unsafeguarded nuclear activities. Activities including research on, or development, design, manufacture, construction, operation, or maintenance of any nuclear reactor, critical facility, facility for the fabrication of nuclear fuel, facility for the conversion of nuclear material from one chemical form to another, or separate storage installation, where there is no obligation to accept International Atomic Energy Agency

¹ Part 772 of the EAR defines “knowledge” for all of the EAR except part 760, Restrictive Trade Practices and Boycotts. The definition, which includes variants such as “know” and “reason to know”, encompasses more than positive knowledge. Thus, the use of “know” in this section in place of the former wording “know or have reason to know” does not lessen or otherwise change the responsibilities of persons subject to the EAR.

² Nuclear explosive devices and any article, material, equipment, or device specifically designed or specially modified for use in the design, development, or fabrication of nuclear weapons or nuclear explosive devices are subject to export licensing or other requirements of the Directorate of Defense Trade Controls, U.S. Department of State, or the licensing or other restrictions specified in the Atomic Energy Act of 1954, as amended. Similarly, items specifically

(IAEA) safeguards at the relevant facility or installation when it contains any source or special fissionable material (regardless of whether or not it contains such material at the time of export), or where any such obligation is not met.

(3) Safeguarded and unsafeguarded nuclear activities. Safeguarded and unsafeguarded nuclear fuel cycle activities, including research on or development, design, manufacture, construction, operation or maintenance of any of the following facilities, or components for such facilities:⁴

(i) Facilities for the chemical processing of irradiated special nuclear or source material;

(ii) Facilities for the production of heavy water;

(iii) Facilities for the separation of isotopes of source and special nuclear material; or

(iv) Facilities for the fabrication of nuclear reactor fuel containing plutonium.

(b) Additional prohibition on persons informed by BIS

BIS may inform persons, either individually by specific notice or through amendment to the

designed or specifically modified for use in devising, carrying out, or evaluating nuclear weapons tests or nuclear explosions (except such items as are in normal commercial use for other purposes) are subject to the same requirements.

³ Also see §§744.5 and 748.4 of the EAR for special provisions relating to technical data for maritime nuclear propulsion plants and other commodities.

⁴ Such activities may also require a specific authorization from the Secretary of Energy pursuant to §57.b.(2) of the Atomic Energy Act of 1954, as amended, as implemented by the Department of Energy's regulations published in 10 CFR 810.

EAR, that a license is required for a specific export, reexport, or transfer (in-country), or for the export, reexport, or transfer (in-country) of specified items to a certain end-user, because there is an unacceptable risk of use in, or diversion to, the activities specified in paragraph (a) of this section. Specific notice is to be given only by, or at the direction of, the Deputy Assistant Secretary for Export Administration. When such notice is provided orally, it will be followed by a written notice within two working days signed by the Deputy Assistant Secretary for Export Administration. However, the absence of any such notification does not excuse persons from compliance with the license requirements of paragraph (a) of this section.

(c) *Exceptions*

Despite the prohibitions described in paragraph (a) and (b) of this section, you may export technology subject to the EAR under the *operation technology and software* or *sales technology and software* provisions of License Exception TSU (see §740.13(a) and (b)), but *only* to and for use in countries listed in Supplement No. 3 to part 744 of the EAR (Countries Not Subject to Certain Nuclear End-Use Restrictions in §744.2(a)). Notwithstanding the provisions of part 740 of the EAR, the provisions of §740.13(a) and (b) will only overcome General Prohibition Five for countries listed in Supplement No. 3 to part 744 of the EAR.

(d) *License review standards*

The following factors are among those used by the United States to determine whether to grant or deny license applications required under this section:

(1) Whether the commodities, software, or technology to be transferred are appropriate for the stated end-use and whether that stated end-use is appropriate for the end-user;

(2) The significance for nuclear purposes of the particular commodity, software, or technology;

(3) Whether the commodities, software, or technology to be exported are to be used in research on or for the development, design, manufacture, construction, operation, or maintenance of any reprocessing or enrichment facility;

(4) The types of assurances or guarantees given against use for nuclear explosive purposes or proliferation in the particular case;

(5) Whether the end-user has been engaged in clandestine or illegal procurement activities;

(6) Whether an application for a license to export to the end-user has previously been denied, or whether the end-use has previously diverted items received under a license, License Exception, or NLR to unauthorized activities;

(7) Whether the export would present an unacceptable risk of diversion to a nuclear explosive activity or unsafeguarded nuclear fuel-cycle activity described in §744.2(a) of the EAR;

(8) The nonproliferation credentials of the importing country, based on consideration of the following factors:

(i) Whether the importing country is a party to the Nuclear Non-Proliferation Treaty (NPT) or to the Treaty for the Prohibition of Nuclear Weapons in Latin America (Treaty of Tlatelolco) (see Supplement No. 2 to part 742 of the EAR), or to a similar international legally-binding nuclear nonproliferation agreement;

(ii) Whether the importing country has all of its nuclear activities, facilities or installations that are operational, being designed, or under construction, under International Atomic Energy Agency (IAEA) safeguards or equivalent full scope safeguards;

(iii) Whether there is an agreement for cooperation in the civil uses of atomic energy between the U.S. and the importing country;

(iv) Whether the actions, statements, and policies of the government of the importing country are in support of nuclear nonproliferation and whether that government is in compliance with its international obligations in the field of nonproliferation;

(v) The degree to which the government of the importing country cooperates in nonproliferation policy generally (e.g., willingness to consult on international nonproliferation issues);

(vi) Intelligence data on the importing country's nuclear intentions and activities; and

(9) Whether the recipient state has sufficient national export controls (as described in paragraph 3 of United Nations Security Council Resolution 1540 (2004)) to prevent an unacceptable risk of retransfer or diversion to a nuclear explosive activity or unsafeguarded nuclear fuel-cycle activity described in § 744.2(a) of the EAR.

**§ 744.3 RESTRICTIONS ON CERTAIN
ROCKET SYSTEMS (INCLUDING
BALLISTIC MISSILES, SPACE
LAUNCH VEHICLES AND SOUNDING
ROCKETS) AND UNMANNED AERIAL
VEHICLES (INCLUDING CRUISE
MISSILES, TARGET DRONES AND
RECONNAISSANCE DRONES) END-
USES**

(a) General prohibition

In addition to the license requirements for items specified on the CCL, you may not export, reexport, or transfer (in-country) an item subject to the EAR without a license if, at the time of the export, reexport or transfer (in-country) you know that the item:

(1) Will be used in the design, “development,” “production,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of rocket systems or unmanned aerial vehicles capable of a range of at least 300 kilometers in or by a country listed in Country Group D:4 of supplement no. 1 to part 740 of the EAR.

(2) Will be used anywhere in the world except by governmental programs for nuclear weapons delivery of NPT Nuclear Weapons States that are also members of NATO, in the design, “development,” “production,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of rocket systems or unmanned aerial vehicles, regardless of range capabilities, for the delivery of chemical, biological, or nuclear weapons; or

(3) Will be used in the design, “development,” “production,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of any rocket systems or unmanned aerial vehicles in or by a country listed in Country Group D:4, but you are unable to determine:

(i) The characteristics (*i.e.*, range capabilities) of the rocket systems or unmanned aerial vehicles, or

(ii) Whether the rocket systems or unmanned aerial vehicles, regardless of range capabilities, will be used in a manner prohibited under paragraph (a)(2) of this section.

NOTE TO PARAGRAPH (a) OF THIS SECTION: For the purposes of this section, “Rocket Systems” include, but are not limited to, ballistic missiles, space launch vehicles, and sounding rockets. Also, for the purposes of this section, “unmanned aerial vehicles” include, but are not limited to, cruise missiles, target drones and reconnaissance drones.

(b) Additional prohibition on persons informed by BIS

BIS may inform persons, either individually by specific notice or through amendment to the EAR, that a license is required for a specific export, reexport or transfer (in-country) or for the export, reexport, or transfer (in-country) of specified items to a certain end-user, because there is an unacceptable risk of use in, or diversion to, the activities specified in paragraphs (a)(1) or (a)(2) of this section. Specific notice is to be given only by, or at the direction of, the Deputy Assistant Secretary for Export Administration. When such notice is provided orally, it will be followed by a written notice within two working days signed by the Deputy Assistant Secretary for Export Administration. However, the absence of any such notification does not excuse persons from compliance with the license requirements of paragraphs (a)(1), (a)(2), or (a)(3) of this section.

(c) Exceptions

No License Exceptions apply to the prohibitions described in paragraph (a) and (b) of this section.

(d) License Review Standards

(1) Applications to export, reexport or transfer (in-country) the items subject to this section will be considered on a case-by-case basis to determine whether the export, reexport or transfer (in-country) would make a material contribution to the proliferation of certain rocket systems, or unmanned aerial vehicles. When an export, reexport or transfer (in-country) is deemed to make a material contribution, the license will be denied.

(2) The following factors are among those that will be considered to determine what action should be taken on an application required by this section:

- (i) The specific nature of the end use;

- (ii) The significance of the export, reexport or transfer in terms of its contribution to the design, “development,” “production,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of certain rocket systems or unmanned aerial vehicles;

- (iii) The capabilities and objectives of the rocket systems or unmanned aerial vehicles of the recipient country;

- (iv) The nonproliferation credentials of the importing country;

- (v) The types of assurances or guarantees against design, “development,” “production,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing for certain rocket system or unmanned aerial vehicle delivery purposes that are given in a particular case; and

- (vi) The existence of a pre-existing contract.

§ 744.4 RESTRICTIONS ON CERTAIN CHEMICAL AND BIOLOGICAL WEAPONS END-USES

(a) General prohibition

In addition to the license requirements for items specified on the CCL, you may not export, reexport, or transfer (in-country) an item subject to the EAR without a license if, at the time of export, reexport, or transfer (in-country) you know that the item will be used in the design, “development,” “production,” stockpiling, operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of chemical or biological weapons in or by any country or destination, worldwide; or in the design, “development,” “production,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or

refurbishing of a whole plant to make chemical weapons precursors specified in ECCN 1C350 in or by countries other than those listed in Country Group A:3 (Australia Group) (see supplement no. 1 to part 740 of the EAR).

(b) *Additional prohibition on persons informed by BIS*

BIS may inform persons, either individually by specific notice or through amendment to the EAR, that a license is required for a specific export, reexport, or transfer (in-country), or for the export, reexport, or transfer (in-country) of specified items to a certain end-user, because there is an unacceptable risk of use in or diversion to the activities specified in paragraph (a) of this section, anywhere in the world. Specific notice is to be given only by, or at the direction of, the Deputy Assistant Secretary for Export Administration. When such notice is provided orally, it will be followed by a written notice within two working days signed by the Deputy Assistant Secretary for Export Administration. However, the absence of any such notification does not excuse persons from compliance with the license requirements of paragraph (a) of this section.

(c) *Exceptions*

No License Exceptions apply to the prohibitions described in paragraphs (a) and (b) of this section.

(d) *License review standards*

(1) Applications to export, reexport, or transfer (in-country) items subject to this section will be considered on a case-by-case basis to determine whether the export, reexport, or transfer (in-country) would make a material contribution to the design, “development,” “production,” stockpiling, operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of chemical or biological weapons. When an export, reexport, or transfer (in-country) is deemed to make such a contribution, the license will be denied.

(2) The following factors are among those that will be considered to determine what action should be taken on an application required under this section:

(i) The specific nature of the end-use;

(ii) The significance of the export, reexport, or transfer in terms of its contribution to the design, “development,” “production,” stockpiling, operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of chemical or biological weapons;

(iii) The nonproliferation credentials of the importing country or the country in which the transfer would take place;

(iv) The types of assurances or guarantees against the design, “development,” “production,” stockpiling, operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of chemical or biological weapons; and

(v) The existence of a pre-existing contract. See Supplement No. 1 to Part 742 of the EAR for relevant contract sanctity dates.

§ 744.5 RESTRICTIONS ON CERTAIN MARITIME NUCLEAR PROPULSION END-USES

(a) *General prohibition*

In addition to the license requirements for items specified on the CCL, you may not export, reexport, or transfer (in-country) certain technology subject to the EAR without a license if at the time of the export, reexport or transfer (in-country) you know the item is for use in connection with a foreign maritime nuclear propulsion project. This prohibition applies to any technology relating to maritime nuclear

propulsion plants, their land prototypes, and special facilities for their construction, support, or maintenance, including any machinery, devices, components, or equipment specifically developed or designed for use in such plants or facilities.

(b) Exceptions

The exceptions provided in part 740 of the EAR do not apply to the prohibitions described in paragraph (a) of this section.

(c) License review standards

It is the policy of the United States Government not to participate in and not to authorize United States firms or individuals to participate in foreign naval nuclear propulsion plant projects, except under an Agreement for Cooperation on naval nuclear propulsion executed in accordance with §123(d) of the Atomic Energy Act of 1954. However, it is the policy of the United States Government to encourage United States firms and individuals to participate in maritime (civil) nuclear propulsion plant projects in friendly foreign countries provided that United States naval nuclear propulsion information is not disclosed.

§ 744.6 RESTRICTIONS ON SPECIFIC ACTIVITIES OF “U.S. PERSONS”

(a) Scope

The general prohibitions in this section apply only to the extent that the underlying activities are not subject to a license requirement or general prohibition administered by another federal department or agency, see, for example, Assistance to Foreign Atomic Energy Activities regulations (10 CFR part 810), administered by the Department of Energy; International Traffic in Arms Regulations (ITAR) (22 CFR parts 120 through 130), administered by the Department of State; and certain sanctions regulations (to include, but not limited to, 31 CFR parts 500 through 599), administered by the Department of

the Treasury. Accordingly, “U.S. persons” are required to seek a license from BIS only for the activities described in this section that are not subject to a license requirement or general prohibition administered by the Department of Energy, Department of State, Department of the Treasury, or other federal department or agency. The issuance of a license by BIS, or any other federal department or agency, does not authorize “U.S. persons” to engage in any activity that is otherwise prohibited by law, including criminal statutes.

(b) General Prohibitions

No “U.S. person” may, without a license from BIS, ‘support’:

(1) The design, “development,” “production,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of nuclear explosive devices in or by any country not listed in supplement no. 3 to this part;

(2) The design, “development,” “production,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of “missiles” in or by a country listed in Country Groups D:4 or E:2;

(3) The design, “development,” “production,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of chemical or biological weapons in or by any country or destination worldwide;

(4) The design, “development,” “production,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, refurbishing, shipment, or transfer (in-country) of a whole plant to make chemical weapons precursors identified in ECCN 1C350, in or by countries other than those listed in Country Group A:3 (Australia Group); or

(5) A 'military-intelligence end use' or a 'military-intelligence end user,' as defined in § 744.22(f),

in Belarus, Burma, Cambodia, the People's Republic of China, Russia, or Venezuela; or a country listed in Country Groups E:1 or E:2 (see supplement no. 1 to part 740 of the EAR).

(6) 'Support' means:

(i) Shipping or transmitting from one foreign country to another foreign country any item not subject to the EAR you know will be used in or by any of the end uses or end users described in paragraphs (b)(1) through (5) of this section, including the sending or taking of such item to or from foreign countries in any manner;

(ii) Transferring (in-country) any item not subject to the EAR you know will be used in or by any of the end uses or end users described in paragraphs (b)(1) through (5) of this section;

(iii) Facilitating such shipment, transmission, or transfer (in-country); or

(iv) Performing any contract, service, or employment you know may assist or benefit any of the end uses or end users described in paragraphs (b)(1) through (5) of this section, including, but not limited to: Ordering, buying, removing, concealing, storing, using, selling, loaning, disposing, servicing, financing, transporting, freight forwarding, or conducting negotiations in furtherance of.

(c) *Additional prohibitions on "U.S. persons" informed by BIS*

(1) BIS may inform "U.S. persons," either individually by specific notice, through amendment to the EAR published in the Federal Register, or through a separate notice published in the Federal Register, that a license is required because an activity could involve the types of 'support' (as defined in paragraph (b)(6) of this section) to the end uses or end users described in paragraphs (b)(1) through (5) of this section. Specific notice is to be given only by, or at the direction of, the Deputy Assistant Secretary for Export Administration. When such notice is

provided orally, it will be followed by a written notice within two working days signed by the Deputy Assistant Secretary for Export Administration. However, the absence of any such notification does not excuse the "U.S. person" from compliance with the license requirements of paragraph (b) of this section.

(2) Consistent with paragraph (c)(1) of this section, BIS is hereby informing "U.S. persons" that a license is required for the following activities, which could involve 'support' for the weapons of mass destruction-related end uses set forth in paragraph (b) of this section.

(i) Shipping, transmitting, or transferring (in-country) to or within the PRC or Macau any item not subject to the EAR that you know will be used in the "development" or "production" of integrated circuits at a semiconductor fabrication "facility" located in the PRC or Macau that fabricates integrated circuits meeting any of the following criteria:

(A) Logic integrated circuits using a non-planar architecture or with a "production" technology node of 16/14 nanometers or less;

(B) NOT-AND (NAND) memory integrated circuits with 128 layers or more; or

(C) Dynamic random-access memory (DRAM) integrated circuits using a "production" technology node of 18 nanometer half-pitch or less; or

(ii) Facilitating the shipment, transmission, or transfer (in-country) of any item not subject to the EAR that you know will be used in the "development" or "production" of integrated circuits at a semiconductor fabrication "facility" located in the PRC or Macau that fabricates integrated circuits that meet any of the criteria in paragraphs (c)(2)(i)(A) through (C) of this section;

(iii) Servicing any item not subject to the EAR that you know will be used in the "development"

or “production” of integrated circuits at a semiconductor fabrication “facility” located in the PRC or Macau that fabricates integrated circuits that meet any of the criteria in paragraphs (c)(2)(i)(A) through (C) of this section;

(iv) Shipping, transmitting, or transferring (in-country) to or within the PRC or Macau any item not subject to the EAR and meeting the parameters of any ECCN in Product Groups B, C, D, or E in Category 3 of the CCL that you know will be used in the “development” or “production” of integrated circuits at any semiconductor fabrication “facility” located in the PRC or Macau, but you do not know whether such semiconductor fabrication “facility” fabricates integrated circuits that meet any of the criteria in paragraphs (c)(2)(i)(A) through (C) of this section;

(v) Facilitating the shipment, transmission, or transfer (in-country) to or within the PRC or Macau of any item not subject to the EAR and meeting the parameters of any ECCN in Product Groups B, C, D, or E in Category 3 of the CCL that you know will be used in the “development” or “production,” of integrated circuits at any semiconductor fabrication “facility” located in the PRC or Macau, but you do not know whether such semiconductor fabrication “facility” fabricates integrated circuits that meet any of the criteria in paragraphs (c)(2)(i)(A) through (C) of this section;

(vi) Servicing any item not subject to the EAR and meeting the parameters of any ECCN in Product Groups B, C, D, or E in Category 3 of the CCL that you know will be used in the “development” or “production” of integrated circuits at any semiconductor fabrication “facility” located in the PRC or Macau, but you do not know whether such semiconductor fabrication “facility” fabricates integrated circuits that meet any of the criteria in paragraphs (c)(2)(i)(A) through (C) of this section;

(vii) Shipping, transmitting, or transferring (in-country) to or within the PRC or Macau any item

not subject to the EAR and meeting the parameters of ECCN 3B090, 3D001 (for 3B090), or 3E001 (for 3B090) regardless of end use or end user;

(viii) Facilitating the shipment, transmission, or transfer (in-country) to or within the PRC or Macau of any item not subject to the EAR and meeting the parameters of ECCN 3B090, 3D001 (for 3B090), or 3E001 (for 3B090), regardless of end use or end user; or

(ix) Servicing any item not subject to the EAR located in the PRC or Macau and meeting the parameters of ECCN 3B090, 3D001 (for 3B090), or 3E001 (for 3B090), regardless of end use or end user.

(d) Exceptions

(1) No License Exceptions apply to the prohibitions described in paragraphs (b)(1) through (4) and (c)(2)(i) through (vi) of this section.

(2) Notwithstanding the prohibitions in paragraphs (b)(5) and (c)(2)(vii) through (ix) of this section, “U.S. persons” who are employees of a department or agency of the U.S. Government may ‘support’ a ‘military-intelligence end use’ or a ‘military-intelligence end user,’ as described in paragraph (b)(5) of this section, or engage in the activities described in paragraphs (c)(2)(vii) through (ix) of this section, if the ‘support’ is provided in the performance of official duties in furtherance of a U.S. Government program that is authorized by law and subject to control by the President by other means. This paragraph (d)(2) does not authorize a department or agency of the U.S. Government to provide ‘support’ that is otherwise prohibited by other administrative provisions or by statute. ‘Contractor support personnel’ of a department or agency of the U.S. Government are eligible for this authorization when in the performance of their duties pursuant to the applicable contract or other official duties. ‘Contractor support personnel’ for the purposes

of this paragraph (d)(2) has the same meaning given to that term in § 740.11(b)(2)(ii) of the EAR. This authorization is not available when a department or agency of the U.S. Government acts as an agent on behalf of a non-U.S. Government person.

(e) License review standards

(1) Applications for a “U.S. person” to ‘support’ (as defined in paragraph (b)(6) of this section) any of the end uses or end users described in paragraphs (b)(1) through (4) of this section will be denied if such support would make a material contribution to the end uses and end users described in paragraphs (b)(1) through (4) of this section.

(2) Applications for a “U.S. person” to ‘support’ (as defined in paragraph (b)(6) of this section) a ‘military-intelligence end use’ or a ‘military-intelligence end user’ as described in paragraph (b)(5) of this section will be reviewed with a presumption of denial.

(3) Applications for licenses submitted pursuant to the notice of a license requirement set forth in paragraph (c)(2) of this section will be reviewed with a presumption of denial, except for end users in the PRC or Macau headquartered in the United States or a country in Country Group A:5 or A:6, which will be considered on a case-by-case basis taking into account factors including technology level, customers, and compliance plans.

§ 744.7 RESTRICTIONS ON CERTAIN EXPORTS TO AND FOR THE USE OF CERTAIN FOREIGN VESSELS OR AIRCRAFT

(a) General end-use prohibition

In addition to the license requirements for items specified on the CCL, you may not export, reexport, or transfer (in-country) an item subject

to the EAR to, or for the use of, a foreign vessel or aircraft, whether an operating vessel or aircraft or one under construction, located in any port including a Canadian port, unless a License Exception or NLR permits the shipment to be made:

(1) To the country in which the vessel or aircraft is located, and

(2) To the country in which the vessel or aircraft is registered, or will be registered in the case of a vessel or aircraft under construction, and

(3) To the country, including a national thereof, which is currently controlling, leasing, or chartering the vessel or aircraft.

(b) Exception for U.S. and Canadian carriers

(1) **Exception to General End-Use Prohibition.** Notwithstanding the general end-use prohibition in paragraph (a) of this section, export, reexport, and transfer (in-country) may be made of the commodities described in paragraph (b)(3) of this section, for use by or on a specific vessel or plane of U.S. or Canadian registry located at any seaport or airport outside the United States or Canada except a port in Country Group D:1 (excluding the PRC), (see supplement no. 1 to part 740) provided that such commodities are all of the following:

(i) Ordered by the person in command or the owner or agent of the vessel or plane to which they are consigned;

(ii) Intended to be used or consumed on board such vessel or plane and necessary for its proper operation;

(iii) In usual and reasonable kinds and quantities during times of extreme need, except that usual and reasonable quantities of ship's bunkers or aviation fuel are considered to be only that quantity necessary for a single onward voyage or flight; and

(iv) Shipped as cargo for which Electronic Export Information (EEI) is filed to the Automated Export System (AES) in accordance with the requirements of the Foreign Trade Regulations (FTR) (15 CFR Part 30), except EEI is not required to be filed when any of the commodities, other than fuel, is exported by U.S. airlines to their own aircraft abroad for their own use, see 15 CFR 30.37(o) of the FTR.

(2) Exports to U.S. or Canadian Airline's Installation or Agent. Exports, reexports, and transfers (in-country) of the commodities described in paragraph (e) of this section, except fuel, may be made to a U.S. or Canadian airline's installation or agent in any foreign destination except Country Group D:1 (excluding the PRC), (see supplement no. 1 to part 740) provided such commodities are all of the following:

(i) Ordered by a U.S. or Canadian airline and consigned to its own installation or agent abroad;

(ii) Intended for maintenance, repair, or operation of aircraft registered in either the United States or Canada, and necessary for the aircraft's proper operation, except where such aircraft is located in, or owned, operated or controlled by, or leased or chartered to, Country Group D:1 (excluding the PRC) (see Supplement No. 1 to part 740) or a national of such country;

(iii) In usual and reasonable kinds and quantities; and

(iv) Shipped as cargo for which Electronic Export Information (EEI) is filed to the Automated Export System (AES) in accordance with the requirements of the Foreign Trade Regulations (FTR) (15 CFR Part 30), except EEI is not required to be filed when any of these commodities is exported by U.S. airlines to their own installations and agents abroad for use in their aircraft operations, see 15 CFR 30.37(o) of the FTR.

(3) Applicable commodities. This §744.7 applies to the commodities listed subject to the provisions in paragraph (b) of this section:

(i) Fuel, including crude oil, petroleum products other than crude oil that are of non-Naval Petroleum Reserves origin or derivation (see § 754.3 of the EAR), and blends of crude oil with such petroleum products;

(ii) Deck, engine, and steward department stores, provisions, and supplies for both port and voyage requirements, provided that any petroleum products other than crude oil which are listed in Supplement No. 1 to part 754 of the EAR are of non-Naval Petroleum Reserves origin or derivation (see § 754.3 of the EAR);

(iii) Medical and surgical supplies;

(iv) Food stores;

(v) Slop chest articles;

(vi) Saloon stores or supplies; and

(vii) Equipment and spare parts.

§ 744.8 RESTRICTIONS ON EXPORTS AND REEXPORTS TO PERSONS DESIGNATED PURSUANT TO EXECUTIVE ORDER 13382 – BLOCKING PROPERTY OF WEAPONS OF MASS DESTRUCTION PROLIFERATORS AND THEIR SUPPORTERS

BIS maintains restrictions on exports and reexports to persons designated in or pursuant to Executive Order 13382 of June 28, 2005 (Weapons of Mass Destruction Proliferators and their Supporters). Executive Order 13382 blocks the property and interests in property of persons named in or designated pursuant to Executive Order 13382 in the United States or that comes within the United States or within the possession or control of United States persons.

The parties whose property or interests in property are blocked pursuant to Executive Order 13382 are identified by the Department of the Treasury, Office of Foreign Assets Control (OFAC) in Appendix A to 31 CFR Chapter V with the bracketed suffix [NPWMD]. This section imposes export and reexport license requirements for items subject to the EAR on those same parties to further the objectives of Executive Order 13382.

(a) License requirement(s) and authorization

(1) EAR license requirement. A license is required for the export or reexport of any item subject to the EAR to any party listed in Appendix A to 31 CFR Chapter V with the bracketed suffix [NPWMD].

(2) BIS authorization.

(i) To avoid duplication, U.S. persons are not required to seek separate authorization from BIS for an export or reexport to a party listed in Appendix A to 31 CFR Chapter V with the bracketed suffix [NPWMD] of an item subject to the EAR. If OFAC authorizes an export from the United States or an export or reexport by a U.S. person to a party listed in Appendix A to 31 CFR Chapter V with the bracketed suffix [NPWMD], such authorization constitutes authorization for purposes of the EAR as well.

(ii) U.S. persons must seek authorization from BIS for the export or reexport to a party listed in Appendix A to 31 CFR Chapter V with the bracketed suffix [NPWMD] of any item subject to the EAR that is not subject to OFAC's regulatory authority pursuant to Executive Order 13382.

(iii) Non-U.S. persons must seek authorization from BIS for any export from abroad or reexport to a party listed in Appendix A to 31 CFR Chapter V with the bracketed suffix [NPWMD] of any item subject to the EAR.

(iv) Any export or reexport to a party listed in Appendix A to 31 CFR Chapter V with the bracketed suffix [NPWMD] of any item subject to the EAR and not authorized by OFAC is a violation of the EAR.

(v) Any export or reexport by a U.S. person to a party listed in Appendix A to 31 CFR Chapter V with the bracketed suffix [NPWMD] of any item subject to the EAR that is not subject to regulation by OFAC and not authorized by BIS is a violation of the EAR. Any export from abroad or reexport by a non-U.S. person to a party listed in Appendix A to 31 CFR Chapter V with the bracketed suffix [NPWMD] of any item subject to the EAR and not authorized by BIS is a violation of the EAR.

(3) Relation to other EAR license requirements. The license requirements in this section supplement any other requirements set forth elsewhere in the EAR.

(b) License exceptions

No license exceptions are available for the EAR license requirements imposed in this section.

(c) Licensing policy

Applications for EAR licenses required by this section generally will be denied. You should consult with OFAC concerning transactions subject to OFAC licensing requirements.

(d) Contract sanctity

Contract sanctity provisions are not available for license applications reviewed under this section.

§ 744.9 RESTRICTIONS ON EXPORTS, REEXPORTS, AND TRANSFERS OF CERTAIN CAMERAS, SYSTEMS, OR RELATED COMPONENTS

(a) General prohibitions

(1) In addition to the applicable license requirements for national security, regional stability, anti-terrorism and United Nations embargo reasons in §§ 742.4, 742.6, 742.8, 746.1(b), and 746.3 of the EAR, a license is required to export, reexport, or transfer (in-country) to any destination other than Canada commodities described in ECCNs 0A504 (incorporating commodities controlled by ECCNs 6A002 or 6A003, or commodities controlled by 6A993.a that meet the criterion of Note 3.a to 6A003.b.4), 6A002, 6A003, or 6A993.a (having a maximum frame rate equal to or less than 9 Hz and thus meeting the criteria of Note 3.a to 6A003.b.4), or 8A002.d if at the time of export, reexport, or transfer, the exporter, reexporter, or transferor knows or is informed that the item will be or is intended to be:

(i) Used by a “military end user,” as defined in paragraph (d) of this section; or

(ii) Incorporated into a “military commodity” controlled by ECCN 0A919.

(2) The license requirement described in paragraph (a)(1) of this section does not apply to exports, reexports, or transfers (in-country) of items described in that paragraph when such items are being reexported or transferred as part of a military deployment by a unit of the government of a country in Country Group A:1 (see Supplement No. 1 to part 740).

(b) Additional prohibition on exporters, reexporters, or transferors informed by BIS

BIS may inform an exporter, reexporter, or transferor, either individually by specific notice or through amendment to the EAR, that a license is required for the export, reexport, or transfer of commodities described in ECCNs 0A504 (incorporating commodities controlled by ECCNs 6A002 or 6A003, or commodities controlled by 6A993.a that meet the criterion of Note 3.a to 6A003.b.4), 6A002, 6A003, or 6A993.a (having a maximum frame rate equal to

or less than 9 Hz and thus meeting the criteria of Note 3.a to 6A003.b.4), or 8A002.d to specified end users, because BIS has determined that there is an unacceptable risk of diversion to the users or unauthorized incorporation into the “military commodities” described in paragraph (a) of this section. Specific notice is to be given only by, or at the direction of, the Deputy Assistant Secretary for Export Administration. When such notice is provided orally, it will be followed by a written notice within two working days signed by the Deputy Assistant Secretary for Export Administration.

(c) License review standard

Applications for licenses required by this section will be reviewed by applying the policies that would be applied under the International Traffic in Arms Regulations (22 CFR Part 120 - 130).

(d) Military end-user

In this section, the term “military end-user” means the national armed services (army, navy, marine, air force, or coast guard), as well as the national guard and national police, government intelligence or reconnaissance organizations, or any person or entity whose actions or functions are intended to support “military end-uses” as defined in § 744.17(d).

(e) Exception

Shipments subject to the prohibitions in paragraphs (a) and (b) of this section that are consigned to and for the official use of the U.S. Government authorized pursuant to § 740.11(b)(2)(ii) of the EAR may be made under License Exception GOV. No other license exceptions apply to the prohibitions described in paragraphs (a) and (b) of this section.

§ 744.10 RESTRICTIONS ON CERTAIN ENTITIES IN RUSSIA

(a) *General prohibition*

Certain entities in Russia are included in Supplement No. 4 to this part 744 (Entity List). (See also §744.1(c) of the EAR.) A license is required, to the extent specified on the Entity List, to export, reexport, or transfer (in-country) any item subject to the EAR to such entities.

(b) *Exceptions*

No License Exceptions apply to the prohibition described in paragraph (a) of this section.

(c) *License review standard*

Applications to export, reexport, or transfer (in-country) items subject to the EAR to these entities will be reviewed with a presumption of denial.

§ 744.11 LICENSE REQUIREMENTS THAT APPLY TO ENTITIES ACTING OR AT SIGNIFICANT RISK OF ACTING CONTRARY TO THE NATIONAL SECURITY OR FOREIGN POLICY INTERESTS OF THE UNITED STATES.

BIS may impose foreign policy export, re-export, and transfer (in-country) license requirements, limitations on availability of license exceptions, and set license application review policy based on the criteria in this section. Such requirements, limitations and policy are in addition to those set forth elsewhere in the EAR. License requirements, limitations on use of license exceptions, and license application review policies will be imposed under this section by adding an entity to the Entity List (supplement no. 4 to this part) with a reference to this section and by stating on the Entity List the license requirements and license application review policies that apply to that entity, or by informing

an exporter, re-exporter, or transferor pursuant to paragraph (c) of this section that a specific entity is subject to a license requirement, limitations on use of license exceptions and license application review policies as specified in a specific notice provided to an exporter, re-exporter, or transferor. BIS may remove an entity from the Entity List if it is no longer engaged in the activities described in paragraph (b) of this section and is unlikely to engage in such activities in the future, or if it is no longer at significant risk of acting contrary to the national security or foreign policy interests of the United States as described therein. BIS may modify the license exception limitations and license application review policies that apply to a particular entity to implement the policies of this section. BIS will implement the provisions of this section in accordance with the decisions of the End-User Review Committee or, if appropriate in a particular case, in accordance with the decisions of the body to which the End-User Review Committee decision is escalated. The End-User Review Committee will follow the procedures set forth in supplement no. 5 to this part.

(a) *License requirement, availability of license exceptions, and license application review policy*

A license is required, to the extent specified on the Entity List, to export, reexport, or transfer (in-country) any item subject to the EAR when an entity that is listed on the Entity List is a party to the transaction as described in § 748.5(c) through (f) of the EAR unless otherwise authorized or excluded in this section. License exceptions may not be used unless authorized in the Entity List entry for the entity that is party to the transaction. Applications for licenses required by this section will be evaluated as stated in the Entity List entry for the entity that is party to the transaction, in addition to any other applicable review policy stated elsewhere in the EAR.

(1) Standards related activity. A license is not required for the release of “technology” or “software” designated EAR99 or controlled on

the CCL for anti-terrorism reasons only, when such a release is for a “standards-related activity.” In addition, a license is not required for the release of the following ECCN “items” level paragraphs of “technology” or “software” specifically for the “development,” “production,” or “use” of cryptographic functionality when such a release is for a “standards-related activity:” “software” that is classified under ECCN 5D002.b or 5D002.c.1 (for equipment specified in ECCN 5A002.a and 5A002.c only); “technology” that is classified under ECCN 5E002 (for equipment specified in ECCN 5A002.a, .b and .c); and “technology” for software controlled under ECCN 5D002.b or .c.1 (for equipment specified in ECCN 5A002.a and .c only).

(2) Entity List Foreign-“Direct Product” (FDP) license requirements, review policy, and license exceptions.

(i) Footnote 1 entities. You may not, without a license or license exception, reexport, export from abroad, or transfer (in-country) any foreign-produced item subject to the EAR pursuant to § 734.9(e)(1)(i) of the EAR when an entity designated with footnote 1 on the Entity List in supplement. no. 4 to this part is a party to the transaction. All license exceptions described in part 740 of the EAR are available for foreign-produced items that are subject to this license requirement if all terms and conditions of the applicable license exception are met and the restrictions in § 740.2 of this EAR do not apply. The sophistication and capabilities of technology in items is a factor in license application review; license applications for foreign-produced items subject to a license requirement by this paragraph (a)(2) that are capable of supporting the “development” or “production” of telecom systems, equipment, and devices below the 5G level (e.g., 4G, 3G) will be reviewed on a case-by-case basis.

(ii) Footnote 4 entities. You may not, without a license, reexport, export from abroad, or transfer (in-country) any foreign-produced item

subject to the EAR pursuant to § 734.9(e)(2) of the EAR when an entity designated with footnote 4 on the Entity List in supp. no. 4 to this part is a party to the transaction, or that will be used in the “development” or “production” of any “part,” “component,” or “equipment” produced, purchased, or ordered by any such entity. See § 744.23 for additional license requirements that may apply to these entities. The license review policy for foreign-produced items subject to this license requirement is set forth in the entry in supplement no. 4 to this part for each entity with a footnote 4 designation.

(b) Criteria for revising the Entity List

Entities for which there is reasonable cause to believe, based on specific and articulable facts, that the entity has been involved, is involved, or poses a significant risk of being or becoming involved in activities that are contrary to the national security or foreign policy interests of the United States and those acting on behalf of such entities may be added to the Entity List pursuant to this section. An entity may pose a significant risk through certain circumstances that may be outside of its own control. Such circumstances that may place an entity at significant risk include situations involving a sustained lack of cooperation by a host government authority, for example, by preventing an end-use check from being conducted, that effectively prevents BIS from determining compliance with the EAR. This section may not be used to place on the Entity List any party to which exports or reexports require a license pursuant to § 744.8, § 744.12, § 744.13, § 744.14, or § 744.18. This section may not be used to place any U.S. person, as defined in § 772.1 of the EAR, on the Entity List. Paragraphs (b)(1) through (5) of this section provide an illustrative list of activities that could be or represent a significant risk of being contrary to the national security or foreign policy interests of the United States, including the foreign policy interest of the protection of human rights throughout the world.

- (1) Supporting persons engaged in acts of terror.
- (2) Actions that could enhance the military capability of, or the ability to support terrorism of governments that have been designated by the Secretary of State as having repeatedly provided support for acts of international terrorism.
- (3) Transferring, developing, servicing, repairing or producing conventional weapons in a manner that is contrary to United States national security or foreign policy interests or enabling such transfer, service, repair, development, or production by supplying parts, components, technology, or financing for such activity.
- (4) Prevention of the accomplishment of an end use check conducted by or on behalf of BIS or the Directorate of Defense Trade Controls of the Department of State by:
 - (i) The entity precluding access to; refusing to provide information about; or providing false or misleading information about parties to the transaction or the item to be checked. The conduct in this example includes: expressly refusing to permit a check; providing false or misleading information; or engaging in dilatory or evasive conduct that effectively prevents the check from occurring or makes the check inaccurate or useless. A nexus between the conduct of the party to be listed and the failure to produce a complete, accurate and useful check is required, even though an express refusal by the party to be listed is not required; or
 - (ii) A sustained lack of cooperation by the host government to schedule and facilitate the completion of an end-use check of entities identified on the Unverified List pursuant to § 744.15, resulting in sufficient concern such that the End-User Review Committee believes that prior review of exports, reexports, or transfers (in-country) involving the entity and the possible imposition of license conditions or license denial enhance BIS's ability to prevent violations of the EAR.

- (5) Engaging in conduct that poses a risk of violating the EAR when such conduct raises sufficient concern that the End-User Review Committee believes that prior review of exports, reexports, or transfers (in-country) involving the party and the possible imposition of license conditions or license denial enhances BIS's ability to prevent violations of the EAR.

(c) *Additional prohibition on persons informed by BIS*

BIS may inform persons, either individually by specific notice or through amendment to the EAR, that a license is required for:

- (1) A specific export, reexport, or transfer (in-country) because there is an unacceptable risk that the export, reexport, or transfer (in-country) is intended to circumvent the license requirement imposed on an entity listed in supplement no. 4 to this part; or
- (2) The export, reexport, or transfer (in-country) of specified items to a certain party because there is an unacceptable risk that the party is acting as an agent, front, or shell company for an entity listed in supplement no. 4 to this part, or is otherwise assisting that listed entity in circumventing the license requirement set forth in that entity's entry in supplement no. 4 to this part; or
- (3) The export, reexport, or transfer (in-country) of specified items to a certain party because there is reasonable cause to believe, based on specific and articulable facts, that the entity has been involved, is involved, or poses a significant risk of being or becoming involved in activities that are contrary to the national security or foreign policy interests of the United States, including the foreign policy interest of the protection of human rights throughout the world, and those acting on behalf of such entity. Specific notice will be given only by, or at the direction of, the Deputy Assistant Secretary for Export Administration. When such notice is provided orally, it will be followed by written notice within two working

days signed by the Deputy Assistant Secretary for Export Administration or the Deputy Assistant Secretary's designee. The specific notice will include the license requirement, limitations on use of license exceptions, and license application review policy with which that exporter, re-exporter, or transferor must comply pursuant to this paragraph (c)(3). The ERC may add such entities to the Entity List in supplement no. 4 to this part.

**§ 744.12 RESTRICTIONS ON
EXPORTS AND REEXPORTS TO
PERSONS DESIGNATED IN OR
PURSUANT TO EXECUTIVE ORDER
13224 (SPECIALLY DESIGNATED
GLOBAL TERRORIST) (SDGT)**

BIS maintains restrictions on exports and reexports to persons designated in or pursuant to Executive Order 13224 of September 23, 2001 (Blocking Property and Prohibiting Transactions with Persons Who Commit, Threaten to Commit, or Support Terrorism). These persons include individuals and entities listed in the Annex to Executive Order 13224, as well as persons subsequently designated by the Secretary of State or Secretary of the Treasury pursuant to criteria set forth in the order. Pursuant to Executive Order 13224, the Department of the Treasury's Office of Foreign Assets Control (OFAC) maintains 31 CFR part 594, the Global Terrorism Sanctions Regulations. OFAC announces the names of persons designated pursuant to Executive Order 13224 in the Federal Register and includes such persons in Appendix A to 31 CFR Chapter V, which lists persons subject to various sanctions programs administered by OFAC. The Department of State also announces the names of foreign persons designated pursuant to Executive Order 13224 in the Federal Register. All persons designated in or pursuant to Executive Order 13224 are identified in Appendix A to 31 CFR Chapter V by the bracketed initials [SDGT] and are also known as Specially Designated Global Terrorists (SDGTs).

(a) License requirement(s)

- (1) A license requirement applies to the export or reexport to an SDGT of any item subject to the EAR.
- (2) To avoid duplication, U.S. persons are not required to seek separate authorization for an export or reexport to an SDGT of an item subject to both the EAR and OFAC's regulatory authority pursuant to Executive Order 13224. Therefore, if OFAC authorizes an export from the United States or an export or reexport by a U.S. person to an SDGT, no separate authorization from BIS is necessary.
- (3) U.S. persons must seek authorization from BIS for the export or reexport to an SDGT of any item subject to the EAR that is not subject to OFAC's Global Terrorism Sanctions Regulations in 31 CFR Part 594.
- (4) Non-U.S. persons must seek authorization from BIS for any export from abroad or reexport to an SDGT of any item subject to the EAR.
- (5) Any export or reexport to an SDGT of any item subject to both the EAR and OFAC's regulatory authority pursuant to Executive Order 13224 and not authorized by OFAC is a violation of the EAR.
- (6) Any export or reexport by a U.S. person to an SDGT of any item subject to the EAR that is not subject to regulation by OFAC and not authorized by BIS is a violation of the EAR. Any export from abroad or reexport by a non-U.S. person to an SDGT of any item subject to the EAR and not authorized by BIS is a violation of the EAR.
- (7) These licensing requirements supplement any other requirements set forth elsewhere in the EAR.

(b) Exceptions

No License Exceptions or other BIS authorization are available for any export or reexport to an SDGT of any item subject to the EAR.

(c) Licensing Policy

Applications for licenses for the export or reexport to an SDGT of any item subject to the EAR generally will be denied. You should consult with OFAC concerning transactions subject to OFAC licensing requirements.

(d) Contract Sanctity

Contract sanctity provisions are not available for license applications reviewed under this section.

NOTE TO §744.12: This section does not implement, construe, or limit the scope of any criminal statute, including (but not limited to) 18 U.S.C. 2339B(a)(1) and 2339A, and does not excuse any person from complying with any criminal statute, including (but not limited to) 18 U.S.C. 2339B(a)(1) and 18 U.S.C. 2339A.

§ 744.13 RESTRICTIONS ON EXPORTS AND REEXPORTS TO PERSONS DESIGNATED PURSUANT TO EXECUTIVE ORDER 12947 (SPECIALLY DESIGNATED TERRORISTS) (SDT)

Consistent with the purpose of Executive Order 12947 of January 23, 1995, BIS maintains restrictions on exports and reexports to Specially Designated Terrorists (SDTs). Executive Order 12947 prohibits transactions by U.S. persons with terrorists who threaten to disrupt the Middle East peace process. Pursuant to the Executive Order, the Department of the Treasury, Office of Foreign Assets Control (OFAC), maintains 31 CFR part 595, the Terrorism Sanctions Regulations. In Appendix A to 31 CFR Chapter V, pursuant to 31 CFR part 595, these Specially Designated Terrorists are identified by the bracketed suffix initials [SDT]. The requirements set forth below further the objectives of Executive Order 12947.

(a) License requirement(s)

(1) A license requirement applies to the export or reexport to an SDT of any item subject to the EAR.

(2) To avoid duplication, U.S. persons are not required to seek separate authorization for an export or reexport to an SDT of an item subject both to the EAR and to OFAC's Terrorism Sanctions Regulations in 31 CFR part 595. Therefore, if OFAC authorizes an export or reexport of an item by a U.S. person to a SDT, no separate authorization from BIS is necessary.

(3) U.S. persons must seek authorization from BIS for the export or reexport to an SDT of an item subject to the EAR but not subject to OFAC's Terrorism Sanctions Regulations in 31 CFR part 595.

(4) Non-U.S. persons must seek authorization from BIS for the export from abroad or reexport to an SDT of any item subject to the EAR.

(5) Any export or reexport to an SDT by a U.S. person of any item subject both to the EAR and OFAC's Terrorism Sanctions Regulations in 31 CFR part 595 and not authorized by OFAC is a violation of the EAR.

(6) Any export or reexport by a U.S. person to an SDT of any item subject to the EAR that is not subject to OFAC's Terrorism Sanctions Regulations in 31 CFR part 595 and not authorized by BIS is a violation of the EAR. Any export from abroad or reexport by a non-U.S. person to an SDT of any item subject to the EAR and not authorized by BIS is a violation of the EAR.

(7) These licensing requirements supplement any other requirements set forth elsewhere in the EAR.

(b) Exceptions

No License Exceptions or other BIS authorization are available for export or reexport to an SDT of any item subject to the EAR.

(c) Licensing policy

Applications for licenses for the export or reexport to an SDT of any item subject to the EAR generally will be denied. You should consult with OFAC concerning transactions subject to OFAC licensing requirements.

(d) Contract sanctity

Contract sanctity provisions are not available for license applications reviewed under this section.

NOTE TO §744.13: *This section does not implement, construe, or limit the scope of any criminal statute, including (but not limited to) 18 U.S.C. 2339B(a)(1) and 2339A, and does not excuse any person from complying with any criminal statute, including (but not limited to) 18 U.S.C. 2339B(a)(1) and 18 U.S.C. 2339A.*

§ 744.14 RESTRICTIONS ON EXPORTS AND REEXPORTS TO DESIGNATED FOREIGN TERRORIST ORGANIZATIONS (FTOs)

Consistent with the objectives of section 219 of the Immigration and Nationality Act, as amended (INA) (8 U.S.C. 1189), and section 303 of the Antiterrorism and Effective Death Penalty Act 1996, as amended (Anti-Terrorism Act) (18 U.S.C. 2339B) (Public Law 104-132. 110 Stat. 1214-1319), BIS maintains restrictions on exports and reexports to organizations designated as Foreign Terrorist Organizations (FTOs) pursuant to section 219 of the INA. The Department of the Treasury, Office of Foreign Assets Control, maintains 31 CFR part 597, the Foreign Terrorist Organizations Sanctions Regulations, requiring U.S. financial institutions to block all financial transactions involving assets of designated FTOs within the possession or control of such U.S. financial institutions.

Section 303 of the Anti-Terrorism Act prohibits persons within the United States or subject to U.S. jurisdiction from knowingly providing material support or resources to a designated FTO and makes violations punishable by criminal penalties under title 18, United States Code. These designated FTOs are listed in Appendix A to 31 CFR Chapter V and identified by the bracketed initials [FTO]. A designation of a foreign organization determined to meet the criteria of section 219 of the INA takes effect upon publication in the Federal Register by the Secretary of State, or the Secretary's designee.

(a) License requirement(s)

(1) A license requirement applies to the export or reexport to an FTO of any item subject to the EAR.

(2) U.S. persons must seek authorization from BIS for the export or reexport to an FTO of any item subject to the EAR.

(3) Non-U.S. persons must seek authorization from BIS for the export from abroad or reexport to an FTO of any item subject to the EAR.

(4) Any export or reexport to an FTO by any person of any item subject to the EAR and not authorized by BIS is a violation of the EAR.

(5) These licensing requirements supplement any other requirements set forth elsewhere in the EAR.

(b) Exceptions

No License Exceptions or other BIS authorization for items described by paragraph (a) of this section are available for exports or reexports to FTOs.

(c) Licensing policy

Applications for exports and reexports to FTOs of all items identified by paragraph (a) of this section will generally be denied, to the extent they

constitute material support or resources, as defined in 18 U.S.C. 2339A(b).

(d) Contract sanctity

Contract sanctity provisions are not available for license applications reviewed under this section.

(e) FTOs also designated as SDTs or SDGTs

In cases in which an FTO is also an SDT, as described in §744.13, or an SDGT, as described in §744.12, the license requirements and licensing policy set forth in §744.13 or §744.12 will apply.

NOTE TO §744.14: *This section does not implement, construe, or limit the scope of any criminal statute, including (but not limited to) 18 U.S.C. 2339B(a)(1) and 2339A, and does not excuse any person from complying with any criminal statute, including (but not limited to) 18 U.S.C. 2339B(a)(1) and 18 U.S.C. 2339A.*

§ 744.15 RESTRICTIONS ON EXPORTS, REEXPORTS AND TRANSFERS (IN-COUNTRY) TO PERSONS LISTED ON THE UNVERIFIED LIST

(a) General requirement

In addition to the requirements set forth elsewhere in the EAR, exports, reexports, or transfers (in-country) subject to the EAR involving parties to the transaction who are listed on the Unverified List (UVL) must be made in accordance with paragraph (b) of this section. The names and addresses of foreign persons subject to end-user controls based on the criteria described in paragraph (c) of this section are identified in the Unverified List found in Supplement No. 6 to this part. Requirements found elsewhere in the EAR also apply, including but not limited to any license requirements, the record filing requirements pursuant to §

758.1(b)(8), and the restrictions on license exceptions described in § 740.2(a)(17) of the EAR.

(b) UVL statement

Before proceeding with any export, reexport, or transfer (in-country) subject to the EAR that is not subject to a license requirement, involving a person listed on the Unverified List as a party described in § 748.5 of the EAR, an exporter, reexporter, or transferor (in-country) must obtain a UVL statement from such person, according to the provisions set forth in this section. The statement must be retained in accordance with part 762 of the EAR.

(1) One UVL statement may be used for multiple exports, reexports, and transfers (in-country) of the same items between the same parties, so long as the party names, the description(s) of the items and the ECCNs are correct. If one UVL statement is used for multiple exports, reexports, and transfers (in-country), the exporter, reexporter, and transferor must maintain a log or other record that identifies each export, reexport, and transfer (in-country) made pursuant to this section and the specific UVL statement that is associated with each. The log or record must be retained in accordance with Part 762 of the EAR.

(2) The UVL statement must be in writing, signed and dated by an individual of sufficient authority to legally bind the UVL party, and state the following:

(i) Name of UVL party; complete physical address, to include shipping, corporate, and end user addresses, if different (simply listing a post office box is insufficient); telephone number; fax number; e-mail address; Web site (if available); and name and title of individual signing the UVL statement.

(ii) Agrees not to use the item(s) for any use prohibited by the United States Export Administration Regulations (EAR), 15 C.F.R. Parts 730-772, and agrees not to reexport or

transfer (in-country) the item(s) to any destination, use or user prohibited by the EAR.

(iii) Declares that the end use, end user, and country of ultimate destination of the item(s) subject to the EAR are as follows: [INSERT END USE, END USER, AND COUNTRY OF ULTIMATE DESTINATION].

(iv) Agrees to cooperate with end-use checks, including a Post-Shipment Verification, conducted by or on behalf of the Bureau of Industry and Security, U.S. Department of Commerce, for any item subject to the EAR in transactions to which they were a party in the last five years. This cooperation includes facilitating the timely conduct of the check and providing full and accurate information concerning the disposition of items subject to the EAR.

(v) Agrees to provide copies of this document and all other export, reexport or transfer (in-country) records required to be retained in part 762 of the EAR.

(vi) Certifies that the individual signing the UVL statement has sufficient authority to legally bind the party.

(c) Criteria for revising the Unverified List

(1) Foreign persons who are parties to an export, reexport, and transfer (in-country) subject to the EAR may be added to the Unverified List if BIS or federal officials acting on BIS's behalf cannot verify the *bona fides* (i.e., legitimacy and reliability relating to the end use and end user of items subject to the EAR) of such persons because an end-use check, such as a pre-license check (PLC) or a post-shipment verification (PSV), cannot be completed satisfactorily for reasons outside of the U.S. Government's control. Examples in paragraphs (c)(1)(i) through (iii) of this section provide an illustrative list of those circumstances.

(i) During the conduct of an end-use check, the subject of the check is unable to demonstrate

the disposition of items subject to the EAR.

(ii) The existence or authenticity of the subject of an end-use check cannot be verified (e.g., the subject of the check cannot be located or contacted).

(iii) Lack of cooperation by the host government authority prevents an end-use check from being conducted.

(2) BIS will remove a person from the Unverified List when BIS is able to verify the *bona fides* of the listed person as an end user, consignee, or other party to exports, reexports, or transfers (in-country) involving items subject to the EAR by completing a PLC or PSV. In the limited circumstance involving a PLC or PSV that cannot be completed due to lack of host government cooperation, an alternative *bona fides* verification process may be determined by BIS to be sufficient. A determination to remove a person from the Unverified List based on the criteria in this paragraph is separate from any determination made by BIS pursuant to § 744.11(b) of the EAR, and must be requested through paragraph (d) of this section.

(d) Procedure for requesting removal of a person on the Unverified List

Any person listed on the Unverified List may request that its listing be amended or removed.

(1) All such requests, including reasons therefor and information that verifies the *bona fides*, i.e., legitimacy and reliability of the person listed on the Unverified List as an end user, consignee or other party to exports, reexports, and transfers (in-country) of items subject to the EAR, must be in writing and sent to: Director, Office of Enforcement Analysis, Bureau of Industry and Security, U.S. Department of Commerce, 14th Street and Pennsylvania Avenue, N.W., Room 4065, Washington, D.C. 20230, via fax to (202) 482-0971, or by e-mail to UVLRequest@bis.doc.gov.

(2) The Deputy Assistant Secretary for Export Enforcement will review such requests and will convey the decision on the request to the requester in writing based on an assessment of the listed person's *bona fides* as a party to exports, reexports, and transfers (in-country) subject to the EAR. That decision will be the final agency action on the request.

§ 744.16 ENTITY LIST

The Entity List (Supplement No. 4 to part 744) identifies persons reasonably believed to be involved, or to pose a significant risk of being or becoming involved, in activities contrary to the national security or foreign policy interests of the United States. The entities are added to the Entity List pursuant to sections of part 744 (Control Policy: End-User and End-Use Based) and part 746 (Embargoes and Other Special Controls) of the EAR

(a) License requirements

In addition to the license requirements for items specified on the CCL, you may not, without a license from BIS, export, reexport, or transfer (in-country) any items included in the License Requirement column of an entity's entry on the Entity List (supplement no. 4 to this part) when that entity is a party to a transaction as described in § 748.5(c) through (f) of the EAR. The specific license requirement for each listed entity is identified in the license requirement column on the Entity List in supplement no. 4 to this part. A license is not required for the release of certain "technology" or "software" when such a release is for a "standards-related activity," as described in §744.11(a)(1) and §772.1 of the EAR.

(b) License exceptions

No license exceptions are available for exports, reexports or transfers (in-country) to listed entities of specified items, except license exceptions for items listed in §740.2(a)(5) of the EAR destined to listed Indian or Pakistani entities

to ensure the safety of civil aviation and safe operation of commercial passenger aircraft, and in the case of entities added to the Entity List pursuant to §744.20, to the extent specified on the Entity List.

(c) License review policy

(1) General review policy. The license review policy for each listed entity is identified in the License Review Policy column on the Entity List.

(d) The End-User Review Committee (ERC)

The End-User Review Committee (ERC), composed of representatives of the Departments of Commerce (Chair), State, Defense, Energy and, where appropriate, the Treasury, generally makes decisions regarding additions to, removals from, or other modifications to the Entity List.

(e) Removal or modification requests

Any entity listed on the Entity List may request that its listing be removed or modified. All such requests, including reasons therefor, must be in writing and sent to: Chair, End-User Review Committee, Bureau of Industry and Security, U.S. Department of Commerce, 14th Street and Pennsylvania Avenue, NW, Room 3886, Washington, DC 20230.

(1) Review. The ERC will review such requests in accordance with the procedures set forth in Supplement No. 5 to this part.

(2) BIS action. The Deputy Assistant Secretary for Export Administration will convey the decision on the request to the requester in writing. That decision will be the final agency action on the request.

§ 744.17 RESTRICTIONS ON CERTAIN EXPORTS, REEXPORTS AND TRANSFERS (IN-COUNTRY) OF MICROPROCESSORS AND ASSOCIATED “SOFTWARE” AND “TECHNOLOGY” FOR ‘MILITARY END USES’ AND TO ‘MILITARY END USERS.’

(a) General prohibition

In addition to the license requirements set forth elsewhere in the EAR, you may not export, reexport or transfer (in-country) microprocessors (“microprocessor microcircuits,” “microcomputer microcircuits,” and microcontroller microcircuits having a processing speed of 5 GFLOPS or more and an arithmetic logic unit with an access width of 32 bit or more, including those incorporating “information security” functionality), or associated “software” and “technology” for the “production” or “development” of such microprocessors without a license if, at the time of the export, reexport or transfer (in-country), you know, have reason to know, or are informed by BIS that the item will be or is intended to be used for a ‘military end use,’ as defined in paragraph (d) of this section, in a destination listed in Country Group D:1 (see Supplement No. 1 to part 740 of the EAR); or by a ‘military end user,’ as defined in paragraph (e) of this section, in a destination listed in Country Group D:1.

(b) Additional prohibition on exporters or reexporters informed by BIS

BIS may inform an exporter, reexporter or transferor, either individually by specific notice or through amendment to the EAR, that a license is required for export, reexport or transfer (in-country) of items described in paragraph (a) of this section to specified end users, because BIS has determined that there is an unacceptable risk of diversion to the end uses or end users described in paragraph (a) of this section. Specific notice is to be given only by, or at the direction of, the Deputy Assistant Secretary for Export Administration. When such notice is provided

orally, it will be followed by a written notice within two working days signed by the Deputy Assistant Secretary for Export Administration. The absence of any such notification does not excuse the exporter, reexporter or transferor from compliance with the license requirements of paragraph (a) of this section.

(c) License review standards

There is a presumption of denial for applications to export, reexport or transfer (in-country) items subject to this section.

(d) ‘Military end-use’

In this section, the phrase ‘military end use’ means incorporation into: a military item described on the U.S. Munitions List (USML) (22 CFR part 121, International Traffic in Arms Regulations) or the Wassenaar Arrangement Munitions List (as set out on the Wassenaar Arrangement website at <http://www.wassenaar.org>); commodities classified under ECCNs ending in “A018” or under “600 series” ECCNs; or any commodity that is designed for the “use,” “development,” “production,” or deployment of military items described on the USML, the Wassenaar Arrangement Munitions List or classified under ECCNs ending in “A018” or under “600 series” ECCNs. Supplement No. 1 of this part lists examples of ‘military end use.’

(e) ‘Military end user’

In this section, the term ‘military end user’ means the national armed services (army, navy, marine, air force, or coast guard), as well as the national guard and national police, government intelligence or reconnaissance organizations, or any person or entity whose actions or functions are intended to support ‘military end uses’ as defined in paragraph (d) of this section.

(f) Exceptions

The prohibitions described in paragraphs (a) and (b) of this section supersede any license exception or No License Required (NLR) designation that would otherwise apply to a transaction subject to the EAR, except that this license requirement does not apply to exports, reexports or transfers (in-country) of items for or on behalf of the official use by personnel and agencies of the U.S. Government or to agencies of a cooperating government authorized by License Exception GOV pursuant to § 740.11 of the EAR. See § 740.11(b)(1) of the EAR for the definition of ‘agency of the U.S. Government’ and §740.11(c)(1) for the definition of ‘agency of a cooperating government.’

**§ 744.18 RESTRICTIONS ON
EXPORTS, REEXPORTS AND
TRANSFERS TO PERSONS
DESIGNATED IN OR PURSUANT TO
EXECUTIVE ORDER 13315**

Consistent with Executive Order (E.O.) 13315 of August 28, 2003 (“Blocking Property of the Former Iraqi Regime, Its Senior Officials and Their Family Members, and Taking Certain Other Actions”), BIS maintains restrictions on exports, reexports, and transfers to persons designated in or pursuant to E.O. 13315. These persons include individuals and entities listed in the Annex to Executive Order 13315, as well as persons subsequently designated pursuant to criteria set forth in the order. OFAC includes the names of persons designated pursuant to E.O. 13315 in Appendix A to 31 CFR Chapter V, which lists persons subject to various sanctions programs administered by OFAC. All persons designated in or pursuant to E.O. 13315 are identified in Appendix A by the bracketed initials [IRAQ2].

(a) License Requirements

(1) A license requirement applies to the export, reexport, or transfer of any item subject to the EAR to –

(i) Persons listed in the Annex to E.O. 13315 of August 28, 2003; or

(ii) Persons determined to be subject to E.O. 13315.

(2) To avoid duplication, U.S. persons are not required to seek separate BIS authorization for an export, reexport, or transfer to a person identified in paragraph (a) of this section of any item subject to both the EAR and regulations maintained by OFAC. Therefore, if OFAC authorizes an export from the United States or an export, reexport, or transfer by a U.S. person to a person identified in paragraph (a) of this section, no separate authorization from BIS is necessary.

(3) U.S. persons must seek authorization from BIS for the export, reexport, or transfer to a person identified in paragraph (a) of this section of any item subject to the EAR but not subject to regulations maintained by OFAC.

(4) Non-U.S. persons must seek authorization from BIS for the export from abroad, reexport, or transfer to a person identified in paragraph (a) of this section of any item subject to the EAR.

(5) Any export, reexport, or transfer to a person identified in paragraph (a) of this section by a U.S. person of any item subject both to the EAR and regulations maintained by OFAC and not authorized by OFAC is a violation of the EAR.

(6) Any export, reexport, or transfer by a U.S. person to a person identified in paragraph (a) of this section of any item subject to the EAR that is not subject to regulations maintained by OFAC and not authorized by BIS is a violation of the EAR. Any export from abroad, reexport, or transfer by a non-U.S. person to a person identified in paragraph (a) of this section of any item subject to the EAR and not authorized by BIS is a violation of the EAR.

(7) These licensing requirements supplement any other requirements set forth elsewhere in the EAR.

(b) Exceptions

No License Exceptions or other BIS authorizations are available for export, reexport, or transfer to a person identified in paragraph (a) of this section of any item subject to the EAR.

(c) Licensing policy

Applications for licenses for the export, reexport, or transfer to a person identified in paragraph (a) of this section of any item subject to the EAR will generally be denied. You should consult with OFAC concerning transactions subject to OFAC licensing requirements.

(d) Contract sanctity

Contract sanctity provisions are not available for license applications reviewed under this section.

**§744.19 LICENSING POLICY
REGARDING PERSONS
SANCTIONED PURSUANT TO
SPECIFIED STATUTES**

Notwithstanding any other licensing policy elsewhere in the EAR, BIS will deny any export or reexport license application if any person who is a party to the transaction (*i.e.*, the applicant, other party authorized to receive a license, purchaser, intermediate consignee, ultimate consignee, or end-user) is subject to one or more of the sanctions described in paragraphs (a), (b), (c) and (e) of this section and will deny any export or reexport license application for an item listed on the Commerce Control List with a reason for control of MT if a person who is a party to the transaction is subject to a sanction described in paragraph (d) of this section.

(a) A sanction issued pursuant to the Iran-Iraq Arms Nonproliferation Act of 1992 (50 U.S.C.

1701 note) that prohibits the issuance of any license to or by the sanctioned person.

(b) A sanction issued pursuant to the Iran, North Korea, and Syria Nonproliferation Act (50 U.S.C.1701 note) that prohibits the granting of a license and requires the suspension of an existing license for the transfer to foreign persons of items, the export of which is controlled under the Export Administration Act of 1979, as amended (50 U.S.C. app. 2401-2420), or the Export Administration Regulations.

(c) A sanction issued pursuant to section 11B(b)(1)(B)(ii) of the Export Administration Act of 1979, as amended (50 U.S.C. app. 2401-2420), that prohibits the issuance of new licenses for exports to the sanctioned person of items controlled pursuant to the Export Administration Act of 1979, as amended.

(d) A sanction issued pursuant to section 11B(b)(1)(B)(i) of the Export Administration Act of 1979, as amended (50 U.S.C. app. 2401-2420), that prohibits the issuance of new licenses for exports to the sanctioned person of MTCR Annex equipment or technology controlled pursuant to the Export Administration Act of 1979, as amended.

(e) A sanction issued pursuant to the Iran Sanctions Act of 1996 (50 U.S.C. 1701 note) that prohibits the issuance of a specific license or grant of any other specific permission or authority to export any goods or technology to a sanctioned person under the Export Administration Act of 1979, as amended (50 U.S.C. app. §§ 2401-2420).

**§ 744.20 LICENSE REQUIREMENTS
THAT APPLY TO CERTAIN
SANCTIONED ENTITIES**

BIS may impose, as foreign policy controls, export, reexport, and transfer (in-country) license requirements and set licensing policy with respect to certain entities that have been sanctioned by

the State Department. Such license requirements and policy are in addition to those imposed elsewhere in the EAR. License requirements and licensing policy may be imposed pursuant to this section even when the sanction and the legal authority under which the State Department imposed the sanction do not require or authorize the imposition of any license requirement or licensing policy. License requirements and licensing policy will be imposed pursuant to this section by adding an entity to the Entity List in accordance with paragraphs (a), (b), and (c) of this section.

(a) General requirement

Certain entities that have been sanctioned by the State Department are listed in Supplement No. 4 to this part (the Entity List) with a reference to this section. A license is required, to the extent specified on the Entity List, to export, reexport, or transfer (in-country) any item to such entities.

(b) License Exceptions

No license exception may be used to export, reexport, or transfer (in-country) to such entities unless specifically authorized on the Entity List.

(c) Licensing policy

Applications to export, reexport, or transfer (in-country) to such entities will be reviewed according to the licensing policy set forth on the Entity List.

**§ 744.21 RESTRICTIONS ON CERTAIN
'MILITARY END USES' OR
'MILITARY END USERS'**

(a) General prohibition.

In addition to the license requirements for items specified on the Commerce Control List (CCL) (supplement no. 1 to part 774), you may not

export, reexport, or transfer (in-country):

(1) Any item subject to the EAR listed in supplement no. 2 to this part without a license if, at the time of the export, reexport, or transfer (in-country), you have “knowledge,” as defined in § 772.1 of the EAR, that the item is intended, entirely or in part, for a ‘military end use,’ as defined in paragraph (f) of this section, in Burma, Cambodia, the People’s Republic of China (China), or Venezuela, or a Burmese, Cambodian, Chinese, or Venezuelan ‘military end user,’ as defined in paragraph (g) of this section, wherever located. ‘Military end users’ located outside of Burma, Cambodia, China, or Venezuela are limited to entities identified on the ‘Military End-User’ (MEU) List under supplement no. 7 to this part.

(2) Any item subject to the EAR without a license if, at the time of the export, reexport, or transfer (in-country), you have “knowledge,” as defined in § 772.1 of the EAR that the item is intended, entirely or in part, for a ‘military end use,’ as defined in paragraph (f) of this section, in Belarus or Russia, or a Belarusian or Russian ‘military end user,’ as defined in paragraph (g) of this section, wherever located. Belarusian or Russian ‘military end users’ located outside of Belarus or Russia are limited to entities identified on the Entity List under supplement no. 4 to this part 744 with a footnote 3 designation.

Note 1 to paragraphs (a)(1) and (2):

An entity anywhere in the world, including in Burma, Cambodia, China, or Venezuela, may be listed on the Entity List as a Belarusian or Russian ‘military end user’ with a footnote 3 designation. If the entity is not a Belarusian or Russian ‘military end user,’ but has otherwise been identified by the End User Review Committee (ERC) as a ‘military end user,’ that entity may be identified under the ‘Military End-User’ (MEU) List under supplement no. 7 to this part. As noted in paragraph (a)(1) of this section, exporters, reexporters, and transferors, even in the absence of any such notification, are not excused from compliance with the license

requirements of this paragraph (a) for all entities in Burma, Cambodia, China, or Venezuela to determine whether the entity is a ‘military end user’ for purposes of paragraph (g) of this section because supplement no. 7 is not an exhaustive listing of ‘military end users’ in those countries. As noted in paragraph (a)(2) of this section, exporters, reexporters, and transferors, even in the absence of any such notification, are not excused from compliance with the license requirements of this paragraph (a) for all entities in Belarus or Russia to determine whether the entity is a ‘military end user’ for purposes of paragraph (g) of this section because supplement no. 4 under this part is not an exhaustive listing of ‘military end users’ in those countries.

(b) *Additional prohibition on those informed by BIS*

BIS may inform you either individually by specific notice, through amendment to the EAR published in the *Federal Register*, or through a separate notification published in the *Federal Register*, that a license is required for specific exports, reexports, or transfers (in-country) of any item because there is an unacceptable risk of use in or diversion to a ‘military end use’ in Belarus, Burma, Cambodia, China, the Russian Federation, or Venezuela, or for a Belarusian, Burmese, Cambodian, Chinese, Russian, or Venezuelan ‘military end user,’ wherever located. Specific notice will be given only by, or at the direction of, the Deputy Assistant Secretary for Export Administration. When such notice is provided orally, it will be followed by written notice within two working days signed by the Deputy Assistant Secretary for Export Administration or the Deputy Assistant Secretary’s designee. The absence of BIS notification does not excuse the exporter from compliance with the license requirements of paragraph (a) of this section.

(1) ‘Military End-User’ (MEU) List. BIS may inform and provide notice to the public that certain entities are subject to the additional

prohibition described under this paragraph (b) following a determination by the End-User Review Committee (ERC) that a specific entity is a ‘military end user’ pursuant to this section and therefore any exports, reexports, or transfers (in-country) to that entity represent an unacceptable risk of use in or diversion to a ‘military end use’ in Belarus, Burma, Cambodia, China, the Russian Federation, or Venezuela, or for a Belarusian, Burmese, Cambodian, Chinese, Russian, or Venezuelan ‘military end user,’ wherever located. Such Burmese, Cambodian, Chinese, or Venezuelan ‘military end users’ may be added to supplement no. 7 to this part – ‘Military End-User’ (MEU) List. Such Belarusian or Russian ‘military end users’ may also be added to supplement no. 4 to this part – Entity List and will be listed with a footnote 3 designation. License requirements for listed MEU are described in paragraph (b)(1)(ii) of this section. The listing of entities under supplements no. 7 or 4 to this part is not an exhaustive listing of ‘military end users’ for purposes of this section, except for ‘military end users’ of a country identified in this section (Belarus, Burma, Cambodia, China, the Russian Federation, or Venezuela) not located in that same country. As specified in paragraphs (a)(1) and (2) of this section, ‘military end users’ of a country identified in this section not located in that same country are exhaustively listed on either the Entity List with a footnote 3 designation or on the Military End-User (MEU) List under supplement no. 7 this part. Exporters, reexporters, and transferors are responsible for determining whether transactions with entities not listed on supplement no. 7 or 4 to this part are subject to a license requirement under paragraph (a) of this section. The process in this paragraph (b)(1) for placing entities on the MEU List and Entity List is only one method BIS may use to inform exporters, reexporters, and transferors of license requirements under this section.

(i) *End-User Review Committee (ERC).* The End-User Review Committee (ERC), composed of representatives of the Departments of Commerce (Chair), State, Defense, Energy and,

where appropriate, the Treasury, makes all decisions regarding additions to, removals from, or other modifications to the MEU List and Entity List. Decisions by the ERC for purposes of the MEU List and Entity List will be made following the procedures identified in this section and in supplement no. 5 to this part - Procedures for End-User Review Committee Entity List and ‘Military End User’ (MEU) List Decisions.

(ii) License requirement for parties to the transaction. Consistent with paragraph (a) of this section, a license is required for the export, reexport, or transfer (in-country) of any item subject to the EAR listed in supplement no. 2 to this part when an entity that is listed on the MEU List as a Burmese, Cambodian, Chinese, or Venezuelan ‘military end user’ is a party to the transaction as described in § 748.5(c) through (f) of the EAR. Consistent with paragraph (a) of this section, a license is required for the export, reexport, or transfer (in-country) of any item subject to the EAR when a Belarusian or Russian ‘military end user’ that is listed on the Entity List pursuant to this section is a party to the transaction as described in § 748.5(c) through (f) of the EAR.

(2) Requests for removal from or modification of ‘Military End User’ (MEU) List. Any entity listed on the MEU List or Entity List pursuant to this section may request that its listing be removed or modified. All such requests, including reasons therefor, must be in writing and sent to: Chair, End-User Review Committee, Bureau of Industry and Security, U.S. Department of Commerce, 14th Street and Pennsylvania Avenue, NW, Room 3886, Washington, DC 20230; or by email at ERC@bis.doc.gov. In order for an entity listed on the MEU List or the Entity List pursuant to this section to petition BIS for their removal or modification, as applicable, the entity must address why the entity is not a ‘military end user’ for purposes of this section.

(i) Review. The ERC will review such

requests for removal or modification in accordance with the procedures set forth in supplement no. 5 to this part.

(ii) BIS action. The Deputy Assistant Secretary for Export Administration will convey the decision on the request to the requester in writing. That decision will be the final agency action on the request.

(c) License exception

Despite the prohibitions described in paragraphs (a) and (b) of this section, you may export, reexport, or transfer (in-country) items subject to the EAR under the provisions of License Exception GOV set forth in §740.11(b)(2)(i) and (ii) of the EAR.

(d) License application procedure

When submitting a license application pursuant to this section, you must state in the “additional information” block of the application that “this application is submitted because of the license requirement in this section (Restrictions on certain ‘military end uses’ or ‘military end users’).” In addition, either in the additional information block of the application or in an attachment to the application, you must include all known information concerning the ‘military end use’ and ‘military end user(s)’ of the item(s). If you submit an attachment with your license application, you must reference the attachment in the “additional information” block of the application.

(e) License review standards

(1) Applications to export, reexport, or transfer (in-country) items described in paragraph (a)(1) of this section will be reviewed with a presumption of denial. Applications to export, reexport, or transfer (in-country) items described in paragraph (a)(2) of this section will be reviewed with a policy of denial except for food and medicine designated as EAR99, which will be reviewed under a case-by-case review policy,

unless otherwise stated in the license review policy column on the Entity List (supplement no. 4 to this part).

(2) Applications may be reviewed under chemical and biological weapons, nuclear nonproliferation, or missile technology review policies, as set forth in §§ 742.2(b)(4), 742.3(b)(4), and 742.5(b)(4) of the EAR, if the end use may involve certain proliferation activities.

(3) Applications for items requiring a license for any reason that are destined for a ‘military end use’ in Belarus, Burma, Cambodia, China, the Russian Federation, or Venezuela or for a Belarusian, Burmese, Cambodian, Chinese, Russian, or Venezuelan ‘military end user,’ wherever located, also will be subject to the review policy stated in paragraph (e)(1) of this section.

(f) Military end use

In this section, ‘military end use’ means: incorporation into a military item described on the U.S. Munitions List (USML) (22 CFR part 121, International Traffic in Arms Regulations); incorporation into items classified under Export Control Classification Numbers (ECCNs) ending in “A018” or under “600 series” ECCNs; or any item that supports or contributes to the operation, installation, maintenance, repair, overhaul, refurbishing, “development,” or “production,” of military items described on the USML, or items classified under ECCNs ending in “A018” or under “600 series” ECCNs.

(g) Military end user

In this section, the term ‘military end user’ means the national armed services (army, navy, marine, air force, or coast guard), as well as the national guard and national police, government intelligence or reconnaissance organizations (excluding those described in § 744.22(f)(2)), or any person or entity whose actions or functions are intended to support ‘military end uses’ as defined in paragraph (f) of this section.

(h) Effects on contracts

Transactions involving the export, reexport, or transfer (in country) of items to or within Venezuela are not subject to the provisions of this section if the contracts for such transactions were signed prior to November 7, 2014.

§ 744.22 RESTRICTIONS ON EXPORTS, REEXPORTS, AND TRANSFERS (IN-COUNTRY) TO CERTAIN MILITARY-INTELLIGENCE END USES OR END USERS

(a) General prohibition

In addition to the license requirements for items specified on the Commerce Control List (CCL) (supplement no. 1 to part 774 of the EAR), you may not export, reexport, or transfer (in-country) any item subject to the EAR without a license from BIS if, at the time of the export, reexport, or transfer (in-country), you have “knowledge” that the item is intended, entirely or in part, for a ‘military-intelligence end use’ in Belarus, Burma, Cambodia, the People’s Republic of China (China), Russia, or Venezuela; or a country listed in Country Groups E:1 or E:2 (see supplement no. 1 to part 740 of the EAR), or for a Belarusian, Burmese, Cambodian, Chinese, Russian, or Venezuelan ‘military-intelligence end user’ or a ‘military-intelligence end user’ of a country listed in Country Group E:1 or E:2, wherever located. ‘Military intelligence end-users’ located outside of Belarus, Burma, Cambodia, the People’s Republic of China (China), Russia, or Venezuela; or a country listed in Country Groups E:1 or E:2, are limited to entities identified under paragraph (f)(2) of this section.

(b) Additional prohibition on those informed by BIS

BIS may inform you either individually by specific notice, through amendment to the EAR

published in the *Federal Register*, or through a separate notification published in the Federal Register, that a license is required for specific exports, reexports, or transfers (in-country) of any item subject to the EAR because there is an unacceptable risk of use in, or diversion to, a ‘military-intelligence end use’ in Belarus, Burma, Cambodia, China, Russia, or Venezuela; or a country listed in Country Group E:1 or E:2 (see supplement no. 1 to part 740 of the EAR), or for a Belarusian, Burmese, Cambodian, Chinese, Russian, or Venezuelan ‘military-intelligence end user’ or a ‘military-intelligence end user’ of a country listed in Country Group E:1 or E:2, wherever located.

(c) License exception

Notwithstanding the prohibitions described in paragraphs (a) and (b) of this section, you may export, reexport, or transfer (in-country) items subject to the EAR under the provision of License Exception GOV set forth in § 740.11(b)(2)(ii) of the EAR.

(d) License application procedure

When submitting a license application pursuant to this section, you must state in the “additional information” block of the application that “this application is submitted because of the license requirement in § 744.22 of the EAR (Restrictions on exports, reexports, and transfers (in-country) to certain military-intelligence end uses or end users).” In addition, either in the additional information block of the application or in an attachment to the application, you must include all known information concerning the military-intelligence end use(s) or end user(s) of the item(s). If you submit an attachment with your license application, you must reference the attachment in the “additional information” block of the application.

(e) License review policy

Applications to export, reexport, or transfer (in-country) items requiring a license pursuant to

paragraph (a) or (b) of this section will be reviewed with a presumption of denial.

(f) Definitions

(1) ‘Military-intelligence end use’ means the “development,” “production,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of, or incorporation into, items described on the U.S. Munitions List (USML) (22 CFR part 121, International Traffic in Arms Regulations), or classified under ECCNs ending in “A018” or under “600 series” ECCNs, which are intended to support the actions or functions of a ‘military-intelligence end user,’ as defined in this section.

(2) ‘Military-intelligence end user’ means any intelligence or reconnaissance organization of the armed services (army, navy, marine, air force, or coast guard); or national guard. For license requirements applicable to other government intelligence or reconnaissance organizations of these countries, see § 744.21. ‘Military-intelligence end users’ subject to the license requirements set forth in this section located in Belarus, Burma, Cambodia, China, Russia, or Venezuela; or a country listed in Country Groups E:1 or E:2 (see supplement no. 1 to part 740 of the EAR) include, but are not limited to, the ‘military-intelligence end users’ identified in this paragraph (f)(2). For ‘military-intelligence end users’ located in all other countries this paragraph (f)(2) is an exhaustive listing.

(i) *Burma*. Office of Chief of Military Security Affairs (OCMSA) and the Directorate of Signal.

(ii) *Cambodia*. General Department of Research and Intelligence (GDRI).

(iii) *Cuba*. Directorate of Military Intelligence (DIM) and Directorate of Military Counterintelligence (CIM).

(iv) *China, People’s Republic of*.

Intelligence Bureau of the Joint Staff Department.

(v) *Iran.* Islamic Revolutionary Guard Corps Intelligence Organization (IRGC-IO) and Artesh Directorate for Intelligence (J2).

(vi) *Korea, North.* Reconnaissance General Bureau (RGB).

(vii) *Russia.* Main Intelligence Directorate (GRU).

(viii) *Syria.* Military Intelligence Service.

(ix) *Venezuela.* General Directorate of Military Counterintelligence (DGCIM).

(x) *Belarus.* The Main Intelligence Directorate of the General Staff of the Armed Forces of Belarus.

(xi) *Other countries.* Paragraph (f)(2)(ix) of this section identifies ‘military-intelligence end users’ located in all countries other than those identified in paragraph (f)(2)(i) to (x).

§ 744.23 “SUPERCOMPUTER” AND SEMICONDUCTOR MANUFACTURING END USE

(a) *General prohibition*

In addition to the license requirements for items specified on the CCL, you may not export, reexport, or transfer (in-country) without a license any item subject to the EAR meeting the product scope in paragraph (a)(1) of this section when you have “knowledge” at the time of export, reexport, or transfer (in-country) that the item is destined for the end-use described in paragraph (a)(2) of this section.

(1) Product scope. Any of the following items meet the product scope of the prohibition in this section:

(i) An integrated circuit (IC) subject to the EAR and specified in ECCN 3A001, 3A991, 4A994, 5A002, 5A004, or 5A992 when you know the item will be used in an end use described under paragraph (a)(2)(i) or (ii) of this section;

(ii) A computer, “electronic assembly,” or “component” subject to the EAR and specified in ECCN 4A003, 4A004, 4A994, 5A002, 5A004, or 5A992 when you know the item will be used in an end use described under paragraph (a)(2)(i) or (ii) of this section;

(iii) Any items subject to the EAR when you know the items will be used in an end use described in paragraphs (a)(2)(iii)(A) through (C) of this section;

(iv) Any items subject to the EAR and classified in an ECCN in Product Groups B, C, D, or E in Category 3 of the CCL when you know the items will be used in an end use described in paragraph (a)(2)(iv) of this section; or

(v) Any item subject to the EAR when you know the item will be used in an end use described in paragraph (a)(2)(v) of this section.

(2) End-use scope. The following activities meet the end-use scope of the prohibition in this section:

(i) The “development,” “production,” “use,” operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing of a “supercomputer” located in or destined to the PRC or Macau;

(ii) The incorporation into, or the “development” or “production” of any “component” or “equipment” that will be used in a “supercomputer” located in or destined to the PRC or Macau; or

(iii) The “development” or “production,” of integrated circuits at a semiconductor fabrication “facility” located in the PRC or Macau that fabricates integrated circuits meeting any of the

following criteria:

(A) Logic integrated circuits using a non-planar transistor architecture or with a “production” technology node of 16/14 nanometers or less;

(B) NOT AND (NAND) memory integrated circuits with 128 layers or more; or

(C) Dynamic random-access memory (DRAM) integrated circuits using a “production” technology node of 18 nanometer half-pitch or less; or

(iv) The “development” or “production” of integrated circuits at any semiconductor fabrication “facility” located in the PRC or Macau, but you do not know whether such semiconductor fabrication “facility” fabricates integrated circuits that meet any of the criteria in paragraphs (a)(2)(iii)(A) through (C) of this section; or

(v) The “development” or “production” in the PRC or Macau of any “parts,” “components,” or “equipment” specified under ECCN 3B001, 3B002, 3B090, 3B611, 3B991, or 3B992.

(b) *Additional prohibition on persons informed by BIS*

BIS may inform persons, either individually by specific notice or through amendment to the EAR published in the Federal Register, that a license is required for a specific export, reexport, or transfer (in-country) of any item subject to the EAR to a certain end-user, because there is an unacceptable risk of use in, or diversion to, the activities specified in paragraph (a)(2) of this section. Specific notice is to be given only by, or at the direction of, the Deputy Assistant Secretary for Export Administration. When such notice is provided orally, it will be followed by a written notice within two working days signed by the Deputy Assistant Secretary for Export Administration or the Deputy Assistant Secretary’s designee. However, the absence of

any such notification does not excuse persons from compliance with the license requirements of paragraph (a) of this section..

(c) *License exceptions*

No license exceptions may overcome the prohibition described in paragraph (a) of this section.

(d) *License review standards*

There is a presumption of denial for applications to export, reexport, or transfer (in-country) items described in paragraph (a)(1) of this section that are for end uses described in paragraph (a)(2) of this section, except for items controlled under paragraph (a)(2)(iii) of this section for end users in China or Macau that are headquartered in the United States or in a Country Group A:5 or A:6 country, which will be considered on a case-by-case basis taking into account factors including technology level, customers and compliance plans.

SUPPLEMENT NO. 1 TO PART 744 - MILITARY END-USE EXAMPLES FOR §744.17

- (a) *Examples of military end-uses (as described in §744.17 (d) of this part) of general-purpose microprocessors classified as ECCN 3A991.a.1 includes employing such microprocessors in the “use”, “development”, “production”, or deployment of:*
- (1) Cruise missiles;
 - (2) Electronic suites of military aircraft and helicopters;
 - (3) Radar for searching, targeting, or tracking systems;
 - (4) Command/control/communications or navigation systems;
 - (5) Unmanned aerial vehicles capable of performing military reconnaissance, surveillance, or combat support;
 - (6) Rocket or missile systems;
 - (7) Electronic or information warfare systems; *or*
 - (8) Intelligence, reconnaissance, or surveillance systems suitable for supporting military operations.
- (b) [RESERVED]

**SUPPLEMENT NO. 2 TO PART 744 - LIST OF ITEMS SUBJECT TO THE MILITARY
END-USE OR END USER LICENSE REQUIREMENT OF §744.21**

The following items, as described, are subject to the military end use or end user license requirement in §744.21.

**(1) Category 1 Materials, Chemicals,
Microorganisms, and Toxins**

- (i) 1A290 Depleted uranium (any uranium containing less than 0.711% of the isotope U 235) in shipments of more than 1,000 kilograms in the form of shielding contained in X ray units, radiographic exposure or teletherapy devices, radioactive thermoelectric generators, or packaging for the transportation of radioactive materials.
- (ii) 1C990 Fibrous and filamentary materials, not controlled by 1C010 or 1C210, for use in “composite” structures and with a specific modulus of 3.18×10^6 m or greater and a specific tensile strength of 7.62×10^4 m or greater.
- (iii) 1C996 Hydraulic fluids containing synthetic hydrocarbon oils, having all the characteristics in the List of Items Controlled.
- (iv) 1D993 Software” specially designed for the “development”, “production”, or “use” of equipment or materials controlled by 1C210.b, or 1C990.
- (v) 1D999 Limited to specific software controlled by 1D999.b for equipment controlled by 1B999.e that is specially designed for the production of prepregs controlled in Category 1, n.e.s.
- (vi) 1E994 Limited to “technology” for the “development”, “production”, or “use” of fibrous and filamentary materials other than glass, aramid or polyethylene controlled by 1C990

(2) Category 2 Materials Processing

- (i) 2A290 Generators and other equipment “specially designed,” prepared, or intended for use with nuclear plants.
- (ii) 2A291 Equipment, except items controlled by 2A290, related to nuclear material handling and processing and to nuclear reactors, and “parts,” “components” and “accessories” therefor (see List of Items Controlled).
- (iii) 2A991 Limited to bearings and bearing systems not controlled by 2A001 and with operating temperatures above 573 K (300° C).
- (iv) 2B991 Limited to “numerically controlled” machine tools having “positioning accuracies”, with all compensations available, less (better) than 9 μ m along any linear axis; and machine tools controlled under 2B991.d.1.a.
- (v) 2B992 Non “numerically controlled” machine tools for generating optical quality surfaces, and specially designed components therefor.
- (vi) 2B996 Limited to dimensional inspection or measuring systems or equipment not controlled by 2B006 with measurement uncertainty equal to or less (better) than $(1.7 + L/1000)$ micrometers in any axes (L measured Length in mm).
- (vii) 2B999 Specific processing equipment, n.e.s. (see List of Items Controlled)
- (viii) 2D290 “Software” “specially designed” or modified for the “development,” “production,” or “use” of items controlled by 2A290 or 2A291.

**(3) Category 3 Electronics Design,
Development and Production**

- (i) 3A991 Electronic devices, and “components” not controlled by 3A001.
- (ii) 3A992 General purpose electronic equipment not controlled by 3A002.
- (iii) 3A999 Specific processing equipment, n.e.s. (see List of Items Controlled).
- (iv) 3B991 Equipment not controlled by 3B001 for the manufacture of electronic “parts,” “components” and materials, and “specially designed” “parts,” “components” and “accessories” therefor.
- (v) 3B992 Equipment not controlled by 3B002 for the inspection or testing of electronic “components” and materials, and “specially designed” “parts,” “components” and “accessories” therefor.
- (vi) 3C992 Positive resists designed for semiconductor lithography specially adjusted (optimized) for use at wavelengths between 370 and 245 nm.
- (vii) 3D991 “Software” “specially designed” for the “development,” “production”, or “use” of electronic devices, “parts” or “components” controlled by 3A991, general purpose electronic equipment controlled by 3A992, or manufacturing and test equipment controlled by 3B991 and 3B992; or “software” “specially designed” for the “use” of equipment controlled by 3B001.g and .h.
- (viii) 3E991 Limited to “technology” according to the General Technology Note for the “development,” “production,” or “use” of digital oscilloscopes and transient recorders using analog-to-digital conversion techniques, capable of storing transients by sequentially sampling single-shot inputs at successive intervals of less than 1 ns (greater than 1 giga-sample per second), digitizing to 8 bits or greater resolution and

storing 256 or more samples.

(4) Category 4 Computers

- (i) 4A994 Limited to computers not controlled by 4A001 or 4A003, with an Adjusted Peak Performance (“APP”) exceeding 0.5 Weighted TeraFLOPS (WT).
- (ii) 4D993 “Program” proof and validation “software”, “software” allowing the automatic generation of “source codes”, and operating system “software” that are specially designed for real time processing equipment.
- (iii) 4D994 Limited to “software” specially designed or modified for the “development”, “production”, or “use” of equipment controlled by 4A101.

**(5) Category 5 (Part 1)
Telecommunications and Category 5
(Part 2) Information Security**

- (i) 5A991 Limited to telecommunications equipment designed to operate outside the temperature range from 219K (-54 °C) to 397K (124 °C), which is controlled by 5A991.a., radio equipment using Quadrature-amplitude-modulation (QAM) techniques, which is controlled by 5A991.b.7., and phased array antennae, operating above 10.5 Ghz, except landing systems meeting ICAO standards (MLS), which are controlled by 5A991.f.
- (ii) 5B991 Telecommunications test equipment, n.e.s.
- (iii) 5D991 Limited to “software” specially designed or modified for the “development”, “production”, or “use” of equipment controlled by 5A991.a., 5A991.b.7., and 5A991.f., or of “software” specially designed or modified for the “development”, “production”, or “use” of equipment controlled by 5A991.a., 5A991.b.7.,

and 5A991.f.

(iv) 5E991 Limited to “technology” for the “development”, “production” or “use” of equipment controlled by 5A991.a., 5A991.b.7., or 5A991.f., or of “software” specially designed or modified for the “development”, “production”, or “use” of equipment controlled by 5A991.a., 5A991.b.7., and 5A991.f.

(v) 5A992 Equipment not controlled by 5A002 (see List of Items Controlled).

(vi) 5D992 “Information Security” “software” not controlled by 5D002 (see List of Items Controlled).

(6) Category 6 Sensors and Lasers

(i) 6A991 Marine or terrestrial acoustic equipment, n.e.s., capable of detecting or locating underwater objects or features or positioning surface vessels or underwater vehicles; and “specially designed” “parts” and “components,” n.e.s.

(ii) 6A993 Cameras, not controlled by 6A003 or 6A203 (see List of Items Controlled).

(iii) 6A995 “Lasers”, not controlled by 6A005 or 6A205.

(iv) 6A996 “Magnetometers” not controlled by ECCN 6A006, “Superconductive” electromagnetic sensors, and “specially designed” “components” therefor, as follows (see List of Items Controlled).

(v) 6C992 Optical sensing fibers not controlled by 6A002.d.3 which are modified structurally to have a “beat length” of less than 500 mm (high birefringence) or optical sensor materials not described in 6C002.b and having a zinc content of equal to or more than 6% by “mole fraction.”

(7) Category 7 Navigation and Avionics

(i) 7A994 Other navigation direction finding equipment, airborne communication equipment, all aircraft inertial navigation systems not controlled under 7A003 or 7A103, and other avionic equipment, including parts and components, n.e.s.

(ii) 7B994 Other equipment for the test, inspection, or “production” of navigation and avionics equipment.

(iii) 7D994 “Software”, n.e.s., for the “development”, “production”, or “use” of navigation, airborne communication and other avionics.

(iv) 7E994 “Technology”, n.e.s., for the “development”, “production”, or “use” of navigation, airborne communication, and other avionics equipment.

(8) Category 8 Marine

(i) 8A992 Vessels, marine systems or equipment, not controlled by 8A001 or 8A002, and “specially designed” “parts” and “components” therefor, and marine boilers and “parts,” “components,” “accessories,” and “attachments” therefor (see List of Items Controlled).

(ii) 8D992 “Software” specially designed or modified for the “development”, “production” or “use” of equipment controlled by 8A992.

(iii) 8E992 “Technology” for the “development”, “production” or “use” of equipment controlled by 8A992.

(9) Category 9 Propulsion Systems, Space Vehicles and Related Equipment

(i) 9A991 “Aircraft”, n.e.s., and gas

turbine engines not controlled by 9A001 or 9A101 and “parts” and “components,” n.e.s. (see List of Items Controlled).

(ii) 9B990 Vibration test equipment and “specially designed” “parts” and “components,” n.e.s.

(iii) 9D991 “Software”, for the "development" or "production" of equipment controlled by 9A991 or 9B991.

(iv) 9E991 “Technology”, for the “development”, “production” or “use” of equipment controlled by 9A991 or 9B991.

**SUPPLEMENT NO. 3 TO PART 744 - COUNTRIES NOT SUBJECT TO
CERTAIN NUCLEAR END-USE RESTRICTIONS IN §744.2(a)**

Australia
Austria
Belgium
Canada
Denmark
Finland
France
Germany
Greece
Iceland
Ireland

Supplement No. 4 to Part 744 - ENTITY LIST

This Supplement lists certain entities subject to license requirements for specified items under parts 744 and 746 of the EAR. License requirements for these entities include exports, reexports, and transfers (in-country) unless otherwise stated. A license is required, to the extent specified on the Entity List, to export, reexport, or transfer (in-country) any item subject to the EAR when an entity that is listed on the Entity List is a party to the transaction as described in § 748.5(c) through (f) of the EAR. See § 744.11 for licensing requirements in the context of a “standards-related activity”. This list of entities is revised and updated on a periodic basis in this Supplement by adding new or amended notifications and deleting notifications no longer in effect.

	KingPai Technology Int'l Co., Limited, 143-6 th Street, 1 Town, Linh Xuan Ward, Thu Duc District, Ho Chi Minh City, Vietnam. (See alternate addresses under China and Russia).	For all items subject to the EAR. (See §§ 734.9(g), ³ 746.8(a)(3), and 744.21(b) of the EAR.)	Policy of Denial for all items subject to the EAR apart from food and medicine designated as EAR99, which will be reviewed on a case-by-case basis. See §§ 746.8(b) and 744.21(e).	87 FR 38925, 6/30/22. 87 FR 57082, 9/16/22.

¹ For this entity, “items subject to the EAR” includes foreign-produced items that are subject to the EAR under § 734.9(e)(1) of the EAR. See § 744.11(a)(2)(i) for related license requirements and license review policy for these items.

² **Cybersecurity research and vulnerability disclosure.** The following exports, reexports, and transfers (in-country) to Huawei Technologies Co., Ltd. (Huawei) and its non-U.S. affiliates on the Entity List for cybersecurity research and vulnerability disclosure subject to other provisions of the EAR are excluded from the Entity List license requirements: when the disclosure to Huawei and/or to its listed non-U.S. affiliates is limited to information regarding security vulnerabilities in items owned, possessed, or controlled by Huawei or any of its non-U.S. affiliates when related to the process of providing ongoing security research critical to maintaining the integrity and reliability of existing and currently ‘fully operational network’ and equipment. A ‘fully operational network’ refers to a ‘third party’ network providing services to the ‘third party’s’ customers. The term ‘third party’ refers to a party that is not Huawei, one of its listed non-U.S. affiliates, or the exporter, reexporter, or transferor, but rather an organization such as a telecommunications service provider.

³ For this entity, “items subject to the EAR” includes foreign-produced items that are subject to the EAR under § 734.9(g) of the EAR. See §§ 746.8 and 744.21 of the EAR for related license requirements, license review policy, and restrictions on license exceptions.

⁴ For this entity, “items subject to the EAR” includes foreign-produced items that are subject to the EAR under § 734.9(e)(2) of the EAR. See § 744.11(a)(2)(ii) for related license requirements and license review policy.

SUPPLEMENT NO. 5 TO PART 744 - PROCEDURES FOR END-USER REVIEW COMMITTEE ENTITY LIST AND 'MILITARY END USER' (MEU) LIST DECISIONS

The End-User Review Committee (ERC), composed of representatives of the Departments of Commerce, State, Defense, Energy and, where appropriate, the Treasury, will make all decisions to make additions to, removals from or changes to the Entity List and the 'Military End User' (MEU) List. The ERC will be chaired by the Department of Commerce and will make all decisions to add an entry to the Entity List and MEU List by majority vote and all decisions to remove or modify an entry by unanimous vote.

When determining to add an entity to the Entity List or MEU List or to modify an existing entry, the ERC will also specify the section or sections of the EAR that provide the basis for that determination. All additions and modifications to the MEU List are done pursuant to § 744.21(b). The license requirements, the license application review policy, or the availability of license exceptions for entities on the MEU List are specified in § 744.21 under paragraphs (b) to (e). In addition, for the Entity List if the section or sections that form the basis for an addition or modification do not specify the license requirements, the license application review policy, or the availability of license exceptions, the ERC will specify the license requirements, the license application review policy and which license exceptions (if any) will be available for shipments to that entity.

Any agency that participates in the ERC may make a proposal for an addition to, modification of, or removal of an entry from the Entity List or MEU List by submitting that proposal to the chairperson.

The ERC will vote on each proposal no later than 30 days after the chairperson first circulates it to all member agencies unless the ERC unanimously agrees to postpone the vote. If a member agency is not satisfied with the outcome of the vote of the ERC that agency may escalate the matter to the Advisory Committee on Export Policy (ACEP). A member agency that is not satisfied with the decision of the ACEP may escalate the matter to the Export Administration Review Board (EARB). An agency that is not satisfied with the decision of the EARB may escalate the matter to the President.

The composition of the ACEP and EARB as well as the procedures and time frames shall be the same as those specified in Executive Order 12981 as amended by Executive Orders 13020, 13026 and 13117 for license applications. If at any stage, a decision by majority vote is not obtained by the prescribed deadline the matter shall be raised to the next level.

A final decision by the ERC (or the ACEP or EARB or the President, as may be applicable in a particular case) to make an addition to, modification of, or removal of an entry from the Entity List or MEU List shall operate as clearance by all member agencies to publish the addition, modification or removal as an amendment to the Entity List or MEU List even if, in the case of a decision by the ERC to add an entry or any decision by the ACEP or EARB, such decision is not unanimous. Such amendments will not be further reviewed through the regular Export Administration Regulations interagency review process.

A proposal by the ERC to make any change to the EAR other than an addition to, modification of, or removal of an entry from the Entity List or MEU List shall operate as a recommendation and shall not be treated as interagency clearance of an EAR amendment. The chairperson of the ERC will be responsible for circulating to all member agencies proposals submitted to him or her by any member agency. The chairperson will be responsible for serving as secretary to the ACEP and EARB for all review of ERC matters. The chairperson will communicate all final decisions that require Entity List or MEU List amendments, to the Bureau of Industry and Security which shall be responsible for drafting the necessary

changes to the Entity List and MEU List. If the ERC decides in a particular case that a party should be informed individually instead of by EAR amendment the chairperson will be responsible for preparing the “is informed” letter for the signature of the Deputy Assistant Secretary for Export Administration.

A listed entity may present a request to remove or modify its Entity List or the MEU List entry along with supporting information to the chairman at Room 3886, U.S. Department of Commerce, 14th Street and Pennsylvania Avenue, NW, Washington, DC 20230. The chairperson shall refer all such requests and supporting information to all member agencies. The member agencies will review and vote on all such requests. The time frames, procedures and right of escalation by a member agency that is dissatisfied with the results that apply to proposals made by a member agency shall apply to these requests. The decision of the ERC (or the ACEP or EARB or the President, as may be applicable in a particular case) shall be the final agency decision on the request and shall not be appealable under part 756 of the EAR. The chairperson will prepare the response to the party who made the request. The response will state the decision on the request and the fact that the response is the final agency decision on the request. The response will be signed by the Deputy Assistant Secretary for Export Administration.

The End-User Review Committee will conduct regular reviews of the Entity List and MEU List for the purpose of determining whether any listed entities should be removed or modified. The review will include analysis of whether the criteria for listing the entity are still applicable and research to determine whether the name(s) and address(es) of each entity are accurate and complete and whether any affiliates of each listed entity should be added or removed.

SUPPLEMENT NO. 6 TO PART 744 – UNVERIFIED LIST

Exports, reexports, and transfers (in-country) involving parties to the transaction who are listed in this supplement are subject to the restrictions outlined in § 744.15 of the EAR.

SUPPLEMENT NO. 7 TO PART 744 – ‘MILITARY END-USER’ (MEU) LIST

The license requirement for entities listed in supplement no. 7 to part 744 applies to the export, reexport, or transfer (in-country) of any item subject to the EAR listed in supplement no. 2 to part 744. A license is required to export, reexport, or transfer (in-country) any item subject to the EAR listed in supplement no. 2 to part 744 when an entity that is listed on the MEU List is a party to the transaction as described in § 748.5(c) through (f). No license exceptions are available for exports, reexports or transfers (in-country) to listed entities on the MEU List for items specified in supplement no. 2 to part 744, except license exceptions for items authorized under the provisions of License Exception GOV set forth in § 740.11(b)(2)(i) and (ii) of the EAR as specified in § 744.21(c). The license application procedure and license review policy for entities specified in this supplement 7 to part 744 is specified in § 744.21(d) and (e).

§ 745.2 END-USE CERTIFICATE REPORTING REQUIREMENTS UNDER THE CHEMICAL WEAPONS CONVENTION 3

SUPPLEMENT NO. 1 TO PART 745 - SCHEDULES OF CHEMICALS 2

SUPPLEMENT NO. 2 TO PART 745 - STATES PARTIES TO THE CONVENTION ON THE PROHIBITION OF THE DEVELOPMENT, PRODUCTION, STOCKPILING, AND USE OF CHEMICAL WEAPONS AND ON THEIR DESTRUCTION 1

SUPPLEMENT NO 3 TO PART 745 - FOREIGN AUTHORIZED AGENCIES RESPONSIBLE FOR ISSUING END-USE CERTIFICATES PURSUANT TO §745.2 1

§ 745.1 ADVANCE NOTIFICATION AND ANNUAL REPORT OF ALL EXPORTS OF SCHEDULE 1 CHEMICALS TO OTHER STATES PARTIES

Pursuant to the Convention, the United States is required to notify the Organization for the Prohibition of Chemical Weapons (OPCW) not less than 30 days in advance of every export of a Schedule 1 chemical, in any quantity, to another State Party. In addition, the United States is required to provide a report of all exports of Schedule 1 chemicals to other States Parties during each calendar year. If you plan to export

any quantity of a Schedule 1 chemical controlled under the EAR and licensed by the Department of Commerce or controlled under the International Traffic in Arms Regulations (ITAR) and licensed by the Department of State, you are required under this section to notify the Department of Commerce in advance of this export. You are also required to provide an annual report of exports that actually occurred during the previous calendar year. The United States will transmit the advance notifications and an aggregate annual report to the OPCW of exports of Schedule 1 chemicals from the United States. Note that the notification and annual report requirements of this section do not relieve the exporter of any requirement to obtain a license from the Department of Commerce for the export of Schedule 1 chemicals subject to the EAR or from the Department of State for the export of Schedule 1 chemicals subject to the ITAR.

(a) Advance notification of exports

You must notify BIS at least 45 calendar days prior to exporting any quantity of a Schedule 1 chemical listed in Supplement No. 1 to this part to another State Party, except that notifications for exports of 5 milligrams or less of saxitoxin (for medical or diagnostic purposes only) must be submitted to BIS at least 3 calendar days prior to the date of export (see 15 CFR 712.6(a)). This is in addition to the requirement to obtain an export license under the EAR for chemicals controlled by ECCN 1C350 or 1C351 for any reason for control, or from the Department of State for Schedule 1 chemicals controlled under the ITAR. Note that such notifications may be sent to BIS prior to or after submission of a license application to BIS for Schedule 1 chemicals controlled subject to the EAR and under ECCNs 1C350 or 1C351 or to the Department of State for Schedule 1 chemicals controlled on the ITAR. Such notices must be submitted separately from license applications.

(1) Such notification should be on company letterhead or must clearly identify the reporting

entity by name of company, complete address, name of contact person and telephone and fax numbers, along with the following information:

- (i) Common Chemical Name;
- (ii) Structural formula of the chemical;
- (iii) Chemical Abstract Service (CAS) Registry Number;
- (iv) Quantity involved in grams;
- (v) Planned date of export;
- (vi) Purpose (end-use) of export;
- (vii) Name of recipient;
- (viii) Complete street address of recipient;
- (ix) Export license or control number, if known; and
- (x) Company identification number, once assigned by BIS.

(2) Send the notification either by fax to (202) 482-1731 or by mail or courier delivery to the following address:

Information Technology Team
Treaty Compliance Division
Bureau of Industry and Security
U.S. Department of Commerce
Room 4515
14th Street and Pennsylvania Avenue, N.W.
Washington, DC 20230.

Attn: “Advance Notification of Schedule 1 Chemical Export”.

(3) Upon receipt of the notification, BIS will inform the exporter of the earliest date the shipment may occur under the notification procedure. To export the Schedule 1 chemical, the exporter must have applied for and been

granted a license (see §§742.2 and 742.18 of the EAR, or the ITAR at 22 CFR Part 121).

(b) Annual report of exports

(1) You must report all exports of any quantity of a Schedule 1 chemical to another State Party during the previous calendar year, starting with exports taking place during calendar year 1997. Reports for exports during calendar years 1997 and 1998 are due to the Department of Commerce August 16, 1999. Thereafter, annual reports of exports are due on February 13 of the following calendar year. The report should be on company letterhead or must clearly identify the reporting entity by name of company, complete address, name of contact person and telephone and fax numbers along with the following information for each export:

- (i) Common Chemical Name;
- (ii) Structural formula of the chemical;
- (iii) CAS Registry Number;
- (iv) Quantity involved in grams;
- (v) Date of export;
- (vi) Export license number;
- (vii) Purpose (end-use) of export;
- (viii) Name of recipient;
- (ix) Complete address of recipient, including street address, city and country; and
- (x) Company identification number, once assigned by BIS.

(2) The report must be signed by a responsible party, certifying that the information provided in the annual report is, to the best of his/her knowledge and belief, true and complete.

(3) Send the report either by fax to (202) 482-

1731 or by mail or courier delivery to the following address:

Information Technology Team
Treaty Compliance Division
Bureau of Industry and Security
U.S. Department of Commerce
Room 4515
14th Street and Pennsylvania Avenue, N.W.
Washington, DC 20230.

Attn: “Annual Report of Schedule 1 Chemical Export”.

§ 745.2 END-USE CERTIFICATE REPORTING REQUIREMENTS UNDER THE CHEMICAL WEAPONS CONVENTION

NOTE: The End-Use Certificate requirement of this section does not relieve the exporter of any requirement to obtain a license from the Department of Commerce for the export of Schedule 3 chemicals subject to the Export Administration Regulations or from the Department of State for the export of Schedule 3 chemicals subject to the International Traffic in Arms Regulations.

(a)(1) No U.S. person, as defined in §744.6(c) of the EAR, may export from the United States any Schedule 3 chemical identified in Supplement No. 1 to this part to countries not party to the Chemical Weapons Convention (destinations *not* listed in Supplement No. 2 to this part) unless the U.S. person obtains from the consignee an End-Use Certificate issued by the government of the importing destination. This Certificate must be issued by the foreign government’s agency responsible for foreign affairs or any other agency or department designated by the importing government for this

purpose. Supplement No. 3 to this part includes foreign authorized agencies responsible for issuing End-Use Certificates pursuant to this section. Additional foreign authorized agencies responsible for issuing End-Use Certificates will be included in Supplement No. 3 to this part when known. End-Use Certificates may be issued to cover aggregate quantities against which multiple shipments may be made to a single consignee. An End-Use Certificate covering multiple shipments may be used until the aggregate quantity is shipped. End-Use Certificates must be submitted separately from license applications.

(2) Submit a copy of the End-Use Certificate, no later than 7 days after the date of export, either by fax to (202) 482-1731 or by mail or courier delivery to the following address:

Information Technology Team
Treaty Compliance Division
Bureau of Industry and Security
U.S. Department of Commerce
Room 4515
14th Street and Pennsylvania Avenue, N.W.
Washington, DC 20230.

Attn: “CWC End-Use Certificate Report”.

(b) The End-Use Certificate described in paragraph (a) of this section must state the following:

- (1)** That the chemicals will be used only for purposes not prohibited under the Chemical Weapons Convention;
- (2)** That the chemicals will not be transferred to other end-user(s) or end-use(s);
- (3)** The types and quantities of chemicals;
- (4)** Their specific end-use(s); and
- (5)** The name(s) and complete address(es) of the end-user(s).

SUPPLEMENT NO. 1 TO PART 745 - SCHEDULES OF CHEMICALS

Schedule 1		
A. Toxic Chemicals:		CAS Registry Number
1	<p>FAMILY: O-Alkyl($\leq C_{10}$, incl. cycloalkyl) alkyl (Me, Et, n-Pr or i-Pr)-phosphonofluoridates</p> <p>Not limited to the following examples:</p> <p>Sarin: O-Isopropyl methylphosphonofluoridate</p> <p>Soman: O-Pinacolyl methylphosphonofluoridate</p>	<p>107-44-8</p> <p>96-64-0</p>
2	<p>FAMILY: O-Alkyl ($\leq C_{10}$, incl. cycloalkyl) N,N-dialkyl (Me, Et, n-Pr or i-Pr) phosphoramidocyanidates</p> <p>Not limited to the following example:</p> <p>Tabun: O-Ethyl N,N-dimethyl phosphoramidocyanidate</p>	77-81-6
3	<p>FAMILY: O-Alkyl (H or $\leq C_{10}$, incl. cycloalkyl) S-2-dialkyl (Me, Et, n-Pr or i-Pr)-aminoethyl alkyl (Me, Et, n-Pr or i-Pr) phosphonothiolates and corresponding alkylated or protonated salts</p> <p>Not limited to the following example:</p> <p>VX: O-Ethyl S-2-diisopropylaminoethyl methyl phosphonothiolate</p>	50782-69-9
4	<p>Sulfur mustards:</p> <p>2-Chloroethylchloromethylsulfide</p> <p>Mustard gas: Bis(2-chloroethyl)sulfide</p> <p>Bis(2-chloroethylthio)methane</p> <p>Sesquimustard: 1,2-Bis(2-chloroethylthio)ethane</p> <p>1,3-Bis(2-chloroethylthio)-n-propane</p> <p>1,4-Bis(2-chloroethylthio)-n-butane</p> <p>1,5-Bis(2-chloroethylthio)-n-pentane</p> <p>Bis(2-chloroethylthiomethyl)ether</p> <p>O-Mustard: Bis(2-chloroethylthioethyl)ether</p>	<p>2625-76-5</p> <p>505-60-2</p> <p>63869-13-6</p> <p>3563-36-8</p> <p>63905-10-2</p> <p>142868-93-7</p> <p>142868-94-8</p> <p>63918-90-1</p> <p>63918-89-8</p>
5	<p>Lewisites:</p> <p>Lewisite 1: 2-Chlorovinylchloroarsine</p> <p>Lewisite 2: Bis(2-chlorovinyl)chloroarsine</p>	<p>541-25-3</p> <p>40334-69-8</p>

	Lewisite 3: Tris(2-chlorovinyl)arsine	40334-70-1
6	Nitrogen mustards: HN1: Bis(2-chloroethyl)ethylamine HN2: Bis(2-chloroethyl)methylamine HN3: Tris(2-chloroethyl)amine	538-07-8 51-75-2 555-77-1
7	Saxitoxin	35523-89-8
8	Ricin	9009-86-3
13	FAMILY: P-alkyl (H or $\leq C_{10}$, incl. cycloalkyl) N-(1-(dialkyl($\leq C_{10}$, incl. cycloalkyl)amino))alkylidene(H or $\leq C_{10}$, incl. cycloalkyl) phosphonamidic fluorides and corresponding alkylated or protonated salts Not limited to the following examples: N-(1-(di-n-decylamino)-n-decylidene)-P-decylphosphonamidic fluoride Methyl-(1-(diethylamino)ethylidene)phosphonamidofluoridate	2387495-99-8 2387496-12-8
14	FAMILY: O-alkyl (H or $\leq C_{10}$, incl. cycloalkyl) N-(1-(dialkyl($\leq C_{10}$, incl. cycloalkyl)amino))alkylidene(H or $\leq C_{10}$, incl. cycloalkyl) phosphoramidofluoridates and corresponding alkylated or protonated salts Not limited to the following examples: O-n-Decyl N-(1-(di-n-decylamino)-n-decylidene)phosphoramidofluoridate Methyl (1-(diethylamino)ethylidene)phosphoramidofluoridate Ethyl (1-(diethylamino)ethylidene)phosphoramidofluoridate	2387496-00-4 2387496-04-8 2387496-06-0
15	Methyl-(bis(diethylamino)methylene)phosphonamidofluoridate	2387496-14-0
16	Carbamates (quaternaries and bisquaternaries of dimethylcarbamoyloxypyridines)	
16.1	FAMILY: Quaternaries of dimethylcarbamoyloxypyridines: 1-[N,N-dialkyl($\leq C_{10}$)-N-(n-(hydroxyl, cyano, acetoxy)alkyl($\leq C_{10}$)) ammonio]-n-[N-(3-dimethylcarbamoxy- α -picolinyl)-N,N-dialkyl($\leq C_{10}$) ammonio]decane dibromide (n=1-8) Not limited to the following example: 1-[N,N-dimethyl-N-(2-hydroxy)ethylammonio]-10-[N-(3-dimethylcarbamoxy- α -picolinyl)-N,N-dimethylammonio]decane dibromide	77104-62-2

16.2	FAMILY: Bisquaternaries of dimethylcarbamoxyloxy pyridines: 1,n-Bis[N-(3-dimethylcarbamoxy- α -picolyl)-N,N-dialkyl($\leq C_{10}$) ammonio]-alkane-(2,(n-1)-dione) dibromide (n=2-12) Not limited to the following example: 1,10-Bis[N-(3-dimethylcarbamoxy- α -picolyl)-N-ethyl-N-methylammonio]decane-2,9-dione dibromide	77104-00-8
B. Precursors:		CAS Registry Number
9	FAMILY: Alkyl (Me, Et, n-Pr or i-Pr) phosphonyldifluorides Not limited to the following example: DF: Methylphosphonyldifluoride	676-99-3
10	FAMILY: O-Alkyl (H or $\leq C_{10}$, incl. cycloalkyl) O-2-dialkyl (Me, Et, n-Pr or i-Pr)-aminoethyl alkyl (Me, Et, n-Pr or i-Pr) phosphonites and corresponding alkylated or protonated salts Not limited to the following example: QL: O-Ethyl O-2-diisopropylaminoethyl methylphosphonite	57856-11-8
11	Chlorosarin: O-Isopropyl methylphosphonochloridate	1445-76-7
12	Chlorosoman: O-Pinacolyl methylphosphonochloridate	7040-57-5
SCHEDULE 2		
A. Toxic Chemicals:		CAS Registry Number
1	Amiton: O,O-Diethyl S-[2-(diethylamino)ethyl] phosphorothiolate and corresponding alkylated or protonated salts	78-53-5
2	PFIB: 1,1,3,3,3-Pentafluoro-2-(trifluoromethyl)-1-propene	382-21-8
3	BZ: 3-Quinuclidinyl benzilate	6581-06-2
B. Precursors:		CAS Registry Number
4	FAMILY: Chemicals, except for those listed in Schedule 1, containing a phosphorus atom to which is bonded one methyl, ethyl or propyl (normal or iso) group but not further carbon atoms, Not limited to the following examples: Methylphosphonyl dichloride Dimethyl methylphosphonate Exemption: Fonofos: O-Ethyl S-phenyl ethylphosphonothiothionate	676-97-1 756-79-6 944-22-9
5	FAMILY: N,N-Dialkyl (Me, Et, n-Pr or i-Pr) phosphoramidic dihalides	

6	FAMILY: Dialkyl (Me, Et, n-Pr or i-Pr) N,N-dialkyl (Me, Et, n-Pr or i-Pr)-phosphoramidates	
7	Arsenic trichloride	7784-34-1
8	2,2-Diphenyl-2-hydroxyacetic acid	76-93-7
9	Quinuclidine-3-ol	1619-34-7
10	FAMILY: N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethyl-2-chlorides and corresponding protonated salts	
11	FAMILY: N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethane-2-ols and corresponding protonated salts Exemptions: N,N-Dimethylaminoethanol and corresponding protonated salts N,N-Diethylaminoethanol and corresponding protonated salts	108-01-0 100-37-8
12	FAMILY: N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethane-2-thiols and corresponding protonated salts	
13	Thiodiglycol: Bis(2-hydroxyethyl)sulfide	111-48-8
14	Pinacolyl alcohol: 3,3-Dimethylbutane-2-ol	464-07-3
SCHEDULE 3		
A. Toxic Chemicals:		CAS Registry Number
1	Phosgene: Carbonyl dichloride	75-44-5
2	Cyanogen chloride	506-77-4
3	Hydrogen cyanide	74-90-8
4	Chloropicrin: Trichloronitromethane	76-06-2
B. Precursors		CAS Registry Number
5	Phosphorus oxychloride	10025-87-3
6	Phosphorus trichloride	7719-12-2
7	Phosphorus pentachloride	10026-13-8
8	Trimethyl phosphite	121-45-9
9	Triethyl phosphite	122-52-1
10	Dimethyl phosphite	868-85-9
11	Diethyl phosphite	762-04-9
12	Sulfur monochloride	10025-67-9
13	Sulfur dichloride	10545-99-0
14	Thionyl chloride	7719-09-7
15	Ethyl-diethanolamine	139-87-7

16	Methyldiethanolamine	105-59-9
17	Triethanolamine	102-71-6

Note to Supplement 1: The numerical sequence of the “Schedule 1” Toxic Chemicals and Precursors is not consecutive so as to align with the December 23, 2019, consolidated textual changes to “Schedule 1” of the Annex on Chemicals to the Chemical Weapons Convention (CWC), which reflect the decisions adopted by the CWC Conference of the States Parties in November 2019.

**SUPPLEMENT NO. 2 TO PART 745 - STATES PARTIES TO THE CONVENTION ON
THE PROHIBITION OF THE DEVELOPMENT, PRODUCTION, STOCKPILING, AND
USE OF CHEMICAL WEAPONS AND ON THEIR DESTRUCTION**

§ 746.1 INTRODUCTION

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. This part implements broad based controls for items and activities subject to the EAR imposed to implement U.S. government policies. Two categories of controls are included in this part.

(a) Comprehensive controls

This part contains or refers to all the BIS licensing requirements, licensing policies, and License Exceptions for countries subject to general embargoes or comprehensive sanctions, currently Cuba, Iran, and Syria. This part is the focal point for all the EAR requirements for transactions involving these countries.

(1) Cuba. All the items on the Commerce Control List (CCL) require a license to Cuba. In addition, most other items subject to the EAR, but not included on the CCL, designated by the Number “EAR99”, require a license to Cuba. Most items requiring a license to these destinations are subject to a general policy of denial. Because these controls extend to virtually all exports, they do not appear in the Country Chart in part 738 of the EAR, nor are they reflected in the Commerce Control List in part 774 of the EAR.

(2) Iran. BIS maintains license requirements and other restrictions on exports and reexports to Iran. A comprehensive embargo on transactions involving this country is administered by the Department of the Treasury’s Office of Foreign Assets Control (OFAC).

(3) Syria. Pursuant to Sections 5(a)(1) and 5(a)(2)(A) of the Syria Accountability and Lebanese Sovereignty Restoration Act of 2003 (Public Law 108-175, codified as a note to 22 USC 2151) (the SAA), since May 14, 2004 BIS has maintained a prohibition on the export to Syria of all items on the Commerce Control List (in 15 CFR Part 774) (CCL) and a prohibition on the export to Syria of products of the United

States, other than food and medicine. The President also exercised national security waiver authority pursuant to Section 5(b) of the SAA for certain transactions. Section 746.9 of this part sets forth the specific license requirements, licensing policy and license exceptions applicable to Syria as a sanctioned country under the EAR. These provisions were issued consistent with Executive Order 13338 of May 11, 2004 which implemented the SAA.

(b) Sanctions on selected categories of items to specific destinations.

(1) BIS controls the export and reexport of selected categories of items to countries under United Nations Security Council arms embargoes. See the Commerce Control List in Supplement No. 1 to Part 774. See also §§ 746.3 (Iraq) and 746.4 (North Korea).

(2) The countries subject to United Nations Security Council arms embargoes are: Central African Republic, Democratic Republic of the Congo, Eritrea, Iran, Iraq, Lebanon, Libya, North Korea, Somalia, and Sudan.

(3) A license is required to export or reexport items identified in Part 774 as having a “UN” reason for control to countries identified in paragraph (b)(2) of this section. To the extent consistent with United States national security and foreign policy interests, BIS will not approve applications for such licenses if the authorization would be contrary to the relevant United Nations Security Council Resolution.

(4) You may not use any License Exception, other than License Exception GOV, for items for personal or official use by personnel and agencies of the U.S. Government or agencies of cooperating governments as set forth in § 740.11(b) of the EAR, to export or reexport items with a UN reason for control to countries listed in paragraph (b)(2) of this section. This paragraph does not apply to Iraq, which is governed by § 746.3(c) of this part; North Korea, which is governed by § 746.4(c) of this part; or Iran, which is governed by § 746.7(c) of this part.

(c) Russian Industry Sector Sanctions

The Russian Industry Sector Sanctions are set forth under § 746.5 and referenced under the License Requirements section of certain Export Control Classification Numbers (ECCNs) in Supplement No. 1 to part 774 (Commerce Control List), as well as in a footnote to the Commerce Country Chart in Supplement No. 1 to part 738.

(d) This part also contains descriptions of controls maintained by the Office of Foreign Assets Control in the Treasury Department and by the Directorate of Defense Trade Controls in the Department of State. Comprehensive embargoes and supplemental controls implemented by BIS under the EAR usually also involve controls on items and activities maintained by these agencies. This part sets forth the allocation of licensing responsibilities between BIS and these other agencies. References to the requirements of other agencies are informational; for current, complete, and authoritative requirements, you should consult the appropriate agency's regulations.

§ 746.2 CUBA

(a) License requirements

As authorized by section 6 of the Export Administration Act of 1979, as amended (EAA) and by the Trading with the Enemy Act of 1917, as amended, you will need a license to export or reexport all items subject to the EAR (see part 734 of the EAR for the scope of items subject to the EAR) to Cuba, including any release of technology or source code subject to the EAR to a Cuban national, except as follows:

(1) **License Exceptions.** You may export or reexport without a license if your transaction meets all the applicable terms and conditions of any of the following License Exceptions. To determine the scope and eligibility requirements, you will need to turn to the sections or specific paragraphs of part 740 of the EAR (License Exceptions). Read each License Exception carefully, as the provisions available for embargoed countries are generally narrow.

(i) Temporary exports and reexports (TMP) by the news media (see §740.9(a)(9) of the EAR).

(ii) Operation technology and software (TSU) for legally exported commodities or software (see §740.13(a) of the EAR).

(iii) Sales technology (TSU) (see §740.13(b) of the EAR).

(iv) Software updates (TSU) for legally exported software (see §740.13(c) of the EAR).

(v) Parts (RPL) for one-for-one replacement in certain legally exported commodities (see §740.10(a) of the EAR).

(vi) Baggage (BAG) (see §740.14 of the EAR).

(vii) Governments and international organizations (GOV) (see §740.11 of the EAR).

(viii) Gift parcels and humanitarian donations (GFT) (see §740.12 of the EAR).

(ix) Items in transit (TMP) from Canada through the U.S. (see §740.9(b)(1)(iv) of the EAR).

(x) Aircraft, vessels and spacecraft (AVS) for certain aircraft on temporary sojourn; equipment and spare parts for permanent use on a vessel or aircraft, and ship and plane stores; vessels on temporary sojourn; or cargo transiting Cuba on aircraft or vessels on temporary sojourn (see §740.15(a), (b), (d), and (e) of the EAR).

(xi) Permissive reexports of certain spare parts in foreign-made equipment (see §740.16(h) of the EAR).

(xii) Exports of agricultural commodities, classified as EAR99, under License Exception Agricultural Commodities (AGR) and certain reexports of U.S. origin agricultural commodities, classified as EAR99, under License Exception AGR (see §740.18 of the EAR).

(xiii) Commodities and software authorized under License Exception Consumer Communications Devices (CCD) (see § 740.19 of the EAR).

(xiv) License Exception Support for the Cuban People (SCP) (see § 740.21 of the EAR).

(2) Deemed exports and deemed reexports. A license is not required to release technology or source code subject to the EAR but not on the Commerce Control List (i.e., EAR99 technology or source code) to a Cuban national in the United States or a third country.

(b) Licensing policy

Items requiring a license are subject to a general policy of denial, except as follows:

(1) Medicines and Medical Devices. Applications to export medicines and medical devices as defined in part 772 of the EAR will generally be approved, except:

(i) To the extent restrictions would be permitted under section 5(m) of the Export Administration Act of 1979, as amended (EAA), or section 203(b)(2) of the International Emergency Economic Powers Act;

(ii) If there is a reasonable likelihood that the item to be exported will be used for purposes of torture or other human rights abuses;

(iii) If there is a reasonable likelihood that the item to be exported will be reexported;

(iv) If the item to be exported could be used in the production of any biotechnological product; or

(v) If it is determined that the United States government is unable to verify, by on-site inspection or other means, that the item to be exported will be used for the purpose for which it was intended and only for the use and benefit of the Cuban people, but this exception shall not apply to donations of medicines for humanitarian purposes to a nongovernmental organization in Cuba.

(2) Exports and reexports that generally will be approved. Applications for licenses to export or reexport the following generally will be approved:

(i) Telecommunications items that would improve communications to, from, and among the Cuban people;

(ii) Commodities and software to human rights organizations or to individuals and non-governmental organizations that promote independent activity intended to strengthen civil society in Cuba;

(iii) Commodities and software to U.S. news bureaus in Cuba whose primary purpose is the gathering and dissemination of news to the general public;

(iv) Agricultural items that are outside the scope of agricultural commodities as defined in part 772 of the EAR, such as insecticides, pesticides and herbicides, and agricultural commodities not eligible for License Exception AGR;

(v) Items necessary to ensure the safety of civil aviation and the safe operation of commercial aircraft engaged in international air transportation, excluding the export or reexport of such aircraft leased to state-owned enterprises; and

(vi) Items necessary for the environmental protection of U.S. and international air quality, waters, or coastlines (including items related to renewable energy or energy efficiency).

(3) Exports and reexports that may be authorized on a case-by-case basis.

(i) Applications for licenses to export or reexport items to meet the needs of the Cuban people, including exports and reexports of such items to state-owned enterprises, agencies, and other organizations of the Cuban government that provide goods and services for the use and benefit of the Cuban people may be authorized on a case-by-case basis. This policy of case-by-case review

includes applications for licenses to export or reexport items for:

(A) Agricultural production, artistic endeavors (including the creation of public content, historic and cultural works and preservation), education, food processing, disaster preparedness, relief and response, public health and sanitation, residential construction and renovation and public transportation;

(B) Wholesale and retail distribution for domestic consumption by the Cuban people;

(C) Construction of facilities for treating public water supplies, facilities for supplying electricity or other energy to the Cuban people, sports and recreation facilities, and other infrastructure that directly benefits the Cuban people; and

(D) Items that will enable or facilitate export from Cuba of items produced by the private sector.

NOTE 1 TO PARAGRAPH(b)(3)(i): Licenses issued pursuant to the policy set forth in this paragraph generally will have a condition prohibiting both reexports from Cuba to any other destination and uses that enable or facilitate the export of goods or services from Cuba, that primarily generate revenue for the state.

NOTE 2 To PARAGRAPH (b)(3)(i): The policy of case-by-case review in this paragraph is intended to facilitate exports and reexports to meet the needs of the Cuban people. Accordingly, BIS generally will deny applications to export or reexport items for use by state-owned enterprises, agencies, and other organizations that primarily generate revenue for the state, including those engaged in tourism and those engaged in the extraction or production of minerals or other raw materials. Applications for export or reexport of items destined to the Cuban military, police, intelligence or security services also generally will be denied. Additionally, pursuant to section 3(a) of the National Security Presidential Memorandum on Strengthening the Policy of the

United States Toward Cuba (NSPM), dated June 16, 2017, BIS generally will deny applications to export or reexport items for use by entities or subentities identified by the Department of State in the *Federal Register* or at <https://www.state.gov/e/eb/tfs/spi/cuba/cubarestrictedlist/index.htm>, unless such transactions are determined to be consistent with sections 2 and 3(a)(iii) of the NSPM.

(ii) [Reserved]

(4) *Temporary sojourns of aircraft and vessels.* Applications for exports or reexports of aircraft or vessels on temporary sojourn to Cuba, other than aircraft operated by certificated air carriers or cargo vessels for hire, are subject to a general policy of denial unless consistent with the foreign policy or national security interests of the United States. Applications for exports or reexports of aircraft operated by certificated air carriers or cargo vessels for hire on temporary sojourn to Cuba may be authorized on a case-by-case basis.

NOTE 1 TO PARAGRAPH (b)(4): Applications for exports or reexports of private and corporate aircraft, cruise ships, sailboats, fishing vessels, and other similar aircraft and vessels on temporary sojourn to Cuba will generally be denied.

(c) *Definitions*
